The revised Part 6, redesignated as Part 122, sets forth all air commerce regulations administered by Customs in a clearly stated new format, which incorporates both current provisions and substantive changes. The major changes from the long-standing air commerce regulations are deletion of the requirements that American-flag aircraft report foreign repairs and pay duty (a change resulting from a provision of the Trade Agreements Act of 1979), and the inclusion of a subpart dealing with requirements relating to aircraft liquor kits. The revision also contains regulatory amendments concerning overflight exemptions and reporting requirements which was published as T.D. 86–72 in the **Federal Register** of March 31, 1986 (51 FR 11004), and T.D. 87–42 published in the **Federal Register** on March 30, 1987 (52 FR 10047), requirements for access to Customs security areas published as T.D. 86–174 in the **Federal Register** on September 12, 1986 (51 FR 32448), and elimination of the now defunct international airport at Portal, North Dakota.

Additionally, amendments necessitated by the revision of the Customs bond structure published as T.D. 84–213 in the **Federal Register** on October 19, 1984 (49 FR 41152), have been incorporated into this revision.

We are aware of the impact of the Anti-Drug Abuse Act of 1986 (Pub. L. 99–570), upon the penalty provisions of the air commerce regulations. Potentially extensive amendments are beyond the scope of this general revision and clarification of existing provisions. Accordingly, any necessary amendments in this regard will be subject of a separate document.

Revised Part 122 is divided into 17 subparts. Following is information concerning the origins of the various sections as well as a discussion of the major changes in each of the subparts.

Section 122.0 is new and sets forth in general terms the scope and geographic applicability of the revised part.

Subpart A—General Definitions and Provisions

1. Section 122.1(a) substitutes the statutory definition of "aircraft" from 49 U.S.C. 1301(5) for the present narrower definition of "civil aircraft."
2. Section 122.1(b) is unchanged from § 6.1(e).
3. Section 122.1(c) revises § 6.1(g) by substituting the word "agent" for the phrase "authorized person (authorized agent of an owner or operator)."
4. Section 122.1(d) is new and clarifies the difference between commercial and non-commercial (private and public) flights.
5. Section 122.1(e) clarifies § 6.1(h).
6. Section 122.1(f) is new and defines, for the first time, a "landing rights airport."
7. Section 122.1(g) is a rephrasing of § 24.18.
8. Section 122.1(h) is new and defines "private aircraft."
9. Section 122.1(i) is new and defines "public aircraft."
10. Section 122.1(j) is new and defines "residue cargo." The definition is loosely derived from § 6.9(a).
11. Section 122.1(k) is a rephrasing of § 6.1(f).
12. Section 122.1(l) combines § 6.1 (b) and (c) and includes Puerto Rico in the definition of "United States."
13. Section 122.2 is largely unchanged from § 6.10.
14. Section 122.3 is a rephrasing of § 6.6(b).
15. Section 122.4 is a rephrasing of § 6.6(a).
16. Section 122.5 significantly revises the specific requirements for reproduction of Customs forms found in § 6.6(a).

Subpart B—International Airports

1. Section 122.11(a) rephrases § 6.12 (a), (b) and (d).
2. Section 122.11(b) is a rephrasing of § 6.12(c).
3. Section 122.11(c) is a rephrasing of § 6.12(e).
4. Section 122.12(a) is a restatement of § 6.12(f).
5. Section 122.12(b) is a restatement of § 6.12(g).
6. Section 122.12(c) is a restatement of § 6.12(h).
7. Section 122.12(d) is a restatement of § 6.12(i) with deletion of the reference to "Area."
8. Section 122.13 is unchanged from § 6.13.
9. Section 122.14 is new and is based upon T.D. 86–174, published in the **Federal Register** on September 12, 1986 (51 FR 32448).

Subpart C—Private Aircraft

1. Section 122.21 is new and makes the subpart applicable to all private aircraft.
2. Section 122.22 makes the landing requirements in § 122.31 applicable to private aircraft.
3. Section 122.23(a) is new and is based upon definitions found in the Department of Transportation regulations relating to exemptions for air taxi operations (14 CFR Part 298).
4. Section 122.23 (b) and (c) is a restatement of § 6.14(a) as amended by T.D. 86–22, published in the **Federal Register** on March 31, 1986 (51 FR 11004).
5. Section 122.24 (a) and (b) is a restatement of § 6.14 (d) and (g).
6. Section 122.25 (a), (b), (c), (d) and (e) is a restatement of § 6.14(f), as amended by T.D. 86–72 and T.D. 87–42.
7. Section 122.26 is new and exempts private aircraft from entry and clearance requirements.
8. Section 122.27 is partially new and partially a restatement of § 148.5. It sets forth the documentation necessary for declaring baggage and cargo upon arrival of a private aircraft, as well as documentation and requirements for departing with certain cargo not for hire
9. Section 122.28 is based upon § 148.32 and relates to a U.S. resident returning a private aircraft to the U.S. which has been taken abroad for non-commercial purposes.
10. Section 122.29 is new and sets forth the changes and procedures relating to overtime services rendered by Customs in connection with an arriving private aircraft. The section is based in part upon § 24.16.
11. Section 122.30 is based upon §§ 6.10 and 6.11, and lists other regulatory requirements applying to private aircraft.

Subpart D—Landing Requirements

1. Section 122.31(a) contains a complete rewording and restructuring of § 6.2(b)(1) and sets forth reporting requirements for all non-excepted aircraft arriving from outside the U.S. Exceptions appear in § 122.31(b).
2. Section 122.31(b) is based upon § 6.2(b)(3).
3. Section 122.31(c)(2) is based upon § 6.2(b)(2).
4. Section 122.31(d) is based upon § 6.2(b)(4).
5. Section 122.31(e) is based upon § 6.2(b)(5).
6. Section 122.31(f) is based upon the second sentence of § 6.2(b)(1).
7. Section 122.32 is based upon the first sentence of § 6.2(a).
8. Section 122.33 is based upon the second sentence of § 6.2(a). The revision adds reference to two other sections relating to alternative landing sites.
9. Section 122.34 is based upon the last three sentences of § 6.2(a).
10. Section 122.35 is based upon § 6.2(h).
11. Section 122.36 is based upon § 6.2(b)(6).
12. Section 122.37 is based upon present § 6.2(h).
13. Section 122.38(a) is based upon the sentence of present § 6.2 (e) and (f).
14. Section 122.38(b) is based upon § 6.2 (e) and (f).
15. Section 122.38(c) is based upon § 6.2 (e) and (f).
16. Section 122.38(d) is based upon § 6.2 (e) and (f) and provides exceptions for the need to obtain a permit or special license for each arrival or departure.
17. Section 122.38(e) is based upon § 6.2(g).
18. Section 122.38(f) is new and is based upon Customs Circular INS–2–EV, dated 12/14/61, and provides the procedure for requesting automatic renewal of permits and special licenses.

Subpart E—Aircraft Entry and Entry Documents

1. Section 122.41 is based upon §§ 6.3(a), 6.4(a) and (b), and 6.9(c).
2. Section 122.42 is based upon §§ 6.3(b), 6.4(c), and 6.7.

Note: Much of the remainder of Subpart E is based upon § 6.7. It covers all of the various forms required for entry. The revision is structured so that each required form is treated in a separate section.

3. Section 122.43(a) and (c) is based upon § 6.7(a) and (b).
4. Section 122.43(b) is based upon Customs Circular Air–4–ICS, dated 1/24/68, and permits entry upon presentation of an air cargo manifest in lieu of a general declaration.
5. Section 122.44 is new and is based upon Customs Circular BAG–3–CO (AIR–4–AIR), dated 8/9/65. It states that aircraft crewmembers arriving from a foreign area must file a crew baggage declaration as provided in Subpart G, Part 148, Customs Regulations (19 CFR Part 148).
6. Section 122.45 is based upon § 6.7(b)(1) and substitutes "crew list" for "crew manifest."
7. Section 122.45(d) is based upon Customs Circular BAG–3–CO, dated 8/9/65, and sets forth requirements for crewmembers returning as passengers.
8. Section 122.46(a) is based upon § 6.7(b)(2). The qualifying phrase "for any aircraft required to enter by § 122.41" is added.
9. Section 122.46(b) is based upon the last sentence of § 6.7(b)(2), as well as Customs Circular AIR–4–ICS, dated 1/24/68. The section includes a cross-reference to Subpart G, Part 148, Customs Regulations (19 CFR Part 148).
10. Section 122.46(c) is based upon the second and third sentences of § 6.7(b)(2). The reference to "attached list" is replaced by "crew purchase list."
11. Section 122.47(a) is based upon § 6.7(f).
12. Section 122.47(b) is based upon 6.7(f).
13. Section 122.47(c)(1) is based upon § 6.7(b)(3)(v).
14. Section 122.47(c)(2) is based upon § 6.7(b)(3)(v) and (vi), and includes major changes. The section specifies that "other domestic supplies" may be omitted from the stores list when an appropriate statement appears on the manifest or stores list. Further, the statement "Aircraft of scheduled airline" is deleted, thus being made applicable to all aircraft required to enter.
15. Section 122.47(d) is based upon § 6.7(f).

Note: Section 122.48 is taken from § 6.7(b)(3). Subparagraphs (v) and (vi) are included in proposed § 122.47(c).

16. Section 122.48(a) is based upon § 6.7(b)(3), and the phrase "for any aircraft required to enter under § 122.41" is added for clarification.
17. Section 122.48(b) is based upon § 6.7(b)(3). There is no substantive change except as concerns the requirement that company mail be listed on the cargo manifest.
18. Section 122.48(c) is based upon § 6.7(b)(3), with the words "duty free" inserted for clarity.
19. Section 122.48(d) is based upon § 6.7(b)(3)(vii), as amended by T.D. 84–128, published in the **Federal Register** on June 4, 1984 (49 FR 23038).
20. Section 122.48(e) is new and is based upon Customs Circular AIR–7–IEI, dated 1/31/72. This section concerns accompanied baggage in transit.
21. Section 122.49(a) is based upon § 6.7(h)(1) and (2).
22. Section 122.49(b) is based upon § 6.7(h)(1) and (3), as well as § 4.12(a). The sections were combined and put in outline form, making it unnecessary to continually refer back to Part 4, Customs Regulations (19 CFR Part 4), to check the applicability of the vessel regulations to aircraft.
23. Paragraphs (c), (d), (e), and (f) of § 122.49 are based upon §§ 6.7(h) and 4.12. The comments relating to § 122.49(b) apply to these paragraphs as well.

Note: All reference to the applicability of the vessel repair statute (19 U.S.C. 1466) to repairs made to aircraft, currently reflected in § 6.7(d) and (e), are deleted in Part 122 due to enactment of the Trade Agreements Act of 1979 (Title 6, section 601(a)(3), Pub. L. 96–39), which relieved aircraft from the duty provisions of 19 U.S.C. 1466.

Subpart F—International Traffic Permit

1. Section 122.51 is based upon § 6.2(d)(3). The word "civil" is deleted and the phrase "passengers carried for hire or merchandise" is replaced by the word "commercial."
2. Section 122.52(a) is based upon § 6.2(d)(3). The word "civil" is deleted and the term "commercial aircraft" replaces the term "international traffic."
3. Section 122.52(b) is based upon § 6.2(d)(3).
4. Section 122.52(c) is based upon the last two sentences of § 6.2(d)(3). The term "international traffic" has been changed to "commercial aircraft."
5. Section 122.53 is new and is based upon the Federal Aviation Administration regulations (14 CFR 121.153).
6. Section 122.54 (a) and (b) is based upon § 6.2(d)(1). The term "or agent" is added to paragraph (b), and necessary information is listed for inclusion on Customs Form 7507 (Permit to Proceed).
7. Section 122.54(c) is based upon § 6.2(d)(1).
8. Section 122.54 (d), (e) and (f) is based upon § 6.2(d)(1).
9. Section 122.54(g) is based upon § 6.2(d)(2).

Subpart G—Clearance of Aircraft and Permission to Depart

1. Section 122.61 is based upon § 6.3(c) and includes a general statement covering all aircraft except public and private.

2. Section 122.62 (a), (b) and (c) is based upon the third, fourth, and fifth sentences of § 6.3(c), and names those aircraft not otherwise required to clear.

3. Section 122.63(a) is based upon § 6.5(c).

4. Section 122.63(b) is based upon § 6.5(c).

5. Section 122.64 is based upon § 6.3(d) and is largely a restatement of § 122.63 (a) and (b), but deals with aircraft not using the procedure outlined therein.

6. Section 122.65 is new and provides that aircraft commanders must notify Customs if departure is delayed or cancelled after the aircraft has been cleared or given permission to depart.

Subpart H—Documents Required for Clearance and Permission to Depart

1. Section 122.71 is based upon § 6.8(a) and rephrases the telephonic clearance procedures, added by T.D. 82–92, published in the **Federal Register** on May 14, 1982 (47 FR 20750).

2. Section 122.72 is based upon § 6.8(a).

3. Section 122.73 is based upon § 6.8(b) and T.D. 82–92, and concerns the form and preparation of air cargo manifests.

4. Section 122.74(a) is based upon § 6.8(a) and the Bureau of the Census regulations (15 CFR 30.24). The term "Customs officer in charge" is changed to "district director."

5. Section 122.74(b) is based upon § 6.8(a). The term "Customs officer in charge" is changed to "district director."

6. Section 122.74(c) is based upon § 6.8(a) and 15 CFR 30.24(a).

7. Section 122.74(c)(1) is based upon § 6.8(a) and 15 CFR 30.24(a), and concerns shipments to foreign countries.

8. Section 122.74(c)(2) is based upon § 6.8(e) and 15 CFR 30.24(a)(1), and concerns shipments to and from Puerto Rico.

9. Section 122.74(c)(3) is based upon § 6.8(a) and 15 CFR 30.24(a)(1), and concerns shipments to U.S. possessions.

10. Section 122.74(d) is based upon § 6.8(e). The phrase "or all required cargo documents will be filed within the 7-day bond period" is added.

11. Section 122.75(a) (1) and (2) is based upon § 6.8(e) and 15 CFR 30.21(b), and concerns the contents of a complete air cargo manifest.

12. Section 122.75(b) is based upon the third and fourth sentences of § 6.8(e).

13. Section 122.76 is based upon § 6.8(a) and 15 CFR 30.1, and sets forth the requirements for Shipper's Export Declarations.

14. Section 122.77 is based upon § 6.8(d).

15. Section 122.78 is based upon § 6.8(c). The phrase "cargo manifest" replaces "outward manifest."

16. Section 122.79(a) is based upon §§ 6.5(b) and 6.3(c), and concerns shipments to U.S. possessions, other than Puerto Rico.

17. Section 122.79(b) is based upon §§ 6.5(b) and 6.3(c), and concerns manifest requirements on direct flights to Puerto Rico.

18. Section 122.80 is based upon § 6.8(e), and concerns verification by Customs of statements made on shipping records.

Subpart I—Procedures for Residue Cargo and Stopover Passengers

1. Section 122.81 is based upon § 6.9(a).

2. Section 122.82 is based upon §§ 6.9(a), 4.85(a), 113.13 (a) and (b), and 113.61, and details the bond requirement for aircraft seeking a permit to proceed while carrying residue cargo.

3. Section 122.83(a) is based upon § 6.9(b), footnote 6. The term "area" is deleted, and the phrase "an authorized person" is replaced by the word "agent."

4. Section 122.83(b) is based upon § 6.9(b), and includes a provision for crew purchases and stores lists, as well as alternate procedures for unlisted items.

5. Section 122.83(c) is based upon § 6.9(b). The clarifying phrase "An abstract general declaration and manifest need not be filed at the last domestic port of discharge" is added.

6. Section 122.83(d) is based upon § 6.9(b), and relates to the contents of a permit to proceed. The word "agent" replaces the phrase "authorized person", and the phrase "Customs officer in charge" replaces "appropriate Customs officer."

7. Section 122.83(e) is based upon § 6.9, and includes a reproduction of Customs Form 7512–C, Permit to Proceed.

8. Section 122.83(f) is based upon § 6.9(b). The phrase "The documents presented by the aircraft commander or authorized person when applying for clearance shall be delivered to the aircraft commander" is replaced by "* * * must be delivered to aircraft commander or agent." The word "agent" replaces the phrase "authorized person."

9. Section 122.84(a) and (b) is based upon § 6.9(c).

10. Section 122.84(c) is based upon § 6.9(c). The section provides that declarations are to be detached by Customs.

11. Section 122.84(d) is based upon § 6.9(c), and concerns departure from an intermediate airport.

12. Section 122.85 is based upon § 6.9(d). It concerns arrival at the final airport.

13. Section 122.86 is new and is based upon Customs Circular AIR–7–EV, dated 11/23/59. It concerns the substitution of aircraft under the residue cargo procedures.

14. Section 122.87 is based upon § 6.9(e).

15. Section 122.88 is based upon § 6.9(f).

Subpart J—Transportation in Bond and Merchandise in Transit

1. Section 122.91 is based upon § 6.15(a).

2. Section 122.92(a) and (b) is based upon § 6.15(b)(1) and (2).

3. Section 122.92(c) is based upon § 6.15(b)(3).

4. Section 122.92(d) is based upon § 6.15(b)(4).

5. Section 122.92(e) is based upon § 6.15(b)(5), and the phrase "aircraft of the same line" is changed to "aircraft of the same airline."

6. Section 122.92(f) is based upon the first sentence of § 6.15(b)(6).

7. Section 122.92(g) is based upon the second sentence of § 6.15(b)(6).

8. Section 122.93(a) is based upon § 6.15(c). The word "port" is changed to "airport", the phrase "authorized person" is replaced by the word "agent", and reference to appropriate Customs forms is inserted.

9. Section 122.93(b) is based upon § 6.15.

10. Section 122.94(a) is based upon § 6.16.

11. Section 122.94(b) is based upon § 6.16, and the phrase "authorized person" is replaced by the word "agent."

12. Section 122.95 is based upon footnote 9 of § 6.15(a).

Subpart K—Accompanied Baggage in Transit

1. Sections 122.101 and 122.102 are new and are based upon Customs Circular AIR–7–IEI, dated 1/31/72. These sections concern entry and inspection of accompanied baggage in transit.

Subpart L—Transit Air Cargo Manifest (TACM) Procedures

1. Section 122.111 is based upon § 6.17.

2. Section 122.112(a), (b) and (c) is based upon the definition portion of § 6.17.

3. Section 122.112(d) is based upon § 6.18(a), and defines the use of the transit air cargo manifest.

4. Section 122.113 is based upon § 6.18(a), and discusses the form used for transit air cargo manifest procedures.

5. Section 122.114(a) is based upon the last sentence of § 6.18(a), and Customs Circular AIR–EV, dated 5/8/62.

6. Section 122.114(b) is based upon the first sentence of § 6.18(b).

7. Section 122.114(b)(2) is based upon the second sentence of § 6.18(b).

8. Section 122.114(c) is based upon § 6.18(d).

9. Section 122.114(d) is based upon Customs Circular AIR–7–EV, dated 5/8/62, and concerns corrections to the route shown on the original manifest.

10. Section 122.115 is based upon § 6.18(e) and Customs Circular AIR–7–EV, dated 5/8/62. The section concerns labeling of cargo.

11. Section 122.116 is based upon § 6.19.

12. Section 122.117(a)(1) is based upon the first sentence of § 6.20(c).

13. Section 122.117(a)(2) is based upon the second sentence of § 20(c).

14. Section 122.117(b) is based upon § 6.20(b) and (d).

15. Section 122.117(c)(1) is based upon § 6.20(c) and concerns responsibility for direct exploration of transit air cargo.

16. Section 122.117(c)(2) is based upon the fourth sentence of § 6.20(c).

17. Section 122.117(c)(3) is based upon the last sentence of § 6.20(c). Section 122.17(c)(4) is based upon the third sentence of § 6.20(c).

18. Section 122.117(d) is based upon § 6.20(e) and concerns receipts for split shipments.

19. Section 122.118(a) is based upon § 6.24(a). All material in the section following the phrase "in the United States" is deleted and the words "under this section" are added.

20. Section 122.118(b) is based upon § 6.21(c).

21. Section 122.118(c) is based upon § 6.24 (b) and (c).

22. Section 122.118(d) is based upon § 6.24(g) with the phrase "air-carrier" being replaced by the word "airline."

23. Section 122.118(f) is based upon Customs Circular AIR–7–CO, dated 3/17/65. It concerns the exportation of post-entered air cargo.

24. Section 122.118(g) is based upon § 6.24(d).

25. Section 122.119(a) is based upon § 6.22(a).

26. Section 122.119(b) is based upon § 6.21(a).

27. Section 122.119(c) is based upon § 6.22(a) and Customs Circular TRA–1–IMS, dated 7/15/68.

28. Section 122.119(d) (1) and (2) is based upon § 6.22 (c) and (d), and concerns failure to deliver transit air cargo in a timely fashion.

29. Section 122.119(e) is new and concerns the transfer of cargo between carriers.

30. Section 122.120(a) is based upon § 6.23(a) and establishes the authority for transporting cargo to another port for exportation.

31. Section 122.120(b)(1) is based upon the first sentence of § 6.23(a).

32. Section 122.120(b)(2) is based upon the second sentence of § 6.23(c). The phrase "when the goods are ready for lading" is replaced by the phrase "when transit air cargo is ready for lading."

33. Section 122.120(c) is based upon § 6.21(b), and concerns the time limit for delivery of transit air cargo for exportation.

34. Section 122.120(d) is based upon § 6.23 and sets forth new procedures for using Customs Form 7512–C.

35. Section 122.120(e) is based upon § 6.23(b) and details the requirements for presentation of the carrier manifest copy.

36. Section 122.120(f) is based upon the first sentence of § 6.23(c).

37. Section 122.120(g) is based upon § 6.23(e).

38. Section 122.120(h) is based upon § 6.23(d). The phrase "these documents (including the clearance copies of transit air cargo manifest)" is replaced by the phrase "the exportation and clearance copies of transit air cargo manifests."

39. Section 122.120(i) is based upon § 6.23(h).

40. Section 122.120(j) is based upon § 6.23(h) and concerns cargo laden on more than one aircraft of the same airline.

41. Section 122.120(k) is based upon § 6.23(g).

Subpart M—Aircraft Liquor Kits

Note: Sections 122.131 through 122.137, the aircraft liquor kit provisions, do not appear in Part 6, Customs Regulations. The subpart is based upon Customs Circular AIR–7–AIR, dated 6/16/64.

Subpart N—Flights to and From the U.S. Virgin Islands

1. Section 122.141 is a new definition section, inserted to help clarify the subpart.

2. Section 122.142 is based upon § 6.25(a).

3. Section 122.143 is based upon § 6.25(b).

4. Section 122.144(a)(1) is based upon § 6.25(c)(1).

5. Section 122.144(a)(2) is based upon § 6.25(c)(2).

6. Section 122.144(b) is based upon § 6.25(c)(3).

7. Section 122.144(c) is based upon § 6.25(c)(4).

Subpart O—Flights to and From Cuba

Sections 122.151 through 122.158 are based upon § 6.3a, as amended by T.D. 87–77, published in the **Federal Register** on June 30, 1987. (52 FR 24291).

Subpart P—Public Aircraft

(Reserved)

Subpart Q—Penalties

1. Section 122.161 is based upon § 6.11.

2. Section 122.162 is based upon § 6.7(h)

3. Section 122.163 is based upon § 6.22(e).

4. Section 122.164 is based upon § 6.23(g).

5. Section 122.165 is new and is based upon Customs Circular AIR–4–CR, dated 11/12/72. It concerns the Air Cabotage statue, 49 U.S.C. App. 1508(b).

6. Section 122.166 is new and is based upon amendments to 19 U.S.C. 1433 and 1436.

7. Section 122.167 is new and is based upon amendments to 19 U.S.C. 1433 and 1436.

Editorial Changes

Throughout the revision, numerous editorial changes have been made to clarify and simplify the language contained in the existing air commerce regulations.

Analysis of Comments

Only six comments were received in response to the July 26, 1985, **Federal Register** notice. Of these, two were from aircraft and airline industry associations, two from Federal Government offices, one from a customs broker, and one from an aircraft importer.

Two commenters stated that the requirements in § 122.23, relating to 1-hour advance notice of penetration of U.S. airspace by private aircraft arriving from areas south of the U.S., are burdensome, and that compliance may be impossible in some instances.

As discussed in T.D. 86–72, published in the **Federal Register** on March 3, 1986 (51 FR 11004), Customs changed the notice time in § 6.14 from 15 minutes to 1 hour after very careful consideration of the effect and impact of such a change. The revised reporting time was determined to be necessary for valid enforcement reasons. If the 1-hour time period proves unworkable for some aircraft operators, Customs will consider accepting notification of intended airspace penetration when a flight plan is filed with the Federal

Aviation Administration or at any time prior to departure from the U.S.

A discussion of the other sections commented upon follows.

Section 122.2(c) (1) and (2). (renumbered § 122.1(c) (1) and (2) in this document). Companies acting as an agent for an airline temporarily importing an aircraft for modifications, or, if a used aircraft, being traded in for a new one, should be permitted to act as an agent for the airline without holding a power of attorney or without having written authority from the airline. This comment is outside the scope of this revision. Relevant procedures for these matters are set forth in § 10.36a, Customs Regulations (19 CFR 10.36a).

Section 122.6(b). (renumbered § 122.5(b) in this document). Airlines need to have flexibility in determining the size, shape, and color of general declaration and air cargo manifest forms to conform with other private sector documents.

The requirements in § 6.6, upon which § 122.6 is based, were amended by T.D. 85–157, published in the **Federal Register** on September 19, 1985 (50 FR 37996). The amendment permits private sector printing of the forms so long as the same size, wording arrangement, style and size of type, and quality of paper are used.

Section 122.13. The list of international airports should be revised frequently.

This section is unchanged from § 6.13. The comment is not relevant to this revision. Changes to the list are made as needed.

Section 122.23(b). The requirement that advance notice of U.S. airspace penetration be made by aircraft arriving from the south, even though not touching foreign territory, is unduly burdensome.

As stated earlier in this document, the amendment to § 6.14 by T.D. 86–72 represents a necessary enforcement requirement. However, Customs will continue to accept the notification either prior to or during such a flight.

Section 122.24. Houston Intercontinental Airport should be added to the list of designated airports.

As no explanation or justification was offered, no such action will be taken at this time.

Section 122.25. The section should be changed to permit air ambulances to get single flight exemptions from special landing requirements without the necessity of notification 15 days in advance.

Such exemption may be granted in the discretion of the appropriate district director.

Section 122.27. The minimum dollar amount for which landing certificates or copies of foreign customs entries for merchandise must be filed should be changed from $100 to $500.

As this suggestion has merit, it has been adopted.

Section 122.29. The question is posed as to why Customs overtime charges apply to aircraft and not to vehicles.

This is because service is provided 24 hours a day to aircraft and vessels. The service is free during normal working hours, but must be reimbursed at other times. Automobiles must arrive at Customs border stations during regular hours of operation only and no service is provided during other times.

Section 122.34. Landing rights airports should be required to provide proper office and other space for use by Federal officials.

Authority for such a requirement is found in 31 U.S.C. 9701, and airports provide the necessary space for use by the Federal Inspection Services.

Section 122.34(a)(1). The words "or his representative" should be added to the section to indicate that the regional commissioner need not personally grant landing rights.

This suggestion has been adopted.

Section 122.42. The section should be changed to permit aircraft to land for refueling only, without the need to formally enter.

As the suggestion has merit, it has been adopted. the section has been changed to set forth certain conditions which must be met for aircraft to be excepted from the entry requirement.

Section 122.46. The section, which concerns crew purchase lists, should be changed to reflect contemporary procedures.

We believe that the section is properly drafted at present because, while it is true that a crew purchase list is rarely used, the requirement should be retained as an optional procedure for crewmember declarations.

Section 122.48. The following changes were suggested: Airline company mail should be considered "baggage" without the necessity to include it on a manifest. Reference to Customs Form 5119A should be changed to 7501. The third sentence of paragraph (d) should be changed to read "* * * added to the cargo list * * *," rather than "* * * shown on the cargo manifest." Finally, the second sentence of paragraph (e) should be changed to "* * * while in transit through the U.S." instead of "* * * during the flight."

Customs believes that company mail should continue to be manifested as cargo and be subject to examination. The remaining points are well taken, and appropriate changes have been made.

Section 122.49. The section should provide for corrections made to air way bills as well as air cargo manifests.

We agree and have amended the section accordingly.

Section 122.52(c). Paragraph (c) should be changed to read, in appropriate part, "* * * carrying neither passengers nor cargo," in lieu of the words "* * * in ballast."

We agree and have made the necessary change.

Subpart F. The subpart title should be changed to avoid confusion with Subpart I.

We agree and have changed the title.

Subpart H. The subpart should include the requirements for an outward general declaration, Customs Form 7507.

This was an inadvertent omission which has been corrected.

Section 122.65. The section should include mention of a time limit within which an aircraft must depart after receiving clearance to depart.

The suggestion has been adopted and the section has been appropriately amended.

Section 122.71. The section is burdensome because it requires an aircraft to depart only from an airport where Customs officers are stationed.

This is an incorrect interpretation. Aircraft departing with no commercial export cargo may clear by telephone in advance with the district director nearest the departure place.

Section 122.83(d). The "permit to proceed" form printed in the section should be changed in two respects. First, the phrase "number of pieces of cargo not cleared" should be deleted because it has no application to aircraft which can now accommodate up to 60 breakbulk containers, and the counting of pieces is not done the same way at any two airports. Second, reference to Public Health Service (PHS) clearance should be deleted because PHS personnel no longer routinely inspect arriving passengers.

We concur in the first suggestion and have modified the form accordingly. We have contacted the PHS regarding the second suggestion and as they have no objection to deletion of the requirement, this change has also been made.

Section 122.86(d)(2). The last sentence, which reads, "No other cargo may be laden on the substitute aircraft.", should be deleted.

This sentence was inserted to insure that foreign aircraft are not used in violation of the air cabotage law, prohibiting certain air transit within the U.S. However, as the Federal Aviation Administration, which is responsible for

---

this requirement, did not object to the suggestion, the change has been made.

Section 122.92 (a) and (b). Customs Form 7520, Manifest of Baggage Shipped in Bond, should be described in the section, and the requirement for submitting both the Customs Form 7512 and Customs Form 7512–C should be deleted.

Use of the CF 7520 is described in § 18.13, Customs Regulations (19 CFR 18.13), and we have added an appropriate reference to that section. In regard to the requirement that both the CF 7512 and CF 7512–C be completed for in-bond merchandise, it has been determined that the information on the CF 7512–C is easier to read and use than that on the CF 7512. Accordingly, at this time, the requirement that both forms be submitted is being retained.

Section 122.115 The warning label procedure in regard to transit air cargo not directly exported from the port of arrival is impractical and should be dropped.

Customs continues to experience problems associated with the unauthorized delivery of in-bond merchandise. Therefore, we must continue to require that the warning label be affixed to all such shipments which are not sealed.

Conforming Amendments

The revision of the air commerce regulations by elimination of Part 6, Customs Regulations (19 CFR Part 6), and the addition of a new Part 122, Customs Regulations (19 CFR Part 122), requires that certain non-substantive amendments be made to other parts of the Customs Regulations to conform them to the revised scheme. These amendments consist wholly of changing citations to Part 6 of the appropriate citations in Part 122 wherever they appear.

Regulatory Flexibility Act

Pursuant to the provisions of section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, U.S.C. 601 et. seq.), it is certified that this revision will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Drafting Information

The principal author of this document was Larry L. Burton, Office of Regulations and Rulings, Customs Headquarters. However, personnel from other offices participated in its development.

List of Subjects

19 CFR Part 122

Air carriers, Air transportation, Aircraft, Airports, Cuba, Freight.

19 CFR Parts 4, 6, 10, 18, 24, 123, 162

Customs duties and inspection.

PART 6—[REMOVED]

Chapter I of Title 19, Code of Federal Regulations, is amended by removing Part 6 (*Air Commerce Regulations*) (19 CFR Part 6).

Chapter I of Title 19, Code of Federal Regulations, is further amended by adding a new part, Part 122, to read as follows:

PART 122—AIR COMMERCE REGULATIONS

Sec.
122.0 Scope

Subpart A—General Definitions and Provisions

122.1 General definitions.
122.2 Other Customs laws and regulations.
122.3 Availability of forms.
122.4 English language required.
122.5 Reproduction of Customs forms.

Subpart B—International Airports

122.11 Designation as international airport.
122.12 Operation of international airports.
122.13 List of international airports.
122.14 Access to Customs Security Areas.

Subpart C—Private Aircraft

122.21 Application.
122.22 Notice of arrival.
122.23 Private aircraft arriving from areas south of the U.S.
122.24 Landing requirements.
122.25 Exemption from special landing requirements.
122.26 Entry and clearance.
122.27 Documents required.
122.28 Private aircraft taken abroad by U.S. residents.
122.29 Overtime services.
122.30 Other Customs laws and regulations.

Subpart D—Landing Requirements.

122.31 Notice of arrival.
122.32 Aircraft required to land.
122.33 Place of first landing.
122.34 Landing rights airport.
122.35 Emergency or forced landing.
122.36 Responsibility of aircraft commander.
122.37 Precleared aircraft.
122.38 Permit and special license to unlade and lade.

Subpart E—Aircraft Entry and Entry Documents

122.41 Aircraft required to enter.
122.42 Aircraft entry.
122.43 General declaration.
122.44 Crew baggage declaration.
122.45 Crew list.
122.46 Crew purchase list.
122.47 Stores list.
122.48 Air cargo manifest.
122.49 Correction of air cargo manifest or air way bill.

Subpart F—International Traffic Permit

122.51 Aircraft of domestic origin registered in the U.S.
122.52 Aircraft of foreign origin registered in the U.S.
122.53 Aircraft of foreign registry chartered or leased to U.S. air carriers.
122.54 Aircraft of foreign registry.

Subpart G—Clearance of Aircraft and Permission to Depart

122.61 Aircraft required to clear.
122.62 Aircraft not otherwise required to clear.
122.63 Scheduled airlines.
122.64 Other aircraft.
122.65 Failure to depart.

Subpart H—Documents Required for Clearance and Permission to Depart

122.71 Aircraft departing with no commercial export cargo.
122.72 Aircraft departing with commercial export cargo.
122.73 General declaration and air cargo manifest.
122.74 Incomplete (pro forma) manifest.
122.75 Complete manifest.
122.76 Shipper's Export Declarations and inspection certifications.
122.77 Clearance certificate.
122.78 Entry or withdrawal for exportation or for transportation and exportation.
122.79 Shipments to U.S. possessions.
122.80 Verification of statement.

Subpart I—Procedures for Residue Cargo and Stopover Passengers

122.81 Application.
122.82 Bond requirements.
122.83 Forms required.
122.84 Intermediate airport.
122.85 Final airport.
122.86 Substitution of aircraft.
122.87 Other requirements.
122.88 Aircraft carrying domestic (stopover) passengers.

Subpart J—Transportation in Bond and Merchandise in Transit

122.91 Application.
122.92 Procedure at port of origin.
122.93 Procedure at destination or exportation airport.
122.94 Certificate of lading for exportation.
122.95 Other provisions.

Subpart K—Accompanied Baggage in Transit

122.101 Entry of accompanied baggage.
122.102 Inspection of baggage in transit.

Subpart L—Transit Air Cargo Manifest (TACM) Procedures

122.111 Application.
122.112 Definitions.
122.113 Form for transit air cargo manifest procedures.
122.114 Contents.
122.115 Labeling of cargo.
122.116 Identification of manifest sheets.
122.117 Requirements for transit air cargo transport.
122.118 Exportation from port of arrival.
122.119 Transportation to another U.S. port.
122.120 Transportation to another port for exportation.

Subpart M—Aircraft Liquor Kits

122.131 Application.
122.132 Sealing of aircraft liquor kits.
122.133 Stores list required on arrival.
122.134 When airline does not have in-bond liquor storeroom.
122.135 Whe airline has in-bond liquor storeroom.
122.136 Outgoing stores list.
122.137 Certificate of use.

Subpart N—Flights to and From the U.S. Virgin Islands

122.141 Definitions.
122.142 Flights between the U.S. Virgin Islands and a foreign area.
122.143 Flights from the U.S. to the U.S. Virgin Islands.
122.144 Flights from the U.S. Virgin Islands to the U.S.

Subpart O—Flights to and From Cuba

122.151 Definitions.
122.152 Application.
122.153 Limitations on airport of entry or departure.
122.154 Notice of arrival.
122.155 Documents to be presented upon arrival.
122.156 Release of passengers.
122.157 Documents required for clearance.
122.158 Other entry and clearance requirements.

Subpart P—Public Aircraft

[Reserved]

Subpart Q—Penalties

122.161 In general.
122.162 Failure to notify and explain differences in air cargo manifest.
122.163 Transit air cargo traveling to U.S. ports.
122.164 Tranportation to another port for exportation.
122.165 Air cabotage.
122.166 Arrived, departure, discharge, and documentation.
122.167 Aviation smuggling.

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1433, 1436, 1459, 1590, 1594, 1624, 1644, 49 U.S.C. App. 1509.

§ 122.0 Scope.

The regulations in this part relate to the entry and clearance of aircraft, and the transportation of persons and cargo by aircraft, and are applicable to all air commerce. They do not apply to Guam, Midway, American Samoa, Wake, Kingman Reef, Johnston Island, and other insular possessions of the U.S. not specified herein. They do apply to the U.S. Virgin Islands as stated in Subpart N (§§ 122.141 through 122.144), and Cuba as stated in Subpart O (§§ 122.151 through 122.158).

Subpart A—General Definitions and Provisions

§ 122.1 General definitions.

The following definitions apply in this part, unless otherwise stated:

(a) *Aircraft.* An "aircraft" is any device now known, or hereafter invented, used or designed for navigation or flight in the air. It does not include hovercraft.

(b) *Aircraft commander.* An "aircraft commander" is any person serving on an aircraft who is in charge or has command of its operation and navigation.

(c) *Agent.* An "agent" is any person who is authorized to act for or in place of:

(1) An owner or operator of a scheduled airline by written authority; or

(2) An owner or operator of a non-scheduled airline, by power of attorney.

The authority to act shall be in writing and satisfactory to the district director.

(d) *Commercial aircraft.* A "commercial aircraft" is any aircraft transporting passengers and/or cargo for some payment or other consideration, including money or services rendered.

(e) *International airport.* An "international airport" is any airport designated by:

(1) The Secretary of the Treasury or the Commissioner of Customs as a port of entry for aircraft arriving in the U.S. from any place outside thereof and for the merchandise carried on such aircraft;

(2) The Attorney General as a port of entry for aliens arriving on such aircraft; and

(3) The Secretary of Health and Human Services as a place for quarantine inspection.

(f) *Landing rights airport.* A "landing rights airport" is any airport, other than an international airport, at which flights from a foreign area may be allowed to land.

(g) *Preclearance.* "Preclearance" is the examination and inspection of air travelers and their baggage, at the request of an airline, at foreign places where Customs personnel are stationed for that purpose. Preclearance may be used only for air travelers and their baggage, not for merchandise.

(h) *Private aircraft.* A "private aircraft" is any aircraft engaged in a personal or business flight to or from the U.S. which is not:

(1) Carrying passengers and/or cargo for commercial purposes:

(2) Leaving the U.S. carrying neither passengers nor cargo in order to lade passengers and/or cargo in a foreign area for commercial purposes; or

(3) Returning to the U.S. carrying neither passengers nor cargo in ballast after leaving with passengers and/or cargo for commercial purposes;

(i) *Public aircraft.* A "public aircraft", is any aircraft owned by, or under the complete control and management of the U.S. government or any of its agencies, or any aircraft owned by or under the complete control and management of any foreign government which exempts public aircraft of the U.S. from arrival, entry and clearance requirements similar to those provided in Subpart C of this part, but not including any government owned aircraft engaged in carrying persons or property for commercial purposes. This definition applies if the aircraft is:

(1) Manned entirely by members of the armed forces or civil service of such government, or by both;

(2) Transporting only property of such government, or passengers traveling on official business of such government; or

(3) Carrying neither passengers nor cargo.

(j) *Residue cargo.* "Residue cargo" is any cargo on board an aircraft arriving in the U.S. from a foreign area if the:

(1) Final delivery airport in the U.S. is not the port of arrival; or

(2) Cargo remains on board the aircraft and travels from port to port in the U.S., for final delivery in a foreign area.

(k) *scheduled airline.* A "scheduled airline" is any individual, partnership, corporation or association:

(1) Engaged in air transportation under regular schedules to, over, away from, or within the U.S.; and

(2) Holding a Foreign Air Carrier Permit or a Certificate of Public Convenience and Necessity, issued by the Department of Transportation pursuant to 14 CFR Parts 201 and 213.

(l) *United States.* Except when used in another context, "U.S." means the territory of the several States, the District of Columbia, and Puerto Rico, including the territorial waters and overlying airspace.

§ 122.2 Other Customs laws and regulations.

Except as otherwise provided for in this chapter, and insofar as such laws and regulations are applicable, aircraft arriving or having arrived from or departing for any foreign port or place, and the persons and merchandise, including baggage, carried thereon, shall be subject to the laws and regulations applicable to vessels to the extent that such laws and regulations are administered or enforced by Customs, as provided in 49 U.S.C. App. 1509(c).

§ 122.3 Availability of forms.

The forms mentioned in this part may be purchased from the district director at a port of entry. A small quantity of each form is set aside by district directors for free distribution and official use.

§ 122.4 English language required.

A translation in the English language shall be attached to the original and each copy of any form or document written or printed in a foreign language.

§ 122.5 Reproduction of Customs forms.

(a) *Specifications.* Subject to approval by Customs, the forms mentioned in this part may be printed by private parties if the specified size, wording arrangement, style and size of type, and quality of paper are used.

(b) *Exceptions.* District directors may accept privately printed copies of the General Declaration (Customs Form 7507) and air cargo manifest (Customs Form 7509) which are different from the official forms. The privately printed forms shall include all information required on the official forms. The differences allowed are:

(1) *General Declaration.* Customs Form 7507 may be printed in several languages, so long as the form includes an English version. The instructions on the reverse side of the official form may be omitted.

(2) *Air cargo manifest.* Customs Form 7509 may be changed to allow for additional information used by the airline.

Subpart B—International Airports

§ 122.11 Designation as international airport.

(a) *Procedure.* International airports, as defined in § 122.1(e), will be designated after due investigation to establish that sufficient need exists in any particular district or area to justify such designation and to determine the airport best suited for such purpose. In each case, a specific airport will be chosen, rather than a general area or district. International airports will be publicly owned, unless circumstances require otherwise

(b) *Withdrawal of designation.* The designation as an international airport may be withdrawn for any of the following reasons:

(1) The amount of business clearing through the airport does not justify maintenance of inspection equipment and personnel;

(2) Proper facilities are not provided or maintained by the airport;

(3) The rules and regulations of the Federal Government are not followed; or

(4) Some other location would be more useful.

(c) *Providing office space to the Federal Government.* Each international airport shall provide, without cost to the Federal Government, proper office and other space for the sole use of Federal officials working at the airport. A suitable paved loading area shall be supplied by each airport at a place convenient to the office space. The loading area shall be kept for the use of aircraft entering or clearing through the airport.

§ 122.12 Operation of international airports.

(a) *Entry, clearance and charges.* International airports are open to all aircraft for entry and clearance at no charge by Customs. However, charges may be assessed by the airport for commercial or private use of the airport.

(b) *Servicing of aircraft.* When an aircraft enters or clears through an international airport, it shall be

promptly serviced by airport personnel solely on the basis of order of arrival or readiness for departure. Servicing charges imposed by the airport operators shall not be greater than the schedule of charges in effect at the airport in question.

(c) *Federal Aviation Administration rules.* International airports shall follow and enforce any requirements for airport operations, including airport rules, that area set out by the Federal Aviation Administration in 14 CFR Part 91.

(d) *Additional requirements.* Additional requirements may be put into effect at a particular airport as the needs of the Customs district served by the airport demand.

§ 122.13 List of international airports.

The following is a list of international airports of entry designated by the Secretary of the Treasury.

Location	Name
Akron, Ohio	Akron Municipal Airport
Albany, N.Y	Albany County Airport
Baudette, Minn	Baudette International Airport
Bellingham, Wash	Bellingham International Airport
Brownsville, Tex	Brownsville International Airport
Burlington, Vt	Burlington International Airport
Calexico, Calif	Calexico International Airport
Caribou, Maine	Caribou Municipal Airport
Chicago, Ill	Midway Airport
Cleveland, Ohio	Cleveland Hopkins International Airport
Cut Bank, Mont	Cut Bank Airport
Del Rio, Tex	Del Rio International Airport
Detroit, Mich	Detroit City Airport
Detroit, Mich	Detroit Metropolitan Wayne County Airport
Douglas, Ariz	Bisbee-Douglas International Airport
Duluth, Minn	Duluth International Airport
Duluth, Minn	Sky Harbor Airport
Eagle Pass, Tex	Eagle Pass Municipal Airport
El Paso, Tex	El Paso International Airport
Fort Lauderdale, Fla.	Fort Lauderdale-Hollywood International Airport
Friday Harbor, Wash.	Friday Harbor Seaplane Base
Grand Forks, N. Dak.	Grand Forks International Airport
Great Falls, Mont	Great Falls International Airport
Havre, Mont	Havre City-County Airport
Houlton, Maine	Houlton International Airport
International Falls, Minn.	Falls International Airport
Juneau, Alaska	Juneau Municipal Airport
Juneau, Alaska	Juneau Harbor Seaplane Base
Ketchikan, Alaska	Ketchikan Harbor Seaplane Base
Key West, Fla	Key West International Airport
Laredo, Tex	Laredo International Airport
Massena, N.Y	Richards Field
McAllen, Tex	Miller International Airport
Miami, Fla	Chalk Seaplane Base
Miami, Fla	Miami International Airport
Minot, N.Dak	Minot International Airport
Nogales, Ariz	Nogales International Airport
Ogdensburg, N.Y	Ogdensburg Harbor
Ogdensburg, N.Y	Ogdensburg International Airport
Oroville, Wash	Dorothy Scott Airport
Oroville, Wash	Dorothy Scott Seaplane Base
Pembina, N.Dak	Pembina Municipal Airport
Port Huron, Mich	St. Clair County International Airport
Port Townsend, Wash.	Jefferson County International Airport
Ranier, Minn	Ranier International Seaplane Base
Rochester, N.Y	Rochester-Monroe County Airport
Rouses Point, N.Y	Rouses Point Seaplane Base
San Diego, Calif	San Diego International Airport (Lindbergh Field)
Sandusky, Ohio	Griffing-Sandusky Airport
Sault Ste. Marie, Mich.	Sault Ste. Marie City-County Airport
Seattle, Wash	King County International Airport
Seattle, Wash	Lake Union Air Service (Seaplanes)
Tampa, Fla	Tampa International Airport
Tucson, Ariz	Tucson International Airport
Watertown, N.Y	Watertown New York International Airport
West Palm Beach, Fla.	Palm Beach International Airport
Williston, N. Dak	Sloulin Field International Airport
Wrangell, Alaska	Wrangell Seaplane Base
Yuma, Ariz	Yuma International Airport

§ 122.14 Access to Customs security areas.

(a) For the purposes of this section, the term "Customs security area" means the Federal inspection services area (as provided for by § 122.11(c)), designated for processing passengers, crew, their baggage and effects arriving from foreign countries, as well as the aircraft deplaning and ramp area and other restricted areas designated by the district director of Customs. These areas will be posted as restricted to the extent possible, and are established for the purpose of prohibiting unauthorized entries or contact with persons or objects.

(b) With the exception of all Federal, and uniformed State and local law enforcement personnel, all persons located at, operating out of, or employed by any airport accommodating international air commerce, or its tenants or contractors, including air carriers, who have unescorted access to the Customs security area must openly display or produce upon demand, an approved identification card, strip, or seal, to be issued by Customs. The approved identification card, strip, or seal shall be in the possession of the person in whose name it is issued at all times when the person is in the Customs security area. The identification strip or seal or any Customs issued card remains the property of Customs and any bearer must immediately surrender it upon demand by any authorized Customs officer.

(c) An application for an approved identification card, strip, or seal as required by this section, shall be filed by the applicant with the district director on Customs Form 3078. This requirement applies to all employees, regardless of the length of their employment. For employees hired on or after November 1, 1985, an authorized official of the employer shall attest in writing that a background check has been conducted on the applicant. The background check shall include, at a minimum, investigation of references and employment history to the extent necessary to verify representations made by the applicant relating to employment in the preceding 5 years. For any employee hired before November 1, 1985, the authorized official of the employer need only attest to the fact that the employee was hired before that date. The authorized official of the employer shall attest that, to the best of his knowledge, the applicant meets the conditions necessary to perform functions associated with employment in the Customs security area. The fingerprints of the applicant may be required on FD 258 at the time of the filing of the application. Proof of citizenship or authorized residency, and a photograph may also be required. In addition, the application may be investigated by Customs and a report prepared concerning the character of the applicant. Records of background investigations conducted by employers must be retained by them and made available upon request by the district director for a period of 1 year following cessation of employment of the employees.

(d) Law enforcement officers and other Federal, State, or local officials whose duties require access to the Customs security area may request from the district director the issuance of an approved identification card, strip, or seal. They need not make application nor submit to background checks for security area access.

(e)(1) An approved identification card, strip, or seal shall not be issued to any person whose employment necessitates access to the Customs security area and whose access will, in the judgment of the district director, endanger the

BEST COPY AVAILABLE

revenue or the security of the area. Grounds for denial of access shall include, but are not limited to:

(i) Any cause which would justify suspension or revocation of the identification card, strip, or seal under the provisions of paragraph (j) of this section; or

(ii) Evidence of a pending or past investigation which establishes criminal, or dishonest conduct, or a verified record of such conduct.

(2)(i) The district director shall give written notification to any person whose application for access to the Customs security area has been denied, fully stating the reasons for denial and setting forth specific appeal procedures. The employer shall be notified in writing that the applicant has been denied access to the area and that the detailed reasons for the denial have been furnished to the applicant. Specific reasons for denial shall not be furnished to the employer.

(ii) The denial will be final unless the applicant files with the district director a written notice of appeal. The applicant's written notice must be filed within 10 days following receipt of the notice of denial. The notice of appeal shall be filed in duplicate, and shall set forth the response of the applicant to the statement of the district director. The district director shall render his decision on the appeal to the applicant within 30 days of receipt of the notice of appeal.

(iii) If the district director denies the application on appeal, the applicant may file a further written notice of appeal to the Commissioner within 10 days of receipt of the district director's decision on the appeal. The further notice of appeal shall be filed in duplicate, and shall set forth the response of the applicant to the district director's decision. The Commissioner or his designee shall review the appeal, and render a written decision. This final decision shall be transmitted to the district director and served by him on the applicant.

(f) An employee may obtain a new identification card, strip, or seal from the district director in the following circumstances, without completing a new application, except as determined by the district director in his discretion:

(1) A change in employee name or address;

(2) A change in the name or ownership of his employing company;

(3) A change in employer or airport authority identification card format; or

(4) Loss or theft of the identification card, strip, or seal.

(g) The identification card, strip, or seal shall be removed from the employee by the district director when, for security reasons, it is necessary to change the nature of the identification.

(h) The loss or theft of an identification card, strip, or seal shall be promptly reported in writing by the employee to the district director, and the card, strip, or seal may be replaced as provided in paragraph (f) of this section.

(i) If an approved identification card, strip, or seal is presented by a person other than the one to whom it was issued, the identification card, strip, or seal shall be removed by the district director and destroyed.

(j)(1) An approved identification card, strip, or seal may be removed from an employee by any Customs officer designated by the district director. In addition, the district director may revoke or suspend access to the Customs security area and demand that the identification strip or seal or Customs issued card be surrendered, for any of the following reasons:

(i) The approved identification card, strip, or seal was obtained through fraud or the misstatement of a material fact;

(ii) The employee is convicted of a felony, or convicted of a misdemeanor involving theft, smuggling, or any theft-connected crime;

(iii) The employee permits the approved identification card, strip or seal to be used by any other person, or refuses to openly display or produce it upon the proper demand of a Customs officer;

(iv) The continuation of privileges would, in the judgment of the district director, endanger the revenue or security of the area.

(v) The employee refuses or neglects to obey any proper order of a Customs officer, or any Customs order, rule, or regulation; or

(vi) The employee's duties no longer require that he have access to the Customs security area for an extended period of time at the airport of issuance. In this instance the employer shall notify the district director in writing, return the identification card, strip, or seal, and give information regarding the status of the employee who was issued the card, strip, or seal and who no longer requires access. If the employee returns to duties in the Customs security area at the airport within 1 year, a Customs Form 3078, as required by paragraph (d) of this section, need not be submitted, at the discretion of the district director.

(2) The district director shall suspend or revoke access to the Customs security area by giving notice of the proposed action in writing to the employee with a copy of the notice to the employer. The notice shall be in the form of a statement specifically setting forth the grounds for revocation or suspension of the privilege and shall be final and conclusive upon the employee unless he files with the district director a written notice of appeal as provided in subparagraph (3) of this paragraph.

(3) The employee may file a written notice of appeal from the revocation or suspension within 10 calendar days following receipt of the notice of revocation or suspension. The notice of appeal shall be filed in duplicate, and shall set forth the response of the employee to the statement of the district director. The employee, in his notice of appeal, may request a hearing.

(4) If a hearing is requested, it shall be held before a hearing officer designated by the Commissioner or his designee within 30 calendar days following the request. The employee shall be notified of the time and place of the hearing at least 5 calendar days before the hearing.

(5) The employee may be represented by counsel at the revocation or suspension hearing. All evidence and testimony of witnesses in such proceeding, including substantiation of charges and the answer thereto, shall be presented. Both parties will have the right of cross-examination. A stenographic record of the proceedings shall be made upon request and a copy furnished to the employee. At the conclusion of the proceedings or review of a written appeal, the hearing officer or the district director, as the case may be, shall promptly transmit all papers and the stenographic record of the hearing to the Commissioner or his designee, together with his recommendation for final action.

(6) Following a hearing and within 10 calendar days after delivery of a copy of the stenographic record, the employee may submit to the Commissioner or his designee, additional written views and arguments on matters in the record.

(7) If neither the employee nor his attorney appear for a scheduled hearing, the hearing officer shall record that fact, accept any appropriate testimony, and conclude the hearing. The hearing officer shall promptly transmit all papers together with his recommendations to the Commissioner or his designee.

(8) After consideration of the recommendations of the hearing officer or the district director, the Commissioner or his designee shall render his decision, in writing, stating his reasons for the final action. The decision shall be transmitted to the district director and served by him on the employee.

(k) When an approved identification card, strip, or seal is required under paragraph (b) of this section, and the

district director determines that the application cannot be administratively processed in a reasonable period of time, an employer may, upon written request, be issued a temporary identification card, strip, or seal for his employee. The employer must satisfy the district director that a hardship to his business would result if the request is not granted.

(l) The temporary identification card, strip, or seal shall be valid for a period of 60 days. The district director may renew the temporary identification card, strip, or seal for additional 30-day periods if he determines that the circumstances under which the temporary identification card, strip, or seal was originally issued continue to exist. The temporary identification card, strip, or seal shall be destroyed by the district director when the permanent approved identification card, strip, or seal is issued, or the privileges granted thereby are withdrawn.

(2) The provisions of this paragraph shall also apply to temporary employees and official visitors requiring access to the Customs security area. In the case of temporary employees, the identification card, strip, or seal shall be valid for a period of 30 days. In the case of official visitors, the temporary identification card, strip, or seal shall be valid for the day of issuance only. Temporary employee and official visitor identification cards, strips, or seals are renewable for periods equal to their original period of validity.

(3) The temporary identification card, strip, or seal may be revoked and access to the Customs security area denied at any time if the holder of the temporary identification card, strip, or seal refuses or neglects to obey any proper order of a Customs officer, or any Customs order, rule, or regulation, or if, in the judgment of the district director, continuation of the privileges granted thereby would endanger the revenue or pose a threat to the Customs security area.

Subpart C—Private Aircraft

§ 122.21 Application.

This subpart applies to all private aircraft as defind in § 122.1(h). No other provisions of this part apply to private aircraft, except where stated in this subpart.

§ 122.22 Notice of arrival.

When arriving in the U.S. from a foreign area, all private aricraft not covered by § 122.23 shall give advance notice of arrival as required in § 122.31.

§ 122.23 Private aircraft arriving from areas south of the U.S.

(a) *Definitions.* (1) For the purpose of this section, "private aircraft" means all aircraft except:

(i) Public aircraft;

(ii) Those aircraft operated on a regularly published schedule, pursuant to a certificate of public convenience and necessity or foreign aircraft permit issued by the Department of Transportation, authorizing interstate, overseas air transportation; and

(iii) Those aircraft with a seating capacity of more than 30 passenges or a maximum payload capacity of more than 7,500 pounds which are engaged in air transportation for compensation or hire on demand. (See 49 U.S.C. App. 1372 and 14 CFR Part 298).

(2) The term "place" as used in this section means anywhere outside of the inner boundary of the Atlantic (Coastal) Air Defense Identification Zone (ADIZ) south of 30 degrees north latitude, anywhere outside of the inner boundary of the Gulf of Mexico (Coastal) ADIZ, or anywhere outside of them inner boundary of the Pacific (Coastal) ADIZ south of 33 degrees north latitude.

(b) *Advance report of penetration of U.S. airspace.* All private aircraft arriving in the Continental U.S. via the U.S./Mexican border or the Pacific Coast from a foreign place in the Western Hemisphere south of 33 degrees north latitude, or from the Gulf of Mexico and Atlantic Coasts from a place in the Western Hemisphere south of 30 degrees north latitude from any place in Mexico, from the U.S. Virgin Islands, or (notwithstanding the definition of "United States" in § 122.1(1)) from Puerto Rico, (which if from Puerto Rico, are conducting flight under visual flight rules (VFR)), shall furnish a notice of intended arrival to Customs at the nearest designated airport to point of crossing listed in § 122.24(b), for the first landing in the U.S. The notice must be furnished at least 1 hour before crossing the U.S. coastline or border. The notice may be furnished directly to Customs by telephone, radio, or other means, or may be furnishd through the Federal Aviation Administration to Customs. The requirement to furnish a notice of intended arrival shall not apply to private aircraft departing from Puerto Rico and conducting flight under instrument flight rules (IFR) until corssing the U.S. coastline or proceeding north of 30 degrees north latitude.

(c) *Contents of notice.* The advance notice of arrival shall include the following:

(1) Aircraft registration number;

(2) Name of aircraft commander;

(3) Number of U.S. citizen passengers;

(4) Number of alien passengers;

(5) Place of last departure;

(6) Estimated time and location of crossing U.S. border/coastline;

(7) Estimated time of arrival;

(8) Name of intended U.S. airport of first landing, as listed in § 122.24, unless an exemption has been granted under § 122.25, or the aircraft has not landed in foreign territory or is arriving directly from Puerto Rico, or the aircraft was inspected by Customs officers in the U.S. Virgin Islands.

§ 122.24 Landing requirements.

(a) *In general.* Private aircraft arriving in the U.S. from a foreign area shall follow the landing requirements set out in §§ 122.23 and 122.36.

(b) *Special requirements.* Private aircraft required to furnish a notice of intended arrival in compliance with § 122.23 shall land for Customs processing at the nearest designated airport to the border or coastline crosing point as listed in this paragraph unless exempted from this requirement in accordance with § 122.25. In addition to the requirement in accordance with § 122.25. In addition to the requirements of this section, private aircraft commanders must comply with all other landing and notice of arrival requirements. This requirement shall not apply to private aircraft which have not landed in foreign territory or are arriving directly from Puerto Rico or if the aircraft was inspected by Customs officers in the U.S. Virgin Islands.

§ 122.25 Exemption from special landing requirements.

(a) *Request.* Only companies principally headquartered in the U.S. or individuals principally residing in the U.S. that have operational control over U.S. registered aircraft required to give advance notice of arrival under § 122.23, may request an exemption from the special landing requirements in § 122.24. Exemptions are within the discretion of the district director and may allow aircraft to land at any airport in the U.S. staffed by Customs. Aircraft traveling under an exemption shall continue to follow advance notice and general landing rights requirements.

(b) *Procedure.* An exemption request shall be made to the district director at the airport at which the majority of Customs overflight processing is desired by the applicant. The request shall be submitted:

(1) At least 30 days before the anticipated first arrival if the request is for an exemption covering a number of flights over a period of one year; or

(2) At least 15 days before the anticipated arrival if the request is for a single flight.

(c) *Content of request.* A request for exemption from the special landing requirements shall be signed by an officer of the company or by the requesting individual and be notarized or witnessed by a Customs officer, and shall include the following information:

(1) Aircraft U.S. registration number(s) and manufacturer's serial number(s) for all aircraft owned or operated by the applicant that will be utilizing the overflight exemption;

(2) Identification information for each aircraft include class, manufacturer, type, number, color scheme, and type of engine (e.g., turbojet, turbofan, turboprop, reciprocating, helicopter, etc.);

(3) A statement that the aircraft is equipped with a functioning mode C (altitude reporting) transponder which will be in use during overflight, that the overflights will be made in accord with instrument flight rules (IFR), and that the overflights will be made at altitudes above 12,500 feet mean sea level (unless otherwise instructed by Federal Aviation Administration controllers);

(4) Name and address of the applicant operating the aircraft, if the applicant is a business entity, the address of the headquarters of the business (include state of incorporation if applicable), and the names, addresses, Social Security numbers, and dates of birth of the company officer or individual signing the application. If the aircraft is operated under a lease, include the name, address, Social Security number, and date of birth of the owner if an individual, or the address of the headquarters of the business (include state of incorporation if applicable), and the names, addresses, Social Security numbers, and dates of birth of the officers of the business;

(5) Individual, signed applications from each usual or anticipated pilot or crewmember for all aircraft for which an overflight exemption is sought stating name, address, Social Security number, Federal Aviation Administration certificate number, and place and date of birth;

(6) A statement from the individual signing the application, as specified in paragraph (c)(4) of this section, that the pilot(s) and crewmembers(s) responding to paragraph (c)(5) of this section are those intended to conduct overflights, and that to the best of the individual's knowledge, the information supplied in response to paragraph (c)(5) of this section is accurate;

(7) Names, addresses, Social Security numbers, and dates of birth for all usual or anticipated passengers. An approved passenger must be on board to utilize the overflight exemption.

Note.—Where the Social Security number is requested, furnishing of the SSN is voluntary. The authority to collect the SSN is 19 U.S.C. 66, 1433, 1459 and 1624. The primary purpose for requesting the SSN is to assist in ascertaining the identity of the individual so as to assure that only law-abiding persons will be granted permission to land at interior airports in the U.S. without first landing at one of the airports designated in § 122.24. The SSN will be made available to Customs personnel on a need-to-know basis. Failure to provide the SSN may result in a delay in processing of the application.

(8) Description of the usual or anticipated baggage or cargo if known, or the actual baggage or cargo;

(9) Description of the applicant's usual business activity;

(10) Name(s) of the airport(s) of intended first landing in the U.S. Actual overflights will only be permitted to specific approved airports.

(11) Foreign place or places from which flight(s) will usually originate; and

(12) Reasons for request for overflight exemption.

(d) *Procedure following exemption.* (1) If a private aircraft is granted an exemption from the landing requirement as provided in this section, the aircraft commander shall notify Customs at least 60 minutes before:

(i) Crossing into the U.S. over a point on the Pacific Coast north of 33 degrees north latitude; or

(ii) Crossing into the U.S. over a point of the Gulf of Mexico or Atlantic Coast north of 30 degrees north latitude; or

(iii) Crossing into the U.S. over the Southwestern land border (defined as the U.S.-Mexican border between Brownsville, Texas, and San Diego, California). Southwestern land border crossings must be made while flying in Federal Aviation Administration published airways.

(2) The notice shall be given to a designated airport specified in § 122.24. The notice may be furnished directly to Customs by telephone, radio, or other means, or may be furnished through the Federal Aviation Administration to Customs. If notice is furnished pursuant to this paragraph, notice pursuant to §§ 122.23 and 122.24 is unnecessary.

(3) All overflights must be conducted pursuant to an instrument flight plan filed with the Federal Aviation Administration prior to the commencement of the overflight.

(4) The owner or aircraft commander of a private aircraft granted an exemption from the landing requirement must:

(i) Notify Customs of a change of Federal Aviation Administration registration number for the aircraft;

(ii) Notify Customs of the sale, theft, modification, or destruction of the aircraft;

(iii) Notify Customs of changes of usual or anticipated pilots or crewmembers as specified in paragraph (c)(5) of this section. Every pilot and crewmember participating in an overflight must have prior Customs approval either through initial application and approval, or through a supplemental application submitted by the new pilot or crewmember and approved by Customs before commencment of the pilot's or crewmember's first overflight.

(iv) Request permission from Customs to conduct an overflight to an airport not listed in the initial overflight application as specified in paragraph (c)(10) of this section. The request must be directed to the district director who approved the initial request for an overflight exemption.

(v) Retain copies of the initial request for an overflight exemption, all supplemental applications from pilots or crewmembers, and all requests for additional landing privileges as well as a copy of the letter from Customs approving each of these requests. The copies must be carried on board any aircraft during the conduct of an overflight.

(vi) The notifications specified in this paragraph must be given to Customs within 5-working days of the change, sale, theft, modification, or destruction, or before a flight for which there is an exemption, whichever occurs earlier.

(e) *Inspection of aircraft having or requesting overflight exemption.* Applicants for overflight exemptions must agree to make the subject aircraft available for inspection by Customs to determine if the aircraft is capable of meeting Customs requirements for the proper conduct of overflight. Inspections may be conducted during the review of an initial application or at any time during the term of an overflight exemption.

§ 122.26 Entry and clearance.

Private aircraft, as defined in § 122.1(h), are not required to formally enter or to obtain formal clearance upon departure. However, entry and clearance requirements do apply to air charter and air taxi operators.

§ 122.27 Documents required.

(a) *Crewmembers and passengers.* Crewmembers and passengers on a private aircraft arriving in the U.S. shall make baggage declarations as set forth in Part 148 of this chapter. An oral declaration of articles acquired in foreign areas shall be made, unless a written declaration on Customs Form 6059–B is found necessary by inspecting officers.

(b) *Cargo.* (1) On arrival, cargo and unaccompanied baggage not carried for hire aboard a private aircraft may be listed on a baggage declaration on Customs Form 6059–B, and shall be entered. If the cargo or unaccompanied baggage is not listed on a baggage declaration, it shall be entered in the same manner as cargo carried for hire into the U.S.

(2) On departure, when a private aircraft leaves the U.S. carrying cargo not for hire, the Bureau of Census (15 CFR Part 30) and the Export Administration (15 CFR Parts 368 through 399) regulations and any other applicable export laws shall be followed. A foreign landing certificate or certified copy of a foreign Customs entry is required as proof of exportation if the cargo includes:

(i) Merchandise valued at more than $500.00; or

(ii) More than one case of alcoholic beverages withdrawn from a Customs bonded warehouse or otherwise in bond for direct exportation by private aircraft.

A foreign landing certificate, when required, shall be produced within six months from the date of exportation and shall be signed by a revenue officer of the foreign country to which the merchandise is exported, unless it is shown that the country has no Customs administration, in which case the certificate may be signed by the consignee or by the vessel's agent at the place of landing.

§ 122.28 Private aircraft taken abroad by U.S. residents.

An aircraft belonging to a resident of the U.S. which is taken to a foreign area for non-commercial purposes and then returned to the U.S. by the resident shall be admitted under the conditions and procedures set forth in § 148.32 of this chapter. Repairs made abroad, and accessories purchased abroad shall be included in the baggage declaration as required by § 148.32(c), and may be subject to entry and payment of duty as provided in § 148.32.

§ 122.29 Overtime services.

(a) *Application.* Private aircraft arriving in the U.S. and requiring Customs services to be performed outside the regular hours of duty are subject to overtime charges. The overtime charges to be assessed against the operator of a private aircraft in connection with each arrival are limited to a maximum of $25.

(b) *Procedures.* An application must be made on Customs Form 3171 to receive overtime services. The application shall be supported by a bond on Customs Form 301, containing the bond conditions set forth in Subpart G of Part 113 of this chapter, or a cash deposit, and may be effective up to one year. See § 24.16(c) of this chapter.

§ 122.30 Other Customs laws and regulations.

Sections 122.2 and 122.161 apply to private aircraft.

Subpart D—Landing Requirements

§ 122.31 Notice of arrival.

(a) *Application.* Except as provided in paragraph (b) of this section, all aircraft entering the U.S. from a foreign area shall give advance notice of arrival. When a private aircraft, as defined in § 122.23(a) of this part, enters the U.S. from a foreign area in the Western hemisphere south of the U.S., advance notice shall be given as provided in § 122.23. Aircraft arriving from Cuba shall follow the procedures set forth in Subpart O of this part.

(b) *Exceptions for scheduled aircraft of a scheduled airline.* Advance notice is not required for aircraft of a scheduled airline arriving under a regular schedule. The regular schedule shall have been filed with the district director for the district in which the first landing is made. Scheduled airlines shall also submit a copy of their schedules to the regional commissioner of the region in which the scheduled aircraft will land. This notice shall be given 30 days before the effective date of the schedule.

(c) *Giving notice of arrival*—(1) *Procedure.* The commander of an aircraft covered by this section shall give the advance notice of arrival. Notice shall be given to the district director at or nearest the place of first landing, either:

(i) Directly by radio, telephone, or other method; or

(ii) Through Federal Aviation Administration flight notification procedure (see International Flight Information Manual, Federal Aviation Administration).

(2) *Reliable facilities.* When reliable means for giving notice are not available (for example, when departure is from a remote place) a landing shall be made at a place where notice can be sent prior to coming into the U.S.

(d) *Contents of notice.* The advance notice of arrival shall include the following information:

(1) Type of aircraft and registration number;

(2) Name of aircraft commander;

(3) Place of last foreign departure;

(4) International airport of intended landing or other place at which landing has been authorized by Customs;

(5) Number of alien passengers;

(6) Number of citizen passengers; and

(7) Estimated time of arrival.

(e) *Time of notice.* Notice of arrival shall be furnished far enough in advance to allow inspecting officers to reach the place of first landing of the aircraft.

(f) *Notice of other Federal agencies.* When advance notice is received, the district director shall inform any other concerned Federal agency.

§ 122.32 Aircraft required to land.

Any aircraft coming into the U.S., including Puerto Rico, from an area outside the U.S., is required to land, unless exempted by the Federal Aviation Administration.

§ 122.33 Place of first landing.

The first landing of an aircraft entering the U.S. from a foreign area shall be at an international airport (see § 122.13, International airports). Permission to land at another place may be given under § 122.34 (Landing rights airport) or § 122.35 (Emergency or forced landing).

§ 122.34 Landing rights airport.

(a) *Permission to land.* Permission to land at a landing rights airport may be given as follows:

(1) *Scheduled flight.* The scheduled aircraft of a scheduled airline may be allowed to land at a landing rights airport. Permission is given by the regional commissioner, or his representative, of the region in which first landing is made.

(2) *Other aircraft.* All other aircraft may be allowed to land at a landing rights airport by the district director at the port of entry or station nearest the first place of landing.

(3) *Additional flights, charters or changes in schedule*—(i) *Scheduled aircraft.* If a new carrier plans to set up a new flight schedule, or an established carrier makes changes in its approved schedule, landing rights may be granted by the regional commissioner.

(ii) *Additional or charter flight.* If a carrier or charter operator wants to begin operating or to add flights, application shall be made to the district director for landing rights. All requests shall be made not less than 48 hours before the intended time of arrival, except in emergencies. If the request is oral, it shall be put in writing before or at the time of arrival.

(4) *Emergency or forced landing.* Permission to land is not required for an emergency or forced landing (see § 122.35).

(b) *Notice to Federal agencies.* If an aircraft is given permission to land at a landing rights airport, the Customs officer who granted the landing rights shall notify the Public Health Service, the Immigration and Naturalization Service, the Animal and Plant Health Inspection Service, and any other interested Federal agency at once.

(c) *Payment of expenses.* The owner, operator or person in charge of the aircraft shall pay any added charges for inspecting the aircraft, passengers, employees and merchandise when landing rights are given. When permission to land is given to scheduled aircraft of a scheduled airline, no inspection charge is made except for the overtime expenses of Customs officers. (see § 24.16 of this chapter).

§ 122.35 Emergency or forced landing.

(a) *Application.* This section applies to emergency or forced landings made by aircraft when necessary for safety or the preservation of life or health, when such aircraft are:

(1) Travelling from airport to airport in the U.S. under a permit to proceed (see §§ 122.52, 122.54 and 122.83(d)), or a Customs Form 7509 (see § 122.113); or

(2) Coming into the U.S. from a foreign area.

(b) *Notice.* When an emergency or forced landing is made, notice shall be given:

(1) To the Customs officer at the intended place of first landing, nearest international airport, or nearest port entry, as soon as possible;

(2) By the aircraft commander, other person in charge, or aircraft owner, who shall make a full report of the flight and the emergency or forced landing.

(c) *Passengers and crewmembers.* The aircraft commander or other person in charge shall keep all passengers and crewmembers in a separate place at the landing area until Customs officers arrive. Passengers and crewmembers may be removed if necessary for safety, or for the purpose of contacting Customs.

(d) *Merchandise and baggage.* The aircraft commander or other person in charge shall keep all merchandise and baggage together and unopened at the landing area until Customs officers arrive. The merchandise and baggage may be removed for safety or to protect property.

(e) *Mail.* Mail may be removed from the aircraft, but shall be delivered at once to an officer or employee of the Postal Service.

§ 122.36 Responsibility of aircraft commander.

If an aircraft lands in the U.S. and Customs officers have not arrived, the aircraft commander shall hold the aircraft, and any merchandise or baggage on the aircraft for inspection. Passengers and crewmembers shall be kept in a separate place until Customs officers authorize their departure.

§ 122.37 Precleared aircraft.

(a) *Application.* This section applies when aircraft carrying crew, passengers and baggage, or merchandise which has been precleared pursuant to § 148.22 of this chapter at a location listed in § 101.5 of this chapter and makes an unscheduled or unintended landing at an airport in the U.S.

(b) *Notice.* The aircraft commander or agent shall give written notice to the Customs office at:

(1) The intended place of unlading; and

(2) The place of preclearance.

(c) *Time of notice.* Notice shall be given within 7 days of the unscheduled or unintended landing unless other arrangements have been made in advance between the carrier and the district director.

§ 122.38 Permit and special license to unlade and lade.

(a) *Applicability.* Before any passengers, baggage, or merchandise may be unladen or laden aboard on arrival or departure of an aircraft subject to these regulations, a permit and/or special license to unlade or lade shall be obtained from Customs.

(1) *Permit to unlade or lade.* A permit is required to obtain Customs supervision of unlading and lading during official Customs duty hours.

(2) *Special license to unlade or lade.* A special license is required to obtain Customs supervision of unlading and lading at any time not within official Customs duty hours (generally, at night, Sundays or holidays).

(b) *Authorization required.* A permit or special license shall be required for each arrival and departure unless a term permit or special license has been granted. No permit or special license shall be issued unless the carrier complies with the terminal facilities and employee list requirements of § 4.30 of this chapter.

(c) *Term permit or special license.* A term permit or special license may be issued covering all arrivals and departures during a period of up to one year, providing local arrangements have been made to notify Customs before services are needed. The notice shall specify the kinds of services requested, and the exact times they will be needed. No term permit or special license shall be issued, and any term permit or special license already issued shall be revoked, unless the carrier complies with the terminal facilities and employee list requirements of § 4.30 of this chapter.

(d) *Procedures.* The application for a permit and special license to unlade or lade shall be made by the owner, operator, or agent for an aircraft on Customs Form 3171, and shall be submitted to the district director for the district in which the unlading and lading will take place. The application shall be accompanied by a bond on Customs Form 301, containing the bond conditions set forth in Subpart G of Part 113 of this chapter, or a cash deposit, unless this requirement is waived under paragraph (e) of this section.

(e) *Waiver of bond.* To insure prompt and orderly clearance of the aircraft, passengers, baggage, or merchandise, the district director may waive the requirement under paragraph (d) of this

section that either a bond or a cash deposit be made, if he is convinced the revenue is protected and that all Customs requirements are satisfied.

(f) *Automatic renewal of term permit or special license.* Automatic renewal of a term permit or special license may be requested by the owner, operator, or agent for an aircraft when a bond on Customs Form 301 containing the appropriate bond conditions set forth in Subpart G of Part 113 of this chapter is on file. The request shall be for successive annual periods which conform to the automatic renewal periods of the bond. An application will be approved by the district director unless specific reasons exist for denial. If a request for automatic renewal is not approved, the district director shall notify the requestor, and shall state the reasons for the denial. To apply for automatic renewal, item 10 on Customs Form 3171 shall be changed by adding the following words after the period of time indicated: "And automatic annual renewal thereof for so long as the bond is renewed and remains in effect."

Subpart E—Aircraft Entry and Entry Documents

§ 122.41 Aircraft required to enter.

All aircraft coming into the U.S. from a foreign area shall make entry under Subpart E except:

(a) Public and private aircraft; and

(b) Aircraft traveling from airport to airport in the U.S. under Subpart I, relating to residue cargo procedures.

§ 122.42 Aircraft entry.

(a) *By whom.* Entry shall be made by the aircraft commander or an agent.

(b) *Place of entry*—(1) *First landing at international airport.* Entry shall be made at the international airport at which first landing is made.

(2) *First landing at another airport.* If the first landing is not at international airport pursuant to §§ 122.34 or 122.35, the aircraft commander or agent shall make entry at the nearest international airport or port of entry, unless some other place is allowed for the purpose.

(c) *Delivery of forms.* When the aircraft arrives, the aircraft commander or agent shall deliver any required forms to the Customs officer at the place of entry at once.

(d) *Exception to entry requirement.* Except for flights to Cuba (provided for in Subpart O of this part), an aircraft of a scheduled airline which stops only for refueling at the first place or arrival in the U.S. shall not be required to enter provided:

(1) That such aircraft departs within 24 hours after arrival;

(2) No cargo, crew, or passengers are off-loaded; and

(3) Landing rights at that airport as either a regular or alternate landing place shall have been previously secured.

§ 122.43 General declaration.

(a) *When required.* A general declaration, Customs Form 7507, shall be filed for all aircraft required to enter under § 122.41 (Aircraft required to enter).

(b) *Exception.* Aircraft arriving directly from Canada on a flight beginning in Canada and ending in the U.S. need not file a general declaration to enter. Instead, an air cargo manifest (see § 122.48) may be filed in place of the general declaration, regardless of whether cargo is on board. The air cargo manifest shall state the following:

> I certify to the best of my knowledge and belief that this manifest contains an exact and true account of all cargo on board this aircraft.
>
> Signature ______________________
>
> (Aircraft Commander or Agent)

(c) *Form.* The general declaration shall be on Customs Form 7507 or on a privately printed form prepared under § 122.5. The form shall contain all required information, unless the information is given is some other manner under Subpart E of this part.

§ 122.44 Crew baggage declaration.

If an aircraft enters the U.S. from a foreign area, aircraft crewmembers shall file a crew baggage declaration as provided in Subpart G, Part 148 of this chapter.

§ 122.45 Crew list.

(a) *When required.* A crew list shall be filed by all aircraft required to enter under § 122.41.

(b) *Exception.* No crew list is required for aircraft arriving directly from Canada on a flight beginning in Canada and ending in the U.S. Instead, the total number of crewmembers may be shown on the general declaration.

(c) *Form.* The crew list shall show the full name (last name, first name, middle initial) of each crewmember, either:

(1) On the general declaration in the column headed "Total Number of Crew"; or

(2) On a separate, clearly marked document.

(d) *Crewmembers returning as passengers.* Crewmembers of any aircraft returning to the U.S. as passengers on a commercial aircraft from a trip on which they were employed as crewmembers shall be listed on the aircraft general declaration or crew list.

§ 122.46 Crew purchase list.

(a) *When required.* A crew purchase list shall be filed with the general declaration for any aircraft required to enter under § 122.41.

(b) *Exception.* A crew purchase list is not required for aircraft arriving directly from Canada on a flight beginning in Canada and ending in the U.S. If a written crew declaration is required for the aircraft under Subpart G of Part 148 of this chapter (Crewmember Declarations and Exemptions), it shall be attached to the air cargo manifest, along with the number of any written crew declarations.

(c) *Form.* If a crewmember enters articles for which a written crew declaration is not required (see Subpart G, Part 148 of this chapter), the articles shall be listed next to the crewmember's name on the general declaration, or on the attached crew purchase list. Articles listed on a written crew declaration need not be listed on the crew purchase list if:

(1) The crew declaration is attached to the general declaration, or to the crew list which in turn is attached to the general declaration; and

(2) The statement "Crew purchases as per attached crew declaration" appears on the general declaration or crew list.

§ 122.47 Stores list.

(a) *When required.* A stores list shall be filed for all aircraft required to enter under § 122.41.

(b) *Form.* The aircraft stores shall be listed on the cargo manifest or on a separate list. If the stores are listed on a separate list, the list must be attached to the cargo manifest. The statement "Stores List Attached" must appear on the cargo manifest.

(c) *Contents*—(1) *Required listing.* The stores list shall include all of the following:

(i) Alcoholic beverages, cigars, cigarettes and narcotic drugs, whether domestic or foreign;

(ii) Bonded merchandise arriving as stores;

(iii) Foreign merchandise arriving as stores; and

(iv) Equipment which must be licensed by the Secretary of State (see § 122.48(b)).

(2) *Other articles.* In the case of aircraft of scheduled airlines, other domestic supplies and equipment (if not subject to license) and fuel may be dropped from the stores list if the statement "Domestic supplies and equipment and fuel for immediate flight only, except as noted" appears on the cargo manifest or on the separate stores

list. The stores list shall be attached to the cargo manifest.

(d) *Other statutes.* Section 446, Tariff Act of 1930, as amended (19 U.S.C. 1446), which covers supplies and stores kept on board vessels, applies to aircraft arriving in the U.S. from any foreign area.

§ 122.48 Air cargo manifest.

(a) *When required.* An air cargo manifest for all cargo on board shall be filed together with the general declaration for any aircraft required to enter under § 122.41.

(b) *Exception.* A cargo manifest is not required for merchandise, baggage and stores arriving from and departing for a foreign country on the same through flight. Any cargo manifest already on board may be inspected. All articles on board which must be licensed by the Secretary of State shall be listed on the cargo manifest. Company mail shall be listed on the cargo manifest.

(c) *Form.* The cargo manifest shall be on Customs Form 7509. The form shall contain all required information, except that a more complete description of the cargo shipped under air waybills may be provided by attaching a copy of each master air waybill and, if a consolidated shipment, copies of the house air waybills to the cargo manifest. The statement "Cargo as per air waybills attached" shall appear on the cargo manifest when this is done. Each air waybill number shall also be listed on the cargo manifest.

(d) *Unaccompanied baggage.* Unaccompanied baggage arriving in the U.S. under a check number from any foreign country by air and presented timely to Customs may be authorized for delivery by the carrier after inspection and examination without preparation of an entry, declaration, or being manifested as cargo. Such baggage must be found to be free of duty or tax under any provision of Schedule 8, Tariff Schedules of the United States (19 U.S.C. 1202), and cannot be restricted or prohibited. Unaccompanied checked baggage not presented timely to Customs or presented timely and found by Customs to be dutiable, restricted, or prohibited may be subject to seizure. Such unaccompanied checked baggage shall be added to the cargo list in columns under the following headings:

Check No.	Description	Where from	Destination	Name of examining officer	Disposition

The two columns, headed "Name of examining officer" and "Disposition," are provided on the cargo manifest for the use of Customs officers. Unaccompained unchecked baggage arriving as air express or freight shall be manifested as other air express or freight.

(e) *Accompanied baggage in transit.* This section applies when accompaned baggage enters into the U.S. in one aircraft and leaves the U.S. in another aircraft. When passengers do not have access to their baggage while in transit through the U.S., the baggage is considered cargo and shall be listed on Customs Form 7509, Air Cargo Manifest.

§ 122.49 Correction of air cargo manifest or air waybill.

(a) *Shortages*—(1) *Reporting.* Shortages (merchandise listed on the manifest or air waybill but not found) shall be reported to the district director by the aircraft commander or agent. The report shall be made:

(i) On a Customs Form 5931, filled out and signed by the importer and the importing or bonded carrier; or

(ii) On a Customs Form 5931, filled out and signed by the importer alone under § 158.3 of this chapter; or

(iii) On a copy of the cargo manifest, which shall be marked "Shortage Declaration," and must list the merchandise involved and the reasons for the shortage.

(2) *Time to file.* Shortages shall be reported within the time set out in Part 158 of this chapter, or within 30 days of aircraft entry.

(3) *Evidence.* The aircraft commander or agent shall supply proof of the claim that:

(i) Shortage merchandise was not imported, or was properly disposed of; or

(ii) That corrective action was taken. This proof shall be kept in the carrier file for one year from the date of aircraft entry.

(b) *Overages*—(1) *Reporting.* Overages (merchandise found but not listed on the manifest or air waybill) shall be reported to the district director by the aricraft commander or agent. The report shall be made.

(i) On a Customs Form 5931; or

(ii) On a separate copy of the cargo manifest which is marked "Post Entry" and lists the overage merchandise and the reason for the overage.

(2) *Time to file.* Overages shall be reported within 30 days of aircraft entry.

(3) *Evidence.* Satisfactory proof of the reasons for the overage shall be kept on file by the carrier for one year from the date of the report.

(c) *Statement on cargo manifest.* If the air cargo manifest is used to report shortages or overages, the Shortages Declaration or Post Entry must include the signed statement of the aircraft commander or agent as follows:

> I declare to the best of my knowledge and belief that the discrepancy described herein occurred for the reason stated. I also certify that evidence to support the explanation of the discrepancy will be retained in the carrier's files for a period of at least one year and will be made available to Customs on demand.
>
> Signature ______________________
>
> (Aircraft Commander or Agent)

(d) *Notice by district director.* The district director shall immediately notify the aircraft commander or agent of any shortages or overages that were not reported by the aircraft commander or agent. Notice shall be given by sending a copy of Customs Form 5931 to the aircraft commander or agent, or in any other appropriate way. The aircraft commander or agent shall make a satisfactory reply within 30 days of entry of the aircraft or receipt of the notice, whichever is later.

(e) *Correction not required.* A correction in the manifest or air waybill is not required if:

(1) The district director is satisfied that the difference between the quantity of bulk merchandise listed on the manifest or air waybill, and the quantity unladen, is the usual difference caused by absorption or loss of moisture, temperature, faulty weighing at the airport, or other such reason; and

(2) The marks or numbers on merchandise packages are different from the marks or numbers listed on the cargo manifest for those packages if the quantity and description of the merchandise is given correctly.

(f) *Statutes applicable.* If an aircraft arrives in the U.S. from a foreign area with merchandise and unaccompained baggage for which a manifest or air waybill must be filed, sections 440 (concerning post entry) and 584 (concerning manifest violations), Tariff Act of 1930, as amended (19 U.S.C. 1440, 1584), apply.

Subpart F—International Traffic Permit

§ 122.51 Aircraft of domestic origin registered in the U.S.

After Customs inspection of the aircraft, passengers, baggage and merchandise at the entry airport, commercial aircraft of domestic origin registered in the U.S. may be allowed to proceed to other airports in the U.S. without permit.

§ 122.52 Aircraft of foreign origin registered in the U.S.

(a) *Application.* This section applies to commercial aircraft (as defined in § 122.1(d)) of foreign origin registered in the U.S. and arriving in the U.S. from a foreign area.

(b) *Aircraft entered as an imported article.* If an aircraft covered by this section is entered as an imported article, and any applicable duty for the aircraft has been paid on a prior arrival, it may be allowed to proceed as other than an imported article. In this instance, the aircraft commander must file a declaration that states the:

(1) Port where entry was made;

(2) Date duty, if any, was paid; and

(3) Number of the entry.

(c) *Aircraft not entered as imported article*—(1) *Treatment as other than an imported article.* A commercial aircraft covered by this section which has not been entered as an imported article may travel from airport to airport in the U.S. without payment of duty. Each commercial aircraft shall proceed under a permit on Customs Form 7507 or 7509, as provided in § 122.54. Treatment of the aircraft as other than an imported article shall continue for so long as the aircraft:

(i) Is used only for commercial purposes between the U.S. and foreign areas; and

(ii) Will leave the U.S. for a foreign destination in commercial use or carrying neither passengers nor cargo.

(2) *Treatment as an imported article.* Any aircraft covered by this section which was not entered as an imported article shall make entry if it:

(i) Is withdrawn from commercial use between the U.S. and foreign areas; or

(ii) Is used in the U.S. in a way not reasonably related to efficient commercial use of the aircraft between the U.S. and foreign areas.

(3) *Aircraft damage and duty payment*—(i) *Substantial damage to commercial aircraft.* If an accident causes substantial damage to a commercial aircraft, no entry or duty payment is required for any part of the wreckage.

(ii) *Less than substantial damage and export.* If an accident does not cause substantial damage to a commercial aircraft, salvageable parts of the wrecked aircraft may be exported. In this circumstance, the aircraft, as a whole or in part, is not considered to be withdrawn from commerical use and is not subject to entry or to duty as imported merchandise.

(iii) *Less than substantial damage and no export.* If an accident does not cause substantial damage to a commercial aircraft and the wrecked aircraft or any salvageable part of it is not exported, then:

(A) Entry is required to be made for the damaged aircraft or any salvageable part of it; and

(B) A duty payment, if applicable, based on the condition of the aircraft following the accident, is required.

§ 122.53 Aircraft of foreign registry chartered or leased to U.S. air carriers.

Aircraft of foreign registry leased or chartered to a U.S. air carrier, while being operated by the U.S. air carrier under the provisions of the Federal Aviation Administration regulations (14 CFR 121.153), shall be treated as U.S. registered aircraft for purposes of this subpart.

§ 122.54 Aircraft of foreign registry.

(a) *Application.* For any commercial aircraft of foreign registry arriving in the U.S., the aircraft commander or agent shall file for an international traffic permit when the aircraft;

(1) Is not an imported article; and

(2) Is ferried (proceeds carrying neither passengers nor cargo) from the airport of first arrival to one or more airports in the U.S. (For permit to proceed with residue cargo, passengers, or crewmembers for discharge in the U.S., see Subpart I of this part).

(b) *International traffic permit.* The international traffic permit shall be filed on Customs Form 7507 by the carrier or its agent. Customs Form 7509 may be used if the aircraft arrives directly from Canada on a flight beginning in Canada and ending in the U.S. Either form shall show the following information and must be approved by the appropriate Customs officer:

(1) Type of aircraft;

(2) Nationality and registration number of aircraft;

(3) Name and country of aircraft manufacturer;

(4) Name of aircraft commander;

(5) Country from which aircraft arrived;

(6) Name and location of airport where international traffic permit is issued;

(7) Date international traffic permit is issued;

(8) Name and location of airport to which aircraft is proceeding;

(9) Purpose of stay in the U.S.;

(10) Signature of Customs officer giving permit.

(c) *Permit on board.* The international traffic permit shall be kept on board the aircraft while in the U.S.

(d) *Intermediate airports.* For each airport at which the aircraft lands, the Customs officer, or airport manager if there is no Customs officer present, shall note the following information on the permit:

(1) Name and location of the airport;

(2) Date and arrival time;

(3) Purpose of the visit;

(4) Name and location of the next airport to be visited; and

(5) Date and time of departure.

(e) *Final airport.* The international traffic permit shall be given to the Customs officer in charge at the airport of final clearance for a foreign destination. Before clearance is given, the Customs officer shall make sure that the aircraft was properly inspected by Customs in the U.S.

(f) *Port of issue.* The international traffic permit shall be returned after final clearance to the district director at the port where the permit was issued, to be kept on file.

(g) *Enforcement.* Once the permit to proceed has been issued for an aircraft, the district director at the port of issue must receive notice that the aircraft has made final clearance. If notice is not received within 60 days, the district director shall report the matter to the Customs agent in charge of the area for investigation.

Subpart G—Clearance of Aircraft and Permission To Depart

§ 122.61 Aircraft required to clear.

(a) All aircraft, except public and private aircraft, leaving the U.S. for a foreign area are required to clear if:

(1) Carrying passengers and/or merchandise for hire; or

(2) Taking aboard or discharging passengers and/or merchandise for hire in a foreign area.

(b) Any aircraft used by members of air travel clubs are required to clear, and foreign aircraft traveling under a permit to proceed shall also clear.

§ 122.62 Aircraft not otherwise required to clear.

(a) *Bureau of the Census.* Under Bureau of the Census Regulations (15 CFR 30.1), aircraft not required to clear by § 122.61 shall obtain permission to depart if carrying merchandise from the U.S. to Puerto Rico or from Puerto Rico to the U.S.

(b) *Office of Export Administration.* Aircraft leaving the U.S. for a foreign area must be cleared by Customs if a validated license from the Office of Export Administration (Department of Commerce) is required for the aircraft under the Export Control Regulations (15 CFR Part 370). Aircraft are not required to clear if the Secretary of Commerce issues a permit allowing departure without clearance.

(c) *Department of State.* Aircraft not covered by Export Control Regulations are subject to the Department of State export licensing authority as set out in 22 CFR Parts 121 and 123. Such aircraft may depart from the U.S. only with the proper Department of State license.

§ 122.63 Scheduled airlines.

The aircraft commander or agent shall request clearance or permission to depart for aircraft of scheduled airlines covered by this subpart.

(a) *Clearance at other than airport of final departure.* Aircraft may clear at each airport where merchandise and/or passengers are taken on board for transport outside of the U.S. The clearance applies only to the merchandise and passengers boarding at each place. Clearance shall be requested at the Customs port of entry (regardless of whether it is an international airport) nearest to the place where merchandise and/or passengers are taken on board.

(b) *Clearance at final departure airport.* Clearance or permission to depart may be requested at the Customs port of entry (regardless of whether it is an international airport) nearest the last departure airport, unless some other place is designated by the district director at that port.

§ 122.64 Other aircraft.

Clearance or permission to depart shall be requested by the aircraft commander or agent for aircraft covered by this subpart other than those of scheduled airlines. The request must be made to the district director at the Customs port of entry (regardless of whether it is an international airport) nearest the final departure airport, unless some other place is designated by the district director

§ 122.65 Failure to depart.

Once an aircraft has been cleared or given permission to depart it must depart within 72 hours. The aircraft commander or agent shall report promptly to the district director if departure is delayed beyond or cancelled within 72 hours after the aircraft received clearance or permission to depart.

Subpart H—Documents Required for Clearance and Permission to Depart

§ 122.71 Aircraft departing with no commercial export cargo.

(a) *Application.* This section applies to aircraft departing for foreign territory with no export cargo, but not to those aircraft which are themselves being exported.

(1) Such aircraft may clear by telephone in advance with the district director nearest the departure place if departing empty or carrying only:

(i) Passengers for hire; or

(ii) Non-commercial cargo for which Shipper's Export Declarations are not required.

(2) If not cleared by telephone, an air cargo manifest containing the following statement, signed by the aircraft commander or agent, shall be submitted to Customs:

I declare to the best of my knowledge and belief that there is no cargo on board this aircraft.

Signature ______________________________

(Aircraft Commander or Agent)

(b) *Timeliness.* The request for telephone clearance must be received by the Customs officer in charge with sufficient time remaining before departure to ensure that Customs may undertake any necessary examination of the aircraft and cargo.

(c) *Documentation.* If clearance is granted by telephone, the aircraft commander is not required to file the documents required by this subpart.

§ 122.72 Aircraft departing with commercial export cargo.

If an aircraft with export cargo leaves the U.S. for any foreign area, a general declaration, if required, an air cargo manifest and any required Shipper's Export Declarations, shall be filed in accordance with this subpart for all cargo on the aircraft, and for the aircraft itself if exported as merchandise. See § 122.79 for special requirements regarding shipments to U.S. possessions.

§ 122.73 General declaration and air cargo manifest.

(a) *General declaration*—(1) *Form.* The general declaration shall be on Customs Form 7507 and shall show all information required.

(2) *Preparation and filing.* The aircraft commander or agent shall file two copies of the general declaration with the district director at the departure airport.

(3) *Exception.* A general declaration shall not be required if the air cargo manifest, Customs Form 7509, contains the statement shown in paragraph (b) of this section.

(b) *Air cargo manifest.*

(1) *Form.* The air cargo manifest shall be on Customs Form 7509, and shall show all information required. If a general declaration is not presented, the following statement, signed by the aircraft commander or agent, shall appear on the form:

I declare that all statements contained in this manifest, including the account of the cargo on board this aircraft, are complete, exact, and true to the best of my knowledge.

Signature ______________________________

(Aircraft Commander or Agent)

(2) *Preparation and filing.* The aircraft commander or agent shall file two copies of the air cargo manifest with the district director or the departure airport. Three copies of the air cargo manifest shall be filed if the aircraft is covered by § 122.77(b). The air cargo manifest must be filed in:

(i) Complete form, with all required Shipper's Export Declarations (see § 122.75); or

(ii) Incomplete form (pro forma) under § 122.74.

§ 122.74 Incomplete (pro forma) manifest.

(a) *Application.* Clearance or permission to depart may be given to an aircraft by the district director before a complete manifest or all required Shipper's Export Declarations have been filed, if a proper bond is filed on Customs Form 301, containing the bond conditions set forth in Subpart G of Part 113 of this chapter, except for aircraft bound for locations referred to in paragraph (b) of this section.

(b) *Exceptions.* An incomplete manifest will not be accepted:

(1) During any time covered by a proclamation of the President that a state of war exists between foreign nations; or

(2) If the aircraft is departing on a flight from the U.S. directly or indirectly to a foreign country listed in § 4.75 of this chapter.

In both cases, a complete air cargo manifest and all required Shipper's Export Declarations shall be filed with the district director before the aircraft will be cleared.

(c) *Filing under bond.* An incomplete set of documents may be filed only when accompanied by the proper bond. Under the bond, a complete set of documents shall be filed within whichever of the following time periods is appropriate:

(1) *Shipments to foreign countries.* All required Shipper's Export Declarations and a complete air cargo manifest shall be filed by the airline not later than the fourth business day after clearance (when clearance is required) or departure (when clearance is not required) of the aircraft.

(2) *Shipments to and from Puerto Rico.* For shipments between the U.S. and Puerto Rico, the complete manifest (when required) and all Shipper's Export Declarations shall be filed by the airline not later than the seventh business day after departure.

(3) *Shipments to U.S. possessions.* For shipments between the U.S. or Puerto Rico and possessions of the U.S., a complete manifest and all required Shipper's Export Declarations shall be filed by the airline not later than the seventh business day after departure. See § 122.79.

(d) *Declaration required.* A declaration shall be made on the incomplete manifest that:

(1) All required documents will be filed within the 4-day bond period; or

(2) All required documents will be filed within the 7-day bond period.

Once all documents have been filed, a statement as required by § 122.75(b) shall be made.

§ 122.75 Complete manifest.

(a) *Contents.* A complete air cargo manifest shall list all cargo laden, and show for each item the air waybill number, or marks and numbers on packages and the type of goods carried. If an item does not requires a Shipper's Export Declaration, it shall be noted on the air cargo manifest.

(1) *Shipments on an air waybill.* A copy of each air waybill on which shipments are listed may be attached to the air cargo manifest, and the number of the air waybill may be listed on the air cargo manifest. The statement "Cargo as per Air Waybill Attached" must appear on the air cargo manifest if this is done.

(2) *Direct departure.* This subsection applies only to direct departures of shipments requiring a Shipper's Export Declaration. A copy of each declaration may be attached to the air cargo manifest, and the number of each declaration shall be listed on the air cargo manifest in the column for air waybill numbers. The statement "Cargo as per export Declarations Attached" must appear on the manifest if this is done.

(b) *Statement required.* (1) When all required documents are ready for filing, the following statement must appear on the air cargo manifest, or on the general declaration form if an air cargo manifest is not required:

Attached Shipper's Export Declarations represent a full and complete enumeration and description of the cargo carried in this flight except that listed on the cargo manifest.

(2) If an incomplete set of documents has been filed and is later completed, the following statement shall accompany the Shipper's Export Declarations and any required air cargo manifests:

Attached Shipper's Export Declarations represent a full and complete enumeration and description of the cargo carried on aircraft No. ________, Flight No. ________ cleared direct for ________, on ________ except cargo listed on any cargo manifest required to be filed for such flight.

Airline ______________________________

Authorized Agent ______________________________

§ 122.76 Shipper's Export Declarations and inspection certificates.

At the time of clearance, the aircraft commander or agent shall file with the district director at the departure airport any Shipper's Export Declarations required by the Bureau of Census (see § 122.62(a)). The aircraft commander or authorized agent also shall deliver a proper export inspection certificate issued by the Veterinary Service, Animal and Plant Inspection Service, Department of Agriculture (9 CFR Part 91), to the Customs officer in charge at the time of departure of any aircraft carrying horses, mules, asses, cattle, sheep, swine or goats.

§ 122.77 Clearance certificate.

(a) *Aircraft departing from the U.S.* One copy of the air cargo manifest shall be used as a clearance certificate when endorsed by the district director to show that clearance is granted.

(b) *Scheduled aircraft.* If a scheduled aircraft clears at an airport which is not the airport at or nearest the place of final take-off from the U.S., two copies of the air cargo manifest shall be filed. One copy shall be used as a clearance certificate when endorsed at the port by the district director at the port where clearance is obtained, and the second copy shall be attached to the first for use at subsequent U.S. ports.

§ 122.78 Entry or withdrawal for exportation or for transportation and exportation.

If a shipment is exported under an entry or withdrawal for exportation, or for transportation and exportation, the air cargo manifest, the air waybill, or the consignment note attached to the manifest shall clearly show the following information for each entry or withdrawal:

(a) Number;

(b) Date; and

(c) Class of entry or withdrawal, as follows:

(1) Transportation and exportation;

(2) Withdrawal for transportation and exportation;

(3) Immediate exportation;

(4) Withdrawal for exportation; or

(5) Withdrawal for transportation.

The name of the port where the entry or withdrawal was filed, if not the port where the merchandise is laden for exportation, shall also appear on the air cargo manifest.

§ 122.79 Shipments to U.S. possessions.

(a) *Other than Puerto Rico.* An air cargo manifest shall be filed for aircraft transporting cargo between the U.S. and U.S. possessions. Shipper's Export Declarations are not required for shipments from the U.S. or Puerto Rico to the U.S. possessions, except to the U.S. Virgin Islands or from a U.S. possession and destined to the U.S., Puerto Rico, or another U.S. possession.

(b) *Puerto Rico.* This subsection applies when an aircraft carries merchandise on a direct flight between the U.S. and Puerto Rico. If the requirements contained in Subpart I, relating to residue cargo procedures, have been satisfied, an air cargo manifest is required only for:

(1) Merchandise transported as cargo for which a Shipper's Export Declaration is not required; or

(2) Cargo for which a Shipper's Export Declaration cannot be filed on time. (See 15 CFR 30.21).

Any required air cargo manifest or Shipper's Export Declarations shall be filed with the district director at the point of departure.

§ 122.80 Verification of statement.

Customs officers may verify any of the statements required under this subpart by examining the shipping records of the airline involved.

Subpart I—Procedures for Residue Cargo and Stopover Passengers

§ 122.81 Application.

(a) *Aircraft arriving with cargo.* Aircraft arriving in the U.S. from a foreign area with cargo shown on the manifest to be traveling to other airports in the U.S. or to foreign areas may proceed under the provisions of this subpart.

(b) *Aircraft arriving with no cargo.* Aircraft arriving in the U.S. from a foreign area with no cargo on board, and requesting immediate examination and release, may proceed if a bond on Customs Form 301, containing the bond conditions set forth in Subpart G of Part 113 of this chapter, has been filed and covers the aircraft.

§ 122.82 Bond requirements.

A bond on Customs Form 301, containing the bond provisions set forth in Subpart G of Part 113 of this chapter, shall be filed before an aircraft is given a permit to proceed with residue cargo under this subpart. The bond shall be filed in the correct amount with the district director at the entry airport.

§ 122.83 Forms required.

(a) *Traveling general declaration and manifest.* When applying for examination and release from an airport or place of entry in the U.S., the aircraft commander or agent shall file a traveling general declaration and manifest. The traveling general declaration and manifest is one certified copy of the original inward general declaration, and each air cargo manifest required when the aircraft entered. This includes air waybills that were part of the manifest.

(b) *Attachments to traveling general declaration and manifest*—(1) *Crew purchase and stores list.* The crew purchase and stores list, if required when the aircraft enters under §§ 122.46 and 122.47, shall be attached to the traveling general declaration and manifest.

(2) *Crew purchases not listed on a crew purchase list.* A crew member's declaration shall be attached to the traveling general declaration and manifest if:

(i) Crew purchases are listed on a crew declaration, Customs Form 5129, instead of on the crew purchase list, under § 122.46(c)(2); and

(ii) The crew member has not left the aircraft with his or her purchase at the first entry port.

The crew member's declaration must be attached at the port where the articles listed on the declaration receive clearance.

(c) *Abstract general declaration and manifest.* The abstract general declaration and manifest shall consist of one copy of the general declaration, and one copy of each manifest (including air waybills) covering residue cargo:

(1) Not yet examined and released by Customs or any other Federal agency; and

(2) To be discharged at another domestic or foreign airport.

An abstract general declaration and manifest need not be filed at the last domestic port of discharge.

(d) *Permit to proceed.* A permit to proceed from one domestic airport to another shall be filed by the aircraft commander or agent with the Customs officer in charge at the clearance airport. The permit to proceed shall include a declaration by the aircraft commander or agent, which shall be signed on entry at the next domestic airport. The permit to proceed and declaration shall state substantially the following:

Permit to Proceed From one Airport to Another

Airport of Departure ____________________
Date ____________________

Permission is hereby given aircraft __________ to proceed to __________

(Next Domestic Airport)

The aircraft which has arrived from and is destined to the places shown in the general declaration, is proceeding to such places of destination to discharge residue cargo, passengers, or crew members and their purchases, as listed in the attached manifest. Bond was given at the airport of arrival for the cargo retained on board. Items of cargo manifested for delivery at this airport appear to have been landed.

Number of crew members not cleared by Customs ________

Number of passengers not cleared by Customs ________

Number of pages of the traveling manifest ________

____

(Customs Officer and Title)

Declaration on Entry of Aircraft at Following Airport

Airport of Arrival ____________________
Date ____________________

I, __________, commander or authorized agent of the aircraft identified in this document, declare and guarantee that there were not, when such aircraft departed from the airport of ________, nor have been since, nor now are, any more or other goods, wares, or merchandise on board than was stated in the attached manifests.

____

(Signature and Title)

The permit to proceed and declaration must be stamped, mimeographed or printed on:

(1) The abstract general declaration;

(2) The traveling general declaration when an abstract general declaration is not required; or

(3) A separate sheet of paper.

(e) *Permit to proceed for nonscheduled aircraft.* For each permit to proceed issued to a nonscheduled aircraft carrying residue cargo the transit air cargo manifest procedures shall be followed and a numbered Customs Form 7512–C shall be filled out and filed. The number on the form shall be placed in the upper right hand corner of the permit to proceed. The original copy of Customs Form 7512–C shall be forwarded as required by the issuing port and the duplicate must be attached to the permit and given to the aircraft commander. When the aircraft arrives at the final port, the aircraft commander shall deliver the permit to proceed and Customs Form 7512–C (duplicate) to Customs.

(f) *Use of form.* When all of the documents required by this section are in order, the permit to proceed shall be dated and signed by the Customs officer in charge at the clearance airport. One copy of the permit to proceed shall be delivered to the aircraft commander or agent with the other required documents, for filing at the next international airport.

§ 122.84 Intermediate airport.

(a) *Application.* The provisions of this section apply at any U.S. airport to which an aircraft proceeds with residue cargo, and passengers, or crewmembers and their purchases not cleared by Customs. They do not apply to aircraft arriving at the last domestic port of discharge.

(b) *Entry.* When an aircraft arrives at the next airport, the aircraft commander or agent shall make entry by filing the:

(1) Abstract general declaration and manifest;

(2) Traveling general declaration and manifest; and

(3) Permit to proceed.

The *Declaration on Entry of Aircraft at Following Airport,* found on the permit to proceed, shall be properly signed before filing for entry.

(c) *Crew declarations.* The declarations and entries, Customs Form 5129, of any crewmembers who leave the aircraft with their purchases at the intermediate airport shall be detached from the traveling general manifest. The declaration and entries are to be detached by the Customs officer in charge and are kept at the airport.

(d) *Departure.* When the aircraft leaves an intermediate airport carrying residue cargo, and passengers or crewmembers and their purchases are not yet cleared by Customs or another interested Federal agency, the procedure is the same as at the first arrival airport. All documents required by this section, except those detached under paragraph (c) of this section, shall be returned to the aircraft commander or agent for filing at the next entry airport.

§ 122.85 Final airport.

When an aircraft enters at the last domestic airport of discharge, the traveling general declaration and manifest shall be filed with Customs and kept at the airport. No abstract general declaration and manifest is required.

§ 122.86 Substitution of aircraft.

(a) *Application.* The residue cargo procedure applies when an airline must substitute aircraft to reach a destination due to weather conditions or operational factors which prevent an aircraft on arrival of the flight at the first port from continuing inbound to interior ports scheduled for that flight.

(b) *Clearance and entry.* Clearance and entry of substitute aircraft is required as provided in this subpart for other aircraft.

(c) *Identification.* An identification of all substitute aircraft shall be clearly made on all clearance and entry documents.

(d) *Transporting cargo*—(1) *Forwarding.* The carrier may forward all cargo which arrived on one aircraft by transferring it to another aircraft of the same airline to complete the inbound flight. The transfer shall be done under Customs supervision.

(2) *Conditions.* All of the residue cargo from more than one inbound flight of an airline may be laden on one substitute aircraft of the airline. The substitute aircraft shall finish the inbound transport of the residue cargo.

§ 122.87 Other requirements.

Section 4.85 of this chapter, relating to vessels with residue cargo for domestic ports, applies to aircraft residue cargo, except as stated in this subpart.

§ 122.88 Aircraft carrying domestic (stopover) passengers.

Airlines that commingle domestic (stopover) passengers (that is, passengers who have already cleared Customs at their port of arrival and are continuing on another aircraft to a second U.S. destination) with international passengers who are continuing on the flight to their port of arrival and have not yet cleared Customs, must comply with certain requirements before being issued a permit to proceed. The carriers requirements are as follows:

(a) The domestic (stopover) passengers must be transported on U.S.-registered aircraft, or foreign-registered aircraft of the same foreign airline that brought them into the U.S.

(b) A $2.00 charge must be paid for each revenue producing domestic (stopover) passenger reinspected in the U.S. (see § 24.12 of this chapter).

(c) Arrangements must be made for the checked baggage of all passengers requiring inspection on the previously described flights to be off-loaded and made available for examination in the Federal inspection area at the destination port (intermediate or final) where an inspection is to take place.

(d) All stopover passengers shall be notified in writing, prior to boarding, that they will be subject to full reinspection by Customs. This written notification shall contain the following language: "Notice to all boarding passengers: You are boarding an aircraft on which passengers will be arriving in the U.S. from foreign destinations. These passengers have not yet cleared U.S. Customs. Accordingly, you will be subject to a full reinspection by Customs at your final U.S. port of entry."

(e) Domestic (stopover) passengers shall be provided a Customs declaration identified by the words "Domestic Flight". The domestic (stopover) passenger is only required to complete items 1–4 on that declaration.

(f) The carrier shall present to Customs, as otherwise required by law, the permit to proceed and/or the general declaration, clearly stating the number of domestic (stopover) passengers to be reinspected upon arrival at the destination port (intermediate or final) where an inspection of passengers is to take place.

Subpart J—Transportation in Bond and Merchandise in Transit

§ 122.91 Application.

This subpart applies to the transportation in bond of merchandise arriving in the U.S. by aircraft and entered:

(a) For immediate transportation to another airport without appraisement; or

(b) For transportation through the U.S. and later exportation by aircraft.

§ 122.92 Procedure at port of origin.

(a) *Forms required*—(1) *Customs Form 7512.* Customs Form 7512 or other Customs approved documents shall be used for both entry and manifest. Three copies of the form or other document are required to be filed with Customs at the port of origin for merchandise for immediate transportation without appraisement. Four copies of the form or other document are required when merchandise for transportation and exportation is entered. (See also, §§ 18.11 and 18.20(a) of this chapter). Each copy shall be signed by the carrier or its authorized agent.

(2) *Customs Form 7512–C.* The "Origin" copy of Customs Form 7512–C shall be filed with Customs Form 7512, and its number shall be placed on all copies of Customs Form 7512.

(b) *Delivery of Customs form to carrier*—(1) *Merchandise entered for immediate transportation without appraisement.* When merchandise is entered for immediate transportation without appraisement, two copies of Customs Form 7512 or other Customs approved document, and the duplicate copy of Customs Form 7512–C shall be delivered to the carrier.

(2) *Merchandise entered for transportation and exportation.* When merchandise is entered for transportation and exportation, one copy of Customs Form 7512 and one copy of Customs Form 7512–C or other Customs approved document shall be delivered to the carrier.

(3) *After delivery.* After delivery, the forms or other document shall accompany the merchandise to the port of destination or exportation.

(c) *Receipt and supervision.* The agent of a bonded air carrier shall give a receipt for any merchandise delivered to it for transportation in bond, and no supervision of the lading of the merchandise on the transporting aircraft shall be required.

(d) *Split shipment—(1) Departure within 24 hours.* Merchandise covered by a single entry and manifest (Customs Form 7512 or other Customs approved document) may be sent to the destination airport on one or more aircraft. A separate manifest for each aircraft is not required if the whole shipment is sent within a single 24-hour period.

(2) *Departure not within 24 hours.* If any part of a shipment is sent more than 24 hours after the first part was sent, the entry and manifest copy which accompanies the first shipment shall state that the rest of the shipment will follow by separate aircraft. A single manifest shall be prepared for each part of the shipment sent by separate aircraft. The manifest shall be used as notice of each arrival at the destination airport.

(e) *Transhipment.* Merchandise sent under bond may be transferred at an intermediate airport to one or more aircraft of the same airline. This may be done without Customs supervision and notice of the transfer is not required. If merchandise covered by one entry and manifest is transferred to more than one aircraft, paragraph (d) of this section applies.

(f) *Sealing not required.* The sealing of aircraft, aircraft compartments carrying bonded merchandise, or the cording and sealing of bonded packages carried by the aircraft, is not required.

(g) *Warning labels.* The carrier shall supply and attach the warning label, as described in § 18.4(e) of this chapter, to each bonded package.

§ 122.93 Procedure at destination or exportation airport.

(a) *Delivery to district director.* When a bonded shipment arrives at the destination or exportation airport, the aircraft commander or agent shall deliver one copy of the entry and manifest with Customs Form 7512–C attached (Customs Form 7512 or other Customs approved document) covering the shipment to the district director of that airport as notice of arrival. If the shipment was sent by separate aircraft more than 24 hours after the first part of the shipment was sent, then a manifest for each part of the shipment shall be delivered to the district director.

(b) *Delivery to consignee.* When the merchandise is sent under an entry for immediate transportation without appraisal, one copy of the manifest covering the merchandise shall be delivered by the carrier to the consignee. This copy is used to make entry, and may also be used as a carrier certificate as provided in § 141.11(a)(4) of this chapter.

§ 122.94 Certificate of lading for exportation.

(a) *Required filing.* This section applies to merchandise entered for transportation and exportation by aircraft. A certificate of lading for exportation, Customs Form 7512 with Customs Form 7512–C attached, or other Customs approved document (see § 122.93 of this subpart) shall be filed when the merchandise reaches the final departure airport. The form shall be filled out and signed at the place where aircraft clearance for the merchandise is given.

(b) *Clearance not at place of final departure.* If an aircraft is cleared at a place other than the place of final departure from the U.S., the aircraft commander or its authorized agent shall:

(1) Promptly report arrival of any bonded merchandise for export to the Customs officer in charge at that place; and

(2) Submit to the Customs officer in charge the certificate received at the place the merchandise was taken on board. The clearance certificate is kept by the Customs officer in charge until departure.

This procedure shall be followed at each place of landing before final departure.

§ 122.95 Other provisions.

Part 18 of this chapter (Transportation in Bond and Merchandise in Transit) applies to the transportation of merchandise under this subpart unless stated otherwise.

Subpart K—Accompanied Baggage in Transit

§ 122.101 Entry of accompanied baggage.

Passengers who enter the U.S. on one aircraft and depart to a foreign area on another aircraft with accompanying baggage shall either:

(a) Submit their baggage to Customs for inspection; or

(b) Arrange with the importing carrier for the baggage to be processed under regular in-transit procedures.

When passengers choose not to have access to their baggage while in the U.S., the baggage shall be listed on the Air Cargo Manifest as provided in § 122.48.

§ 122.102 Inspection of baggage in transit.

(a) General baggage in transit may be inspected upon arrival, while in transit, and upon exportation. Carriers shall present in-transit baggage for inspection at any time found necessary by the district director.

(b) In-transit baggage shall be presented to a Customs officer for inspection and clearance before the baggage can be delivered to a passenger while in the U.S.

Subpart L—Transit Air Cargo Manifest (TACM) Procedures

§ 122.111 Application.

Cargo (including manifested baggage) which arrives and is transported under Customs control in, through, or from, the U.S. may be transported in bond under this subpart. If cargo is not transported under this subpart, it shall be transported under other provisions of this chapter. (See Subparts I and J of this part, and Parts 18 and 123 of this chapter.)

§ 122.112 Definitions.

The following definitions apply in this subpart:

(a) *Transit air cargo.* "Transit air cargo" is cargo, including manifested baggage, transported under the requirements of this subpart.

(b) *Port of arrival.* The "port of arrival" is the port in the U.S. where imported cargo must be documented for further transportation under this subpart.

(c) *Transfer or transferred.* "Transfer or transferred" means the change of documentation of cargo to transit air cargo for transportation. The terms also include the physical movement of the cargo from one carrier to another, and thereafter by air or surface movement to the port of destination.

(d) *Transit air cargo manifest.* "Transit air cargo manifest" is used in this subpart as the shortened title for the transportation entry and transit air cargo manifest.

§ 122.113 Form for transit air cargo manifest procedures.

A manifest on Customs Form 7509 is required for transit air cargo, as provided in § 122.48(c) of this part. The words "Transportation Entry and Transit Air Cargo Manifest" shall be printed, stamped or marked on the form and on all copies of the form required for transit air cargo movement.

§ 122.114 Contents.

(a) *Form duplicates original manifest.* Each transit air cargo manifest shall be a duplicate of the sheet presented as part of the cargo manifest for the aircraft on which the cargo arrived in the U.S.

(b) *Shipments shown on manifest*—(1) *Country of exportation.* Each transit air cargo manifest sheet may list:

(i) Only air cargo shipments from one exporting country, with the name of the country shown in the heading; or

(ii) Air cargo shipments from several exporting countries, with the name of the exporting country shown in the "Nature of Goods" column.

(2) *Shipment to same port.* Each transit air manifest sheet may list only those shipments manifested by way of the port of arrival for:

(i) The same Customs port of destination;

(ii) The same Customs port for later exportation; or

(iii) Direct exportation from the port of arrival.

(c) *Information required.* Each air cargo manifest sheet shall show:

(1) The foreign port of lading;

(2) The date the aircraft arrived at the port of arrival;

(3) Each U.S. port where Customs services will be necessary due to transit air cargo procedures; and

(4) The final port of destination in the U.S., or the foreign country of destination, for each shipment. The foreign country destination shown on the manifest must be the final destination, as shown by airline shipping documents, even though airline transport may be scheduled to end before the shipment arrives at the final destination.

(d) *Corrections.* If corrections in the route shown on the original manifest for the cargo are required at the port of arrival to make a manifest sheet workable as a transit air cargo manifest, the district director at the port of arrival may allow the corrections.

§ 122.115 Labeling of cargo.

A warning label, as required by § 18.4(e) of this chapter, shall be attached to all transit air cargo not directly exported from the port of arrival before the cargo leaves the port of arrival.

§ 122.116 Identification of manifest sheets.

When the original cargo manifest for the aircraft on which the cargo arrives is presented by the aircraft commander or its authorized agent at the port of arrival, a manifest number will be given to the aircraft entry documents by Customs. The number given shall be used by the airline to identify all copies of the transit air cargo manifest. All copies of the manifest shall be correctly numbered before cargo will be released from the port of arrival as transit air cargo.

§ 122.117 Requirements for transit air cargo transport.

(a) *Transportation*—(1) *Port to port.* Transit air cargo may be carried to another port only when a receipt is given, as provided in paragraph (b) of this section. The receipt may be given only to an airline which:

(i) Is a common carrier for the transportation of bonded merchandise; and

(ii) Has the required Customs bond on file.

(2) *Exportation from port of arrival.* Transit air cargo may be exported from the port of arrival only if covered by a bond on Customs Form 301, containing the bond conditions set forth in Subpart G of Part 113 of this chapter, as provided in § 18.25 of this chapter.

(b) *Receipt*—(1) *Requirements.* When air cargo is to move from the port of arrival as transit air cargo, a receipt shall be given. The receipt shall be made by the airline responsible for transport or export within the lay order period, or an authorized extension period (see § 4.37 of this chapter).

(2) *Contents.* The receipt shall appear on each copy of the transit air cargo manifest, clearly signed and dated if required, in the following form:

> Received the cargo listed herein for delivery to Customs at the port of destination or exportation shown above, or for direct exportation.

Name of carrier (or exporter)

Attorney or agent of carrier (or exporter)

Date

(c) *Responsibility for transit air cargo*—(1) *Direct exportation.* The responsibility of the airline exporting transit air cargo for direct exportation begins when a receipt, as provided in paragraph (b) of this section, is presented to Customs.

(2) *Other than direct exportation.* When the transit air cargo is not for direct exportation, the responsibility of the airline receiving the cargo begins when a receipt, as provided in paragraph (b) of this section, is presented to Customs.

(3) *Carting.* When carting is used to deliver transit air cargo to receiving airlines, the importing airline is responsible for the cargo under its own bond until a receipt is filed by the receiving airline. This does not apply when the carting is done under Part 112 of this chapter, at the expense of the parties involved.

(4) *Importing airlines.* An importing airline which has qualified as a carrier of bonded merchandise, whether registered in the U.S. or a foreign area, may:

(i) Give a receipt for the air cargo;

(ii) File an appropriate bond; and

(iii) Deliver the cargo to an authorized domestic carrier for in-bond transportation from the port of arrival. The importing carrier's bond covers the transportation.

(d) *Split shipments.* A receipt shall be given by one airline for all of the cargo shipments listed on one transit air cargo manifest sheet. Cargo shipments so listed shall be transported from the port of arrival on one aircraft or carrier unless the use of more than one aircraft or carrier would be allowed:

(1) By § 122.92(d) under a single combined entry and manifest;

(2) By § 122.118(d); or

(3) By § 122.119(e), permitting the use of a surface carrier for transport.

Otherwise, all shipments on the transit air cargo manifest shall be separately documented and transported under the regular procedures for transportation of merchandise in bond (See Subpart J).

§ 122.118 Exportation from port of arrival.

(a) *Application.* Transit air cargo may be transferred for exportation from any port of arrival under this section. The district director may require any supervision necessary to enforce the regulations of other Federal agencies.

(b) *Time.* Transit air cargo shall be exported from the port of arrival within 10 days from the date the exporting airline receives the cargo. After the 10-day period, the individual cargo shipments must be made the subject of individual entries, as appropriate.

(c) *Transit air cargo manifest copies.* Three copies of the transit air cargo manifest shall be filed with Customs.

(1) *Review copy.* The importing airline shall file a copy of each transit air cargo manifest sheet covering any cargo shipment that will be transferred for direct exportation. This filing shall be made as soon as the exporting airline has been chosen. The exporting airline need not give receipt on the review copy for the cargo to be transferred, but the name of the exporting airline shall be placed on the copy.

(2) *Exportation copy.* The exportation copy shall be filed by the exporting airline when clearance documents are presented to Customs.

(3) *Clearance copy.* The clearance copy shall be filed with the exporting aircraft's clearance documents.

The exportation and clearance copies shall show the exporting airline's receipt for the cargo, aircraft number, flight number, and the date.

(d) *Direct export on different aircraft.* Transit air cargo shipments which are listed on one aircraft transit air cargo manifest sheet may be directly exported on different aircraft of the exporting airline. If this occurs, two additional copies of the transit air cargo manifest shall be filed for each shipment or group of shipments transported in other aircraft. Each copy of the transit air cargo manifest shall be clearly marked to show which shipment or shipments listed are covered by the manifest copy.

(e) *Direct export by another airline.* If shipments listed on one transit air cargo manifest sheet are not exported from the same port on the same airline, separate export entries on Customs Form 7512, as required by § 18.25 of this chapter, shall be filed.

(f) *Post entered air cargo.* Air cargo not listed on the manifest (i.e., overages) which has been post entered under § 122.49(b) may be exported from the port of origin under this subpart. If this occurs, four copies of the air cargo manifest, Customs Form 7509, marked "Post Entry", shall be provided. All requirements of § 122.44(b) shall be followed in using this procedure.

(g) *Review.* The review copy of the transit air cargo manifest sheets must be reviewed by Customs as required for the carrier manifest copy in § 122.120(g). The reviewing officer shall take the proper action if a license is necessary for any cargo. The exporting airline shall be notified that any transit air cargo which is not covered by the required license must be placed under constructive Customs custody in a special area of the airline's terminal until the license is obtained.

§ 122.119 Transportation to another U.S. port.

(a) *Application.* Air cargo shipments may be transferred for transportation as transit air cargo from the port of arrival to another port in the U.S. under this section. The district director of the port of arrival may require Customs supervision of the transfer.

(b) *Time.* Transit air cargo traveling to a final port of destination in the U.S. shall be delivered to Customs at its destination within 15 days from the date the receiving airline gives the receipt for the cargo at the port of arrival.

(c) *Transit air cargo manifest copies.* Four copies of the transit air cargo manifest, including a carrier manifest copy, and two copies of Customs Form 7512–C (original and duplicate) shall be filed by the airline giving a receipt for moving the cargo shipments to their destination.

(1) *Permit copy.* This copy is used and kept by Customs at the port of arrival.

(2) *Customs Form 7512–C (duplicate).* This copy accompanies the transit air cargo to the port of destination.

(d) *Failure to deliver on time*—(1) *Procedure.* If transit air cargo does not arrive at the destination port on time, the district director at the port of arrival shall take action as provided in §§ 18.6 and 18.8 of this chapter. The amount of duty and tax shall be decided at the port of arrival on the basis of information:

(i) On the permit copy kept at the port of arrival; and

(ii) Obtained from the carriers as necessary.

The district director at the port of arrival shall notify the airline that presented a receipt for the cargo that there has been a failure to deliver.

(2) *Responsibility of airline.* When the airline that presented a receipt for the cargo receives notice of discrepancies, the airline shall answer within 90 days of the date of such notice to the district director at the port of arrival. The answer shall provide any information or documents related to the value and description of the cargo involved that the receipting airline and the importing airline can produce.

(e) *Surface movement to port of destination.* If an aircraft arrives at the port of arrival with cargo to be carried as transit air cargo, the cargo may be transferred to another carrier for surface movement to the port of destination. The transfer is allowed under the following conditions:

(1) The bond of the party receiving the cargo for surface movement must cover the transfer and surface movement;

(2) The description of the cargo on the transit air cargo manifest must be complete;

(3) The entire shipment listed in the transit air cargo manifest must be shipped from the port of arrival to the port of destination by the same surface carrier; and

(4) The requirements of § 122.114(b) must be followed.

§ 122.120 Transportation to another port for exportation.

(a) *Application.* Air cargo may be transferred as transit air cargo at the port of arrival for transportation to another port in the U.S. and later exportation under this section.

(b) *Supervision*—(1) *From port of arrival to exportation port.* The district director at the port of arrival shall order any supervision found necessary for the transfer of transit air cargo for transportation to another port for export.

(2) *At exportation port.* Customs shall be notified far enough in advance to be able to make any required supervision of the lading of cargo, and to enforce any other Federal agency requirements, when transit air cargo is ready for lading on the exporting aircraft.

(c) *Time.* Transit air cargo covered by this section shall be delivered to Customs at the port of exportation within 15 days from the date of receipt by the forwarding airline.

(d) *Transit air cargo manifest copies.* Five copies of the transit air cargo manifest and a Customs Form 7512–C (original and duplicate) shall be filed with Customs.

(1) *Port of arrival.* Two copies of the transit air cargo manifest, marked separately as "permit" and "control" copies, and Customs Form 7512–C (original) shall be filed with Customs at the port of arrival. The duplicate shall accompany the shipment as provided in § 122.119(c)(2) of this part. Filing shall be made when the arriving aircraft enters, or before the lay order period ends, by the airline which presents a receipt to transport the cargo from the port of arrival to the port of destination.

(2) *Port of exportation.* Three copies of the transit air cargo manifest shall be filed at the port of exportation.

(i) *Carrier manifest copy.* The carrier manifest copy shall be attached to the listing of cargo shipments and submitted when the cargo arrives at the exportation port.

(ii) *Exportation and clearance copies.* Two copies, marked separately as "exportation" and "clearance" copies, shall be filed with Customs at the exportation port.

(e) *Delivery to exporting airline.* When the transit air cargo arrives at the exportation port, it may be delivered directly to the exporting carrier, together with the exportation and clearance copies. The name of the exporting carrier shall be clearly noted on the carrier manifest copy, which shall then be delivered to Customs.

(f) *Storage by exporting airline.* The exporting carrier shall keep all cargo listed on the transit air cargo manifest in one storage space. This storage space shall be separate from the area in which special shipments which require a license under paragraph (g) of this section are stored.

(g) *Export license*—(1) *Review.* A Customs officer shall review the carrier manifest copy of the transit air cargo manifest to make sure that the export licensing requirements of other Federal agencies have been followed.

(2) *Information inadequate.* If the manifest information is not enough for Customs to determine that a license or other requirement applies, then the transit air cargo shall be checked by examination, or by inspection of the air waybills or attached invoices.

(3) *When license or other requirement applies.* The exporting airline shall be notified at once if Customs finds that the shipment cannot be exported without a license or other approval. The shipment shall then be put under constructive Customs custody in a special area set aside for the shipment in the exporting airline's cargo terminal.

(h) *Filing of exportation and clearance copies*—(1) *Information.* When filed with Customs, the exportation and clearance copies of the transit air cargo manifest shall each show:

(i) The aircraft number;

(ii) The aircraft flight number; and

(iii) The date.

(2) *Filing.* The exporting airline shall file the exportation and clearance copies before the aircraft that carries the transit air cargo departs. The clearance copies shall be grouped together and not mixed in with other outward manifest sheets. The exportation copies shall be grouped together, and kept separate from the outward clearance documents.

(i) *Cargo not laden at same airport by same airline.* If all the cargo listed on one transit air cargo manifest sheet is not laden for exportation from the same U.S. airport by the same airline, then separate entries on Customs Forms 7512 and 7512–C are required for each cargo shipment listed:

(1) For transportation and exportation under Subpart J of this part; or

(2) For direct exportation under § 18.25 of this chapter.

(j) *Cargo laden on more than one aircraft of same airline.* When any cargo shipment listed on the same transit air cargo manifest must be exported on more than one aircraft of the same airline, § 122.118(d) applies.

(k) *Failure to deliver.* If all or part of the cargo listed on the transit air cargo manifest is not accounted for with an exportation copy within 40 days, the district director at the port of arrival shall take action as provided in § 122.119(d).

Subpart M—Aircraft Liquor Kits

§ 122.131 Application.

(a) *Liquor and tobacco.* Subpart M applies to:

(1) Duty-free and tax-free liquor and tobacco; and

(2) Duty-paid and tax-paid liquor and tobacco which has been placed in the same liquor kit as duty-free and tax-free liquor and tobacco.

(b) *Aircraft.* Subpart M applies to all commercial aircraft on domestic or foreign flights operating into, from and between U.S. airports, which are carrying:

(1) Duty-free and tax-free liquor and tobacco withdrawn from bond under section 309, Tariff Act of 1930, as amended (19 U.S.C. 1309); or

(2) Other liquor or tobacco on which duty or taxes have not been paid.

This includes any aircraft carrying duty-free and tax-free liquor under 19 U.S.C. 1309, or other Federal law, although the aircraft is not required to enter, clear or report arrival.

§ 122.132 Sealing of aircraft liquor kits.

(a) *Sealing required.* Aircraft liquor kits shall be sealed on board the aircraft by crewmembers before the aircraft lands in the U.S. The liquor kits shall be kept under seal while on the ground unless taken to an authorized airline in-bond liquor storeroom.

(b) *Exception.* When an aircraft is traveling between airports in the U.S., in a trade for which duty-free and tax-free liquor is used during flight, sealing the liquor kits on board during transporting stopovers is not required if:

(1) The liquor kits are kept on board the aircraft; and

(2) The district director finds that sealing is not required for revenue protection.

(c) *Seals to be used.* Aircraft liquor kits shall be sealed with serially numbered, Customs approved seals. The airline shall use seals supplied by an approved manufacturer, as provided in Part 24 of this chapter. A small number of seals may be obtained from the district director.

(d) *Removing seals.* When sealed liquor kits are on the ground, the Customs seals may be broken only by:

(1) A Customs officer; or

(2) Authorized airline personnel, in an authorized airline in-bond liquor storeroom.

(e) *Resealing.* When a Customs officer breaks the seal of a liquor kit to check the contents, the action shall be recorded on the liquor kit stores list, and the liquor kit must be resealed with an approved seal.

§ 122.133 Stores list required on arrival.

(a) *When required, contents.* Three copies of an incoming stores list shall be prepared for each liquor kit on board before an aircraft lands. The incoming stores list shall state for each type of liquor and bottle size:

(1) Number of full bottles;

(2) Number of partially filled bottles; and

(3) Total number of bottles.

If the carrier chooses not to state the type of liquor for each size bottle, any duty or taxes assessed for any shortage shall be set at the highest rate available for the alcoholic beverages in the kit.

(b) *Disposition of stores list copies.* One copy of the incoming stores list shall be placed in the liquor kit before it is sealed. The remaining two copies shall be used as follows:

(1) One copy shall be filed with the inward cargo manifest; and

(2) One copy shall be kept for filing with the outward cargo manifest if the liquor kit was laden for export.

(c) *For aircraft not required to enter and/or clear.* If an aircraft is not required to enter and/or clear:

(1) One copy shall be given to the Customs officer upon arrival; and

(2) One copy shall be kept to be given to the Customs officer before departure of the aircraft.

(d) *When stores list not prepared.* When a complete stores list is not prepared before landing, liquor kits must be sealed on board, and the seal number shall be recorded on the stores list. When the aircraft lands, the liquor shall be taken at once to the Customs office and the stores list shall be completed by crew members under Customs supervision.

§ 122.134 When airline does not have in-bond liquor storeroom.

(a) *Handling of liquor kits.* An aircraft may land at an airport where the airline involved does not have an authorized in-bond liquor storeroom. When this occurs, the liquor kits, under any supervision found necessary by the district director, may be:

(1) Kept on board the aircraft;

(2) Removed and replaced upon the aircraft; or

(3) Removed and replaced aboard another aircraft.

(b) *Sealing of kits.* Aircraft liquor kits covered by this section shall remain sealed until departure. Customs officers may remove the seal to check the contents of the liquor kits, but shall reseal the kits as provided in § 122.132(e).

(c) *Restocking.* Additional amounts of duty-free and tax-free liquor and tobacco obtained in the U.S. shall be laden in a separate container on any aircraft covered by this section. The lading shall be done under any supervision the district director finds necessary. The additional liquor and tobacco shall be shown on separate outward stores lists.

§ 122.135 When airline has in-bond liquor storeroom.

(a) *Restocking.* Liquor kits on board an aircraft landing at an airport where the airline involved has an authorized in-bond liquor storeroom may be removed and restocked in the storeroom.

(b) *Inventory record.* Each authorized airline in-bond liquor storeroom shall keep an inventory record in a form that satisfies the district director. The inventory record shall account for the receipt and use of all aircraft liquor and tobacco stores on which duty and/or tax has not been paid.

(c) *Airline employees.* Any airline which has an authorized in-bond liquor store room at an airport shall give the district director:

(1) A list of names of all airline employees authorized to break Customs seals on liquor kits in the in-bond liquor storeroom; and

(2) Signature samples of the authorized employees.

(d) *Opening of aircraft liquor kits.* Aircraft liquor kits received in an authorized storeroom shall be opened only by authorized airline employees, or by Customs officers.

(e) *Contents of liquor kits.* The employees who break the seals on aircraft liquor kits shall check the contents at once. The employees shall immediately report to the district director any:

(1) Evidence of seal tampering;

(2) Difference between the seal numbers on the liquor kits and those recorded on the stores list; and

(3) Differences in quantity as shown on the stores list.

(f) *Handling the liquor kits*—(1) *Partial bottles.* Partial bottles of liquor may be removed from incoming liquor kits and kept in the in-bond liquor storeroom to be destroyed or combined with other partial bottles. This may be done only under Customs supervision. The costs of Customs supervision shall be paid by the airline.

(2) *Exportation.* The contents of incoming liquor kits may be commingled to restock outbound liquor kits. The commingling must take place in the airline in-bond liquor storeroom, using liquor bottles on which the seal has not been broken.

(3) *Sealing.* All liquor kits shall be sealed as provided in § 122.132(a) before removal from the in-bond liquor storeroom. All seal numbers shall be listed on an outgoing stores list.

§ 122.136 Outgoing stores list.

(a) *Preparation.* Two copies of a serially numbered outgoing stores list shall be prepared by the airline for all liquor and tobacco withdrawn from bonded or non-tax-paid stock and added to liquor kits. The outgoing stores list shall show the total number of bottles for each type liquor, the brand, and the size of each bottle.

(b) *Use of copies.* The two copies of the outgoing stores list shall be used as follows:

(1) One copy shall be placed and kept in the outgoing kits until the aircraft leaves the U.S.; and

(2) One copy must be filed either with the outgoing cargo manifest (for aircraft required to clear) or with Customs before departing, as provided in § 122.133(c).

In both cases, the third copy of the inward stores list shall be filed with the outgoing stores list. (See § 122.133(c)).

§ 122.137 Certificate of use.

Any liquor or tobacco withdrawn from the in-bond storeroom and shown on the outgoing stores list shall be recorded, when exported, on a certificate of use prepared by the airline.

Subpart N—Flights to and From the U.S. Virgin Islands

§ 122.141 Definitions.

Under Subpart N, the following definitions apply:

(a) *United States.* The term "U.S." includes the several States, the District of Columbia and Puerto Rico.

(b) *Foreign area.* The term "foreign area" means any area other than the several States, the District of Columbia and Puerto Rico.

§ 122.142 Flights between the U.S. Virgin Islands and a foreign area.

(a) *Aircraft arriving in the U.S. Virgin Islands.* Aircraft arriving in the U.S. Virgin Islands from a place other than the U.S. are governed by the provisions of this part which apply to aircraft arriving in the U.S. from a foreign area.

(b) *Aircraft leaving the U.S. Virgin Islands.* Aircraft leaving the U.S. Virgin Islands for a place other than the U.S. are governed by the provisions of this part that apply to aircraft leaving the U.S. for a foreign area.

§ 122.143 Flights from the U.S. to the U.S. Virgin Islands.

(a) *In general.* Aircraft on flights from the U.S. to the U.S. Virgin Islands are governed by the provisions of this part that apply to aircraft on a flight within the U.S.

(b) *Bureau of the Census.* When Bureau of the Census regulations (15 CFR Part 30) apply to aircraft carrying merchandise to the U.S. Virgin Islands from the U.S., permission to depart must be obtained from the district director. Permission to depart shall not be given unless:

(1) A complete manifest and Shipper's Export Declarations as required by 15 CFR Part 30 are filed; or

(2) An incomplete manifest under 15 CFR 30.24 is filed and the complete manifest and Shipper's Export Declarations are filed within 7 business days after departure.

§ 122.144 Flights from the U.S. Virgin Islands to the U.S.

(a) *Aircraft not inspected.* This paragraph applies to aircraft departing from the U.S. Virgin Islands and arriving in the U.S., without having been inspected prior to departure.

(1) *On departure.* Aircraft leaving the U.S. Virgin Islands for the U.S. are governed by the provisions of this part that apply to aircraft leaving the U.S. for a foreign area.

(2) *On arrival.* Aircraft departing from the U.S. Virgin Islands and arriving in the U.S. are governed by the provisions of this part that apply to aircraft arriving in the U.S. from a foreign area.

(b) *Supervision.* When aircraft are inspected by Customs in the U.S. Virgin Islands, the district director may order any supervision found necessary to protect the revenue and enforce the laws administered by Customs. This includes the collection of duty and taxes on articles bought in the U.S. Virgin Islands.

(c) *Procedure.* When an aircraft that was inspected in the U.S. Virgin Islands arrives in the U.S. from the U.S. Virgin Islands, the aircraft commander must be able to give evidence of the inspection to Customs on request. Evidence of the inspection shall be given in the following manner:

(1) A certificate on Customs Form 7507 shall be presented for aircraft registered in the U.S.:

(i) Of domestic origin; or

(ii) Of foreign origin, if duty has been paid and the aircraft is proceeding carrying neither passengers nor cargo, or with cargo and/or passengers solely from the U.S. Virgin Islands.

Two copies of the certificate shall be given to the inspecting Customs officers in the U.S. Virgin Islands by the aircraft commander. The certificate shall be marked with the port and date of inspection, and must be signed by the inspecting officer. The original of the certificate must be returned to the aircraft commander, who must keep the certificate for a reasonable time after the end of the flight to the U.S. If requested, the certificate shall be presented to Customs. The certificate may be destroyed or disposed of after a reasonable time at the discretion of the aircraft commander or agent.

(2) A permit to proceed on Customs Form 7507 shall be presented for aircraft registered in the U.S. which are:

(i) Of foreign origin;

(ii) Not duty paid; and

(iii) Proceeding carrying neither passengers nor cargo.

The permit to proceed, as required by Subpart F of this part, shall be marked with the port and date of inspection, and shall be signed by the inspecting officer in the U.S. Virgin Islands.

(3) A permit to proceed on Customs Form 7507 shall be presented for aircraft registered in a foreign country and proceeding carrying neither passengers nor cargo. The permit to proceed, as required under Subpart F of this part, shall be marked with the port and date of inspection, and shall be signed by the inspecting officer in the U.S. Virgin Islands.

(4) A permit to proceed, or other document, shall be filed as required under Subpart I of this part for an aircraft carrying residue cargo and/or passengers. The permit to proceed shall be marked with the port and date of inspection, and it must be signed by the inspecting officer in the U.S. Virgin Islands.

Subpart O—Flights to and From Cuba

§ 122.151 Definitions.

Under this subpart, the following definitions apply:

(a) *United States.* The term "U.S." includes the several States, the District of Columbia, the U.S. Virgin Islands, and Puerto Rico.

(b) *Cuba.* The term "Cuba" does not include the Guantanamo Bay Naval Station.

§ 122.152 Application.

This subpart applies to all aircraft entering or departing the U.S. to or from Cuba except public aircraft. Public aircraft are covered by Subpart P.

§ 122.153 Limitations on airport of entry or departure.

The owner or person in command of any aircraft clearing the U.S. for, or entering the U.S. from, Cuba, whether the aircraft is departing on a temporary sojourn, or for export, shall clear or obtain permission to depart from, or enter at, the Miami International Airport, Miami, Florida, and comply with the requirements in this part unless otherwise authorized by the Regional Commissioner of Customs, Miami, Florida.

§ 122.154 Notice of arrival.

(a) *Application.* All aircraft entering the U.S. from Cuba shall give advance notice of arrival.

(b) *Procedure for giving advance notice of arrival.* The commander of an aircraft covered by this section shall give the advance notice of arrival not less than one (1) hour before crossing the U.S. coast or border. Notice shall be given either:

(1) Through Federal Aviation Administration flight notification procedure (see International Flight Information Manual, Federal Aviation Administration); or

(2) Directly to the Customs officer in charge at the Miami International Airport, Miami, Florida.

(c) *Contents of notice.* The advance notice of arrival shall state:

(1) Type of aircraft and registration number;

(2) Name of aircraft commander;

(3) Number of U.S. citizen passengers;

(4) Number of alien passengers;

(5) Place of last foreign departure;

(6) Estimated time and location of crossing the U.S. coast or border; and

(7) Estimated time of arrival.

§ 122.155 Document to be presented upon arrival.

Upon arrival, the aircraft commander shall present:

(a) A manifest of all passengers on board, as required by the U.S. Immigration and Naturalization Service pursuant to 8 CFR 231.1(b), to an officer of the U.S. Immigration and Naturalization Service or to a Customs officer acting as an Immigration officer;

(b) The documents required by Subpart E of this part.

§ 122.156 Release of passengers.

No passengers arriving from Cuba by aircraft will be released by Customs, nor will the aircraft be cleared or permitted to depart before the passengers are released by an officer of the Immigration and Naturalization Service or by a Customs officer acting on behalf of that agency.

§ 122.157 Documents required for clearance.

As a condition precedent to clearance, the aircraft commander shall present to Customs:

(a) The documents required by Subpart H of this part; and

(b) A validated license issued by the Department of Commerce, as provided for in 15 CFR 371.19 or a license issued by the Department of State, as provided in 22 CFR Part 123.

§ 122.158 Other entry and clearance requirements.

All other provisions of this part relating to entry and clearance of aircraft are applicable to aircraft subject to this subpart.

Subpart P—Public Aircraft [Reserved]

Subpart Q—Penalties

§ 122.161 In general.

Except as provided in § 122.14, any person who violates any Customs requirements stated in this part, or any regulation that applies to aircraft under § 122.2, is, in addition to any other applicable penalty, subject to a civil penalty of $5,000 as provided by 49 U.S.C. App. 1474, except for overages, and failure to manifest narcotics or marihuana, in which cases the penalties set forth in section 584, Tariff Act of 1930, as amended (19 U.S.C. 1584) apply, or for failure to report arrival as required in which case the penalties set forth in section 436, Tariff Act of 1930, as amended (19 U.S.C. 1436) apply, and any aircraft used in connection with any such violation shall be subject to seizure and forfeiture, as provided for in the Customs laws. A penalty or forfeiture may be mitigated under Part 171 of this chapter.

§ 122.162 Failure to notify and explain differences in air cargo manifest.

(a) *Application.* Penalties shall be assessed if differences in an air cargo manifest (overages or shortages) are discovered and:

(1) The required notice and explanation are not made in time;

(2) The district director is not satisfied that the differences were caused by clerical error or other mistake;

(3) There has been a loss of revenue to the U.S.; or

(4) The district director is not satisfied that there was a valid reason for delay in reporting any differences.

(b) *Definition.* Under this section, "clerical error or other mistake" means a non-negligent, inadvertant, or typographical mistake, made when the manifest is prepared, assembled or submitted.

(c) *Repeated differences.* If repeated differences are found in manifests filed by the same person, it may be determined that the differences were a result of negligence and not clerical error or other mistake.

(d) *Knowledge.* A penalty may be assessed for differences in a manifest that are unknown to the aircraft commander or owner.

§ 122.163 Transit air cargo traveling to U.S. ports.

(a) *Application.* If transit air cargo is traveling from the port of arrival to another U.S. port under § 122.119, a liability shall be assessed, as set out in § 18.8 of this chapter if there has been:

(1) Shortage in delivery;

(2) Irregular delivery; or

(3) Non-delivery.

(b) *Liabilities assessed.* The liabilities assessed under this section are imposed as liquidated damages under a carrier's bond.

(c) *Value of merchandise.* The district director shall determine the value of merchandise for assessment purposes based on the following factors:

(1) Any data or documents available to the airline which presented a receipt for the transit air cargo, and available to the importing airline relating to the description and value of the cargo; and

(2) Other information available to the district director relating to the same or similar merchandise. If the data or documents required by this section are not submitted within 90 days of the date requested, the district director shall determine value on the basis of other available information. The transit air cargo manifest does not reflect value.

§ 122.164 Transportation to another port for exportation.

If transit air cargo is traveling from the port of arrival to another U.S. port for later exportation, any liquidated damages for shortages or irregular delivery shall be assessed as provided in § 122.163.

§ 122.165 Air cabotage.

(a) The air cabotage law (49 U.S.C. App. 1508(b)) prohibits the transportation of persons, property, or mail for compensation or hire between points of the U.S. in a foreign civil aircraft. The term "foreign civil aircraft" includes all aircraft that are not of U.S. registration except those foreign-registered aircraft leased or chartered to a U.S. air carrier and operated under the authority of regulations issued by the Department of Transportation, as provided for in 14 CFR 121.153, and those aircraft used exclusively in the service of any government.

(b) Customs officers detecting possible violations shall report the matter to Headquarters, Attention: Carrier Rulings Branch. Liability should not be assessed under 49 U.S.C. App. 1471 pending instructions from Headquarters since certain limited domestic transportation by foreign civil aircraft is permitted under regulations issued by the Department of Transportation.

§ 122.166 Arrival, departure, discharge, and documentation.

(a) *Liability for civil penalties.* Except as otherwise provided, any aircraft pilot violation of the requirements of section 433, Tariff Act of 1930, as amended, (19 U.S.C. 1433), with respect to the following actions shall be liable for civil penalties as provided by section 436, Tariff Act of 1930, as amended (19 U.S.C. 1436), and described in paragraph (c) of this section:

(1) Advance notification of arrival;

(2) Report of arrival;

(3) Landing of aircraft;

(4) Presentation of documentation;

(5) Departure from the port, place, or airport of arrival without authorization; or

(6) Discharge of passenger, or merchandise (to include baggage) without authorization.

(b) *Liability for criminal penalties.* Upon conviction, any aircraft pilot violating any of the Customs requirements described in paragraph (a) of this section shall, in addition to civil penalties be subject to criminal penalties as set forth in section 436, Tariff Act of 1930, as amended, (19 U.S.C. 1436), and described in paragraph (c) of this section. If the aircraft has or is discovered to have had on board any merchandise (other than the equivalent, for a vessel, of sea stores) the importation of which into the U.S. is prohibited, that person shall be subject to an additional fine as set forth in 19 U.S.C. 1436 and described in paragraph (c) of this section.

(c) *Civil and criminal penalties described*—(1) *Civil penalty.* The pilot of any aircraft who fails to comply with the requirements of this section is liable for a civil penalty of $5,000 for the first violation, and $10,000 for each subsequent violation. Any aircraft used in connection with any such violation is subject to seizure and forfeiture.

(2) *Criminal penalty.* In addition to the civil penalty prescribed for violation of this section, the pilot of any aircraft who intentionally fails to comply with the requirements of this section is liable, upon conviction, for a fine of not more than $2,000 or imprisonment for 1 year, or both. If the aircraft is found to have, or to have had, on board any merchandise the importation of which is prohibited, such individual is liable for an additional fine of not more than $10,000 or imprisonment for not more than 5 years, or both.

(3) *Additional civil penalty.* If any merchandise, other than the equivalent of vessel sea stores, is imported or brought into the U.S. aboard an aircraft which has failed to comply with the requirements prescribed by this section, the pilot of the aircraft shall be liable for a civil penalty equal to the value of the merchandise, and the merchandise may be seized and forfeited, unless properly entered by the importer or consignee.

§ 122.167 Aviation smuggling.

(a) *Civil penalties.* Any aircraft pilot who transports, or any person on board any aircraft who possesses prohibited or restricted merchandise knowing, or intending, that the merchandise will be introduced into the U.S. contrary to law shall be subject to a civil penalty of twice the value of the merchandise involved, but not less than $10,000, as prescribed in section 590, Tariff Act of 1930, as amended (19 U.S.C. 1590). Any aircraft used in connection with, or in aiding or facilitating, any violation of 19 U.S.C. 1590, whether or not any person is charged in connection with such violation, may be seized and forfeited in accordance with Customs laws.

(b) *Criminal penalties.* Any aircraft pilot or person who intentionally violates 19 U.S.C. 1590 is, upon conviction, subject to the criminal penalties of a fine of not more than $10,000 or imprisonment for not more than 5 years, or both, if none of the merchandise involved is a controlled substance. More severe penalties are provided in 19 U.S.C. 1590 if the smuggled merchandise is a controlled substance. In such case, a violator is liable for a fine of not more than $250,000 or imprisonment for not more than 20 years, or both.

(c) For purposes of imposing civil penalties under this section, any of the following acts, when performed within 250 miles of the territorial sea of the United States, shall be evidence that the transportation or possession of merchandise was unlawful and shall indicate that the purpose of the transfer was to make it possible for such merchandise, or any part of it, to be introduced into the U.S. unlawfully. For purposes of seizure and forfeiture, the following acts shall be evidence that an aircraft was used in connection with, or to aid or facilitate, a violation of this section:

(1) The operation of an aircraft without lights during such times as lights are required to be displayed under applicable law.

(2) The presence on an aircraft of an auxilliary fuel tank which is not installed in accordance with applicable law.

(3) The failure to correctly identify the aircraft by registration number and country of registration, when requested to do so by a customs officer or other government authority.

(4) The external display of false registration numbers or false country of registration.

(5) The presence on board of unmanifested merchandise, the importation of which is prohibited or restricted.

(6) The presence on board of controlled substances which are not manifested or which are not accompanied by the permits or licenses required under Single Convention on Narcotic Drugs or other international treaty.

(7) The presence of any compartment or equipment which is built or fitted out for smuggling.

Conforming Amendments to the Regulations

Parts 4, 10, 18, 24, 123, and 162, Customs Regulations (19 CFR Parts 4, 10, 18, 24, 123, and 162), are amended as set forth below.

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The authority citation for Part 4 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624; 46 U.S.C. 3, 2103.

§ 4.30 [Amended]

2. Section 4.30(l) and (m) is amended by removing the references to "Part 6", and by inserting, in their places, references to "Part 122".

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The authority citation for Part 10 continues to read as follows:

Authority: 19 U.S.C. 66, 1202, 1481, 1484, 1498, 1623, 1624.

§ 10.41 [Amended]

2. Section 10.41(c) is amended by removing the reference to "Part 6", and by inserting, in its place, a reference to "Part 122".

PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

1. The authority citation for Part 18 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnt. 11), 1551, 1552, 1553, 1624.

§ 18.2 [Amended]

2. Section 18.2(c)(2) is amended by removing the reference to "§ 6.21" and inserting, in its place, a reference to "§ 122.118".

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

1. The authority citation for Part 24 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnte. 11), 1624; 31 U.S.C. 9701.

§ 24.12 [Amended]

2. Section 24.12(d) is amended by removing the reference to "§ 6.9(f)" and inserting, in its place, a reference to "§ 122.86".

PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

1. The authority citation for Part 123 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (Gen. Hdnte. 11), 1624.

§ 123.0 [Amended]

2. Section 123.0 is amended by removing the reference to "Part 6" and inserting, in its place, a reference to "Part 122".

PART 162—RECORDKEEPING, INSPECTION, SEARCH, AND SEIZURE

1. The authority citation for Part 162 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624.

§ 162.72 [Amended]

2. Section 162.72(b)(3)(ii) is amended by removing the reference to "§ 6.11" and inserting, in its place, a reference to "§ 122.161".

3. Section 162.72(c) is amended by removing the reference to "§ 6.7(h)(5)" and inserting, in its place, a reference to "§ 122.162".

William von Raab,
Commissioner of Customs.

Approved: March 8, 1988.

19 CFR Part 4

[T.D. 88–15]

Customs Regulations Amendment Removing Ecuador From the List of Countries Entitled to Special Tonnage Tax Exemption

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This rule amends the Customs Regulations by removing Ecuador from the list of nations whose vessels are exempted from the payment of any higher tonnage duties than are applicable to vessels of the U.S. and from the payment of light money. The Department of State has informed Customs that U.S. vessels have been paying lighthouse fees in Ecuadorian ports since at least 1983, in apparent violation of a reciprocal agreement under which the vessels of neither country would be assessed such duties. Exemption from the assessment of such duties is a privilege which is extended to vessels of countries which extend such privileges to U.S. vessels. Since U.S. vessels are no longer exempt from special tonnage fees and light money in Ecuador, the privileges regarding exemption from the payment of such duties at U.S. ports will no longer be extended to vessels registered in Ecuador.

EFFECTIVE DATE: February 4, 1988.

FOR FURTHER INFORMATION CONTACT: Paul Hegland, Carrier Rulings Branch, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229 (202–566–5706).

SUPPLEMENTARY INFORMATION:

Background

Generally, the United States imposes regular and special tonnage taxes, and a duty of a specified amount per ton, known as "light money", on all foreign vessels which enter United States ports (46 U.S.C. 121, 128). However, vessels of a foreign nation may be exempted from the payment of special tonnage taxes and light money upon presentation of proof, satisfactory to the President, that no discriminatory duties of tonnage or imposts are imposed by that foreign nation on U.S. vessels or their cargoes (46 U.S.C. 141). Section 4.22, Customs Regulations (19 CFR 4.22), lists those nations whose vessels have been exempted from the payment of any higher tonnage duties than are applicable to vessels of the U.S., and from payment of light money.

Ecuadorian ships have been exempt as the result of a finding, based upon reciprocity, issued in 1944. By letter, dated January 12, 1988, the Department of State informed the U.S. Customs Service that the U.S. Embassy in Quito, Ecuador had reported it had been advised that U.S. vessels have been paying lighthouse fees in Ecuadorian ports since 1983. This is in violation of the requirement for reciprocal treatment, since Ecuadorian vessels were not being charged such fees at U.S. ports. Because of this lack of reciprocity, the Department of State recommended that Ecuador be removed from the list of nations whose vessels are exempted from payment of special tonnage taxes and light money. On February 4, 1988, the Director, Office of Regulations and Rulings of the U.S. Customs Service determined that, as of that date, Ecuador should be deleted from the list in § 4.22.

By virtue of the authority vested in the President by section 4228 of the revised statutes, as amended (116 U.S.C. 141), the President delegated the authority to grant the exemption from payment of special tonnage tax and light money to the Secretary of the Treasury by E.O. 10289, September 17, 1951, as amended by E.O. No. 10882, July 18, 1960 (3 CFR 1959–1960 Comp., Ch. II). By Treasury Department Order 165025, the Secretary of the Treasury delegated authority to the Commissioner of Customs to prescribe regulations relating to § 4.22 and other sections of the Customs Regulations relating to lists of countries entitled to preferential treatment in Customs matters because of reciprocal privileges accorded to vessels and aircraft of the U.S. Subsequently, by Customs Delegation Order No. 66 (T.D. 82–201), dated October 13, 1982, the Commissioner delegated authority to amend this section to the Assistant Commissioner (Commercial Operations), who redelegated this authority to the Director, Office Regulations and Rulings, who then redelegated it to the Chief, Regulations and Disclosure Law Branch.

Finding

On the basis of the information received from the Department of State, as described above, it has been determined that the U.S. is in possession of satisfactory evidence regarding the

BEST COPY AVAILABLE

assessment of lighthouse fees on U.S. vessels by the nation of Ecuador in violation of an agreement to the contrary. Therefore, Ecuador will be deleted from the list of nations whose vessels are exempted from the payment of the special tonnage tax and the payment of light money as of February 4, 1988.

Inapplicability of Public Notice and Delayed Effective Date Requirements

Because this amendment merely implements a statutory requirement and involves a matter in which the majority of the public is not particularly interested, pursuant to 5 U.S.C. 553(b)(B), notice and public procedure thereon are unnecessary. Further, for the same reasons good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553(d)(1).

The Regulatory Flexibility Act

This document is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). That Act does not apply to any regulation such as this for which a notice of proposed rulemaking is not required by the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), or any other statute.

Effective Order 12291

This amendment does not meet the criteria for a major regulation as defined in section 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Drafting Information

The principal author of this document was Peter T. Lynch, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 4

Customs inspection and duties, Harbors, Vessels.

PART 4—VESSELS IN FOREIGN DOMESTIC TRADES

1. The general authority citation for Part 4 and the specific authority for § 4.22 continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624, 46 U.S.C. 3, 2103.

Section 4.22 also issued under 46 U.S.C. 121, 128, 141.

§ 4.22 [Amended]

2. Section 4.22, Customs Regulations (19 CFR 4.22), is amended by removing "Ecuador" from the list of nations entitled to exemptions from special tonnage taxes and light money.

Date: March 14, 1988.

BILLING CODE 9107-37-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Approval of Amendments to the Indiana Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: The Director of OSMRE is announcing the approval of a proposed amendment submitted by the State of Indiana as a modification to its permanent regulatory program (hereinafter referred to as the Indiana program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The proposed amendment consists of revisions to the Indiana program pertaining to the removal and segregation of topsoil at both surface and underground mining sites. This action is in response to OSMRE's imposition of a required amendment at 30 CFR 914.16(d) to delete the inclusion of the term "permanent impoundments" from the listings of those areas for which topsoil need not be removed.

EFFECTIVE DATE: March 22, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. Rieke, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Minton-Capehart Federal Building, 575 North Pennsylvania Street, Room 301, Indianapolis, Indiana 46204. Telephone (317) 269-2609 or (FTS) 331-2609.

SUPPLEMENTARY INFORMATION:

I. Background on the Indiana Program

The general background on the Indiana submission and the approval process, as well as the Secretary's findings, the disposition of comments and an explanation of the conditions of approval can be found in the July 26 1982 **Federal Register** (47 FR 32107). Other actions concerning the approval, subsequent program amendments, and required amendments are identified at 30 CFR 914.10, 914.15, and 914.16.

II. Discussion of Proposed Amendment

In 1985, OSMRE determined that "permanent impoundments" would not be considered minor disturbances and that topsoil from such sites must be removed and salvaged (50 FR 20206, May 15, 1985). As a result, a required program amendment was imposed on the Indiana program to remove the term "permanent impoundments" from the listings of sites for which topsoil need not be removed.

By letter dated April 10, 1987 (Administrative Record No. IND-0482), the Indiana Department of Natural Resources submitted to OSMRE, pursuant to 30 CFR 732.17, a proposed State program amendment for approval in response to the requirements at 30 CFR 914.16(d). Indiana proposed to amend 310 IAC 12-1-12.5(a)(3)(i) and 310 IAC 12-5-78.1(a)(3)(i) pertaining to topsoil removal at surface and underground coal mine sites, respectively. The amended rules delete the term "permanent impoundments" from the list of sites from which topsoil need not be removed.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.17 and 732.15, that the program amendment submitted by Indiana on April 10, 1987, meets the requirements of SMCRA and 30 CFR Chapter VIII. Removal of the term "permanent impoundments" from the lists of sites from which topsoil need not be removed renders the Indiana provisions no less effective than the Federal rules at 30 CFR 816.22.

IV. Public Comment

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i), comments were solicited from various Federal agencies. No substantive comments were received.

On July 9, 1987, OSMRE published a notice of the receipt of the amendment and invited public comment on the adequacy of the proposed amendment in the **Federal Register** (52 FR 25887). The notice stated that a public hearing would be held only if requested. Since there were no requires for a hearing, a hearing was not held. The comment period closed on August 10, 1987, with no public comments received.

V. Director's Decision

Based on the findings, the Director is approving the amendment to the Indiana program as submitted on April 10, 1987. The Director is amending § 914.15 or 30 CFR Chapter VII to implement this decision. In addition, the required program amendments section at 30 CFR 914.16(d) is being removed to reflect the fulfillment of the requirement amendments.

VI. Procedural Requirements

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no evironmental impact statement need be prepared on this rulemaking.

2. *Compliance with the National Environmental Policy Act:* the Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need by prepared on this rulemaking.

2. *Compliance with Executive Order No. 12291:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

3. *Compliance with the Regulatory Flexibility Act:* The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

4. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 914

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: March 14, 1988.

Robert E. Boldt,

Acting Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

PART 914—INDIANA

30 CFR Part 914 is amended as follows:

1. The authority citation for Part 914 continues to read as follows:

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. Paragraph (r) is added to § 914.15 to read as follows:

§ 914.15 Approval of regulatory program amendments.

* * * * *

(r) The following amendments submitted by the Indiana Department of Natural Resources to OSMRE on April 10, 1987, are approved effective March 22, 1988: amendments to the Indiana regulations at 310 IAC 12-5-12.1(a)(3)(i) and 310 IAC 12-5-78.1(a)(3)(i) concerning removal of the term "permanent impoundments" from the listings of sites for which topsoil need not be removed.

* * * * *

§ 914.16 [Amended]

3. Section 914.16 is amended by removing paragraph (d) in its entirety.

Proposed Rules

Federal Register
Vol. 53, No. 55
Tuesday, March 22, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1822,1823, 1910, 1941, 1942, 1943, 1944, 1945, 1951, 1955, and 1965

Use of Certification Statements in Collection of Debt by the Farmers Home Administration

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulations to add a new requirement concerning the use of applicant certification statements. This action is necessary to comply with OMB Circular A–129, Subject: Managing Federal Credit Programs. The intended effect is to establish procedure to ensure that applicants for Federal loans are aware of debt collection methods the Federal Government can use in recovering delinquent or defaulted debt on FmHA loans.

DATE: Comments must be submitted on or before May 23, 1988.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Directives and Forms Management Branch, FmHA, Room 6348, South Agriculture Building, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address. The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Submit comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: Desk Officer for the Farmers Home Administration, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Norma Weetman, Chief, Management Analysis Branch, Financial and Management Analysis Staff, Farmers Home Administration, Room 4929, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250, Telephone (202) 475–3859.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291, and has been determined to be nonmajor because there will not be an annual effect on the economy of $100 million or more; a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, Environmental Program. It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Intergovernmental Consultation

This program/activity is not subject to the provisions of Executive Order 12372 which required intergovernmental consultation with State and local officials.

Programs Affected

This program/activity is listed in the Catalog of Federal Domestic Assistance under: 10.404 Emergency Loans; 10.405 Farm Labor Housing Loans and Grants; 10.406 Farm Operating Loans; 10.407 Farm Ownership Loans; 10.410 Low Income Housing Loans; 10.411 Rural Housing Site Loans; 10.414 Resource Conservation and Development Loans; 10.415 Rural Rental Housing Loans; 10.416 Soil and Water Loans; 10.417 Very Low-Income Housing Repair Loans and Grants; 10.418 Water and Waste Disposal Systems Loans; 10.419 Watershed Protection and Flood Prevention Loans; 10.421 Indian Tribes and Tribal Corporation Loans; and 10.423 Community Facilities Loans.

Regulatory Flexibility Act

The Administrator, Farmers Home Administration, USDA, has determined that this action will not have a significant economic impact on a substantial number of small entities because it requires applicants only to read and to acknowledge a list of actions that the Government can take to collect delinquent debt.

Background

OMB Circular A–129 requires that Federal Agencies must use Certification Statements during the loan application process to notify applicants about the Federal Government's debt collection policies. Therefore, FmHA proposes to amend its regulations to require that the County Suprevisor or District Director must review a certification statement with applicants for insured loans and that the applicant must sign and date the certification statement to show that the applicant is aware of and understands the debt collection methods the Federal Government can use in recovering delinquent or defaulted debt on FmHA loans.

List of Subjects

7 CFR Part 1822

Loan programs—Housing and community development, Low and moderate income housing, Mortgages, Nonprofit organizations, Rural housing.

7 CFR Part 1823

Credit, Indians.

7 CFR Part 1910

Applications, Credit, Loan programs—Agriculture, Loan programs—Housing and community development, Low and moderate income housing, Marital status discrimination, Sex discrimination.

7 CFR Part 1941

Crops, Livestock, Loan programs—Agriculture, Rural areas, Youth.

7 CFR Part 1942

Community development, Community facilities, Loan programs—Housing and community development, Loan security, Rural areas, Waste treatment and disposal—Domestic, Water supply—Domestic.

7 CFR Part 1943

Credit, Loan programs—Agriculture, Recreation, Water resources.

7 CFR Part 1944

Administrative Practice and Procedure, Aged, Farm labor housing, Grant programs—Housing and community development, Handicapped, Home improvement, Loan programs—Housing and community development, Low and moderate income housing—Rental, Migrant labor, Mobile homes, Mortgages, Nonprofit organizations, Public housing, Rent subsidies, Rural housing, Subsidies.

7 CFR Part 1945

Agriculture, Disaster assistance, Loan programs—Agriculture.

7 CFR Part 1951

Account servicing, Grant programs—Housing and community development, Reporting requirements, Rural areas.

7 CFR Part 1955

Government acquired property, Sale of government acquired property, Surplus government property.

7 CFR Part 1965

Administrative practice and procedure, Loan programs—Housing and community development, Low and moderate income housing—Rental, Mortgages, Rural areas.

Therefore, FmHA proposes to amend Chapter XVIII, Title 7, Code of Federal Regulations as follows:

PART 1822—RURAL HOUSING LOANS AND GRANTS

1. The authority citation for Part 1822 continues to read as follows:

Authority: 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart G—Rural Housing Site Loan Policies, Procedures, and Authorizations

§ 1822.271 [Amended]

2. Section 1822.271(e) is amended by adding the following entry to the list of forms after the Application Letter and Attachments and before the Evidence of Legal Authority (copy or citation of specific provisions of State statutory authority):

Form No.	Name of form or document	Total No. of copies	Signed by borrower	No. for loan docket	Copy for borrower
*	*	*	*	*	*
FmHA 1910–11.	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts	2	2–O&C	1–O	1–C
*	*	*	*	*	*

PART 1823—ASSOCIATION LOANS AND GRANTS—COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

3. The authority citation for Part 1823 is added to read as follows:

Authority: 7 U.S.C. 1989, 5 U.S.C. 301, 25 U.S.C. 490, 7 CFR 2.23, 7 CFR 2.70.

Subpart N—Loans to Indian Tribes and Tribal Corporations

Exhibit A [Amended]

4. Exhibit A, Section 1 is amended by adding the following phrase to the list of forms after Form AD 621 and before Form FmHA 442–12:

"Form FmHA 1910–11: Aplicant Certification, Federal Collection Policies for Consumer or Commercial Debts. (O & 1C—Sign O)"

PART 1910—GENERAL

5. The authority citation for Part 1910 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Receiving and Processing Applications

6. Section 1910.8 is amended by adding paragraph (f) to read as follows:

§ 1910.8 Reaching an understanding.

* * * * *

(f) *Use of Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts."* Before loan closing, all insured Single Family Housing (502 and 504) and Farmer Program loan applicants will have Form FmHA 1910–11 reviewed with them by the County Supervisor, and all insured Multi-Family Housing and Community Program loan applicants will have Form FmHA 1910–11 reviewed with them by the Loan Approval Official (District Director or State Director, as appropriate.) Form FmHA 1910–11 explains collection policies that will be taken by FmHA to recover delinquent or defaulted debt on insured loans. Form FmHA 1910–11 will be signed and distributed in accordance with the Forms Manual Insert. The applicant certification statement does not constitute a notification under the Debt Collection Act or the Deficit Reduction Act.

PART 1941—OPERATING

7. The authority citation for Part 1941 continues to read as follows:

Authority: 7 U.S.C. 1989, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Operating Loan Policies, Procedures and Authorizations

Exhibit A [Amended]

8. Exhibit A is amended in item A. APPLICANT INTERVIEW, by adding the following entry to the list of application processing forms after Form FmHA 410–1 and before Form FmHA 1910–5.

Form No.	Name	
*	* * *	*
1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts.	(X)
*	* * *	*

PART 1942—ASSOCIATION

9. The authority for Part 1942 continues to read as follows:

Authority: 7 U.S.C. 1989, 16 U.S.C. 1005, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Community Facilities Loans

10. Section 1942.2 is amended by adding a new paragraph (a)(2)(v) to read as follows:

OL
53
ISS
55
MR
22
988
MI

§ 1942.2 Processing applications.

(a) * * *

(2) * * *

(v) The District Director will review Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts," with the applicant. The applicant must sign and date the form after this review. A copy of the signed and dated form will be given to the applicant and the original placed in the loan docket.

* * * * *

PART 1943—FARM OWNERSHIP, SOIL AND WATER, AND RECREATION

11. The authority citation for Part 1943 continues to read as follows:

Authority: 7 U.S.C. 1989, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Insured Farm Ownership Loan Policies, Procedures and Authorizations

§ 1943.32 [Amended]

12. Section 1943.32 (a) is amended by adding the following entry to the list of forms after Form FmHA 410–1 and before Form FmHA 410–8:

FmHA Form No.	Name of form	Total of No. of copies	Signed by borrower [1]	Loan docket [1]	Copy for borrower [1]
	* * * * *				
1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts	2	2–O&C	1–0	1–C
	* * * * *				

[1] O=Original; C=Copy.

* * * * *

Subpart B—Insured Soil and Water Loan Policies, Procedures and Authorizations

§ 1943.82 [Amended]

13. Section 1943.82(a) is amended by adding the following entry to the list of forms after Form FmHA 410–1 and before Form FmHA 410–8:

FmHA Form No.	Name of form	Total of No. of copies	Signed by borrower [1]	Loan docket [1]	Copy to borrower [1]
	* * * * *				
1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts	2	2–O&C	1–0	1–C
	* * * * *				

[1] O=Original; C=Copy.

* * * * *

Subpart C—Insured Recreation Loan Policies, Procedures and Authorizations

§ 1943.122 [Amended]

14. Section 1943.132(a) is amended by adding the following entry to the list of forms after Form FmHA 410–1 and before Form FmHA 410–8:

FmHA Form No.	Name of form	Total of No. of copies	Signed by borrower [1]	Loan docket [1]	Copy to borrower [1]
	* * * * *				
1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts	2	2–O&C	1–0	1–C
	* * * * *				

[1] O=Original; C=Copy.

PART 1944—HOUSING

15. The authority citation for Part 1944 continues to read as follows:

Authority: 42 U.S.C. 1480, 5 U.S.C. 301; 7 CFR 2.23, 7 CFR 2.70.

§ 1944.30 [Amended]

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

16. Section 1944.30(a) is amended by reading the following entry to the list of forms after Form FmHA 410–4 and before Form FmHA 1944–12:

Form No.	Name of form	Total of No. of copies	Signed by borrower [1]	Loan docket [1]	Copy for borrower [1]
	* * * * *				
FmHA 1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts	2	[1,2] 2	[1] 1	[2] 1
	* * * * *				

[1] Original. [2] C=Copy.

---

* * * * *

Subpart D—Farm Labor Housing Loan and Grant Policies, Procedures and Authorizations

§ 1944.171 [Amended]

17. Section 1944.171(d) is amended by reading the following entry to the list of forms after Form AD–625 and before Exhibit A–1:

Form No.	Name of form or document	Total No. of copies	Signed by borrower [1]	No. for docket [1]	Copy for borrower [1]
	* * * * *				
FmHA 1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts	2	2–O&C	1–0	1–C
	* * * * *				

Subpart J—Section 504 Rural Housing Loans and Grants

18. Section 1944.467 is amended by revising paragraph (a), by redesignating paragraphs (g)(2) and (g)(3) as (g)(3) and (g)(4) and by adding a new paragraph (g)(2) to read as follows:

§ 1944.467 Processing applications.

(a) *Application form.* Application for Section 504 loans and grants will be made on Form FmHA 410–4, "Application for Rural Housing Loans Assistance (Non-Farm Tract)," and processed in accordance with Subpart A of Part 1910 of this chapter.

* * * * *

(g) * * *

(2) Review Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts," with applicants for loans.

* * * * *

PART 1945—EMERGENCY

19. The Authority Citation for Part 1945 is added to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.73, 7 CFR 2.70.

Subpart D—Emergency Loan Policies, Procedures and Authorizations

Exhibit A [Amended]

20. In Exhibit A, paragraph III A 5 is amended by adding the following entry to the list of forms after Form FmHA 410–1 and before Form FmHA 1910–5:

Form No.	Name	Use
	* * * * *	
1910–11	Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts.	X
	* * * * *	

22. The authority for Part 1951 is added to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart E—Servicing of Community Program Loans and Grants

23. Section 1951.210 is amended by adding a new paragraph (f) (15) to read as follows:

§ 1951.210 Transfer of security and assumption of loans.

* * * * *

(f) * * *

(15) Form FmHA 1910–11, "*Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts*." The District Director must review Form FmHA 1910–11, "Application Certification, Federal Collection Policies for Consumer or Commercial Debts," with the applicant.

* * * * *

24. Section 1951.211 is amended by revising the introductory text of paragraph (c) to read as follows:

§ 1951.211 Mergers.

* * * * *

(c) *Processing mergers.* Processing is made according to all applicable items of § 1951.210 (e) (1) through (15) of this subpart. In addition:

* * * * *

PART 1955—PROPERTY MANAGEMENT

25. The authority citation for Part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart C—Disposal of Inventory Property

26. Section 1955.108 is amended by adding paragraph (i) to read as follows:

§ 1955.108 Processing and closing (CONACT).

* * * * *

(i) *Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts*." The County Supervisor or District Director must review Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts," with the applicant.

27. Section 1955.118 is amended by adding a new paragraph (h) to read as follows:

§ 1955.118 Processing cash sales or credit sales on ineligible terms (housing).

* * * * *

(h) *Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts*." The County Supervisor or District Director must review Form FmHA 1910–11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts," with the applicant.

PART 1965—REAL PROPERTY

28. The authority citation for Part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases

29. Section 1965.27 is amended by adding paragraph (b) (21) to read as follows:

§ 1965.27 Transfer of real estate security.

* * * * *

(b) * * *

(21) Form FmHA 1910-11, "*Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts.*" For all transfers, the County Supervisor must review form FmHA 1910-11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts," with the applicant. A copy of the signed and dated form will be given to the applicant and the original placed in the loan docket.

Subpart B—Security Servicing for Multiple Housing Loans

30. Section 1965.65 is amended by adding a new paragraph (a) (10) to read as follows:

§ 1965.65 Transfer of real estate security and assumption of loans.

(a) * * *

(10) for all transfers, the District Director must review Form FmHA 1910-11, "Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts," with the applicant. A copy of the signed and dated form will be given to the applicant and the original placed in the loan docket.

BILLING CODE 3410-07-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-130-AD]

Airworthiness Directives; Short Brothers, Ltd., SD3-30 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental Notice of Proposed Rulemaking (NPRM); reopening of comment period.

SUMMARY: This notice proposes to amend an earlier proposed airworthiness directive (AD) that would have required replacement of certain pitot tubes on Shorts Model SD3-60 series airplanes. That proposal was prompted by reports of inoperative pitot tubes due to icing. This condition, if not corrected, could result in erroneous airspeed and altitude indications. This action proposes to revise the applicability of the proposed rule to identify the appropriate model of airplane affected by the proposed action.

DATES: Comments must be received no later than May 2, 1988.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-130-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Short Brothers Ltd., Service Representative, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3702. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. David Herron, Systems and Equipment Branch, Seattle Aircraft Certification Office, ANM-130S; telephone (206) 431-1949. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-130-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which requires the replacement of certain pitot tubes made from stainless steel on Short Brothers, Ltd. Model SD3-60 series airplanes, was published as a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** on October 14, 1987 (52 FR 38107). The comment period closed on November 12, 1987.

Interested parties have been afforded an opportunity to comment on this proposal. Due consideration has been given to the comments received.

One commenter stated that the effectivity section of the applicable service bulletin listed the serial numbers of Shorts Model SD3-30 series airplanes, rather than Model SD3-60 series airplanes. The FAA has verified this fact with the manufacturer. Further discussion with the manufacturer has also verified that, while the applicable service bulletin refers to inoperative pitot tubes on Model SD3-60 airplanes, the procedures described in the service bulletin apply to the Model SD3-30, not the Model SD3-60. In light of the foregoing, the FAA has determined that the applicability of this proposed action must be revised to reflect only Shorts Model SD3-30 series airplanes.

Since this action changes the scope of the proposed AD, the comment period has been reopened to provide adequate time for public comment. Further, a reiteration of the discussion follows, for the benefit of those operators now affected by this supplemental proposed action:

This action is prompted by several reports of inoperative pitot tubes due to icing, which have resulted in erroneous airspeed and altitude indications.

Short Brothers, Ltd., issued Service Bulletin SD3-345-26, Revision 1, dated

October 1985, which indicates that pitot tubes produced between October 1982 and October 1983 were manufactured from stainless steel, in lieu of copper, with a resultant reduction of efficiency of the anti-icing system. These stainless steel pitot tubes bear a code letter "Z" adjacent to the serial number. The service bulletin describes inspection of pitot tubes for code letter "Z," and replacement, if necessary with copper pitot tubes bearing a code letter other than "Z." The United Kingdom Civil Aviation Authority (CAA) has classified the service bulletin as Mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on Shorts Model SD3-30 series airplanes registered in the United States, an AD is proposed which would require replacement of left and right pitot tubes bearing code letter "Z" adjacent to the serial number with pitot tubes bearing a code letter other than "Z," in accordance with the service bulletin previously mentioned.

It is estimated that 66 airplanes of U.S. registry would be affected by this AD, that it would take approximately 3 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $7,920.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($120). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation Safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By amending the applicability statement of the Notice of Proposed Rulemaking, Docket No. 87-NM-130-AD, published in the **Federal Register** on October 14, 1987 (52 FR 38107), FR Doc. 87-23678, as follows:

Short Brothers, Ltd.: Applies to Model SD3-30 series airplanes; serial numbers SH3002 through SH3096, inclusive; certificated in any category. Compliance required as indicated, unless previously accomplished."

To prevent pitot tubes from becoming inoperative due to icing, which could result in erroneous airspeed and altitude indication, accomplish the following:

A. Within the next 180 days after the effective date of this AD, replace pitot tubes having the code letter "Z" adjacent to the serial number with one containing a code letter other than "Z," in accordance with accomplishment instructions in Service Bulletin SD3-34-26, Revision 1, dated September 1, 1985.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the requirements required by this AD.

All persons affected by this proposal who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Short Brothers, Ltd., Service Representative, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3702. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on March 14, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 88-AGL-1]

Establishment of Transition Area; Litchville, ND

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish the Litchville, ND, transition area to accommodate air taxi operators requesting a direct route to Alexandria, MN from Jamestown, ND and the Minneapolis-St. Paul, MN area. The intended effect of this action is to ensure segregation of Instrument Flight Rule (IFR) aircraft from other aircraft operating under visual weather conditions in controlled airspace.

DATES: Comments must be received on or before April 21, 1988.

ADDRESS: Send comments on the proposal in triplicate to: Federal Aviation Administration, Regional Counsel, AGL-7, Attn: Rules Docket No. 88-AGL-1, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

FOR FURTHER INFORMATION CONTACT: Harold G. Hale, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88–AGL–1." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2, which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a transition area airspace near Litchville, ND.

Presently, air taxi operators from Jamestown, ND, to the Minneapolis-St. Paul, MN area, routinely request a direct route to Alexandria, MN to save time and fuel. There are no airways. However, radar coverage is adequate to routinely approve a direct route, but when a direct route is used a portion of the climb or descent is made in uncontrolled airspace adding an additional workload on controllers. By designating this transition area better radar vectoring service for users going to and from Jamestown Municipal Airport will be provided. It will also eliminate an additional workload on controllers; and, will save the aviation users time and fuel.

Aeronautical maps and charts will reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Litchville, ND [New]

That airspace extending upward from 1200' AGL beginning at lat. 46°30'00" N., long. 98°29'30" W., to lat. 46°30'00" N., long. 97°38'00" W., to lat. 46°32'30" N., long. 97°37'00" W., to lat. 46°40'00" N., long. 97°42'00" W., to lat. 46°48'00" N., long. 97°54'00" W., to lat. 46°49'30" N., long. 98°15'00" W., to lat. 46°46'00" N., long. 98°10'00" W., to lat. 46°37'20" N., long. 98°22'00" W., to lat. 46°41'00" N., long. 98°27'00" W., to lat. 46°39'30" N., long. 98°31'00" W., to the point of beginning.

Issued in Des Plaines, Illinois, on March 7, 1988.

Teddy W. Burcham,
Manager, Air Traffic Division.

BILLING CODE 4910–13–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 35 and 293

[Docket No. RM88–5–000]

Regulations Governing Bidding Programs

March 16, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking (NOPR).

SUMMARY: The Federal Energy Regulatory Commission (Commission) proposes to adopt regulations which would authorize state regulatory authorities and nonregulated electric utilities to implement bidding procedures as a means of establishing rates for power purchases from qualifying facilities (QFs) under section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA).

A bidding program is a formally organized market to acquire incremental supplies of electricity. The purpose of this proposed rule is to permit bidding programs that would accurately establish utilities' avoided cost. To accomplish this goal, the Commission proposes to amend its current regulations to establish conditions and to provide specific guidance to the state regulatory authorities and nonregulated electric utilities on the use of bidding programs to set avoided costs. This proposed rule sanctions the use of bidding as a procedure for purchasing electricity from QFs.

The Commission believes that bidding will promote the statutory objectives of PURPA by encouraging cogeneration and small power production, energy conservation, efficient use of facilities and resources by electric utilities and equitable rates for electric consumers.

DATES: The Commission is scheduling a public hearing to be held on July 5, 1988, to provide interested persons with an opportunity to make oral presentations of their views. Requests to participate must be filed in writing (separately from comments) with the Secretary on or before June 14, 1988. An original and 14 copies of written comments on this proposed rule must be filed with the Commission on or before June 14, 1988. Replies to written comments must be filed with the Commission on or before July 14, 1988. Replies to written comments shall not exceed 15 double-spaced pages.

ADDRESS:

Public hearing and comments:

Federal Energy Regulatory Commission,
825 North Capitol Street NE.,
Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT:

Martha M. Poindexter, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Telephone: (202) 357–8428.

Technical questions:

William Longenecker, Office of Electric Power Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Telephone: (202) 376–4444.

James C. Liles, Office of Economic Policy, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Telephone: (202) 357–8069.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's action in Docket No. RM88–5–000 adopted and released March 16, 1988.

The full text of this Commission action is available for inspection and copying during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street NE., Washington, DC 20426; at the Atlanta Regional Office, 730 Peachtree Street NE., Room 800, Atlanta, GA 30308; at the Chicago Regional Office, Federal Building, 230 South Dearborn Street, Room 3130, Chicago, IL 60604; at the New York Regional Office, 201 Varick Street, Room 664, New York, NY 10014; at the Portland Regional Office, 1120 South West 5th Avenue, Suite 1340, Portland, OR 97204; and at the San Francisco Regional Office, 901 Market Street, 3rd Floor, San Francisco, CA 94103. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

List of Subjects

18 CFR Part 35

Electric power rates, Electric utilities, Reporting and recordkeeping requirements.

18 CFR Part 293

Electric power plants, Electric utilities, Natural gas, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission proposes to amend Parts 35 and add Part 293, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By direction of the Commission. Commissioner Stalon concurred with a separate statement. Commissioner Trabandt concurred in part and dissented in part with a separate statement.

Lois D. Cashell,
Acting Secretary.

PART 35—FILING OF RATE SCHEDULES

1. The authority citiation for Part 35 continues to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Independent Offices Appropriations Act, 31 U.S.C. 9701 (1982); Federal Power Act, 16 U.S.C. 791a–825r (1982); Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2645 (1982).

2. In § 35.13, paragraph (h)(37)(i) is revised to read as follows:

§ 35.13 Filing of changes in rate schedules.

* * * * *

(h) * * *

(37) *Statement BL—Rate design information.* * * *

(i) A narrative statement describing and justifying the objectives of the design of the changed rate. If the purpose of the rate design is to reflect costs, the utility must state how that objective is achieved, and must accompany it with a summary cost analysis that would justify the rate design, including any discount or surcharges based on delivery voltage level or other specific consideration. Such summary cost analysis must be consistent with, derived from, and cross-referenced to the data in cost of service Statement BK. If the rate design is not intended to reflect costs, whether fully distributed, marginal, incremental, or other, the utility must provide a statement to justify the departure from cost-based rates. For noncost based rates established in a bidding program under Part 293 of this chapter, the electric utility must submit a copy of the state certification of the bid selection under § 293.212 of this chapter in lieu of any of the cost of service information otherwise required by Statements AA through BM.

* * * * *

3. Part 293 is added to read as follows:

PART 293—REGULATIONS GOVERNING THE USE OF BIDDING PROGRAMS TO PURCHASE ELECTRIC CAPACITY AND ASSOCIATED ENERGY FROM QUALIFYING FACILITIES UNDER PURPA

Subpart A—General Provisions

Sec.
293.101 Purpose.
293.102 Applicability.
293.103 Definitions.

Subpart B—Requirements for Bidding Programs

293.201 Rates for purchases.
293.202 Capacity reservations.
293.203 Sources of capacity.
293.204 Solicitation of bids.
293.205 Evaluation of bid selection.
293.206 Negotiation and bidding programs.
293.207 Preference for qualifying facilities.
293.208 Waiver of efficiency standard.
293.209 Availability of electric utility system cost data.
293.210 Small qualifying facilities.
293.211 State certification of bid selection.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Independent Offices Appropriations Act, 31 U.S.C. 9701 (1982); Federal Power Act, 16 U.S.C. 791a–825r (1982), as amended; Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2645 (1982), as amended.

Subpart A—General Provisions

§ 293.101 Purpose.

(a) The purpose of this part is to set forth minimum requirements for any bidding program that is used to determine rates for the purchase of electric capacity and associated energy from qualifying facilities under the Public Utility Regulatory Policies Act of 1978 (PURPA).

(b) Nothing in this part relieves an electric utility of its obligation to:

(1) Purchase electric energy from a qualifying facility under § 292.303(a) of this chapter;

(2) Sell electric energy to a qualifying facility under § 292.303(b) of this chapter;

(3) Interconnect with a qualifying facility under § 292.303(c) of this chapter.

(4) Transmit to another electric utility under § 292.303(d) of this chapter; and

OL
53
SS
55
MR
22
988
MI

(5) Operate in parallel with a qualifying facility under § 292.303(e) of this chapter.

§ 293.102 Applicability.

(a) This part applies to any State regulatory authority or nonregulated electric utility that chooses to establish a bidding program to determine rates for the purchase of electric capacity and associated energy from qualifying facilities and others.

(b) Either a State regulatory authority or a nonregulated electric utility can establish or rescind a bidding program.

(c) If a State regulatory authority or nonregulated electric utility establishes a bidding program, the bidding program must:

(1) Not alter existing contracts between electric utilities and qualifying facilities; and

(2) Not be unduly discriminatory toward any participant in the bidding program.

§ 293.103 Definitions.

For the purpose of this part:

(a) "Person" means an individual or a corporation;

(b) "Corporation" means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing;

(c) The terms "qualifying facility," "purchase," "rate" and "avoided cost" have the same meaning as defined in § 292.101 of this chapter;

(d) "Bidding program" means an established procedure through which offers from qualifying facilities under the Public Utility Regulatory Policies Act of 1978 and others are solicited, obtained and selected in order to meet a specified need for electric capacity and associated energy;

(e) "Benchmark avoided cost" means an avoided cost calculated on the basis of any sources of capacity not permitted to submit offers in a bidding program;

Subpart B—Requirements for Bidding Programs

§ 293.201 Rates for purchases.

(a) Rates for purchases established in a bidding program under this part must:

(1) Be just and reasonable to the electric consumer of the electric utility and in the public interest;

(2) Not discriminate against qualifying facilities; and

(3) Not exceed the incremental cost of alternative electric energy.

(b) Rates established through a bidding program that meets the requirements of this part satisfy paragraph (a) of this section.

§ 293.202 Capacity Reservations.

A state regulatory authority or nonregulated electric utility that implements a bidding program may reserve or withhold a portion of the utility's planned capacity needs from bidding. Qualifying facilities must be:

(a) Permitted to submit offers for the capacity subject to bidding; and

(b) Given the opportunity to satisfy the planned capacity need reserved or withheld from bidding.

§ 293.203 Sources of capacity.

(a) Except as provided in paragraph (c) of this section a bidding program under this part must take into account all sources for satisfying the planned capacity needs of the electric utility.

(b) A State regulatory authority or nonregulated electric utility can satisfy the requirement in paragraph (a) of this section by either:

(1) Permitting all sources of capacity to submit offers in a bidding program; or

(2) Limiting the sources of capacity, other than qualifying facilities, that may submit offers in a bidding program by calculating a benchmark avoided cost which:

(i) Takes into account any source of capacity excluded from the bidding program; and

(ii) Serves as a ceiling for the rates established in the bidding program.

(c) If a state regulatory authority or nonregulated electric utility excludes any wholesale source from the benchmark avoid cost calculation required under paragraph (b)(2) of this section, it must explain in writing why the wholesale source was excluded.

§ 293.204 Solicitation of bids.

(a) *General rule.* The solicitation of bids must be:

(1) Open to all persons who sell electric capacity and associated energy other than those persons prohibited by the State regulatory authority or nonregulated electric utility pursuant to § 293.203 or this part; and

(2) Publicly noticed sufficiently in advance of the date offers are to be submitted to allow preparation of the bids or offers to sell electric capacity and associated energy.

(b) The solicitation of bids must include a full description of:

(1) The planned need for capacity and associated energy;

(2) The criteria for participation, including any conditions which limit prospective participants with respect to ownership, affiliation, condition of the facility, technology, experience of the owner or operator, financial capability, site control, fuel supply guarantees, and permits or licenses; and

(3) The selection criteria to be used for selecting the winning bids including the factors set forth in § 292.304(e) and § 292.304(b)(5) and (d) of this chapter.

§ 293.205 Evaluation of bid selection.

The evaluation of all bids submitted in a bidding program under this part must be in writing and must be based on the criteria identified in the solicitation of bids, including those factors in § 292.304(e) and § 292.304(b)(5) and (d) of this chapter.

§ 293.206 Negotiation and bidding programs.

(a) Except as provided in paragraphs (b) or (c) of this section, an electric utility may not negotiate to acquire electric capacity and associated energy to be obtained through a bidding program, if any, from the time the final bids are submitted to the time the winning bids are selected.

(b) An electric utility may negotiate with a winning bidder on terms and conditions not stated in the solicitation of bids.

(c) An electric utility may negotiate to acquire any capacity and associated energy that is not subject to bidding from the time the final bids are submitted to the time the winning bids are selected. must be given an opportunity to offer to satisfy this capacity.

§ 293.207 Preference for qualifying facilities.

In any bidding program under this part, in the case of a tie among bids between a qualifying facility and a nonqualifying facility, the qualifying facility's bid must be selected over the nonqualifying facility's bid.

§ 293.208 Waiver of efficiency standard.

If a qualifying oil- or gas-fired topping cycle cogeneration facility is selected as a winning bidder, the efficiency standard in § 292.205(a)(2) of this chapter is waived.

§ 293.209 Availability of electric utility system cost data.

(a) Except as provided in paragraph (b) of this section, an electric utility whose planned capacity needs are subject to a bidding program must provide to the State regulatory authority or nonregulated electric utility and must maintain for public inspection at its principal place of operation the following data:

(1) The estimated avoided cost on the electric utility's system;

(2) The electric utility's plan for the addition of capacity by amount and type, including wholesale sources; and

(3) The estimated capacity costs at completion of the planned capacity additions and planned capacity purchases.

(b) *Exception.* (1) If an electric utility submits an offer in a bidding program to satisfy its own planned capacity needs, the State regulatory authority may exempt the electric utility from the requirement to make the data in paragraph (a) of this section publicly available. However, the data in paragraph (a) of this section must still be submitted to the appropriate State regulatory authority.

(2) If a nonregulated electric utility submits an offer in a bidding program to satisfy its own capacity needs, the nonregulated electric utility is not required to make the data in paragraph (a) of this section publicly available. However, the data in paragraph (a) of this section must be submitted to the Commission.

§ 293.210 Small qualifying facilities.

(a) A State regulatory authority or nonregulated electric utility may exempt from participation in a bidding program qualifying facilities not exceeding one megawatt in size.

(b) Rates and terms and conditions for qualifying facilities exempted under paragraph (a) of this section must be determined by a bidding program under this part.

§ 293.211 State certification of bid selection.

Any State regulatory authority or nonregulated electric utility that establishes a bidding program under this part must:

(1) Approve the price and selection of the bids pursuant to any bidding program under its jurisdiction; and

(2) Notify the Commission of the winning bidders.

18 CFR Parts 38 and 382

[Docket No. RM88-4-000]

Regulations Governing Independent Power Producers

March 16, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking (NOPR).

SUMMARY: The Federal Energy Regulatory Commission (Commission) is proposing to streamline regulation of a class of nontraditional utility suppliers, called independent power producers (IPPs). The proposed regulations would: (1) Authorize rates for IPPs to be determined through competitive bidding or rate negotiation subject to a price cap, thereby freeing IPPs from cost-based ratemaking while ensuring rates fall within a zone of reasonableness; (2) authorize IPPs to file rate schedules without having to provide extensive cost support; (3) exempt IPPs from cost-related accounting, reporting and recordkeeping requirements; (4) streamline the corporate and financial regulation of IPPs; (5) provide for virtually automatic authorizations to engage in certain corporate activities; (6) revise filing fees; (7) waive annual charges; and (8) adopt an advance certification procedure to qualify as an IPP. By promulgating these regulations the Commission seeks to increase supply options in the wholesale electric energy market and thereby fulfill its statutory responsibilities under the Federal Power Act (FPA) and Public Utility Regulatory Policies Act of 1978 (PURPA).

DATES: The Commission is scheduling a public hearing to be held on July 5, 1988, to provide interested persons with an opportunity to make oral presentations of their views. Requests to participate must be filed in writing (separately from comments) with the Secretary on or before June 14, 1988. An original and 14 copies of written comments on this proposed rule must be filed with the Commission on or before June 14, 1988. Replies to written comments must be filed with the Commission on or before July 14, 1988. Replies to written comments shall not exceed 15 double-spaced pages.

ADDRESS: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT:

General questions: Gilda E. Rodriguez, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Telephone: (202) 357-9155.

Technical questions: William Longenecker, Office of Electric Power Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, Telephone: 376-4444.

David Mead, Office of Economic Policy, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, Telephone: 357-8024.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's action in Docket No. RM88-4-000 adopted and released March 16, 1988.

The full text of this Commission action is available for inspection and copying during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street, NE., Washington, DC 20426; at the Atlanta Regional Office, 730 Peachtree Street NE., Room 800, Atlanta, GA 30308; at the Chicago Regional Office, Federal Building, 230 South Dearborn Street, Room 3130, Chicago, IL 60604; at the New York Regional Office, 201 Varick Street, Room 664, New York, NY 10014; at the Portland Regional Office, 1120 South West 5th Avenue, Suite 1340, Portland, OR 97204; and at the San Francisco Regional Office, 901 Market Street, 3rd Floor, San Francisco, Regional Office, 901 Market Street, 3rd Floor, San Francisco, CA 94103. Subpart G—Accounting and Reporting Procedures

38.701 Accounting requirements.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Independent Offices Appropriations Act, 31 U.S.C. 9701 (1982); Federal Power Act, 16 U.S.C. 791a–825r (1982), as amended; Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2645 (1982), as amended.

Subpart A—General Applicability

§ 38.101 Purpose.

The purpose of this part is to establish procedures to regulate and certify independent power producers under the Federal Power Act.

§ 38.102 Application.

(a) This part applies to:

(1) An independent power producer (IPP), as that term is defined in § 38.103(a); and

(2) The sale for resale in interstate commerce of electric energy from an IPP to a wholesale customer.

(b) A public utility that has not been granted a retail service franchise territory and that is primarily engaged in transactions in which it qualifies as an independent power producer (IPP), qualifies for regulatory treatment under subparts C, D, and E of this part.

(c) A public utility that does not meet the requirements in paragraph (b) of this section may apply for regulatory treatment under subparts C, D, and E of this part on a case-by-case basis.

(d) Unless otherwise provided in this part, IPPs are exempt from Parts 33, 34, 35, 41, 45, 46, 50, 101, 141, and 382 of this chapter.

§ 38.103 Definitions.

For the purposes of this part:

(a) A public utility as defined in section 201(e) of the Federal Power Act is an "independent power producer" (IPP) only when it:

(1) Sells or will sell electric energy produced by an independent power facility to a customer outside any retail service franchise territory that the public utility (or its affiliate) may have been granted; and

(2) Does not control transmission facilities essential to the customer purchasing electric energy from that independent power facility.

(b) "Independent power facility" (IPF) is a facility, or portion thereof, that is not regulated on a cost-of-service basis as that term is defined in paragraph (a)(1) of this section.

(c) "Transmission facility essential to a customer" means a transmission facility that supplies a necessary or indispensable amount of electric energy to the customer served by such facility. Absent a Commission order to the contrary, a transmission facility that supplies less than 50 percent of the electric energy needs of the customer is not essential.

(d) "Affiliate" means companies or persons that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the IPP.

(e) "Control" for purposes of an affiliate (including the terms "controlled by," and "under common control with") means the possession, directly or indirectly, of the authority to direct or cause the direction of the management and policies of a company, whether such authority is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract or any [illegible] direct or indirect means.

[illegible] of transmission facilities" means [illegible] ability to prevent the use of transmission facilities for the purpose of transmitting electric energy.

(g) "Securities" means any note, stock, treasury stock, bond, or debenture or other evidence of interest in or indebtedness of a corporation subject to the Federal Power Act.

(h) "Person" means an individual or corporation.

(i) "Corporation" means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees or any of the foregoing. Corporation does not include "municipalities" as defined in the Federal Power Act.

(j) "Purchaser's avoided cost" means the incremental cost to an electric utility of electric energy or capacity or both which, but for the purchase from the IPP, such utility would generate itself or purchase from another source.

(k) "Regulated on a cost-of-service basis" means rate treatment that provides, under an approved rate on file, for recovery of plant related costs including operation, maintenance, income and non-income taxes return on investment, return of capital, and lease expense.

Subpart B—Rate Regulation

§ 38.201 Sales by independent power producers.

(a) An independent power producer (IPP) must file an application for a rate schedule in accordance with §§ 38.202–204 for any sale of electric energy subject to the jurisdiction of the Commission.

(b) *Ceiling price.* A rate filed by an IPP is just and reasonable if the rate is at or below the purchaser's avoided cost, as that term is defined in § 38.103(j).

(c) *Purchaser's avoided cost.* A purchaser's avoided cost can be determined, consistent with § 38.103(j), by:

(1) The purchaser in a statement filed by the IPP, verified and attested to by an authorized representative of the purchaser; or

(2) A State regulatory agency that has administratively determined the purchaser's avoided cost pursuant to Part 292 of this chapter; or

(3) A bidding program pursuant to Part 293 of this chapter.

§ 38.202 Rate application.

An initial or changed rate application filed under this subpart must contain the following information:

(a) The rate schedule with copies of all contracts (including the terms and conditions of sale) that affect or relate to the rates, charges, or services, as required by section 205(e) o' the Federal Power Act;

(b) A list of documents submitted with the initial rate or rate change schedule;

(c) A letter to transmit to the Commission for filing the rate schedule. The transmittal letter must contain the following information:

(1) The date on which the service under the initial rate schedule or changed rate schedule is expected to commence;

(2) The names and addresses of those to whom the rate schedule has been mailed;

(3) A brief description of the kinds of services to be furnished at the initial or changed rates specified therein including:

(i) Whether the IPP will sell electric energy from an independent power facility (IPF) outside any retail service franchise territory that the IPP or its affiliate may have been granted; and

(ii) Whether the IPP or its affiliate controls transmission facilities essential to the customer purchasing electric energy from the IPF;

(4) A summary of the circumstances which show that all requisite agreement to the rate schedule or its filing, including any contract embodied therein, has in fact been obtained; and

(d) A form of notice suitable for publication in the **Federal Register** which briefly summarizes the facts contained in the application so as to acquaint the public with its scope and purpose.

§ 38.203 Filing of rate schedules.

(a) An independent power producer (IPP) must file with the Commission and maintain, rate schedules that show the rates for any sale of electric energy subject to the Commission's jurisdiction. The filing of the rate schedule must meet the requirements of this section.

(b) An IPP must:

(1) Make available a copy of every current rate schedule on file or as tendered for filing with the Commission during regular business hours for public inspection in a convenient form at its principal place of business and at any offices in the territory in which it sells power; and

(2) Mail to every purchaser under such rate schedule a copy of that schedule when the IPP sends it to this Commission for filing.

(c) If an IPP files for an increase or decrease in rates or charges, or other change in contract terms or conditions, the IPP must mail to each purchaser and to each State regulatory authority within whose jurisdiction such purchaser distributes and sells electric energy at retail, a copy of the rate schedule showing the increase or decrease in rates or charges or other change in contract terms and conditions, and if requested by a purchaser or State regulatory authority, a copy of the supporting data required to be submitted to this Commission under this part.

(d) The effective date of a rate schedule means the date on which a rate schedule, filed pursuant to the requirements of this section, is permitted by the Commission to become effective as a filed rate schedule.

(e) A rate schedule covered by the terms of this section must contain the following provisions when it is the intent of the contracting parties to withhold from the party furnishing service, the right to file any unilateral rate change under section 205 of the Federal Power Act:

> The rates for service specified herin shall remain in effect for the term of XXX or until XXX, and shall not be subject to change through application to the Federal Energy Regulatory Commission pursuant to the provisions of Section 205 of the Federal Power Act absent the agreement of all parties thereto.

(f) *Form and style of rate schedules.* A rate application filed with the Commission under this part must include the following:

(1) The name of the rate applicant;

(2) Identity of the parties;

(3) A brief description of the service to be provided under the rate schedule;

(4) A verified statement that the proposed rates are at or below the purchasers avoided cost as defined in § 38.103(j).

(5) A rate schedule tendered for filing under this part must conform to the specifications in § 385.2003 of this chapter. All copies must be clear, legible, complete, and must show the name(s) of all signatures to executed documents.

(g) *Number of copies.* An applicant must supply an original and three copies of all rate schedules or parts thereof, and material related to the rate schedule, including any change in rates, notices of cancellation or termination, and notices of succession that are filed with the Commission. All copies are to be included in one package, together with three copies of the transmittal letter and all other materials and information required by these regulations. The package should be filed with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

(h) *Identification and numbering of rate schedules.* Every rate schedule filed with the Commission will be numbered and the filing independent power producer will be advised of the rate schedule FERC number. Whenever a rate schedule change is offered for filing and is dependent upon, or amendatory of, an existing rate schedule on file with the Commission, it will be designated as a supplement or an exhibit to the existing rate schedule and will be so numbered.

§ 38.204 Notice requirements.

(a) *Rate schedules.* A rate application for an initial or changed rate must be filed with the Commission at least 60 days before the electric service begins and becomes effective under that rate schedule.

(b) *Construction of facilities.* If a rate schedule involves construction of facilities, the IPP may file the rate schedule up to 60 days before the date the parties have agreed the contract would go into effect.

(c) *Termination of service.* An IPP must file a notice of termination 60 days before service is to be terminated.

(d) *Waiver.* Upon application and for good cause shown, the Commission may waive the notice requirements of this section.

Suppart C—Disposition of Facilities, Merger or Consolidation of Facilities, or Acquisition of Securities

§ 38.301 Applicability.

(a) An independent power producer (IPP) must file an application for Commission approval of any proposed transaction under this subpart.

(b) The requirements of this section apply to an IPP that seeks authority under section 203 of the Federal Power Act to:

(1) Dispose by sale, lease or otherwise the whole of its electric facilities subject to Commission jurisdiction, or any part thereof of a value in excess of $50,000;

(2) Merge or consolidate, directly or indirectly, its facilities subject to the Commission's jurisdiction which have a value in excess of $50,000, with those of any other person or corporation;

(3) Acquire electric facilities used for the transmission or sale at wholesale of electric energy in interstate commerce which, except for ownership, would be subject to the Commission's jurisdiction;

(4) Purchase, acquire, or take a security of any other IPP or public utility.

(c) "Value in excess of $50,000" as used in section 203 of the Federal Power Act is the original cost undepreciated as defined in Part 101 of this chapter.

§ 39.302 Commission authorization.

Except as provided in § 38.102(c), an IPP is authorized by the Commission to dispose of jurisdictional facilities, to merge or consolidate jurisdictional facilities, and to acquire the securities of any other public utility provided that it complies with all the requirements of this subpart.

§ 38.303 Contents of the application.

(a) An application for a proposed transaction described in § 38.301 must contain the following information:

(1) An identification of the parties to the transactions including:

(i) The address of the principal business offices of the parties;

(ii) The name and address of the person authorized to receive notices and communications; and

(iii) The State or other sovereign power under which incorporated, the respective dates of incorporation, and the State in which the party is domiciled;

(2) A statement whether the application is for a disposition of facilities by sale, lease, or othewise, a merger or consolidation of facilities, or for purchase or acquisition of securities of an IPP or other public utility;

(3) A description of the consideration in the transaction, if any, and the method of determining the amount of consideration;

(4) A statement as to the effect the proposed transaction may have on:

(i) The applicant's retail service franchise territory and control of transmission facilities; and

(ii) Any contract for the purchase, sale, or interchange of electric energy;

(5) A statement describing the jurisdictional facilities or securities to be disposed of, consolidated, merged, or acquired;

(6) A statement whether the proposed disposition of facilities or plan for consolidation or merger includes all the operating facilities of the parties to the transaction;

(7) A statement whether any application with respect to the transaction or any part thereof is required to be filed with any other Federal or State regulatory authority; and

(8) A form of notice suitable for publication in the **Federal Register**, which will briefly summarize the facts contained in the application in such way as to acquaint the public with its scope and purpose.

(b) The application must include the following exhibits:

(1) *Exhibit A.* A signed copy of opinion of counsel with respect to legality of the proposed transaction;

(2) *Exhibit B.* A copy of all contracts with respect to the proposed disposition, merger or consolidation of facilities, or acquisition of securities, together with copies of all other written instruments entered into or proposed to be entered into by the parties to the transaction pertaining thereto.

§ 38.304 Number of copies.

An applicant must provide the Commission with an original and three copies of each application filed under this subpart.

§ 38.305 Verification.

The application must meet the requirements in § 385.2005 of this chapter and must be verified under oath.

Subpart D—Application for Authorization of the Issuance of Securities or the Assumption of Liabilities

§ 38.401 Applicability.

Except as provided in § 38.403, an independent power producer (IPP) must file and application for authorization from the Commission pursuant to section 204 of the Federal Power Act to issue securities or to assume an obligation or liability.

§ 38.402 Commission authorization.

Except as provided for in §38.102(c), an IPP is authorized by the Commission to issue securities or assume an obligation or liability provided that it complies with the requirements of this subpart.

§ 38.403 Exemptions.

(a) The provisions of this subpart do not apply to:

(1) An applicant who is organized and operating in a State where its security issues are regulated by a State regulatory authority; or

(2) The issuance, renewal, or assumption of laibility on a note or draft if:

(i) The note or draft does not mature more than one year after the date of such issuance, renewal, or assumption of liability; and

(ii) The note or draft does not total (together with all other then outstanding notes and drafts of a maturity of one year or less on which such IPP is primarily or secondarily liable) more than five percent of the par value of the other securities of the IPP then outstanding. In the case of securities having no par value, the par value is the fair market value of the securities on the date of issuance, renewal or assumption of liability.

(b) To qualify for the exemption in paragraph (a) of this section the applicant must file with the Commission, within 10 days of the issuance, renewal, or assumption of liability, a certificate of notice in the form provided in § 131.50 of this chapter.

§ 38.404 Contents of the application.

An application to the Commission for authority to issue securities or assume an obligation or liability must contain the following information:

(a) A statement describing the transaction subject to the jurisdiction of the Commission under section 204 of the Federal Power Act;

(b) A description as to how the securities are to be issued and sold or the procedure by which the applicant will assume any obligation or liability as guarnator, endorser, surety, or otherwise;

(c) A statement whether the proposed issuance of securities or assumption of liabilities is for some lawful object, within the corporate purposes of the applicant;

(d) A statement, pursuant to section 204(d) of the Federal Power Act, declaring that the proposed issuance does not authorize the capitalization of the right to be a corporation or of any franchise, permit, or contracts for consolidation, merger or lease in excess of the amount (exclusive of any tax or annual charge) actually paid as the consideration for such right, franchise, permit, or contract;

(e) A statement as to whether the application, with respect to the transaction or any part thereof, is required to be filed with any State regulatory body; and

(f) A form of notice suitable for publication in the **Federal Register**, providing:

(1) The legal name of the applicant; and

(2) The securities offered for issuance including the proposed issue date.

§ 38.405 Number of copies to be filed.

An applicant must submit to the Commission an original and three copies of each application filed pursuant to this subpart.

§ 38.409 Verification.

The application must meet requirements in § 385.2005 of this chapter and must be verified under oath.

Subpart E—Application for Authorization to Hold Interlocking Positions

§ 38.501 Applicability.

An officer or director of an independent power producer (IPP) who holds or will hold an interlocking position as described in § 38.503, must file under sectin 305(b) of the Federal Power Act, an application for authorization to hold the interlocking position with the Commission.

§ 38.502 Commission authorization.

Except as provided in § 38.102(c), an officer, or director of an IPP is authorized by the Commission to hold the interlocking positions described in § 38.503, if the officer or director of the IPP complies with the requirements of this subpart.

§ 38.503 Position subject to authorization.

(a) This subpart applies to a person seeking to hold the following interlocking positions:

(1) Officer or director of an IPP and the officer or director of another public utility;

(2) Officer or director of an IPP and the officer or director of any bank, trust company, banking association, or firm that is authorized by law to underwrite or participate in the marketing of securities of a public utility; or

(3) Officer or director of an IPP and the officer or director of any company supplying electrical equipment to the IPP.

(b)(1) The positions subject to this section include those of any person elected or appointed to perform the duties or functions ordinarily performed by a president, vice president, secretary, treasurer, general manager, comptroller, chief purchasing agent, director or partner, or to perform any other similar executive duties or functions.

(2) If a position which the applicant holds and which is invested with executive authority is not specifically mentioned in paragraph (b)(1), the applicant must state in the application the source of such executive authority, whether by bylaws, action of the board of directors, or otherwise.

§ 38.504 Time of filing.

A person authorized to hold interlocking positions under this subpart must file an application with the Commission within 30 days of assuming the duties of the position.

§ 38.505 Contents of the application.

An application filed with the Commission under this subpart must contain the following information:

(a) The applicant's full name, and business address;

(b) A list of the jurisdictional interlocks, identifying the affected companies and the positions held by the applicant, including a description of those positions; and

(c) A form of notice suitable for publication in the **Federal Register**, which will briefly summarize the facts contained in the application in such way as to acquaint the public with its scope and purpose.

§ 38.506 Number of copies.

An applicant must provide the Commission with an original and three copies of each application filed under this subpart.

Subpart F—Procedures for Obtaining Advance Certification Independent Power Producer (IPP) Status

§ 38.601 Advance certification.

(a) Any person or corporation seeking advance certification as an IPP under this part may, pursuant to either paragraphs (b) or (c) of this section file with the Commission an application for certification that the applicant is an IPP.

(b) If a public utility meets the requirements of § 38.102(b) it must, in order to be certified as an IPP, provide the following information:

(1) The name and address of the applicant;

(2) A verified statement that the applicant has not been, and will not be, granted a retail service franchise territory; and

(3) A verified statement that the applicant is or will be primarily engaged in transactions in which it qualifies as an IPP.

(c) If a public utility does not meet the requirements of § 38.102(b), it must, in order to be certified as an IPP, provide the following information:

(1) The name and address of the applicant;

(2) A brief description of the independent power facility (IPF) as that term is defined in § 38.103(b) of this part;

(3) A brief description of the IPP transaction;

(4) A description of the retail service franchise territory, if any, which has been granted to the applicant or its affiliate; and

(5) A verified statement that the applicant or its affiliate does not control a transmission facility which is essential to the customer purchasing electric energy from the IPF.

§ 38.602 Notice.

Applications filed under this subpart must provide the Commission with a form of notice suitable for publication in the **Federal Register**, which will briefly summarize the facts contained in the application.

§ 38.603 Revocation of independent power producer status.

The certification of a power producer as an IPP under this section is revoked if the power producer fails to comply with any of the statements contained in its application.

Subpart G—Accounting and Reporting Procedures

§ 38.701 Accounting requirments.

Except for its transactions regulated on a cost-of-service basis, an independent power producer is exempt from Parts 41, 50, 101 and 141 of this chapter.

PART 382—ANNUAL CHARGES

2. The authority citation for Part 382 continues to read as follows:

Authority: Omnibus Budget Reconciliation Act of 1986, Pub. L. No. 99-509, Title III, Subtitle E, sec. 3401 (Oct. 21, 1986); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp. p. 142; Administrative Procedure Act, 5 U.S.C. 551–557 (1982); Natural Gas Act 15 U.S.C. 717–717w (1982); Federal Power Act, 16 U.S.C. 791a–828c (1982); Natural Gas Policy Act, 15 U.S.C. 3301–3432 (1982); Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2645 (1982); Interstate Commerce Act, 49 U.S.C. 1–27 (1976).

§ 382.102 [Amended]

3. In § 382.102, paragraph (b) is amended by adding the phrase ", or an independent power producer (IPP) as defined in Part 38 of this chapter." at the end of the sentence.

Administrative Determination of Full Avoided Costs, Sales of Power To Qualifying Facilities, and Interconnection Facilities

March 16, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking (NOPR).

SUMMARY: The Federal Energy Regulatory Commission (Commission) is proposing to amend its regulations governing purchases and sales of electric energy and capacity between electric utilities and qualifying cogeneration facilities and qualifying small power production facilities. The proposed changes would §§ 292.304, 292.305, and 292.306 of the Commission's regulations (18 CFR 292.304, 292.305, and 292.306 (1987)) by: (1) More sharply defining guidelines and criteria for administrative determinations of full avoided costs by state regulatory authorities and nonregulated electric utilities; (2) revising guidelines with

respect to the provision of supplemental, backup, maintenance, and interruptible power to qualifying facilities and requiring certain factors to be considered in setting rates for back-up and maintenance power; and (3) permitting the ownership of internconnection and transmission facilities by qualifying facilities.

DATES: The Commission is scheduling a public hearing to be held on July 5, 1988, to provide interested persons with an opportunity to make oral presentations of their views. Requests to participate must be filed in writing (separately from comments) with the Secretary on or before June 14, 1988.

An original and 14 copies of written comments on this proposed rule should be filed with the Commission on or before May 16, 1988. Replies to written comments should be filed with the Commission on or before July 14, 1988. Replies to written comments shall not exceed 15 double-spaced pages.

ADDRESS: Public hearing and comments: Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, DC 20426.

General questions:

Andre Goodson, Office of the General Counsel, Federal Energy Regulatory Commission, Washington, DC 20426, (202) 357–8467.

Technical questions:

Stratford Douglas, Office of Economic Policy, Federal Energy Regulatory Commission, Washington, DC 20426, (202) 357–8741

James K. Newton, Office of Electric Power Regulation, Federal Energy Regulatory Commission, Washington, DC 20426, (202) 376–9020

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's action in Docket No. RM88–6–000 adopted and released March 16, 1988.

The full text of this Commission action is available for inspection and copying during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street, NE., Washington, DC 20426; at the Atlanta Regional Office, 730 Peachtree Street NE., Room 800, Atlanta, GA 30308; at the Chicago Regional Office, Federal Building, 230 South Dearborn Street, Room 3130, Chicago, IL 60604; at the New York Regional Office, 201 Varick Street, Room 664, New York, NY 10014; at the Portland Regional Office, 1120 South West 5th Avenue, Suite 1340, Portland, OR 97204; and at the San Francisco Regional Office, 901 Market Street, 3rd Floor, San Francisco, CA 94103. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

List of Subjects in 18 CFR Part 292

Electric power plants, Electric utilities, Natural Gas, Reporting and recordkeeping requirements.

The Commission proposes to amend Part 292, Chapter I, Title 18, *Code of Federal Regulations*, as set forth below.

By direction of the Commission. Commissioner Trabandt concurred in part and dissented in part with a separate statement.

Lois D. Cashell,
Acting Secretary.

PART 292—REGULATIONS UNDER SECTION 201 AND 210 OF THE PUBLIC UTILITY REGULATORY POLICIES ACT OF 1978 WITH REGARD TO SMALL POWER PRODUCTION AND COGENERATION

1. The authority citation in Part 292 is revised to read as follows:

Authority: Electric Consumers Protection Act of 1986, Pub. L. 99–495; Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 C.F.R. 1978 Comp., p. 142; Independent Offices Appropriationis Act, 31 U.S.C. 9701 (1982); Federal Power Act, 16 U.S.C. 791a–825r (1982); Public Utility Regulatory Policies Act, 16 U.S.C. 2601–2645 (1982), as amended.

2. In § 292.101, paragraphs (b)(8), (b)(9), (b)(10), and (b)(11) are revised and (b)(12) is added to read as follows:

§ 292.101 Definitions.

* * * * *

(b) *Definitions* * * *

(8) "Supplemantary Power" means electric energy and capacity supplied by an electric utility regularly used by a qualifying facility in addition to that which the facility generates itself.

(9) "Back-up power" means electric energy and capacity supplied by an electric utility to replace energy ordinarily generated by a qualifying facility's own generation equipment during an unscheduled outage of the facility.

(10) "Maintenance power" means electric energy and capacity supplied by an electric utility to replace energy ordinarily generated by the qualifying facility's own generation equipment during scheduled outages of the qualifying facility.

(11) "Interruptible service" means electric energy and capacity supplied by an electric utility subject to interruption by the electric utility under certain circumstances, such as by contractual agreement between the electric utility and the qualifying facility or as specified by a state regulatory authority.

(12) "Firm service" means service that is not subject to interruption.

3. In § 292.304, paragraph (a)(2) is revised, paragraph (b)(5) is revised, paragraph (b)(6) is added, paragraphs (c))(1), (c)(2), and (c)(3)((i) are revised, paragraph (d)(2) is revised, paragraph (e) introductory text is revised, paragraphs, (e)(3) and (e)(4) are revised, paragraph (e)(5) is added, and paragraph (g) is added to read as follows:

§ 292.304 Rates of purchases.

(a) *Rates for purchases.* * * *

(2) Except as provided in paragraph (b)(5) of this section, a State may not require under this subpart an electric utility to purchase energy or capacity from a qualifying facility at a rate higher than the electric utility's avoided cost.

(b) *Relationship to avoided costs.* * * *

(5) Rates for purchases from a qualifying facility pursuant to a contract or other legally enforceable obligation may differ from avoided cost at the time of delivery only if the rates:

(i) Are based on estimates of avoided costs over the term of the contract or other legally enforceable obligation;

(ii) Do not result in payments in excess of the total avoided costs as calculated at the time the obligation is incurred; and

(iii) Take into account

(A) The time value of money.

(B) The qualifying facility's financing needs, and

(C) Any inequities that may result from the difference between the rate paid to the qualifying facility and the avoided cost at the time of delivery.

(6) A rate for purchase from qualifying facility must be based on the amount an electric utility would have paid another wholesale source if the purchase from the qualifying facility displaces the purchase from the other wholesale source.

(c) *Standard rates for purchases.* (1) Standard rates must be established for purchases from qualifying facilities that have a deisgn capacity of 1 megawatt or less.

(2) Standard rates may be established for purchases from qualifying facilities with a design capacity of more than 1 megawatt.

(3) * * *

(i) Must be set in accordance with paragraphs (a), (e), and (g) of this section; and

* * * * *

(d) *Purchases "as available" or pursuant to a legally enforceable obligation.* * * *

(2) To provide energy or capacity pursuant to a contract or other legally enforceable obligation for the delivery of energy or capacity over a specified term, in whch case the rates for such purchases must, at the option of the qualifying facility exercised prior to the beginning of the specified term, be based on:

(i) The avoided costs as calculated at the time of delivery; or

(ii) Any other payment schedule that meets the requirements of paragraph (b)(5) of this section.

(e) *Factors affecting rates for purchases.* A determination of avoided costs must be supported in writing and must address the following factors:

* * * * *

(3) The amount of capacity or energy needed by the utility and the qualifying facility's ability to meet those needs;

(4) The costs or savings resulting from variations in line losses from those that would have existed in the absence of purchases from a qualifying facility, if the purchasing electric utility generated an equivalent amount of energy itself or purchased an equivalent amount of electric energy or capacity; and

(5) The value to the electric utility of a diversity of fuel sources.

* * * * *

(g) *Adjustment of avoided capacity cost.* (1) If the amount of capacity offered by qualifying facilities exceeds an electric utility's capacity needs, a state regulatory authority or nonregulated electric utility should consider redetermining the electric utility's avoided capacity cost rate.

(2) An avoided capacity cost rate redetermined under paragraph (g)(1) of this section would not affect any existing contract or other legally enforceable obligation between an electric utility and a qualifying facility, unless the contract or legally enforceable obligation specifies otherwise.

4. Section 292.305 is revised to read as follows:

§ 292.305 Rates for sales.

(a) *General rules.* (1) Rates for sales:

(i) Must be just and reasonable and in the public interest; and

(ii) must not discriminate against qualifying facility in comparison to rates for sales to other customers served by the electric utility.

(2) Rates for sales do not discriminate against a qualifying facility, if those rates:

(i) Are based on accurate data; and

(ii) Use the same ratemaking principles that are used to establish rates for the utility's customers other than qualifying facilities.

(b) *Additional services to be provided to qualifying facilities.* (1) Except as provided in paragraph (b)(3), upon request of a qualifying facility, an electric utility must provide either firm or interruptible service for:

(i) Supplementary power;

(ii) Back-up power; and

(iii) Maintenance power.

(2) An electric utility must provide back-up power and maintenance power supplied under paragraph (b)(1) of this section to both the power producing equipment of a qualifying facility and any electric loads normally served by that facility.

(3) A juridsdictional State regulatory authority or the Commission, (with respect to any nonregulated electric utility) may waive the requirement in paragraph (b)(1) of this section if, after notice and an opportunity for public comment in the area served by the electric utility, the electric utility demonstrates and the appropriate regulatory authority finds that compliance would:

(i) Impair the electric utility's ability to render adequate service to its customers; or

(ii) Place an undue burden on the electric utility.

(c) *Rates for sales of back-up power.* (1) Unless supported by factual data, the rate for sales of back-up power may not be based on the assumption that:

(i) Reductions in electric output by all qualifying facilities on an electric utility's system will occur at the same time; or

(ii) Reductions in electric output by a qualifying facility will occur during the system peak.

(2) A determination of rates for back-up power must be supported in writing and include:

(i) The expected timing of forced outages of the qualifying facility, if there is any reason to expect they would not occur with random probability;

(ii) The expected frequency of forced outages of the qualifying facility;

(iii) The expected duration of forced outages of the qualifying facility;

(iv) The expected demand placed on the supplying utility's generating resources in the event of a forced outage of the qualifying facility;

(v) The expected cost of electric energy associated with the capacity used to meet the demand in the event of a forced outage of the qualifying facility;

(vi) The costs, if any, associated with transmission and distribution facilities used to meet the demand resulting from a forced outage of the qualifying facility; and

(vii) The terms of back-up service, in regard to its provision as firm or interruptible service, and the cost such terms of service impose on the supplying utility.

(d) *Rates for sales of maintenance power.* (1) Rates established for sales of maintenance power must consider the cost of producing electric energy and supplying capacity when an outage of a qualifying facility is scheduled to occur.

(2) A determination of rates for maintenance power must be supported in writing and must include:

(i) The ability of the qualifying facility to schedule outages and the associated maintenance power purchases with the utility;

(ii) The season of the year during which maintenance power is scheduled;

(iii) The ability of the qualifying facility to schedule maintenance power for a particular time of the day or days of the week;

(iv) The duration of scheduled outages of the qualifying facility;

(v) The expected demand placed on the supplying utility's generating resources if there is a scheduled outage by the qualifying facility;

(vi) The expected cost of electric energy associated with the capacity used to meet the demand in the event of a scheduled outage by the qualifying facility;

(vii) The costs associated with transmission and distribution facilities used to meet the demand that results from a scheduled outage by the qualifying facility; and

(viii) The terms of maintenance service, whether firm or interruptible, and their cost to the supplying utility.

(e) *Standard rates for sales.* A state regulatory authority or nonregulated utility must establish standard rates for sales to qualifying facilities that have a capacity of 1 megawatt or less. Rates for sales under this paragraph:

(1) Must be consistent with the requirements of this section; and

(2) May vary among qualifying facilities using different technologies and energy sources.

5. In § 292.306, paragraph (c) is added to read as follows:

§ 292.306 Interconnection costs.

* * * * *

(c) *Qualifying facility ownership of interconnection or transmission* *facilities*. A qualifying facility may construct or own an interconnection or transmission facility if the interconnection or transmission facility:

(1) Is used for the transmission of energy between the qualifying facility and an electric utility purchasing energy from, or selling energy to, the qualifying facility; and

(2) Meets all applicable State regulations.

BILLING CODE 6717-01-M

POSTAL SERVICE

39 CFR Part 111

Supplements and Enclosures in Second-Class Publications; Extension of Comment Period

AGENCY: Postal Service.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On March 3, 1988, the Postal Service published in the **Federal Register** (53 FR 6837) a proposed rule change intended to clarify and improve current postal regulations and procedures concerning the mailing of supplements to second-class publications. The Postal Service requested comments on the proposed rule change on or before April 4, 1988.

Certain mailer representatives requested a twenty-one day extension of the comment period in order to make a more complete assessment of the proposal and its potential effects.

The Postal Service believes that the requested extension is reasonable and will serve the public interest in this case. Accordingly, the Postal Service is extending the deadline for comments on the proposed rule change until April 25, 1988.

DATE: Comments on the proposed rule change must be received on or before April 25, 1988.

ADDRESS: Written comments should be mailed or delivered to the Director, Office of Classification and Rates Administration, U.S. Postal Service, 475 L'Enfant Plaza West SW., Washington, DC 20260-5360. Copies of all written comments will be available for inspection and photocopying between 9:00 a.m. and 4:00 p.m., Monday through Friday, in Room 8430, at the above address.

FOR FURTHER INFORMATION CONTACT: Kenneth H. Young, (202) 268-5321.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1-FRL-3351-9]

Approval and Promulgation of Air Quality Implementation Plans; Connecticut; Reasonably Available Control Technology for Spongex International, Ltd.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of Connecticut. This revision establishes and requires the use of reasonably available control technology (RACT) to control volatile organic compounds (VOC) emissions from Spongex International Ltd. in Shelton, Connecticut. The intended effect of this action is to propose approval of a source-specific RACT determination made by the State in accordance with commitments made in its Ozone Attainment Plan approved by EPA on March 21, 1984 (49 FR 10542).

DATES: Comments must be received on or before April 21, 1988.

ADDRESSES: Comments may be mailed to Louis F. Gitto, Director, Air Management Division, Room 2313, JFK Federal Bldg., Boston, MA 02203. Copies of Connecticut's submittal and EPA's Technical Support Document prepared for this revision are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2311, JFK Federal Bldg., Boston, MA 02203; and the Air Compliance Unit, Department of Environmental Protection, State Office Bldg., 165 Capitol Avenue, Hartford, CT 06106.

FOR FURTHER INFORMATION CONTACT: David B. Conroy, (617) 565-3252; FTS 835-3252.

SUPPLEMENTARY INFORMATION: On April 8, 1987, the Connecticut Department of Environmental Protection (DEP) submitted a SIP revision to EPA for parallel-processing. This revision is proposed State Order No. 8008 which defines VOC control requirements for Spongex International, Ltd. (Spongex) in Shelton, Connecticut. These control requirements constitute RACT for this facility as required by subsection 22a-174-20(ee), "Reasonably Available Control Technology for Large Sources," of Connecticut's Regulations for the Abatement of Air Pollution.

Subsection 22a-174-20(ee) requires the DEP to determine and impose RACT on all stationary sources with potential VOC emissions of one hundred tons per year (TPY) or more that are not already subject to Connecticut's regulations developed pursuant to the Control Techniques Guidelines (CTG) documents. EPA approved this regulation on March 21, 1984 (49 FR 10542) as part of Connecticut's 1982 Ozone Attainment Plan. That approval was granted with the agreement that all source-specific RACT determinations made by the DEP would be submitted to EPA as source-specific SIP revisions.

Summary of SIP Revision

Spongex manufactures a variety of polyvinyl chloride (PVC) foam products at its Shelton facility. Process equipment which emits VOC emissions includes mixers, injection molding presses and normalizing ovens. The first step in the foam manufacturing process involves mixing PVC resins, solvents, blowing agents and other components in the mixers to form a dough compound mix. The mixing process takes place in closed vessels at ambient temperatures and VOC emissions are estimated to be minor. The second step in the process consists of placing the dough in the injection molding presses where it is high compression molded at high temperatures. During this process, the blowing agent in the dough mix decomposes, and the dough changes to a foam which expands and fills the mold forming the completed article.

The final step involves the removal of this material from the injection molding equipment and heating the completed articles in the normalizing ovens to remove the remaining solvent from the product. From mass balance calculations it is estimated that 80 percent of the total VOC emissions emitted from this process are emitted during this final step.

State Order No. 8008 requires Spongex to reduce the overall VOC emissions from the foam manufacturing process by sixty-five percent by December 31, 1987. Spongex is required to achieve this reduction in either one of two ways. Spongex can achieve the reduction by

reformulating all of its compound dough mixtures to VOC levels equivalent to a sixty-five percent reduction based on the unformulated compound dough mixture for each product. If Spongex chooses to comply utilizing this method, it is required to submit documentation which verifies that a sixty-five percent reduction from historical levels has been achieved for each product. Additionally, Spongex will be required to institute a recordkeeping procedure to verify that each batch quantity of compound dough mix contains no more than the allowable VOC content which is equivalent to a sixty-five percent reduction from historical levels.

If Spongex chooses not to comply through reformulation of the compound dough mixtures or cannot achieve sufficient reductions with that method, then Spongex will be required to install add-on control equipment on all of its normalizing ovens. Provided that eighty percent of the overall VOC emissions from the process are emitted from the normalizing ovens, Spongex is required to achieve a ninety percent capture efficiency of the VOC emissions from the normalizing ovens and is required to reduce those emissions by ninety percent with the add-on control equipment in order to achieve the sixty-five percent overall reduction in VOC emissions required by the State Order. If it is determined that less than eighty percent of the total VOC emissions are emitted from the normalizing ovens, Spongex will be required to increase the capture and destruction efficiencies to the appropriate levels necessary for a sixty-five percent overall reduction. To verify compliance, the State Order requires Spongex to conduct an emissions test of the add-on control system in an EPA and DEP-approved manner in order to demonstrate the required destruction and capture efficiencies.

Spongex is required to achieve full compliance with the requirements of the State Order No. 8008 by December 31, 1987 which is allowed under subsection 22a-174-20(ee) of the Connecticut's federally-approved SIP. The application of RACT by Spongex as required by State Order No. 8008 will reduce Spongex's actual emissions from approximately 303 tons per year to 106 tons per year.

EPA has reviewed the requirements of State Order No. 8008 and its compliance dates, and has determined that they constitute RACT for Spongex International, Ltd.

EPA is proposing to approve DEP's proposed Order as a revision to the Connecticut SIP, and is soliciting public comments. These comments will be considered before taking final action. Interested parties may participate in the Federal Rulemaking procedure by submitting written comments to the Region I office listed in the **ADDRESSES** section of this notice.

This revision is being proposed under a procedure called parallel-processing, whereby EPA proposes rulemaking action concurrently with the State's procedures for amending its regulations. If the proposed revision is substantially changed, EPA will evaluate those changes and may publish another notice of proposed rulemaking. If no substantial changes are made to the proposed revision, EPA will publish a final rulemaking notice. The final rulemaking action by EPA will occur only after the SIP revision has been adopted by the State of Connecticut and submitted for incorporation into the SIP.

Proposed Action

EPA is proposing to approve Connecticut's proposed State Order No. 8008 as a revision to the Connecticut SIP. The provisions of Connecticut's proposed State Order No. 8008 define and impose RACT for Spongex International, Ltd. as required by subsection 22a-174-20(ee) of Connecticut's regulations.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

The Administrator's decision to approve or disapprove the plan revision will be based on whether it meets the requirements of section 110(a)(2) (A)-(K) and 110(a)(3) of the Clean Air Act, as amended, and EPA regulations in 40 CFR Part 51.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401-7642.

Editorial Note: This document was received by the Office of the Federal Register on March 17, 1988.

Date: June 30, 1987.

[A-1-FRL-3352-2]

Approval and Promulgation of Implementation Plans; Non-CTG RACT Determination for General Motors, Framingham, MA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a proposed State Implementation Plan revision submitted by the Commonwealth of Massachusetts. This revision establishes and requires the use of reasonably available control technology (RACT) to reduce volatile organic compound (VOC) emissions from certain processes at General Motors in Framingham, Massachusetts. The intended effect of this action is to propose approval of a source-specific RACT determination made by the Commonwealth of Massachusetts in accordance with commitments of its approved 1982 Ozone Attainment Plan. This action is being taken under section 110 of the Clean Air Act.

DATES: Comments must be received on or before April 21, 1988. Public comments on this document are requested and will be considered before taking final action on these SIP revisions.

ADDRESSES: Comments may be mailed to Louis F. Gitto, Director, Air Management Division, Room 2313, JFK Federal Bldg., Boston, MA 02203. Copies of the submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2313, JFK Federal Bldg., Boston, MA 02203 and the Department of Environmental Quality Engineering, Division of Air Quality Control, 8th Floor, One Winter Street, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Cynthia L. Greene, (617) 565-3244; FTS 835-3244.

SUPPLEMENTARY INFORMATION: On June 30, 1987 the Massachusetts Department of Environmental Quality Engineering (DEQE) submitted a proposed revision to its State Implementation Plan (SIP) for General Motors (GM) located in Framingham, Massachusetts. GM, Framingham has four operations that emit greater than 100 tons per year (TPY) of VOCs which are not covered by a control technique guideline (CTG).

Massachusetts requested and was granted an extension until December 31, 1987 to come into attainment with the

BEST COPY AVAILABLE

national ambient air quality standard (NAAQS) for ozone. The SIPs of all extension States must require the control of non-CTG sources with the potential to emit 100 TPY or more of VOCs. Massachusetts submitted a regulation, 310 CMR 7.18(17), requiring RACT on all such non-CTG sources as part of its 1982 Ozone Attainment Plan (48 FR 51480). In a November 17, 1982 letter to EPA, the DEQE committed to submit each of the 100 TPY individual RACT determinations to EPA for incorporation into the Massachusetts SIP. Each RACT determination is submitted as a source-specific SIP revision.

This revision includes a Plan Approval proposed by the DEQE to impose RACT on four processes at GM that are not covered by a CTG. This is in accordance with SIP Regulation 310 CMR 7.18(17). The Plan requires that the prephosphate cleaning operation use a specified low solvent compound to clean and remove oil, dust and grease from automotive parts; that the flexible parts operation which paints plastic fascias cease operation by August 31, 1987; and that the operations involving miscellaneous sealers, adhesives, paints and solvents be controlled by imposing emission limitations and work practice standards on the use of those materials. Additionally, GM is required to report to the DEQE on a quarterly basis the amount of miscellaneous sealers, adhesives, paint and solvents used and VOCs emitted.

EPA has reviewed the proposed Plan Approval and supporting documents submitted by the DEQE regarding this RACT determination. EPA generally concurs with the DEQE's determination that limiting emissions by requiring the use of a low solvent cleaner for the prephosphate cleaning; cessation of flexible parts operation that has the potential to emit 267 TPY; and usage controls for the miscellaneous sealers, adhesives, paints and solvents that are small operations scattered throughout the plant constitute RACT for these processes. (Justification to support the proposed RACT determination is discussed in the technical support document (TSD) available at the EPA address given above.) However, EPA is requiring through this notice that the Plan Approval itself must be amended to incorporate as enforceable conditions the items identified below:

(1) A quarterly recordkeeping and reporting requirement must be established for the prephosphate cleaning operation to ensure that GM does not use any compound other than that specified in the Plan Approval; and

(2) Emission limits and work practice standards reflecting DEQE's determination of how the use of miscellaneous sealers, adhesives, paints and solvents will be controlled must be clearly specified. These emission limits and work practice standards must be enforceable conditions of the Plan Approval.

These amendments to the Plan Approval must be addressed in the version of that document formally submitted as a revision for EPA's final approval and incorporation into the SIP. EPA is proposing to approve this SIP revision for General Motors in Framingham, which was submitted on June 30, 1987, and is soliciting public comments on the issues discussed in this notice or on other relevant matters. These comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the address above.

This revision is being proposed under a procedure called "parallel processing" (47 CFR 27073). If the proposed revision is substantially changed, in areas other than those identified in this notice, EPA will evaluate those changes and may publish a revised NPR. If no substantial changes are made other than those areas cited in this notice, EPA will publish a final Rulemaking Notice on the revisions. The final rulemaking action by EPA will occur only after the SIP revision has been adopted by Massachusetts and submitted to EPA for incorporation into the SIP. "Parallel processing", it is estimated, will reduce the time necessary for final approval of this SIP revision by 3 to 4 months.

Proposed Action

EPA is proposing to approve the DEQE's proposed RACT determination for four non-CTG operations at General Motors Framingham automobile manufacturing plant. Final EPA approval is contingent upon the DEQE amending its Plan Approval to include quarterly recordkeeping and reporting for the prephosphate cleaning operation and emission limits and work practice standards for the miscellaneous sealers, adhesives, paints and solvents as specified in this notice of proposed rulemaking.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

The Administrator's decision to approve or disapprove this plan revision will be based on whether it meets the requirements of sections 110(a) (2)(A)–(K) and 110(a)(3) of the Clean Air Act, as amended, and EPA regulations in 40 CFR Part 51.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Approval and Promulgation of Implementation Plans; Massachusetts Non–CTG RACT Determination for North American Philips Lighting Co.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a proposed State Implementation Plan revision submitted by the Commonwealth of Massachusetts. This proposed revision establishes and imposes reasonably available control technology (RACT) to reduce volatile organic compounds (VOC) from certain processes at the North American Philips Lighting Company in Lynn, Massachusetts. The intended effect of this action is to propose approval of a source-specific RACT determination made by the Commonwealth in accordance with commitments made in its approved 1982 Ozone Attainment Plan (48 FR 51480). This action is being taken under section 110 of the Clean Air Act.

DATES: Comments must be received on or before April 21, 1988. Public comments on this document are requested and will be considered before taking final action on these SIP revisions.

ADDRESSES: Comments may be mailed to Louis F. Gitto, Director, Air Management Division, Room 2313, JFK Federal Bldg., Boston, MA 02203. Copies of the submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2313, JFK Federal Bldg., Boston, MA 02203 and the Department of Environmental Quality Engineering, Division of Air Quality Control, 8th floor, One Winter Street, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: Cynthia L. Greene, (617) 565–3244; FTS 835–3244.

SUPPLEMENTARY INFORMATION: On June 30, 1987 Department of Environmental Quality Engineering (DEQE) submitted a proposed revision to its State Implementation Plan (SIP) for North American Philips Lighting Company in Lynn, Massachusetts. North American Philips Lighting Company's three glass tube, phosphor coating lines are not controlled by a control technique guideline (CTG) regulation and emit greater than 100 tons per year (TPY) of volatile organic compounds (VOCs).

Massachusetts requested and was granted an extension until December 31, 1987 to come into attainment with the National Ambient Air Quality Standard (NAAQS) for ozone. The SIPs of all extension states must require the control of non-CTG sources with the potential to emit greater than 100 TPY of VOCs. Massachusetts submitted a regulation, 310 CMR 7.18(17), requiring RACT on all such non-CTG sources as part of its 1982 Ozone Attainment Plan. Regulation 310 CMR 7.18(17) states that the DEQE will determine and impose RACT on a case-by-case basis for all non-CTG sources with the potential to emit greater than 100 TPY of VOCs and submit each determination as a source-specific SIP revision.

This revision includes a Plan Approval proposed by the DEQE to impose RACT on North American Philips Lighting Company's three glass tube, phosphor coating lines in accordance with SIP Regulation 310 CMR 7.18(17).

North American Philips Lighting Company manufactures fluorescent light bulbs which involves washing and drying the raw glass tubes, coating them, drying them in a hot tunnel, and fitting them with electrical parts. The coating operation involves coating the insides of the glass tubes with a VOC containing phosphor coating. North American Philips Lighting Company has five such coating lines. Three lines, Units 23, 24 and 25 are subject to RACT and two lines, All Purpose (AP) and Unit 22 are subject to best available control technology (BACT) under the SIP's approved new source review regulations. Units 23, 24, and 25 coat the glass tubes in an enclosed application room which is vented to a carbon adsorption device. The RACT determination requires that the carbon adsorber achieve 81% control efficiency. The imposed 81% control efficiency represents the equivalent of 90% capture efficiency of 90% removal efficiency. These are the efficiencies considered RACT by EPA for other surface coating source categories for which EPA has published CTGs.

EPA has reviewed the proposed Plan Approval and the supporting documents the DEQE submitted regarding this RACT determination. While EPA generally concurs with the DEQE's RACT determination, the Plan Approval must be amended to incorporate as enforceable conditions monitoring, recordkeeping and reporting requirements that will ensure that the 81% control efficiency is maintained. These requirements must be included in the version of the Plan Approval formally submitted for EPA's final approval and incorporation into the SIP.

EPA is proposing to approve this SIP revision for North American Philips Lighting Company in Lynn, which was submitted on June 30, 1987, and is soliciting public comments on issues discussed in this notice or on other relevant matters. These comments will be considered before taking final action Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the address above.

This revision is being proposed under a procedure called "parallel processing" (47 CFR 27073). If the proposed revision is substantially changed in areas other than those identified and required by this notice, EPA will evaluate those changes and may publish a revised NPR. If no substantial changes are made other than those areas cited in this notice, EPA will publish a Final Rulemaking Notice on this revision. The final rulemaking action by EPA will occur only after the SIP revision has been adopted by Massachusetts and submitted to EPA for incorporation into the SIP. "Parallel processing", it is estimated, will reduce the time necessary for final approval of these SIP revisions by 3 to 4 months.

Proposed Action

EPA is proposing to approve the DEQE's proposed RACT determination for the three non-CTG glass tube, phosphor coating lines (Units 23, 24, and 25) at North American Philips Lighting Company in Lynn. Final EPA approval is contingent upon DEQE amending its Plan Approval to include enforceable monitoring, recordkeeping and reporting requirements to ensure that the 81% control efficiency is maintained.

Under 5 U.S.C. 605(b), I certify that the SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

The Administrator's decision to approve or disapprove the plan revision will be based on whether it meets the requirements of sections 110(a)(2)(A)–(K) and 110 (a)(3) of the Clean Air Act, as amended, and EPA regulations in CFR Part 51.

Medicare Program; Miscellaneous Changes Affecting Payment for Inpatient Hospital Services

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing to make several revisions to the regulations governing payment for inpatient hospital services. These proposed changes, which, in general, are necessary to conform the regulations to current policy, include—

- Clarifying in regulations when the changes in urban/rural designations are recognized for purposes of the prospective payment system;
- Clarifying in the regulations the effective date of the revised payment rate for a hospital that is classified as a sole community hospital;
- Adding to the regulations a definition of patient days used in computing a hospital's disproportionate share patient percentage as well as clarifying how we calculate the Supplemental Security Income/Medicare percentage based on Medicare patient days; and
- Clarifying in the regulations that the provisions that govern requests for

exceptions to and exemptions from a hospital's rate-of-increase ceiling also govern requests for adjustments to the ceiling and that we grant a hospital's request for an exception or adjustment only if its costs exceed its rate-of-increase ceiling.

In addition, we are making two technical and conforming changes to the regulations.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5:00 p.m. on May 23, 1988.

ADDRESSES: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC–462–P, P.O. Box 28676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC.
Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC–462–P. Comments received timely will be available for public inspection as they are received, generally beginning approximately three weeks after publication of a document, in Room 309–G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202–245–7890).

FOR FURTHER INFORMATION CONTACT: Paul Olenick, (301) 966–4534.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 1886(d) of the Social Security Act (the Act), the prospective payment system for Medicare payment of inpatient hospital services was established effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment is made at a predetermined, specific rate for each hospital discharge. The regulations governing this inpatient hospital prospective payment system are located in 42 CFR Part 412.

The inpatient operating costs of those hospitals and hospital units excluded from the prospective payment system are subject to rate-of-increase limits established under the authority of section 1886(b) of the Act, which is implemented in § 413.40 of the regulations. Under these limits, an annual target amount (stated as inpatient operating cost per discharge) is set for each hospital, based on the hospital's own cost experience in a base period. This target amount is applied as a ceiling on the allowable costs per discharge for the hospital's next cost reporting period.

In this document, we are proposing to make the following changes in the regulations that govern payment for inpatient hospital services:

- We would clarify that, for purposes of paying hospitals under the prospective payment system, changes in Metropolitan Statistical Area (MSA) and New England County Metropolitan Area (NECMA) designations are recognized only at the beginning of a Federal fiscal year.
- We would clarify that a hospital classified as a sole community hospital would receive a revised payment rate effective with discharges occurring on or after 30 days after the date of HCFA approval of the classification.
- We would revise the regulations to provide that, for purposes of determining a hospital's qualification for payment as a disproportionate share hospital, the Supplemental Security Income (SSI)/Medicare percentage is calculated based on Medicare patient days associated with discharges occurring during the Federal fiscal year. In addition, we would add to the regulations a definition of patient days.
- The regulations governing hospital requests regarding applicability of the rate-of-increase ceiling would be revised to make it clear that they apply to a hospital's request for an adjustment to the rate of increase ceiling as well as to the currently included requests for an exemption or exception. We would also clarify that a request for an exception or adjustment is granted only in those cases in which the hospital's costs exceed its rate-of-increase ceiling.
- Two technical, conforming changes would be made to the regulations as follows:
  - —We would add payment adjustments for hospitals that serve a disproportionate share of low-income patients to the list of additional payments to hospitals set forth at § 412.2(e).
  - —We would delete from the regulations the special provision for hospitals that provides for waiver of requirements concerning Part A billing and cross-references to that deleted section, since the authority to provide such waivers expired with cost reporting periods beginning on or after October 1, 1986.

These proposals are discussed below in detail.

II. Discussion of Proposed Changes

A. Recognition of Changes in Urban/Rural Redesignations (§§ 412.63 and 412.210)

Sections 1886(d) (2)(D) and (3)(A) of the Act requires that the average standardized amounts per discharge, which are used to determine payment to hospitals subject to the prospective payment system, be determined for hospitals located in rural and urban areas. Thus, a hospital's payment rate is dependent, to some degree, on whether the county in which the hospital is located is designated as an urban area or a rural area. The term "urban" area is defined in section 1886(d)(2)(D) of the Act and in regulations at §§ 412.62(f)(1)(ii), 412.63(b), and 412.208(f)(1)(i) (which pertains to the prospective payment system in Puerto Rico that was adopted at 52 FR 33034 (September 1, 1987) and 52 FR 35350 (September 18, 1987), in accordance with the Executive Office of Management and Budget's (EOMB's) designations, as an MSA, a NECMA, or certain New England counties deemed to be urban areas under section 601(g) of the Social Security Amendments of 1983 (Pub. L. 98–21) (42 U.S.C. 1395ww (note)). A "rural" area is any area outside an urban area.

Periodically, EOMB revises the list of MSA/NECMA designations based on a continuing analysis of factors such as changes in population. In addition, Congress occasionally directs EOMB to change an MSA or NECMA designation. Depending on the changes, a county may be reclassified as urban and thus hospitals located in the county would receive a higher urban payment rate, or a county may lose its urban area status, and thus hospitals located in the county would receive the lower, rural payment rate.

In the preamble to the August 31, 1984 prospective payment final rule, we stated that for purposes of determining payment, we recognize these MSA reclassifications beginning with the start of the Federal fiscal year following the announcement of the change (49 FR 34738). We restated this policy in the September 3, 1985 and September 3, 1986 final rules and most recently in the June 10, 1987 proposed rule (52 FR 22104). However, we have never included this policy in the regulations. Therefore, we are proposing to revise §§ 412.63(b) and 412.210(b) to state specifically that any changes in MSA designations are recognized for purposes of payment beginning on the October 1 (that is, the start of the Federal fiscal year) following the announcement of the change.

B. Sole Community Hospitals (§ 412.92)

Section 1886(d)(5)(C)(ii) of the Act requires that the special needs of sole community hospitals (SCHs) be taken into account under the prospective payment system. SCHs are defined as those hospitals that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other hospitals (as determined by the Secretary), are the sole source of inpatient hospital services reasonably available to Medicare beneficiaries in a geographic area. Regulations governing the Special Treatment of SCHs under the prospective payment system are set forth in § 412.92.

A hospital that is classified as an SCH is paid in accordance with the method of establishing payment for the first year of the transition period under the prospective payment system. Thus, the payment rate for an SCH is composed of 75 percent of the hospital-specific rate and 25 percent of the Federal regional rate.

We have stated in the preamble to two Federal Register documents that the effective date of the payment for an SCH is 30 days after the date of HCFA's approval of the hospital's request. (See the September 1, 1983 interim final rule (48 FR 39781) and January 3, 1984 final rule (49 FR 271).) However, we continue to receive requests from hospitals that the effective date of the revised payment rate for an SCH should be the date that the hospital first met the classification criteria for an SCH, rather than 30 days after the date of HCFA's approval.

We stated in the January 3, 1984 final rule that to set the effective date as the day the hospital first met the SCH classification criteria would *not* be in keeping with the basis of the prospective payment system. We maintain that our prospective payment policy continues to be an appropriate method of paying an SCH, and are proposing to revise § 412.92(b) to clearly state that the effective date of the payment adjustment for an SCH is 30 days after the date of HCFA's approval of the hospital's request.

C. Hospitals That Serve a Disproportionate Share of Low-Income Patients (§ 412.106)

Section 1886(d)(5)(F) of the Act requires that we make an additional payment to hospitals that serve a disproportionate share of low-income patients. Sections 1886(d)(5)(F) (i) and (v) of the Act provide that, for discharges occurring before October 1, 1989, an additional payment must be made for each prospective payment hospital that meets one of the following criteria:

- During the hospital's cost reporting period, the hospital has a disproportionate patient percentage that is at least equal to—
  - — 15 percent if the hospital is located in an urban area and has 100 or more beds;
  - — 40 percent if the hospital is located in an urban area and has fewer than 100 beds; or
  - — 45 percent if the hospital is located in a rural area.
- The hospital is located in an urban area, has 100 or more beds, and can demonstrate that, during its cost reporting period, more than 30 percent of its total inpatient care revenues are derived from State and local government payments for indigent care furnished to patients not covered by Medicare or Medicaid.
- The hospital is located in a rural area, has 500 or more beds, and, during its cost reporting period, the hospital has a disproportionate patient percentage that equals or exceeds a percentage specified by the Secretary. Through regulation (§ 412.106(b)(2)), the Secretary has specified the percentage as 15 percent.

The criteria for qualification as a disproportionate share hospital are set forth in regulations at § 412.106(b).

Under the authority of section 1886(d)(5)(F)(vi) of the Act, § 412.106(a)(1) defines the term "disproportionate patient percentage" as the sum of the following two fractions, which is expressed as a percentage:

$$\frac{\text{Number of covered patient days of those patients entitled to both Medicare Part A and SSI (excluding those patients receiving State supplementation only)}}{\text{Number of patient days of those patients entitled to Medicare Part A}}$$

$$\frac{\text{Number of patient days of those patients entitled to Medicaid but not to Medicare Part A}}{\text{Total number of patient days}}$$

As we stated in the May 6, 1986 interim final rule (51 FR 16777), which added this provision to the regulations, the number of patient days of those patients entitled to both Medicare Part A and SSI will be determined by matching data from the Medicare hospital billing file with the Social Security Administration's SSI file. The match of SSI eligibility records to Medicare inpatient hospital days for a hospital consists of counting the days in which Medicare inpatient hospital services are furnished during each month to patients entitled to both Medicare Part A and SSI, summing those days, and dividing by the total number of days for which Medicare inpatient hospital services are furnished to all Medicare Part A beneficiaries in the hospital.

Since patient days used in computing the SSI/Medicare percentage are taken from the Medicare bills for discharges occurring during the Federal fiscal year, all of the inpatient days associated with those discharges may not have occurred during the same Federal fiscal year. For example, if a patient was admitted at the end of the prior fiscal year and discharged in the current fiscal year, all days associated with the stay would be counted in the current fiscal year. Similarly, if a patient is admitted at the end of the current fiscal year but is not discharged until the following fiscal year, those days would not be counted until the date of discharge. We are revising § 412.106(a)(1) to clearly state that this is how we count patient days in making the computation of the SSI/Medicare percentage.

We are also proposing to add a definition of patient days to the regulations. For purposes of computing a hospital's disproportionate patient percentage, patient days, whether total days or Medicare, Medicaid, or SSI days, are determined by counting those inpatient days attributable only to those areas of the hospital subject to the prospective payment system. Patient days attributable to excluded distinct part units of the hospital, such as psychiatric and rehabilitation units, are not counted. We do not believe it is appropriate to consider patient days from excluded units of the hospital since the disproportionate share adjustment is a prospective payment system adjustment and is not available to hospitals or units that are excluded from the prospective payment system.

Section 1886(d)(5)(F)(i) of the Act specifically provide that an additional payment amount is made for each subsection (d) hospital that serves a significantly disproportionate number of low-income patients. Section 1886(d)(1)(B) of the Act defines a subsection (d) hospital as "a hospital located in one of the fifty States or the District of Columbia * * * and * * * does not include a psychiatric or rehabilitation unit of the hospital which is a distinct part of the hospital * * *." Since section 1886(d)(5)(F)(i) of the Act incorporates the definition of hospital by reference to subsection (d), we believe that all further references in that subparagraph to hospital, unless stated otherwise, should be taken to mean a subsection (d) hospital. We believe that this interpretation of the statute produces the most consistent application of the disproportionate share adjustment, since data from only prospective payment hospitals (or the portions of the hospital subject to the prospective payment system) are used in determining both the qualifications for and the amount of additional payments to those hospitals.

Currently, the regulations do not specifically define patient days for purposes of calculating a hospital's disproportionate patient percentage. Therefore, we are proposing to revise § 412.106(a) to state that only those days attributable to parts of the hospital paid under the prospective payment system—that is, to the subsection (d) hospital as defined in section 1886(d)(1)(B) of the Act—would be counted in determining a hospital's eligibility for a disproportionate share adjustment.

D. Adjustments to the Rate-of-Increase Ceiling and Hospital Cost Limits (§§ 413.40 and 413.30)

As discussed above, hospitals that are excluded from the prospective payment system are subject to the rate-of-increase limits under section 1886(b) of the Act. Each hospital has a target amount that is applied as a ceiling on its allowable inpatient operating costs per discharge. A hospital that has inpatient operating costs in excess of its target amount is paid no more than that amount. However, a hospital that has costs less than its target amount is paid its costs plus the lower of—

- Fifty percent of the difference between the inpatient operating cost per discharge and the target amount; or
- Five percent of the target amount.

Section 1886(b)(4) of the Act provides for exemptions from, and exceptions and adjustments to, the rate-of-increase ceiling. Currently, § 413.40(e) describes how a hospital may request an exemption from, or exception to, the ceiling. Section 413.40(e) also states that the time required for HCFA to review a hospital's request for an exception is considered good cause for the granting of an extension of the time limit to apply for review by the Provider Reimbursement Review Board (PRRB), as specified in § 405.1841(b). The following three paragraphs, § 413.40(f) through (h), detail the conditions under which an exemption, exception, and adjustment, respectively, will be granted.

Since § 413.40(e) does not specifically refer to requests for adjustments to the rate-of-increase ceiling, even though § 413.40(h) describes when HCFA will make an adjustment, it is unclear whether a hospital's right to a PRRB review is protected while HCFA reviews an adjustment request. Therefore, we are proposing to revise § 413.40(e) to clarify that a request for an adjustment would be treated the same as a request for an exemption or exception.

Similarly, we are proposing to revise § 413.30(c) concerning provider requests regarding applicability of cost limits. Hospitals have been subject to cost limits since 1974. Under § 413.30(h), for cost reporting periods beginning on or after October 1, 1982 and before October 1, 1983, HCFA may make an adjustment to a hospital's cost limits. Like the current § 413.40(e), § 413.30(c) does not include a hospital's request for an adjustment to its cost limits, even though § 413.30(h) describes when HCFA makes an adjustment. In the interest of clarity, we would revise § 413.30(c) so that the provisions of that section apply to a hospital's request for an adjustment to its cost limits.

In summary, we are proposing to revise §§ 413.30(c) and 413.40(e) to clarify that the time it takes HCFA to review a request for an exception, exemption, or adjustment (and, in the case of § 413.30(c), a request for reclassification) is good cause for extending the period allowed for requesting PRRB review.

We are also proposing to revise § 413.40(g) and (h) to clearly state that we would not grant an exception or adjustment to a hospital's rate-of-increase ceiling if the hospital's costs do not exceed its target amount. We believe that an actual disallowance of costs as a result of the application of the rate-of-increase ceiling is a necessary precondition to HCFA's granting an exception or adjustment under § 413.40(g) or (h) and that the exceptions and adjustments provided under section 1886(b)(4) of the Act should be used to increase a hospital's incentive payment under section 1886(b)(1)(A) of the Act.

The rate-of-increase ceiling provision was added to the Act by section 101 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248). The Conference Report that accompanied Pub. L. 97–248 (H.R. Rep. No. 760, 97th Cong., 2d Sess. 419–421 (1982)) does not contain any explicit expression of congressional intent with regard to whether an exception or adjustment should be granted only if a hospital exceeds its target amount. Rather, the report states, "The Secretary of HHS would be required to provide for appropirate exemptions, exceptions, and adjustments as in the Senate provision." Thus, it appears that Congress deferred to the Secretary's judgment in implementing the exemption, exception, and adjustment process.

We also note that the report does state that it was the Senate provision the Conference Committee adopted with regard to this process. The Senate amendment did not provide for incentive payments to hospitals with costs below the target amount. Thus, the language in the statute authorizing the exemptions, exceptions, and adjustments was added by the Senate without its contemplating that this process would apply in cases in which the hospital's costs do not exceed the target amount and the hospital receives an incentive payment. Based on this evidence, we believe that our policy is consistent with congressional intent.

Even though the current regulations do not specifically state that we will not grant an exception of adjustment to increase incentive payments, there are references to this policy in the preamble to the interim final rule (45 FR 43282, September 30, 1982) and final rule (48 FR 39412, August 30, 1983) that first added § 413.40 (then § 405.463) to the regulations. In the interim final rule, in defining the exceptions process, we stated, "An exception allows a hospital to have its ceiling adjusted to take costs into account that would otherwise be disallowed by application of the ceiling." (See 47 FR 43288.) In addition, in the final rule, in addressing a comment concerning when an exception request may be filed, we stated, "Under both the rate-of-increase ceiling and the total cost limits, a hospital may request an exception whenever it has a reasonable basis for estimating that its costs will exceed its rate-of-increase target amount or cost limit." (See 48 FR 39419.)

We believe that these statements make it clear that it has always been our policy not to award exceptions or adjustments under the rate-of-increase ceiling if there has been no disallowance of a hospital's actual costs. Therefore, we are proposing to revise § 413.40(g) and (h) to clearly state our current policy concerning the granting of exceptions and adjustments.

E. Additional Payments to Hospitals (§ 412.2(e))

In addition to payments based on the prospective payment rates, hospitals receive additional payments for the following:

- Outlier cases.
- The indirect cost of graduate medical education.
- Costs excluded from the prospective payment rate.
- Medicare bad debts.

- End-Stage Renal Disease beneficiary discharges if these discharges are 10 percent or more of the hospital's total Medicare discharges.
- Serving a disproportionate share of low-income patients.

Currently, § 412.2(e) lists all these additional payments except the payments to disproportionate share hospitals. Therefore, we are proposing to revise that section to include those payments.

F. Special Provision for Waiver of Certain Inpatient Hospitals Services Requirements (§§ 405.310(m), 412.50(b), and 489.23)

When the original prospective payment system was enacted by Congress through the Social Security Amendments of 1983 (Pub. L. 98–21), section 602(k) of that law (42 U.S.C. 1395y (note)) authorized a temporary waiver, in certain circumstances, of the requirement set forth in sections 1862(a)(14) and 1866(a)(1)(H) of the Act that hospitals bill for all nonphysician inpatient hospital services under Medicare Part A. This waiver authority is implemented through our regulations governing provider agreements (§ 489.23). The waiver was authorized for cost reporting periods begining before October 1, 1986.

Since the waiver authority has now expired, we are proposing to delete § 489.23 from the regulation. We would also make a conforming change to §§ 405.310(m) and 412.50(b), which contain a reference to § 489.23. In addition, we are proposing to make a change in § 412.50(b), regarding inpatient hospital services of an anesthetist employed by a physician, to conform it with § 405.310(m).

III. Impact Analysis

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulation that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in: an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We are proposing to amend §§ 412.2, 412.63, 412.92, 412.106, 412.210, 413.30, and 413.40 only to bring them into conformity with existing policy. The changes to §§ 405.310, 412.50, and 489.23 reflect the statutory expiration of authority under section 602(k) of Pub. L. 98–21 governing payments to certain hospitals under the prospective payment system. Thus, these regulations would not implement either new statutory provisions or new policies, and, for this reason, we believe it is unnecessary to prepare or publish a regulatory impact analysis.

B. The Regulatory Flexibility Act

In addition, we generally prepare an initial regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a proposed regulation would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we treat all hospitals as small entities.

In addition, section 1102(b) of the Social Security Act requires the Secretary to prepare an initial regulatory impact analysis for any proposed rule that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must also conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside a metropolitan statistical area.

For the same reasons stated above in connection with E.O. 12291, we have determined that a regulatory impact analysis not required. Further, we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on a substantial number of small entities or on the operations of a substantial number of small rural hospitals, and we have therefore not prepared a regulatory flexibility analysis or an impact analysis for small rural hospitals.

IV. Other Required Information

A. Responses to Public Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or repond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Date" section of this preamble, and, if we proceed with a final rule, we will respond to the comments in the preamble of that rule.

B. Paperwork Reduction Act

The proposed rule does not impose information collection requirements. Consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511).

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 412

Health facilities, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 413

Health facilities, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 489

Health facilities, Medicare.

42 CFR Chapter IV would be amended as follows:

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

I. Part 405, Subpart C is amended as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart C—Exclusions, Recovery of Overpayments, Liability of a Certifying Officer and Suspension of Payment

A. The authority citation for Subpart C continues to read as follows:

Authority: Secs. 1102, 1815, 1833, 1842, 1862, 1866, 1870, 1871, and 1879 of the Social Security Act (42 U.S.C. 1302, 1395g, 1395l, 1395u, 1395x, 1395y, 1395cc, 1395gg, 1395hh, and 1395pp) and 31 U.S.C. 3711.

B. In § 405.310(m)(2) is revised to read as follows:

§405.310 Particular services excluded from coverage.

* * * * *

(m) *Services to hospital inpatients.*

* * * * *

(2) *Exception.* Physicians' services that meet the criteria of § 405.550(b) for payment on a reasonable charge basis, and services of an anesthetist employed by a physician that meet the conditions of § 405.553(b)(4), are not excluded.

* * * * *

II. Part 412 is amended as follows:

PART 412—PROSPECTIVE PAYMENT SYSTEM FOR INPATIENT HOSPITAL SERVICES

A. The authority citation for Part 412 continues to read as follows:

Authority: Secs. 1102, 1122, 1871, and 1886 of the Social Security Act, as amended (42 U.S.C. 1302, 1320a–1, 1395hh, and 1395ww).

B. In Subpart A, § 412.2, the introductory text in paragraph (e) is republished and a new paragraph (e)(6) is added to read as follows:

Subpart A—General Provisions

§ 412.2 Basis of payment.

* * * * *

(e) *Additional payments to hospitals.* In addition to payments based on the prospective payment rates, hospitals will receive payments for the following:

* * * * *

(6) Serving a disproportionate share of low-income patients, as provided in § 412.106.

C. In Subpart C, § 412.50(b) is revised to read as follows:

Subpart C—Conditions for Payment Under the Prospective Payment System

§ 412.50 Furnishing of inpatient hospital services directly or under arrangements.

* * * * *

(b) HCFA does not pay any provider or supplier other than the hospital for services furnished to a beneficiary who is an impatient, except for physicians' services reimbursable under § 405.550(b) of this chapter and services of an anesthetist employed by a physician reimbursable under § 405.553(b)(4) of this chapter.

* * * * *

D. In Subpart D, § 412.63 is amended by adding a new paragraph (b)(4) to read as follows:

Subpart D—Basic Methodology for Determining Federal Prospective Payment Rates

§ 412.63 Federal rates for fiscal years after Federal fiscal year 1984.

* * * * *

(b) *Geographic classifications.* * * *

(4) For purposes of this section, any change in an MSA or NECMA designation is recognized on the October 1 following the effective date of the change.

* * * * *

E Subpart G is amended as follows:

Subpart G—Special Treatment of Certain Facilities

1. In § 412.92, a new paragraph (b)(1)(iv) is added to read as follows:

§ 412.92 Special treatment: Sole community hospitals.

* * * * *

(b) *Classification procedures*—(1) *Request for classification as sole community hospital.* * * *

(iv) A hospital classified as a sole community hospital receives a payment adjustment, as described in paragraph (d) of this section, effective with discharges occurring on or after 30 days after the date of HCFA's approval of the classification.

* * * * *

2. § 412.106, the introductory text of paragraph (a)(1) is republished, paragraph (a)(1)(i) is revised, and a new paragraph (a)(5) is added to read as follows:

§ 412.106 Special treatment: Hospitals that serve a disproportionate share of low-income patients.

(a) *Basic rule.* (1) Unless a hospital elects the option concerning the period of time used for counting the number of patient days (that is, the hospital's cost reporting period rather than the Federal fiscal year), as described in paragraph (a)(2) of this section, a hospital's disproportionate patient percentage is the sum of the following, expressed as a percentage:

(i) Number of covered patient days associated with discharges occurring during each month of the Federal fiscal year in which the hospital's cost reporting period begins of those patients who are entitled during that month to both Medicare Part A and Supplemental Security Income benefits under title XVI of the Act (excluding those patients receiving State supplementation only), summed for the months of the Federal fiscal year, and divided by the number of patient days associated with discharges occurring during that same Federal fiscal year of those patients entitled to Medicare Part A.

* * * * *

(5) For purposes of making the calculation in paragraph (a)(1) of this section, patient days are determined by counting those days attributable only to areas of the hospital subject to the prospective payment system. Patient days attributable to areas or units of the hospital excluded from the prospective payment system are not included in the count of patient days.

* * * * *

F. In Subpart K, § 412.210(b) is revised to read as follows:

Subpart K—Prospective Payment System for Hospitals Located in Puerto Rico

§ 412.210 Puerto Rico rates for fiscal years after Federal fiscal year 1988.

* * * * *

(b) *Geographic classifications.* For purposes of this section—

(1) The definitions set forth in § 412.208(f) apply; and

(2) Any change in an MSA designation is recognized on the October 1 following the effective date of the change.

* * * * *

III. Part 413 is amended as follows:

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT: PAYMENT FOR END-STAGE RENAL DISEASE SERVICES

A. The authority citation for Part 413 continues to read as follows:

Authority: Secs. 1102, 1122, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, and 1886 of the Social Security Act as amended (42 U.S.C. 1302, 1302, 1320a–1, 1395f(b), 1395g, 13951(a), 1395x(v), 1395hh, 1395hh, 1395rr, and 1395ww).

B. Subpart C is amended as follows:

Subpart C—Limits on Cost Reimbursement

1. In § 413.30, paragraph (c) is revised to read as follows:

§ 413.30 Limitations on reimbursable costs.

* * * * *

(c) *Provider requests regarding applicability of cost limits.* A provider may request a reclassification, exception, or exemption from the cost limits imposed under this section. In addition a hospital may request an adjustment to the cost limits imposed under this section. The provider's request must be made to its fiscal intermediary within 180 days of the date on the intermediary's notice of program reimbursement. The intermediary makes a recommendation on the provider's request to HCFA, which makes the decision. HCFA responds to the request within 180 days from the date HCFA receives the request from the intermediary. The intermediary notifies the provider of HCFA's decision. The time required for HCFA to review the request is considered good cause for the granting of an extension of the time limit to apply for a Board review, as specified in § 405.1841 of this chapter. HCFA's decision is subject to review under Subpart R of Part 405 of this chapter.

* * * * *

2. In § 413.40, paragraphs (e), (g)(1), and (h)(1)(iii) are revised to read as follows:

§ 413.40 Ceiling on rate of hospital cost increases.

* * * * *

(e) *Hospital requests regarding applicability of the rate of increase ceiling.* A hospital may request an exemption from, or exception or adjustment to, the rate of cost increase ceiling imposed under this section. The hospital's request must be made to its fiscal intermediary no later than 180 days from the date on the intermediary's notice of program reimbursement. The intermediary makes a recommendation on the hospital's request to HCFA, which makes the decision. HCFA responds to the request within 180 days from the date HCFA receives the request from the intermediary. The intermediary notifies the hospital of HCFA's decision. The time required for HCFA to review the request is considered good cause for the granting of an extension of the time limit to apply for review by the Provider Reimbursement Review Board, as specified in § 405.1841(b) of this chapter. HCFA's decision is subject to review under Subpart R of Part 405 of this chapter.

* * * * *

(g) *Exceptions*—(1) *General procedure.* HCFA may adjust a hospital's operating costs (as described in paragaph (b)(1) of this section) upward or downward, as appropriate, under circumstances as specified in paragraphs (g) (2) and (3) of this section. HCFA makes an adjustment only to the extent that the hospital's operating costs are reasonable, attributable to the circumstances specified, separately identified by the hospital, and verified by the intermediary. HCFA may grant an exception only if a hospital's operating costs exceed the rate of increase ceiling imposed under this section.

* * * * *

(h) *Adjustments.* * * *

(iii) HCFA may adjust the amount of operating costs, under paragraph (c)(1) of this section, to take into account factors such as a change in the inpatient hospital services that a hospital provides, that are customarily provided directly by similar hospitals, or the manipulation of discharges to increase reimbursement. A change in the inpatient hospital services provided could result from changes that include, but are not limited to, opening or closing a special care unit or changing the arrangements under which such services may be furnished, such as leasing a department. HCFA may grant an adjustment only if a hospital's operating costs exceed the rate of increase ceiling imposed under this section.

* * * * *

IV. Part 489 is amended as follows:

PART 489—PROVIDER AGREEMENTS UNDER MEDICARE

A. The authority citation for Part 489 is revised to read as follows:

Authority: Secs. 1102, 1861, 1864(m), 1866, and 1871 of the Social Security Act (42 U.S.C. 1302, 1395x, 1395aa(m), 1395cc, and 1395hh).

B. The table of contents of Part 489 is amended by removing the title for §489.23.

§ 489.23 [Removed]

C. Subpart B is amended by removing § 489.23.

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare—Hospital Insurance)

Dated: January 11, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

Approved: February 10, 1988.

Otis R. Bowen,

Secretary.

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

List of Warehouses and Availability of List of Cancellations and/or Terminations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of publication of list of warehouses licensed under the U.S. Warehouse Act and availability of list of cancellations and/or terminations occurring during calendar year 1987.

Notice is hereby given that the Agricultural Stabilization and Conservation Service has published a list of warehouses licensed under the U.S. Warehouse Act (7 U.S.C. 241 *et seq.*) as of December 31, 1987, as required by section 26 of that Act (7 U.S.C. 266). Also available is a list of cancellations and/or terminations that occurred during calendar year 1987. A copy of the list of warehouses as of December 31, 1987, will be distributed to all licensed warehousemen. Other interested parties may obtain a copy of either list from: Mrs. Judy Fry, ASCS, Warehouse Division, Warehouse Licensing Branch, U.S. Department of Agriculture, P.O. Box 2415, Room 5968, South Agriculture Bldg., Washington, DC 20013, Telephone: 202–447–3822.

Signed at Washington, DC, March 15, 1988.

Milton Hertz,

Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410-05-M

DEPARTMENT OF COMMERCE

Office of the Secretary

Privacy Act of 1974—Revision of Four Existing Systems of Records

AGENCY: Office of the Secretary, Commerce.

ACTION: Notice; request for comments.

SUMMARY: In accordance with the requirements of the Privacy Act, (5 U.S.C. 552a) and OMB Circular A–130, Appendix I, "Federal Agency Responsibilities for Maintaining Records About Individuals", this notice announces revision of four existing systems of records entitled: COMMERCE/DEPT–3, Conflict of Interest Records, Appointed Officials; COMMERCE/DEPT–10, Executive Correspondence Files; COMMERCE/NOAA–3, Commissioned Officer Official Personnel Folders; and COMMERCE/NOAA–8, Individuals Engaged in Weather Modification Activities. These revisions reflect minor administrative changes, and do not require a report to Congress and OMB.

EFFECTIVE DATE: April 21, 1988.

ADDRESS: Please address or deliver written comments to Ms. Geraldine P. LeBoo, Office of Management and Organization, Department of Commerce, Room 6628, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Ms. Geraldine P. LeBoo, Office of Management and Organization, (202) 377–3630.

SUPPLEMENTARY INFORMATION: The minor changes to the systems are as follows: COMMERCE/DEPT–3, Conflict of Interest Records, Appointed Officials—change in location of records as a result of organizational realignment, change in retention and disposal period, system manager, and address for notification procedures; COMMERCE/DEPT–10, Executive Correspondence Files—deletion of one category of records covered, and change in filing system for the records; COMMERCE/NOAA–3, Commissioned Officer Official Personnel Folders—change of address under notification procedures; COMMERCE/NOAA–8, Individuals Engaged in Weather Modification Activities—change in system location, and notification procedures because of organizational realignment.

These systems were last published in the **Federal Register** on December 31, 1981, 46 FR 63498.

Dated: March 15, 1988.

J. Randall Blumenschein,

Chief, Management Support Division, Office of Management and Organization.

COMMERCE/DEPT-3

SYSTEM NAME:

Conflict of Interest Records, Appointed Officials—COMMERCE/DEPT–3

SYSTEM LOCATION:

Office of General Counsel, Room 5897, U.S. Department of Commerce, Washington, DC 20230.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals, past and present, appointed by the President to Commerce Department offices and other senior level officers of the Department.

CATEGORIES OF RECORDS IN THE SYSTEM:

Statement of personal and family shareholding and other interests in business enterprises; copies of blind trust and other agreements pertaining to such interests; correspondence as to insulation of control of such interests; opinions of counsel; and confirmation materials.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 18 U.S.C. 208, 28 U.S.C. 533–535, 44 U.S.C. 3101, E.O. 10450, and E.O. 11222.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See routine use paragraphs of Prefatory Statement, except paragraphs 6, 8, and 10.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

Filed alphabetically by name.

SAFEGUARDS:

Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

RETENTION AND DISPOSAL:

Disposed of 6 years after separation of employee.

SYSTEM MANAGERS AND ADDRESS:

Assistant General Counsel for Administration, Room 5883, U.S. Department of Commerce, Washington, DC 20230.

NOTIFICATION PROCEDURE:

Information may be obtained from: Assistant General Counsel for Administration, U.S. Department of Commerce, Washington, DC 20230. Requester should provide name, and date of appointment pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to: Same address as stated in the Notification section above.

CONTESTING RECORD PROCEDURES:

The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

RECORD SOURCE CATEGORIES:

The subject individual, financial institutions involved, counsel, and those authorized by the individual to furnish information.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(k)(5), all investigatory material in the record which meets the criteria of 5 U.S.C. 552a(k)(5) is exempted from the notice, access, and contest requirements (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)) of the agency regulations in order to fulfill commitments made to protect the confidentiality of sources, and to maintain access to sources of information which are necessary to determine suitability for employment.

COMMERCE/DEPT-10

SYSTEM NAME:

Executive Correspondence Files—COMMERCE/DEPT–10.

SYSTEM LOCATION:

a. For Office of the Secretary correspondence: Executive Secretariat and Office of Information Management (Computer Services Division); U.S. Department of Commerce; 14th & Constitution Avenue, NW., Washington, DC 20230.

b. For EDA correspondence: Executive Secretariat, EDA, Room 7227, 14th and Constitution Avenue, NW., Washington, DC 20230.

c. For MBDA correspondence: MBDA Secretariat, Room 5083, 14th and Constitution Avenue, NW., Washington, DC 20230.

d. For NOAA correspondence: Executive Secretariat, Office of the Administrator, NOAA, Room 5807, 14th and Constitution Avenue, NW., Washington, DC 20230. Records on magnetic tape are also temporarily located at the contractor's installation: Dialcom Inc., 1104 Spring Street, Silver Spring, MD. 20910.

e. For PTO correspondence: Office of the Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(a) Individuals who correspond with the Secretary of Commerce, and the Deputy Secretary, and individuals whose correspondence has been referred by the White House, other Executive agencies or Members of Congress to the Secretary or Deputy Secretary for response.

(b) Individuals who correspond with top level officials in EDA, MBDA, NOAA, and PTO. In these categories the individuals include only those who express views or seek information or assistance. Freedom of Information Act or Privacy Act requests are not indexed in this system (See Freedom of Information and Privacy Request Records—COMMERCE/DEPT–5).

CATEGORIES OF RECORDS IN THE SYSTEM:

The system may include the name and address or correspondent, summary of subject matter, original correspondence, official response, referral letters, memoranda or notes concerning the subject of the correspondence, or copies of any enclosures. The records in the system are arranged numerically by control number assigned to each item of correspondence. Authority for maintenance of the system: 5 U.S.C. 301 and 44 U.S.C. 3101.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by personnel in the Office of the Secretary, Executive Secretariat, and administrative offices of each operating unit of the Department to assure that each request receives an appropriate and timely reply and to prepare statistical reports for management on correspondence volume or topics of public interest. Information from or copies of the records may be provided to the original addresses of the original correspondence. General routine uses of the Prefatory Statement also apply.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in paper form and on diskettes and magnetic tape.

RETRIEVABILITY:

By agency responsibility, by control number, by correspondent's name, by subject, by addressee, by category of writer (e.g., Member of Congress, White House staff, Cabinet member, mayor, citizen) by category of correspondence, by Executive Secretariat analysts' identification code, by type of priority for response time, by date, or possibly by city and state of correspondent's address.

SAFEGUARDS:

Paper records, disk, and magnetic tape as stored in file cabinets on secured premises with access limited to personnel whose official duties require access.

RETENTION AND DISPOSAL:

Records are disposed of in accord with the appropriate records disposition schedule approved by the Archivist of the United States.

SYSTEM MANAGER(S) AND ADDRESS:

For records at location a.: Director, Executive Secretariat, Office of the Secretary, U.S. Department of Commerce, Washington, DC 20230. for records at location b.: Chief, Executive Secretariat, EDA, Room 7227, 14th and Constitution Avenue NW., Washington, DC.

For records at location c.: Chief, MBDA Secretariat, Room 5063, 14th and Constitution Avenue NW., Washington, DC 20230. For records at location d.: Director, Executive Secretariat, Office of the Administrator, National Oceanic and Atmospheric Administration, Washington, DC 20230. For records at location e.: Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202.

NOTIFICATION PROCEDURE:

For records at location a., information may be obtained from the Director, Office of Management and Organization, U.S. Department of Commerce, Washington, DC 20230. For records at location b., information may be obtained from the Director, Office of

Public Affairs, EDA, U.S. Department of Commerce, Washington, DC 20230.

For records at location c., information may be obtained from the Privacy Officer, Office of Chief Counsel, MBDA, U.S. Department of Commerce, Washington, DC 20230.

For records at location d., information may be obtained from the Assistant Administrator for Management and Budget, NOAA, 6010 Executive Boulevard, Rockville, Maryland 20852. For records at location e., information may be obtained from the Solicitor, U.S. Patent and Trademark Office, Washington, DC 20231.

All requests for information should provide the correspondent's name as included in original correspondence, or provide any items listed under the retrievability section above pursuant to the inquiry provisions of the Department's rules that appear in 15 CFR Part 4b.

RECORD ACCESS PROCEDURES:

Request for access and disclosures should be addressed to the same address as stated in the Notification section above. Contesting record procedures:

The Department's rules for access, for contesting contents, and for appealing initial determination by the individual concerned appear in 15 CFR Part 4b. Requests for correction should be addressed to manager as shown above.

RECORD SOURCE CATEGORIES:

The correspondent, referral source, Department employees involved in processing the correspondence, and other individuals, as required to prepare an appropriate response.

COMMERCE/NOAA-3

SYSTEM NAME:

Commissioned Officer Official Personnel Folders—

COMMERCE/NOAA-3

SYSTEM LOCATION:

Office of the Director, NOAA Corps (NC), National Oceanic and Atmospheric Administration, Rockville, Maryland 20852.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Commissioned Officers of the NOAA Corps (active, retired, and deceased) and former commissioned officers separated within previous six months.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, social security number; selective service number; promotion history; history of assignments; performance evaluations; date of birth; education; prior employment history; prior uniformed service; pay and allowance data; relatives; references; commendations; discipline; insurance; medical evaluations; and similar personal information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

33 U.S.C. 853a-t, 854a-a2, 855, 856, 857, 857-1-5, 857a, 858, 864, 865, 872, 873, 874, 875, 876; 5 U.S.C. 301; 28 U.S.C. 533–535; 44 U.S.C. 3101; and, E.O. 10450.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See routine use paragraphs of the Prefatory Statement. Users are Selective Service System, Veteran's Administration, Federal Housing Administration, Social Security Administation, Public Health Service, Department of Defense elements, Taxing authorities (Federal, State and local), unemployment compensation authorities, and the organization to which officer is assigned such as branches of U.S. Military Service, branches of foreign military services, World Weather Organizations, etc.

Selected information is disseminated to determine eligibility for retention, promotion, retirement, separation, and other personnel actions; physical fitness; entitlement to pay and various allowances; report taxes withheld; entitlement to social security benefits, Veteran's benefits, unemployment compensation, waivers for repayment of student loans, death benefits, survivor benefits, and FHA in-service loans; assignments; and selective service status.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders (selected data elements in this system are duplicated on word processing equipment for ease of retrieval).

RETRIEVABILITY:

Filed alphabetically by name.

SAFEGUARDS:

Records ar maintained in secured area. Access only on the authority of the Director, NOAA Corps or the Chief/Deputy Cheif, Commissioned Personnel Division.

RETENTION AND DISPOSAL:

Records are retained indefinitely on active, retired, and deceased officers; discharged officers' records are retained for approximately 6 months, then transferred to the National Personnel Records Center, St. Louis, Missouri 63118.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NOAA Corps, see above address.

NOTIFICATION PROCEDURE:

Information may be obtained from: Director, Office of Administration, NOAA, Room 6863, Herbert C. Hoover Building, Washington, DC 20230.

Requester should provide name, address, social security number, and date of birth pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to: Same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The Department's rules for access, for contesting contents, and appealing initial determinations by the individuals concerned appear in 15 CFR Part 4b. Use above address.

RECORD SOURCE CATEGORIES:

Subject individual, official correspondence and forms generated by routine personnel actions, previous employers, prior military service, Selective Service System, Federal Housing Administration, Social Security Administration, and similar sources.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(k)(5), all investigatory material in the record which meets the criteria of 5 U.S.C. 552a(k)(5), is exempted from the notice, access, and contest requirements (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H) and (I), and (f)) of the agency regulations in order to fulfill commitments made to protect the confidentiality of sources, and to maintain access to sources of information which are necessary to determine employee's suitability for employment in the NOAA Corps.

COMMERCE/NOAA-8

SYSTEM NAME:

Individuals Engaged in Weather Modification Activities, COMMERCE/NOAA-8

SYSTEM LOCATION:

Assistant Administrator for Oceanic and Atmospheric Research NOAA, U.S. Department of Commerce, 6010 Executive Boulevard, Rockville, Md. 20852.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals and associations involved in weather modification operations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name and address; type of weather modification activity; location and duration of project; and equipment used. Authority for maintenance of the system: Pub. L. 92-205; 15 CFR Part 908.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See routine use paragraphs in the Prefatory Statement. Also information is made available to anyone who so requests to comply with Pub. L. 92–205.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic data base.

RETRIEVABILITY:

Filed sequentially by name.

SAFEGUARDS:

Records are located on an electronic data base with full public access upon request to comply with Pub. L. 92–205.

RETENTION AND DISPOSAL:

Records are maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Director, Office of Weather Modification, see above address.

NOTIFICATION PROCEDURE:

Information may be obtained from: Director, Office of Administration, NOAA, Room 6863, Herbert C. Hoover Building, Washington, DC 20230. Requester should provide name, address, date(s) of project etc., pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to: same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

RECORD SOURCE CATEGORIES:

Subject individual or association involved and those authorized by the foregoing to furnish information.

National Bureau of Standards

Electromagnetic Properties of Materials Consortium Workshop

AGENCY: National Bureau of Standards, Commerce.

ACTION: Notice of public workshop.

SUMMARY: The National Bureau of Standards will host an informal workshop on May 3 and 4 to organize a research consortium on the electromagnetic properties for materials in 2–300 GHZ applications. The focus of the research consortium is on development of measurement techniques and reference materials. During this workshop, NBS would like to discuss industry's needs, a research program to address these needs, consortium member benefits, and business issues related to participating in the research consortium.

DATE: The workshop will be held on May 3 and 4, 1988, from 9:00 a.m. to 4:30 p.m. both days.

Place: The workshop will be held in the Radio Building (Building 1), National Bureau of Standards, Boulder, Colorado.

FOR FURTHER INFORMATION CONTACT: William Kissick, Electromagnetic Fields Division, National Bureau of Standards, Boulder, CO 80303; telephone (303) 497–3339 for reservations.

Dated: March 17, 1988.

Ernest Ambler,

Director.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

Alaska Coastal Management Program; North Slope Borough

ACTION: Notice of Preliminary Approval of Amendment.

SUMMARY: The Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA) received a request from the State of Alaska to amend the Alaska Coastal Management Program (ACMP) to incorporate the North Slope Borough Coastal Management Program (NSBCMP). The State's request was made pursuant to section 306(g) of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 14559(g) and implementing regulations at 15 CFR 923.81. The NSBCMP creates a new coastal boundary for the ACMP in the region and establishes goals and policies for activities taking place in the Borough. The NSBCMP follows the guidelines and standards for local program development set in the ACMP and will be administered both by the Borough and the State.

The Director of the Office of Ocean and Coastal Resource Management has reviewed the amendment request and has made a preliminary finding that the ACMP as amended will still constitute an approvable program and that the procedural requirements of section 306(c) of the CZMA have been met.

The Director also determined that approval of the proposed change does not constitute a major Federal action having a significant effect on the environment. Therefore, an environmental impact statement on the approval of the amendment under the National Environmental Policy Act of 1969, as amended, is not required. Copies of the Finding of No Significant Impact (FONSI), including the supporting Environmental Assessment (EA) and the Director's Preliminary Findings of Approvability, are available at the address below.

Comments on the Preliminary Findings to approve the Alaska amendment request and on the EA and FONSI should be made within 30 days from the date of this notice. Address comments to: Peter L. Tweedt, Director, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1825 Connecticut Avenue NW., Washington, DC 20235, (202) 673–5111.

James P. Blizzard,

Acting Director, Office of Ocean and Coastal Resource Management.

BILLING CODE 3510-08-M

Evaluation of State/Territorial Coastal Management Programs, Coastal Energy Impact Programs and National Estuarine Research Reserves

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management, Commerce.

ACTION: Notice of Availability of Evaluation Findings.

SUMMARY: Notice is hereby given of the availability of the evaluation findings for the Oregon, Massachusetts, South Carolina and Connecticut Coastal Management Programs. Section 312 of the Coastal Zone Management Act of 1972, as amended, (CZMA) requires a continuing review of the performance of each coastal state with respect to funds authorized under the CZMA and to the implementation of its federally approved Coastal Management Program. The states evaluated were found to be adhering both to the programmatic terms of their financial assistance awards and/or to their approved coastal management programs; and to be making progress on award tasks, special award conditions, and significant improvement tasks aimed at program implementation and enforcement, as appropriate. Accomplishments in implementing coastal zone management programs were occurring with respect to the national coastal management objectives identified in section 303(2)(A)–(I) of the Coastal Zone Management Act. A copy of the assessment and detailed findings for these programs may be obtained on request from: John H. McLeod, Evaluation Officer, Policy Coordination Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue, NW., Washington, DC 20235 (telephone: 202/673–5104).

(Federal Domestic Assistance Catalog 11.419 Coastal Zone Management Program Administration)

Date: March 11, 1988.

BILLING CODE 3510–08–M

Coastal Zone Management; Invitation To Evaluate

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management.

ACTION: Notice of Intent to Evaluate.

SUMMARY: The National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management (OCRM), announces its intent to evaluate the performance of the Maryland Coastal Management Program; the Hawaii (Waimanu) National Estuarine Research Reserve (NERR); Maine (Wells) NERR; New York (Hudson) NERR; and Rhode Island (Narragansett) NERR through June 30, 1988. The review of the coastal management program will be conducted pursuant to section 312 of the Coastal Zone Management Act of 1972, as amended, (CZMA) which requires a continuing review of the performance of coastal states with respect to coastal management, including detailed findings concerning the extent to which the state has implemented and enforced the program approved by the Secretary of Commerce, addressed the coastal management needs identified in section 303(2) (A) through (I) of the CZMA, and adhered to the terms of any grant, loan or cooperative agreement funded under CZMA. The reviews of National Estuarine Research Reserves are conducted pursuant to section 315(f) of the CZMA, as amended by Pub. L. 99–272, which requires the Secretary of Commerce to evaluate periodically the operation and management of each Reserve, including education and interpretive activities, and the research being conducted within the reserve. The reviews involve consideration of written submissions, a site visit to the state, and consultations with interested Federal, state and local agencies and members of the public. Public meetings will be held as part of the site visits. The state will issue notice of these meetings. Copies of each state's most recent performance report, as well as the OCRM's notification letter and supplemental information request letter to the state are available upon request from the OCRM. Written comments from all interested parties on each of these programs to the contact listed below are encouraged at this time. OCRM will place subsequent notice in the **Federal Register** announcing the availability of the Final Findings based on each evaluation once these are completed.

FOR FURTHER INFORMATION CONTACT: John H. McLeod, Evaluation Officer, Policy Coordination Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue NW., Washington, DC 20235 (telephone: 202/673–5104).

BILLING CODE 3510–10–M

[Modification No. 1 to Permit No. 573]

Marine Mammals; Modification of Permit Dr. William Watkins (P70C)

Notice is hereby given that pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Scientific Research Permit No. 573 issued to Dr. William Watkins, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts 02543, on November 21, 1986, (51 FR 311793) is modified in the following manner:

Section B.5 is replaced by:

> 4. The authority to take by harassment, tagging, or other activities authorized herein, shall extend from the date of issuance through December 31, 1990.

This modification became effective on December 31, 1987.

Documents submitted in connection with the above modification are available for review in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Room 805, Washington, D.C.:

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930; and Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida, 33702.

Dated: March 16, 1988.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Services.

[FR Doc. 88–6179 Filed 3–21–88; 8:45 am]

BILLING CODE 3510–22–M

Marine Mammals; Issuance of Permit: Horizons West, Ltd. (P158C)

On December 23, 1987, Notice was published in the **Federal Register** (52 FR 48558) that an application had been filed by Horizons West, Ltd., dba Marine Life Aquarium, Keystone Route Box 365, Rapid City, South Dakota 57701, to take two (2) Atlantic bottlenose dolphins (*Tursiops truncatus*) for public display.

Notice is hereby given that on March 14, 1988, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit for the above taking subject to certain conditions set forth therein.

The Permit is available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Rm. 805, Washington, DC;

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702; and

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, NE, BIN C15700, Seattle, Washington 98115.

Dated: March 14, 1988.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

North Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council and its advisory bodies will convene separate public meetings at the Sheraton Hotel, Anchorage, AK, as follows:

Council—on April 13, 1988, at 9 a.m., will decide which of the proposed amendments to the groundfish fishery management plans (FMPs) for the Gulf of Alaska and Bering Sea and Aleutian Islands will be sent for public review; a draft of the FMP for king and Tanner crab in the Bering Sea/Aleutian Islands will be considered for public review, and there may be a new draft Salmon FMP for review. In addition to the regular reports on domestic and foreign fisheries, enforcement, and legislation, the Council will also hear the results of a recent survey of pollock in the southern half of the international waters in the Bering Sea, and discuss the annual meeting of the International Pacific Halibut Commission. The Council will also convene a closed session (not open to the public) at least once to review ongoing litigation, and other appropriate matters. The public meeting will adjourn at approximately noon on April 15.

Advisory bodies—The Council's Scientific and Statistical Committee, and its Advisory Panel will convene April 11 at 10 a.m. Other Plan Team and workgroup meetings may be convened on short notice also.

For more information contact the North Pacific Council, P.O. Box 103136, Anchorage, AK 99501; telephone: (907) 271–3809.

Date: March 16, 1988.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The South Atlantic Fishery Management Council and its Committees will convene separate public meetings at the Sheraton Brickell Point Hotel, Miami, FL, as follows:

King and Spanish Mackerel Advisory Panel—Will convene April 11, 1988, from 1 p.m. to 6 p.m., to review the mackerel stock assessment, and make recommendations for modifications to the Total Allowable Catch (TAC), and bag limits.

Snapper/Grouper Advisory Panel—Will convene April 12, 1988, from 9 a.m. to noon, to review and offer input on the trawl prohibition contained in Amendment #1 to the Snapper/Grouper Fishery Management plan (FMP). They also will offer input regarding the concept of Special Management Zones (SMZs), to assist the Council as it begins reevaluation of the SMZ concept.

Scientific and Statistical Committee—Will convene April 12, 1988, from 1 p.m. to 5 p.m., to review and make recommendations on the trawl prohibition contained in Amendment #1 to the Snapper/Grouper FMP. They also will offer input regarding the concept of SMZs, to assist the Council as it begins reevaluation of the SMZ concept. The SSC will also review and make recommendations regarding the draft Summer Flounder FMP. Detailed agendas for these three meetings will be available to the public on or about April 1, 1988.

For further information contact Robert K. Mahood, Executive Director, South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407; telephone: (803) 571–4366.

Date: March 16, 1988.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment to the List of Exempt Traditional Folklore and Handicraft Textile Products From Pakistan

March 17, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 23, 1988. For further information contact Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, DC, (202) 377–4212.

Background

A CITA directive dated May 27, 1983 (48 FR 25257), as further amended on June 2, 1987, established an export visa arrangement and exempt certification for certain cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Pakistan. Under the terms of the Bilateral Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement, effected by exchange of notes dated May 20, 1987 and June 11, 1987, the Governments of the United States and Pakistan have exchanged letters amending the bilateral agreement to include additional folklore and handicraft textile products made in the cottage industry of Pakistan which are exempt from the limits of the agreement and visa requirements when properly certified by the Government of Pakistan prior to exportation. All "Pakistan items" must be cut, sewn, or otherwise fabricated by hand in the cottage industry of Pakistan in order to qualify for exemption. A list of these additional exempt products is published as an enclosure to the letter to the Commissioner of Customs which follows this notice.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 17, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on May 27, 1983, as amended on June 2, 1987, by the Chairman, Committee for the Implementation of Textile Agreements, which established export visa requirements for cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Pakistan.

Effective on March 23, 1988, you are directed to include the items described in the enclosure to this letter among the folklore and the handicraft products which are exempt from the limits of the bilateral agreement when properly certified by the Government of Pakistan prior to exportation. All "Pakistan items" must be cut, sewn, or otherwise fabricated by hand in the cottage industry of Pakistan in order to qualify for exemption.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Enclosure

List of Pakistan Items

Shalwar—Loose baggy pants at waist with drawstring. Narrows down to ankle which has cuffs or elastic.

Pyjama—A pair of trousers, loose at waist, with either drawstring or hooks and tapering to a tight fit at ankle. It is traditionally a Moghul costume worn by Punjabi women since the 16th century along with a kurta and dupatta (an oblong scarf)

Chaddi—Plain shorts worn by young and old as the national outfit while playing Kabadi games. Worn in plain or printed fabric, has drawstring at waist and two side pockets.

Plain Kurta—Strip susi shirt made in full sleeve, has front pocket, worn in short and ankle length.

Punjab Kamiz—Sargodha ladies tunic. Worn by the native of district Sargodha; comes with embroidery; knee length.

Roomal—Headwear made up of printed or embroidered fabrics. Worn by Muslim devout, both by men and by women.

Sleeveless Kurta—Shisha top from Peshawar made from natural khaddar with mirror work and embroidery.

Ghagra—Koprapar Langha. It's a drawstring skirt with Bandni printed design worn by people living in Koprapar suburb of Karachi. Comes in knee and ankle length.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form and Applicable OMB Control Number: Application (Request) for DoD/Armed Forces Community Relations Support; No Form; and No OMB Control Number.

Type of Request: New.

Annual Burden Hours: 4,000.

Annual Responses: 8,000.

Needs and Uses: The Armed Services frequently are asked to support community events with aerial demonstrations, musical support, and speakers. To evaluate these requests, certain information is required which is summarized in the formats. Information is requested about the event, the sponsor, the exact nature of the desired support, and safety considerations.

Affected Public: Individual, State and local governments, Federal agencies, Nonprofit institutions.

Frequency: On Occasion.

Respondent's Obligation: Required to obtain government support.

OMB Desk Officer: Mr. Edward Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Edward Springer at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison.

A copy of the information collection proposal may be obtained from, Ms. Rascoe-Harrison WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302, telephone (202) 746-0933.

Office of the Secretary

Strategic Defense Initiative Advisory Committee; Meeting

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Strategic Defense Initiative (SDI) Subcommittee (Ground Based Free Electron Laser Technology Integration Experiment Technical Advisory Group) will meet in closed session in Washington, DC, on April 15, 1988.

The mission of the Subcommittee is to provide the SDI Advisory Committee an independent analysis and assessment of the plans and approaches for the ground based free electron laser technology integration experiment. At the meeting on April 15, 1988 the subcommittee will discuss status of laser research and management issues.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C., App II, (1982)), it has been determined that this SDI Advisory Subcommittee meeting, concerns matters listed in 5 U.S.C., 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

National Advisory and Coordinating Council on Bilingual Education; Meeting

AGENCY: Department of Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory and Coordinating Council on Bilingual Education. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of the opportunity to attend.

DATE: April 7 and April 8, 1988—9:00 a.m. until 5:00 p.m.

The meeting will be conducted at the Radisson Hotel, 1550 Court Place, Denver, Colorado 80202.

FOR FURTHER INFORMATION CONTACT: Anna Maria Farias, Designated Federal Official, Office of Bilingual Education and Minority Languages Affairs, Reporter's Building, Room 421, 400 Maryland Avenue SW., Washington, DC 20202 (202 732-5063.

SUPPLEMENTARY INFORMATION: The National Advisory and Coordinating Council on Bilingual Education is established under section 752(a) of the Bilingual Education Act (20 U.S.C. 3262). NACCBE is established to advise the Secretary of the Department of Education concerning matters arising in the administration of the Bilingual Education Act and other laws affecting the limited English proficient populations. The meeting of the Council is open to the public.

The proposed agenda includes the following:

I Roll Call
II Approval of Minutes of Previous Meeting
III Introduction of Visitors
IV Presentation of Information by OBEMLA Director or Designee
V Presentation of information by Members of General Public or Organizations on Agenda Items (Limited to 5 minutes per person from any one group)
VI Committee Reports
VII Old Business
VIII New Business
IX Meetings of Individual Committees
X Reconvening of Council
XII Adjournment

Records are kept of all Council proceedings and are available for public inspection at the Office of Bilingual Education and Minority Languages Affairs, Reporter's Building, Room 421, 400 Maryland Avenue SW., Washington, DC 20202, Monday through Friday from 9:00 a.m.—5:30 p.m.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER88-286-000 et al.]

Arizona Public Service Co. et al.; Electric Rate and Corporate Regulation Filings

March 17, 1988.

Take notice that the following filings have been made with the Commission:

1. Arizona Public Service Company

[Docket No. ER88-286-000]

Take notice that on March 10, 1988, Arizona Public Service Company (APS) tendered from filing a Certificate of Concurrence with San Diego Gas and Electric Company's filing of February 5, 1988. The aforementioned filing provides for an amendment to the Mutual Assistance Transmission Agreement (Amendment) between APS and San Diego Gas and Electric Company, Southern California Edison Company and Imperial Irrigation District (collectively the "Parties").

The Amendment modifies the methodology of the Mutual Assistance Transmission Agreement to conform to the "Transmission System Operating Principles" executed as of October 7, 1986 between the parties, Los Angeles Department of Water and Power, Nevada Power Company and the Western Area Power Administration.

Copies of this filing were served on San Diego Gas & Electric Company and the Arizona Corporation Commission.

Comment date: March 31, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. New England Power Company Public Service Company of New Hampshire

[Docket No. ER88-218-000]

Take notice that on March 11, 1988, New England Power Company (NEP) and Public Service Company of New Hampshire (PSNH) tendered for filing an amendment to their January 28, 1988 submittal in the above-referenced docket. NEP and PSNH state that the amendment consists of three pages to Exhibit B to the Seabrook Transmission Support Agreement which were inadvertently omitted from the original filing.

Comment date: March 31, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Idaho Power Company

[Docket No. ER88-285-000]

Take notice that on March 10, 1988, Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during January 1988, along with cost justification for the rate charged. This filing includes the following supplements:

Pacific Gas & Electric Co—Supplement No. 30
City of Glendale—Supplement No. 34
Sierra Pacific Power Co.—Supplement No. 72
Utah Power & Light Co.—Supplement No. 74

Comment date: March 31, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. Iowa Power and Light Company

[Docket No. ES88-32-000]

Take notice that on March 2, 1988, Iowa Power and Light Company (Applicant) filed an application seeking authority pursuant to Section 204 of the Federal Power Act to issue not more than $100 million of First Mortgage Bonds.

Comment date: April 1, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6222 Filed 3-21-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER87-387-002 et al.]

Pennsylvania Power & Light Co. et al.; Electric Rate and Corporate Regulation Filings

March 16, 1988.

Take notice that the following filings have been made with the Commission:

1. Pennsylvania Power & Light Company

[Docket No. ER87-387-002]

Take notice that on March 9, 1988, Pennsylvania Power & Light Company tendered for filing a compliance refund report.

Comment date: March 28, 1988, in accordance with Standard Paragraph E at the end of this document.

Allegheny Power Service Corporation on behalf of Monongahela Power Company

[Docket No. ER86-379-003]

Take notice that on March 8, 1988, Allegheny Power Service Corporation on behalf of Monongahela Power Company tendered for filing Tenth Revision of Sheet No. 14, Monongahela Power Company FERC Electric Tariff, Original Volume No. 1.

The new tariff page reduces the demand charge on the Company's rate schedule for sales to the City of Philippi and Town of New Martinsville, West Virginia, the Harrison Rural Electric Association, the Potomac Edison Company, and West Penn Power Company in accordance with the provisions of the Settlement Agreement in this docket to reflect the change in return on equity of Allegheny Generating Company effective March 1, 1988, ordered by the Commission in Docket Nos. EL86-37-002 and EL86-38-002. The Company has requested that the change in the rate be effective March 1, 1988, in accordance with the provisions of the Settlement Agreement.

Copies of the filing have been served upon all the jurisdictional customers and the West Virginia Public Serivice Commission.

Comment date: March 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

Kansas Power and Light Company

[Docket No. ER88-24-000]

Take notice that on March 9, 1988, Kansas Power and Light Company (KPL) tendered for filing an amendment to its filing in Docket No. ER88-24-000 pursuant to a deficiency letter dated February 5, 1988. KPL states that the purpose of the filing is to revise the appropriate rate schedules to exclude the adjustment intended to track changes in revenue credits.

Comment date: March 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

Allegheny Power Service Corporation on behalf of West Penn Power Company

[Docket No. ER87-156-001]

Take notice that on March 8, 1988, Allegheny Power Service Corporation on behalf of West Penn Power Company tendered for filing West Penn Power Company FERC Electric Tariff, Original Volume No. 1, Sixth Revised Sheet No. 11, and Original Volume No. 2, Sixth Revised Sheet No. 9, Fifth Revised Sheet No. 10, and Sixth Revised Sheet No. 12.

The new tariff pages reduce the demand change on the Company's rate shedules for sales to the Allegheny Electric Cooperative, Inc., and the Boroughs of Chambersburg and Mount Alto, Pennsylvania, and reduce the energy charge to Metropolitan Edision Company in accordance with the provisions of the Settlement Agreements in this docket to reflect the change in return on equity of Allegheny Generating Company effective March 1, 1988, ordered by the Commission in Docket Nos. EL86-37-002 and EL86-38-002. The Company has requested that the change in the rate by effective March 1, 1988, in accordance with the provisions of the Settlement Agreements.

Copies of the filing have been served upon all the jurisdictional customers and the Pennsylvania Public Utility Commission.

Comment date: March 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. Western Area Power Administration

[Docket No. EF88-5011-000]

Take notice that on March 7, 1988, the Under Secretary of the Department of Energy, by Rate Order No. WAPA-38, did confirm and approve on an interim basis, to be effective on May 1, 1988, that being the first day of the May 1988 billing period, Western Area Power Administration (Western) tendered for filing Power Rate Schedule CV-F6 and Transmission Rate Schedule CV-FT1, CV-NFT1, and CV-TPT2 for the Central Valley Project (CVP). The power and transmission rates will be in effect on an interim basis pending the Commission's approval of them, or substitute rates, on a final basis, or until superseded.

The power repayment study, on which the power rates are based, indicated that the rates are adequate to recover the full cost of service. A brief summary comparing the provisional rates to the previous rates follows.

	Capacity ($/kW-Mo)	Energy (mills/kWh)	Composite (mills/kWh)
Previous rates	3.75	31.44	39.40
Provisional rates:			
May 1, 1988, through September 30, 1989	6.86	14.43	28.86
Oct. 1, 1989, through Sept. 30, 1991	7.49	15.76	31.53
Oct. 1, 1991, through Apr. 30, 1993	7.74	16.30	32.60

The provisional rates for the CVP will cover all annual operating expenses and repay the federal investment allocated to the commercial power function. The provisional firm power rates are composed of capacity and energy charges that initially represent approximately a 17.5 percent decrease from the previous composite power rate, and then increase in two steps over the 5-year cost evaluation period of May 1, 1988, through March 30, 1993. The rate step increases are necessary to track projected escalation in annual purchased power and wheeling expenses and result in a composite rate in 1993 that is approximately 7 percent below the previous rate (Schedule CV-F5). The previous power rate for CVP firm power service to commercial customer loads was: $3.75/kW-month for capacity and $31.44 mills/kWh for energy. If calculated on a composite basis, the previous rate would be 39.40 mills/kWh for energy (assuming the average projected customer load factor of 64.55 percent for the cost evaluation period). However, the previous power rate included cost recovery for third-party wheeling expenses as well as the expense of Western's provisions for certain voltages and direct service discounts. The provisional power rates have been modified in design to exclude cost recovery for third-party transmission expenses, thus eliminating the need for any discounts. If the previous rates were modified consistent with this provisional rate design, then on a composite basis, it would be 34.98 mills/kWh.

Revenues from CVP power sales under the previous rate (adjusted to parallel the proposed rate design) would have produced annual revenue amounts ranging from $253 million in FY 1988 to $259 million in FY 1993. These power sales revenue figures reduce to about $211 million in FY 1989 and $241 million in 1993 with the provisional power rates.

Two adjustment clauses incorporated in the provisional CVP power rates that have not been included in previous CVP power rate schedules are: the power factor adjustment clause (PFAC), and the revenue adjustment clause (RAC). The PFAC is characteristic of standard utility practice and requires that CVP commercial power customers maintain a minimum power factor level during peakload period to avoid a revenue surcharge. The RAC has been developed to provide greater stability in the repayment of the CVP investment. The RAC provides this stability by tracking certain projected major expenses and revenue categories used in developing the provisional rates, and "balancing" them periodically against actual incurred expenses and revenues.

In addition to the proposed CVP power rates, three provisional CVP transmission rate schedules are being proposed for approval and implementation on a final basis effective May 1, 1988. These schedules provide for the direct passthrough recovery from CVP power customers of third-party transmission expenses incurred by Western in the delivery of CVP commercial power (Rate Schedule CV-TPT2); and for firm and nonfirm transmission rates for transmission services provided by Western over the CVP transmission system for non-CVP power (Rate Schedules CV-FT1 and CV-NFT1, respectively). Rate Schedule CV-TPT2, which provides for the recovery of all third-party wheeling charges, will supersede Rate Schedule CV-TPT1, which provided for the recovery of all third-party wheeling expenses above the high-voltage wheeling charges and losses assessed by the Pacific Gas and Electric Company; the high-voltage wheeling charges and losses were previously included in the power rate design revenue recovery. No charge is proposed in the assessment of losses; however, the new rate schedule will provide for the direct pass through of all wheeling charges assessed by Western's wheeling agents.

The previous firm and nonfirm transmission rates were $0.35/kW-month and 1.0 mill/kWh, respectively. The provisional firm transmission rate of $0.481/kWh represents a 37.4 increase. The provisional 1.022 mill/kWh nonfirm transmission rate represents a 2.2 percent increase. The disproportionate increase in the firm transmission rate reflects an appropirate change in the rate calculation methodology. Both of the provisional CVP transmission rates reflect slight increases due to minor escalation over the past 5-year in the transmission system's operation, maintenance, replacements, additions, and administrative overhead expenses.

The Administrator of Western certifies that the rates are consistent with applicable law and that they are the lowest possible rate to customers consistent with sound business principles. The rate schedules are submitted by the Under Secretary for confirmation and approval on a final basis beginning May 1, 1988, and extending through April 30, 1993, pursuant to authority vested in the Federal Energy Regulatory Commission by Amendment No. 1 to Delegation Order No. 0204-108.

Comment date: March 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6214 Filed 3-21-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP88-261-000 et al.]

United Gas Pipe Line Company et al. Natural Gas Certificate Filings

March 15, 1988.

Take notice that the following filings have been made with the Commission:

1. United Gas Pipe Line Company

[Docket No. CP88-261-000]

Take notice that on February 29, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478 filed in Docket No. CP88-261-000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act, as amended, requesting a certificate of public convenience and necessity authorizing construction and operation of facilities and for issuance of an order permitting and approving abandonment of other, older facilities, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Specifically, United is seeking Commission approval to replace a portion of its 12-inch Barataria-New Orleans Main Line with 3.77 miles of 6-inch pipeline. It is stated that this facility is located along the bank of a canal in Jefferson Parish, Louisiana and the tide and boat traffic in the canal has resulted in the line losing its cover. It is also stated that the new pipeline would be laid approximately 100 feet behind the canal in order to eliminate this problem and it would cost $671,000, which will be paid from funds on hand.

Comment date: April 5, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Transcontinental Gas Pipe Line Corporation

[Docket No. CP84-336-002]

Take notice that on February 29, 1988, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP84-336-002 a petition to amend the order issued in Docket No. CP84-336-000, on October 3, 1984, pursuant to section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas for storage (injection/withdrawal) for Elizabethtown Gas Company (Shipper) from additional sources of supply, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Transco states that the purpose of the instant petition to amend is to secure Commission authorization permitting Applicant to transport quantities of gas for Shipper that Shipper may purchase from National Fuel Gas Supply Corporation (National Fuel) or from local production. Transco, it is said, would receive such alternative supply from National Fuel at the existing interconnection between National Fuel and Transco near the Wharton Storage Field and redeliver equivalent quantities to Shipper.

Transco states that such transportation of alternative quantity would involve no additional facilities or capacity.

Comment date: April 5, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Southern Natural Gas Company

[Docket No. CP88–268–00]

Take notice that on March 2, 1988, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563 filed in Docket No. CP88–268–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorities to consolidate the operation of two delivery points under its blanket certificate issued in Docket No. CP82–406–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern states that it currently provides natural gas service to Southeast Alabama Gas District (Southeast) at delivery points in Elmore and Lee Counties, Alabama. Southern proposes to consolidate these two delivery points into one area delivery point containing two meter stations. Southern states that Southeast has informed Southern that the consolidation would enable it to more efficiently nominate volumes for distribution to its customers.

Southern states that in order to consolidate the delivery point it would not have to construct any new facilities or operate the meter stations in a different manner. Southern states that the total Contract Demand to be delivered to Southeast after the proposed consolidation would not exceed the total volumes authorized prior to the rearrangement.

Comment date: April 29, 1988, in accordance with Standard Paragraph G at the end of this notice.

4. Arkla Energy Resources, a division of Arkla, Inc.

[Docket No. CP88–263–000]

Take notice that on March 1, 1988, Arkla Energy Resources, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP88–263–000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate a sales tap and meter for delivery of natural gas to Arkansas Louisiana Gas Company, a division of Arkla, Inc. (ALG), all as more fully set forth in the request on file with the Commission and open to public inspection.

Arkla proposes to construct and operate a 4-inch tap and meter on its Line T in Jefferson County, Arkansas, to enable ALG to establish alternative means of providing natural gas service to two existing retail customers, the Natural Center for Toxicological Research, and an office of the Environmental Protection Agency. Arkla states that the estimated cost of the facilities is $54,720. These two customers are presently served from ALG's distribution system in the Pine Bluff area, it is explained. Arkla states that increasing requirements in the Pine Bluff area make it more efficient for ALG to serve the two customers from R.E. 1235, a new 6-inch, 3.5 mile pipeline to be constructed by ALG. It is explained that natural gas usage by the two customers would be about 438,000 Mcf per year and 1,650 Mcf on a peak day.

Comment date: April 29, 1988, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the mattter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–6220 Filed 3-21-88; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CI88–310–000]

Consolidated Oil & Gas, Inc., et al.; Application for Permanent Abandonment and Pregranted Abandonment for Sales Under Small Producer Certificate

March 17, 1988.

Take notice that on February 19, 1988, as supplemented on March 3, 1988, Consolidated Oil & Gas, Inc. *et al.* [1] (Consolidated, *et al.*) filed an application pursuant to section 7(b) of the Natural Gas Act and § 2.77 of the Commission's Regulations requesting permission to permanently abandon sales of gas to Sunterra Gas Gathering Company (Sunterra) pursuant to four gas purchase contracts dated August 24, 1956, January 1, 1958, September 6, 1960, and November 28, 1960. Consolidated, *et al.*, also request pregranted abandonment for sales for resale in ineterstate commerce under Consolidated's small producer certificate in Docket No. CS72–694. Consolidated, *et al.*, state that while such pregranted abandonment is requested on a permanent basis, Consolidated, *et al.*, will accept a three-year limited-term authorization. Consolidated, *et al.*, state that they recognize that the Commission has undertaken dramatic revision of its abandonment procedures in Order No. 490 issued on February 5, 1988. However, Consolidated, *et al.*, state that Order No. 490 does not become effective until, at the earliest, 60 days following publication in the **Federal Register** (April 12, 1988), and the order will be subject to rehearing, possible administrative stay, judicial review, and possible judicial stay. Therefore, Consolidated, *et al.*, request that permanent abandonment and pregranted abandonment be granted under the current Commission regulations and procedures.

Consolidated, *et al.*, state that the abandonment involves sales obligations under four gas purchase contracts between Consolidated and Sunterra, successor to Southern Union Gathering Company. Consolidated, *et al.*, state that their obligations arose when Sunterra sold surplus volumes of gas, including gas covered by these four contracts, to El Paso Natural Gas Company (El Paso). Consolidated, *et al.*, state that deliveries of their gas to El Paso by Sunterra were authorized by certificates issued by the Commission to Consolidated in 1959 and 1963, which were subsequently terminated when Consolidated's small producer certificate was issued. According to Consolidated, *et al.*, the Commission determined, over Consolidated's objection, that because of the deliveries by Sunterra to El Paso, all of Consolidated's sales pursuant to all four contracts were subject to the jurisdiction of the Commission under the Natural Gas Act.[2]

Consolidated, *et al.*, state that El Paso has been unable or unwilling to purchase any gas from Sunterra since 1985. Consolidated, *et al.*, state that Sunterra submitted its application to abandon all sales to El Paso and for a blanket limited-term certificate in Docket Nos. CI88–119–000 and CI88–140–000. Consolidated, *et al.*, state that the applications which Sunterra filed in Docket Nos. CI88–119–000 and CI88–140–000 set forth in full the facts and support for the requested abandonment. Consolidated, *et al.*, state they will not restate the substance of that pleading; rather Consolidated, *et al.*, subscribe to and incorporate by reference that discussion and justification. Notice of the Sunterra applications was published in the **Federal Register** on January 5, 1988 (53 FR 170). Consolidated, *et al.*, state that four specific matters require amplification herein.

First, Consolidated, *et al.*, state that their obligation under the four contracts to El Paso does not arise directly from the four sales contracts but rather indirectly through Sunterra's gas sales contract with El Paso, and Consolidated, *et al.*, state that contract has been terminated by its terms.

Second, Consolidated, *et al.*, state that El Paso has indicated no opposition to the request for abandonment by Sunterra, and because Consolidated's gas under the four contracts comprises part of the gas committed by Sunterra to El Paso, neither Sunterra nor El Paso can object to permanent abandonment of Consolidated's obligation.

Third, Consolidated, *et al.*, state that when abandonment is granted to Sunterra, delivery of gas to El Paso by Consolidated will become unlawful and physically impossible because Consolidated delivers the gas covered by the four contracts to Sunterra and Sunterra then delivers the gas pursuant to its obligations and opportunities.

Fourth, Consolidated, *et al.*, state that the gas covered by the fourth contracts may be sold to end-users, local distribution companies, intrastate pipelines, and interstate pipelines. Therefore, Consolidated, *et al.*, request pregranted abandonment for sales under Consolidated's small producer certificate. Consolidated, *et al.*, state that they seek such authority for as long as permitted by the Commission, but they are willing to accept a three-year limitation on pregranted abandonment in order to expedite the grant of permanent abandonment as requested. Due to the circumstances described herein and in the Sunterra applications, Consolidated, *et al.*, request that their application be considered on an expedited basis under procedures established by Order No. 436, Docket No. RM85–1–000, at 18 CFR 2.77.[3]

Consolidated, *et al.*, state that the deliverability is 2,124 Mcf/d and that the gas is NGPA section 104 small producer flowing gas.

Since Consolidated, *et al.*, state that they satisfy the requirements of § 2.77 of the Commission's Regulations and have requested that their application be considered on an expedited basis, all as more fully described in the application which is on file with the Commission and open to public inspection, any person desiring to be heard or to make any protest with reference to said application should, on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Consolidated, *et al.*, to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–6213 Filed 3–21–88; 8:45 am]

BILLING CODE 6717–01–M

---

[1] Consolidated states the application is submitted on its own behalf and on behalf of other signatory and nonsignatory parties to the subject contracts.

[2] *Southern Union Gathering Company*, 28 FERC ¶ 61,225 at p.61,428 (1984), *reh. denied* 30 FERC ¶ 61,350 at p.61,709 (1985), *affirmed* 806 F.2d 275 (D.C. Cir. 1986).

[3] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applications for certificate and abandonment authority where the producers assert they are subject to substantially reduced takes without payment or where the parties have entered into a take-or-pay buy-out pursuant to § 2.76. On August 7, 1987, the Commission issued Order No. 500 which promulgated interim regulations in response to the court's remand (40 FERC ¶ 61,172 (1987)). These interim regulations became effective on September 15, 1987.

[Docket No. CI86-267-001 et al.]

Howell Gas Management Co. et al.; Applications for Extension of Blanket Limited-Term Certificates With Pregranted Abandonment [1]

March 17, 1988.

Take notice that each Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for amendment of its blanket limited-term certificate with pregranted abandonment previously issued by the Commission for a term expiring March 31, 1988, to extend such authorization for the term listed herein, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said applications should on or before March 29, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-3-12-000]

Distrigas Corp., Distrigas of Massachusetts Corp.; Rate Change Pursuant to Purchased Gas Cost Adjustment Provision and Request for Waiver

March 16, 1988.

Take notice that on March 10, 1988, Distrigas Corporation ("Distrigas") tendered for filing 22nd Revised Sheet No. 1 to its FERC Gas Tariff to reflect rate decreases for LNG from five cargoes delivered pursuant to amended import authorization granted by the Economic Regulatory Administration, and Distrigas of Massachusetts Corporation ("DOMAC") tendered for filing 22nd Revised Sheet No. 3A of its FERC Gas Tariff also to reflect rate decreases.

Distrigas' 22nd Revised Sheet No. 1 is being filed pursuant to the Purchased LNG Cost Adjustment provision set forth in its FERC Gas Tariff. The Distrigas rate changes are being filed to reflect decreases in its current sales rates to DOMAC of approximately $.80 for the first three cargoes and approximately $1.30 for the last two cargoes. The first three cargoes are priced at $2.50 plus approximately 6 cents for bunkers and port charges plus approximately .5 cent for custom user and harbor maintenance fee. The last two cargoes are priced at $2.00 plus approximately 6 cents for bunkers and port charges and approximately .4 cent for the custom user and harbor maintenance fee.

DOMAC's 22nd Revised Sheet No. 3A is being filed under Section 15 of the General Terms and Conditions of its FERC Gas Tariff to reflect the Distrigas rate changes in DOMAC's rates for sale to its distribution customers, a losses and uses factor and the GRI surcharge. The resulting sales prices are $2.681199 and $2.160107 respectively per MMBtu. This reflects decreases of approximately $.80 for the first three cargoes and approximately $1.30 for the last two cargoes. No surcharge is filed to recover outstanding balances in DOMAC's unrecovered purchased LNG cost account.

Distrigas and DOMAC request a waiver of all applicable notice requirements so that the proposed tariff sheets become effective on the date of delivery of the first LNG cargo imported from Sonatrach pursuant to Amendment No. 2, which reflects these reduced prices.

A copy of Distrigas' and DOMAC's filing is being served on all affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 214 or 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before March 23, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6164 Filed 3-21-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP88-291-000]

Natural Gas Pipeline Company of America; Proposed Changes in FERC Gas Tariff

March 16, 1988.

Take notice that on March 9, 1988, Natural Gas Pipeline Company of America (Natural) tendered for filing the following tariff sheets to be a part of its FERC Gas Tariff, Third Revised Volume No. 1:

Thirth-seventh Revised Sheet No. 5A
Eighth Revised Sheet No. 8
Fourth Revised Sheet No. 13
First Revised Sheet Nos. 126 through 132
Original Sheet Nos. 157 through 162

Natural states that the purpose of these sheets is to: (1) Institute a Gas Supply Charge provision (section 31) in Natural's Tariff, and (2) change the effective dates for the nomination procedure pursuant to section 22 of the General Terms and Conditions. The Gas Supply Charge provision when accepted and permitted to become effective will apply to Natural's customers purchasing gas under Rate Schedules DMQ-1 and G-1. It will provide a mechanism whereby Natural can recover from these customers the costs of maintaining a gas supply inventory to meet the levels of sales service they nominate. Natural further states that the proposed Gas Supply Charge mechanism submitted adheres to the principles which the Commission outlined in Order No. 500 to be used as a guide in structuring such a charge.

Natural requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective April 15, 1988, and the charge to go into effect subject to refund on June 1, 1988.

A copy of this filing is being mailed to Natural's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214. All such motions or protests must be filed on or before March 23, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-75-000]

Natural Gas Pipeline Company of America; Proposed Changes in FERC Gas Tariff

March 15, 1988.

Take notice that on March 9, 1988, Natural Gas Pipeline Company of America (Natural) tendered for filing tariff sheets to be a part of its FERC Gas Tariff, Third Revised Volume No. 1.

Natural states that the tariff sheets were submitted pursuant to § 284.10(3)(A) of the Commission's Regulations. They reflect the changes necessary to effectuate the sales contract conversions to firm transportations as requested by four (4) of Natural's Rate Schedule DMQ-1 sales customers.

Natural requested waiver of the Commission's Regulations to the extent necessary to permit the proposed tariff sheets to become effective on their indicated effective dates.

A copy of this filing was mailed to Natural's jurisdictional sales customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before March 22, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-26-025]

Tennessee Gas Pipeline Co.; Filing Revised Tariff Sheets

March 16, 1988.

Take notice that on March 11, 1988, Tennessee Gas Pipeline Company (Tennessee) tendered for filing the following tariff sheets to Second Revised Volume No. 1 of its FERC Gas Tariff to be effective August 21, 1987:

Third Substitute First Revised Sheet No. 114
Third Substitute First Revised Sheet No. 346

Tennessee states that the purpose of this filing is to refile tariff sheets with modifications in accord with the Commission's February 25, 1988 Letter Order.

Tennessee states that copies of the filing have been mailed to all affected customers and state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 23, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6167 Filed 3-21-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-76-000]

Tennessee Gas Pipeline Co.; Filing Revised Tariff Sheets

March 16, 1988.

Take notice that on March 11, 1988, Tennessee Gas Pipeline Company (Tennessee) tendered for filing the following tariff sheets to Second Revised Volume No. 1 of its FERC Gas Tariff to be effective as indicated:

Tariff sheet	Effective date
Substitute Original Sheet Nos. 12 through 19.	Dec. 10, 1986
Second Revised Sheet No. 114	Apr. 10, 1988
Second Substitute Second Revised Sheet No. 116.	Aug. 21, 1987
Substitute Original Sheet No. 214	Dec. 10, 1986
Substitute Original Sheet No. 227	Dec. 10, 1986
First Revised Sheet No. 237	Jan. 1, 1988
Second Revised Sheet Nos. 350 through 357.	Apr. 10, 1988
Second Revised Sheet No. 359	Apr. 10, 1988
First Revised Sheet No. 360	Apr. 10, 1988

Tennessee states that the purpose of the filing is to: (1) Revised Rate Schedule FT-A to reflect an increase in reservation and commodity rates if a shipper elects to change receipt points for its firm transportation, (2) conform language in Rate Schedule FT-A to indicate that the reservation charge is made up of two components—R_1 and R_2, (3) correct typographical errors, (4) change headings on the system maps, and (5) update the Index of Purchasers.

Tennessee states that copies of the filing have been mailed to all affected customers and state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 23, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-33-007]

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 15, 1988.

Take notice that Williams Natural Gas Company (WNG) on March 9, 1988, tendered for filing to become a part of its FERC Gas Tariff to be effective April 15, 1988:

Original Volume No. 1

Revised First Revised Sheet No. 1
First Revised Third Revised No. 7
First Revised Original Sheet Nos. 42, 47 and 48
First Revised Sheet Nos. 143 and 149

Original Volume No. 2

First Revised Sheet Nos. 249, 252–255, 258 and 259

WNG states that these pages comprise a general maintenance filing to update WNG's FERC Gas Tariff, Original Volume Nos. 1 and 2.

WNG states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 22, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3352-1]

Announcement of a Request for Applications for Superfund Research

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: A Request for Applications (RFA), RFA #NPIR-002-88 is available. The purpose of the request is to solicit grant proposals which will result in the development of innovative, cost-effective methods for the treatment of hazardous wastes in situ at Superfund sites. The Agency expects to fund 5 to 10 proposals for two years at a total cost of $1 million.

[Section 209, Superfund Amendments and Reauthorization Act 1986]

DATES: Applications must be received no later than May 1, 1988 to be considered for funding.

ADDRESS: Copies of the RFA may be obtained from: U.S. Environmental Protection Agency, ORD Publications, 26 West St. Clair Street, Cincinnati, Ohio 45268 (513) 569-7562

FOR FURTHER INFORMATION CONTACT: Questions relating to the RFA may be directed to Mr. Donald Carey at: U.S. Environmental Protection Agency, Research Grants Staff (RD-675), 401 M Street SW., Washington, DC 20460, (202) 382-7445.

George R. Simon,

Acting Director, Research Grants Staff.

Roger S. Cortesi,

Director, Office of Exploratory Research.

Hazardous Substance Research Centers; Solicitation for Applications

AGENCY: Environmental Protection Agency.

ACTION: Solicitation for Applications.

SUMMARY: This notice sets forth the eligibility and submission requirements, evaluation criteria, and implementation schedule for establishing five university-based hazardous substance research centers, as authorized by section 311(d) of Superfund, as amended by section 209 of the Superfund Amendments and Reauthorization Act of 1986. These centers will be competitively awarded and will be equitably distributed around the United States. The primary purpose of these centers is to perform long-term and short-term research relating to key hazardous substance problems in the geographic area served by the center. An important secondary focus of each center is to provide training, technology transfer, and information dissemination services aimed at local personnel interested in the manufacture use, transportation, or disposal of hazardous substances.

DATE: All applications must be received at the contact point by June 27, 1988.

FOR FURTHER INFORMATION CONTACT: Karen Morehouse, Director, Hazardous Substance Research Centers Program, Office of Exploratory Research (RD-675), U.S. Environmental Protection Agency 401 M Street SW., Washington, DC 20460 (202/382-5750).

I. Introduction

A. Announcement

The Environmental Protection Agency (EPA) is seeking proposals for the establishment of five university-based Hazardous Substance Research Centers (HSRC). The purpose of these centers is to conduct research and training relating to the manufacture, use, transportation, disposal, and management of hazardous substances.

B. The Hazardous Substance Problem

One of the most important environmental issues to emerge in the 1980's is the management of hazardous substances, from manufacture to treatment and disposal. Health and environmental risks associated with hazardous substances have become the concern of environmental managers, regulators of numerous industries, and the public at large. Since 1980, numerous abandoned hazardous waste sites have been discovered, and a National Priorities List for cleanup of many sites has shown that in many cases, air, soils, and ground and surface waters have been contaminated by a wide variety of organic and inorganic compounds which have been improperly disposed of. In many instances, remedial actions are very costly, and conventional cleanup procedures are unsatisfactory. At the same time, there has been a growing recognition of the risks associated with transportations of hazardous materials and of the failure of conventional methods of disposal, such as landfills, container burial, impoundments, and deep well injection to contain and immobilize hazardous wastes. There is also a greater awareness of the need to develop more advanced methods of waste stabilization, incineration, chemical, biological or physical alteration, and waste volume reduction to address the growing inventory of waste disposal problems associated with both historical sites and future waste production. Further, more reliable and efficient methods to assess the degree of risk associated with hazardous substances must be found. Finally, there has been an increasing recognition that the most satisfactory approach to managing hazardous substances is to produce less of them through industrial process changes, alternative materials, and in-plant recycling and recovery.

C. Authorization and Appropriation

In recognition of the fact that current scientific knowledge and existing science-based technologies are inadquate to fully address the identification, remediation, and management of hazardous substance problems, Congress enacted section 209 of the Superfund Amendments and Reauthorization Act (SARA). This section amends the Comprehensive Environmental Response, Compensation, and Liability Act (Superfund) to include section 311, entitled Research, *Development and Demonstration.* The broad purpose of section 311 is to establish a comprehensive Federal program of research, development, demonstration, and training to promote alternative and advanced treatment technologies and to improve the scientific capability to detect, assess, and mitigate risks associated with all major aspects of the manufacture, use, and disposal of hazardous substances.

In support of these broad objectives, section 311(d) of Superfund authorizes EPA to provide Federal assistance to at least five university-based centers, equitably distributed throughout the United States, to conduct research and training relating to the manufacture, use, transportation, disposal, and management of hazardous substances, and publish and disseminate the results of such research. EPA's 1988 appropriation provides five million dollars of Superfund for the first year of this program with the requirement that no more than five centers be competitively selected and established.

D. Definition of Hazardous Substances

For purposes of this solicitation, "hazardous substances" is defined according to section 101(14) of Superfund, as amended by SARA. This definition is quoted below:

> The term "hazardous substance" means (A) any substance designated pursuant to section 311(b)(2)(A) of the Federal Water Pollution Control Act, (B) any element, compound, mixture, solution, or substance designated pursuant to section 102 of [Superfund], (c) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (but not including any waste the regulation of which under the Solid Waste Disposal Act has been suspended by Act of Congress), (D) any toxic pollutant listed under section 307(a) of the Federal Water Pollution Control Act, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act, and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synethetic gas).

II. General Description

A. Mission of the Centers

Five hazardous substance research centers will be established in the United States to provide the following services:

- Long-term and short-term research on the manufacture, use, transportation, diposal, and management of hazardous substances.
- Dissemination of research results and coordination of efforts with other institutions active in related areas
- Training, technology transfer, and technical support which would benefit personnel and organization involved in the regulation of hazardous substances or their manufacture, handling, or diposal.

B. Disciplines

Research areas supported by the HSCRs may cover all relevant scientific and technological subjects except health effects research (toxicology, dose-response, epidemiology). Risk assessment studies are not prohibited, provided the HSRC does not perform the health effects research needed to support the risk assessment studies. If health effects data are needed, they

OL
53
ISS
55
MR
22
988
MI

must be obtained from other sources at no cost to the HSRC. Since other institutions are specifically authorized to perform health effects research on hazardous substances [SARA, section 311(a)(c)] it is the view of EPA that the resources of the HSRCs are best spent on activities other than health effects research.

C. Personnel

Each HSRC will be headed by a center director who will be responsible for management, staffing, and budgeting for the center. He will provide intellectual leadership and guidance for the center, and is responsible for coordinating the efforts of the center with those of other institutions engaged in similar pursuits.

The director will devote at least 50% of his time to the operation of the HSRC, and will be a member of the faculty or a full-time member of the administrative staff of the designated lead institution of an HSRC in the event that it is a consortium arrangement. Other personnel that are associated with the center on a full- or party-time basis are:

- A secretary for the center or an administrative assistant who will report to the center director
- Principal investigators on all research projects supported entirely or partly by HSRC funds. Principal investigators should be full-time staff members of the HSRC institution(s)
- Training staff, who consist of one or more individuals who devote at least 50% of their time to the design, development, and administration of the HSRC training program.

D. Region-Pairs

Two adjoining Federal regions will be served by each center, according to a region pairing plan designed to provide equitable distribution of resources over the United States and to better address the hazardous substance problems experienced in the various sections of the country. Pairings are based on contiguity and, to the extent possible, on a reasonable similarity in regional profiles. The ten EPA regions and the States and territories which comprise them are listed below:

Region 1

Connecticut
Maine
Massachusetts
New Hampshire
Rhode Island
Vermont

Region 2

New Jersey
New York
Puerto Rico
Virgin Islands

Region 3

Delaware
Maryland
Pennsylvania
Virginia
Washington, DC
West Virginia

Region 4

Alabama
Florida
Georgia
Kentucky
Mississippi
North Carolina
South Carolina
Tennessee

Region 5

Illinois
Indiana
Michigan
Minnesota
Ohio
Wisconsin

Region 6

Arkansas
Louisiana
New Mexico
Oklahoma
Texas

Region 7

Iowa
Kansas
Missouri
Nebraska

Region 8

Colorado
Montana
North Dakota
South Dakota
Utah
Wyoming

Region 9

Arizona
California
Guam
Hawaii
Nevada

Region 10

Alaska
Idaho
Oregon
Washington

Regions are paired in the following way:

Region-Pair 1 and 2
Region-Pair 3 and 5
Region-Pair 4 and 6
Region-Pair 7 and 8
Region-Pair 9 and 10

E. Administrative and Operating Requirements

1. Lead Institution

HSRCs may be either single institutions or consortiums. (See Section III for additional information on consortium arrangements.) If a consortium arrangement is proposed, a lead institution must be identified. The lead institution must be a university, and the center director must be at that institution.

2. Research

At least once per year the center director will solicit for technical proposals for research within all of the institutions of the HSRC, indicating subject areas of interest. Proposals will be evaluated by a science advisory committee (see item 4.a. below) for technical quality and relevance to the HSRC's research plan. The center director will select proposals for funding based on the recommendations of the science advisory committee and the availability of research funds.

3. Training and Technology Transfer

Training courses and technology transfer activities must be conducted by the HSRC. *Training as used here does not include work leading to a baccalaureate or advanced degree.* Training and technology transfer as defined in this solicitation include, but are not limited to: (1) seminars, (2) workshops, (3) demonstrations, (4) handbooks, (5) user manuals, (6) bibliographies, (7) data bases, (8) newsletters, (9) professional exchange programs, (10) information clearinghouses, or (11) non-academic courses of a length less than one academic term. Within the context of this broad definition, the applicant is free to determine whether a proposed activity is training or technology transfer. Courses should be directed toward State and local regulators, manufacturers, disposers, other handlers of hazardous substances, or the public at large.

4. Committees

To ensure that the center continues to fulfill its mission in ensuing years, the following bodies must be established upon initiation of a center and maintained throughout the life of the center:

a. *Science Advisory Committee.* This committee is chaired by the center director, who is also responsible for selecting members, within certain limitations established by this announcement. The membership of this

committee will consist of approximately 15 technical peers drawn from the public and private sectors and academia. Approximately one-third of the membership will consist of appropriate personnel from EPA's regional offices and laboratories. At least one-third of the membership must be drawn from the academic community. The remaining members may come from academia, industry, or Federal, State, or local government. Appointments to this committee are subject to approval by the EPA project officer. Duties include annual development of a list of relevant research topics and recommendations regarding the relevance and technical merit of project proposals, and review of ongoing projects. Meetings will be held twice a year. Members must be chosen from outside of the institutions of the HSRC.

b. *Training and Technology Advisory Committee.* This committee is chaired by the center director. Mandatory membership will include representatives from the relevant EPA regional offices, EPA's Office of Solid Waste and Emergency Response, ORD's Office of Technology Transfer and Regulatory Support, and States or localities. Others may be added by the center director with approval by the EPA project officer. Duties include annual meetings to recommend training, technology transfer, and technical support plans for the next year, review progress, and recommended changes in current year programs.

5. Annual Meeting of Center Directors

All center directors will meet annually with the EPA project officer and other EPA personnel to discuss progress, coordination, and future directions.

6. Annual Report

Not more than 30 days after the end of each fiscal year, the center director must submit an annual report to the project officer in a format to be specified by the project officer. This report will include accomplishments for the fiscal year immediately ending, plans for the next fiscal year, and listings of publications, courses given, workshops, seminars, conferences, and other quantifiable outputs.

7. Regional Liaison

Each regional office in the region-pair will assign a contact person to advise the project officer on center operations and to advise the center in its efforts to address regional needs. The center must agree to work directly and closely with regional personnel in a manner which will be negotiated among the two regional representatives and the center director.

F. Funding Requirements

EPA plans to contribute approximately one million dollars annually to each center to support the center's research and training activities. These funds will be provided through a Federal assistance agreement with the recipient. The amount of funds the recipient may provide is unlimited. However, the Federal share must not exceed 80% of the total budget. Matching funds may be provided by the university, State or local contributions, foundations, individuals, or the private sector. Not less than 10% and not more than 20% of the total resources available to the center must be devoted to training, technical support, and technology transfer.

No Federal funds provided for this program may be used to purchase, build, or renovate any buildings or to purchase land.

III. Eligibility Requirements

U.S. academic institutions with significant research and training programs in areas relating to hazardous substances are invited to submit proposals. Proposals involving consortiums—limited to universities and two and four year colleges—are encouraged.

However, a single institution in a consortium, designated as the lead institution, must accept overall management responsibilities for the center. The lead institutions must be a university. In accordance with requirements established in section 311(d) of SARA, the institution (or the lead institution in the case of a consortium) must meet the following additional requirements in order to be eligible for HSRC status:

Section 311(d)(4)(A):

> The Hazardous Substance Research Center must be located in a State which is representative of the needs of the region in which such State is located for improved hazardous waste management.

Section 311(d)(4)(B):

> The recipient shall be located in an area which has experienced problems with hazardous substance management.

For purposes of this solicitation, "region" is defined in the sections quoted above as "region-pair" and "area" is interpreted to mean "State". Each institution which applies may only compete for selection in the region-pair in which it is located. *No member of a center consortium may be located outside the particular region-pair which the applicant is proposing to serve.* Contracts with other institutions to perform research or training tasks are allowed.

However, the total amount of funds contracted for these purposes cannot exceed 10% of the total HSRC budget for any fiscal year. Normal contractual services, such as equipment rental, purchase or supplies, etc., are not subject to this limitation. Contract institutions are not considered part of the HSRC.

Within the constraints imposed by region-pairing, any university may be listed on more than one consortium proposal.

IV. Submission Requirements

A. Where and When to Submit

In order to be considerd for award of an HSRC, an original and 15 copies of a proposal must be submitted to: Karen Morehouse, Office of Exploratory Research (RD-675), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The original proposal and 15 copies are due at this contact point no later than June 27, 1988. Please provide a stamped, self-addressed envelope so that receipt of your proposal can be acknowledged.

B. Format for Submission

Each proposal must adhere to the format and limitations specified below, in order to be construed for funding. *Do not append additional material to the proposal, as it will not be considered and will not be forwarded to reviewers.* Each proposals must be submitted in final form. Requests to add or correct material to a submitted proposal will not be considered, unless the additional material is requested by EPA.

1. Administrative Proposal

Each proposal must contain the following separate items, that will be used primarily in an administrative review of the proposal to determine eligibility of the proposer and compliance with administrative and legislative requirements:

a. A cover letter from the proposer
b. A table of contents
c. A justification of eligibility
d. Proof that administrative requirements will be met
e. Proof that legislative requirements will be met

a. *Cover Letter:* A one to two page cover letter must accompany the proposal. This letter must be signed by the chief executive officer of the institution (or, in the case of a consortium arrangement, the lead institution). This letter must begin by stating that the proposal is submitted in response to the solicitation for Hazardous Substance Research Centers to serve the region-pair in which the institution or consortium is located.

In addition, the letter must indicate the willingness of each institution to provide the necessary resources for successful implementation of the center. Finally, the letter must state that the institution will meet all administrative, management, legislative, and operational requirements and restrictions laid out in this solicitation.

b. *Table of Contents:* To assist in the administrative and technical processing of proposals, a complete table of contents must be included which refers to clearly numbered pages.

c. *Eligibility Requirements:* Each proposal must include a section which addresses the eligibility requirements as specified in section III of this solicitation and which clearly demonstrates the institution's eligibility to compete for an HSRC.

d. *Administrative Requirements:* Each proposal must include a section which addresses the administrative and operational requirements as specified in section 11.E. of this solicitation and which clearly and completely describes how the institution will adhere to these requirements.

e. *Legislative Requirements:* Section 311(d) of Superfund requires that certain conditions must be met for an institution to qualify for funds under the HSRC program. Specific conditions are discussed below.

Section 311(d)(4)(E):

> The grant recipient shall make a commitment to support ongoing hazardous substance research programs with budgeted institutional funds of at least $100,000 per year.

For a consortium arrangement, the total commitment from all institutions in the consortium need not exceed $100,000 per year. The proposal must explain how this requirement is being met.

Section 311(d)(5):

> MAINTENANCE OF EFFORT.—*No grant* may be made under this subsection in any fiscal year unless the recipient of such grant enters into such agreements with the Administrator as the Administrator may require to ensure that such recipient will maintain its aggregate expenditures from all other sources for establishing and operating a regional hazardous substance research center and related research activities at or above the average level of such expenditures in its 2 fiscal years preceding the date of the enactment of this subsection.

(SARA was enacted in October 1986).

For purposes of this solicitation, a single maintenance of effort justification may be provided to cover all institutions in the consortium.

2. Technical Proposal

In addition to the Administrative Proposal, each proposal must include the following items, which will be used in its technical evaluation:

a. Center director
b. Center staff
c. Region-Pair problems
d. Research plan
e. Training and technology transfer plan
f. Coordination
g. Facilities and equipment
h. Non-Federal support
i. Budget

a. *The Center Director:* The proposal must describe the technical and administrative qualifications of the center director and his plans for developing an administrative structure which will enable the center to operate efficiently and effectively. This description must clearly demonstrate that the center director possesses the necessary expertise to guide such a center's research, training, and information dissemination activities. A resume for the center director, not to exceed two pages in length, must be appended to the proposal.

b. *Center Staff:* The proposal must clearly indicate the skills and abilities of all key personnel who will conduct research or training for the center. This description must clearly demonstrate that the center staff possess the necessary expertise to carry out the duties which they were hired to perform. A resume which does not exceed two pages must be appended for each key member of the research or training staff associated with the center.

c. *Discussion of Hazardous Substance Problems in the Region-Pair:* The proposal must include a comprehensive description of the major hazardous substance problems experienced by each region in the region-pair and provide quantitative as well as qualitative descriptions of problems wherever possible. To the extent that it is possible to specify individual compounds of concern, this should be done.

When the proposal specifies a hazardous substance by chemical or physical class, that substance must be shown to be consistent with the definition of hazardous substances as provided under Section 101(14) of Superfund. Specific reference to the appropriate acts and sections cited under Superfund section 101(14) will be sufficient to establish the consistency of the definition with this solicitation. For example, if a study of benzene is proposed (or benzene-containing mixtures, in any environmental medium) it is sufficient to say that benzene is identified as a hazardous substance under Section 112 of the Clean Air Act. Any mixture or combination of compounds which contains one or more substances so referenced can be established as a hazardous substance according to the procedures outlined above. Refer to Section I. D. of this solicitation for the legal definition of hazardous substances.

d. *Research Plan:* Based on the discussion of the region-pair problems, the proposal must present a plan for the conduct of research, briefly indicating the technical issues, research approach, and expected results. The discussion should indicate how results would address problems of the region-pair. The research plan must cover a three-year period, emphasizing the first year's work. It is understood that since the operation of centers would continually bring in new (and currently unknown) proposals, significant uncertainties are necessarily contained in the initial research plan. For that reason, emphasis should be placed on a description of the specific projects that would be initiated in the first year, the way this work would be conducted, and the expected results. To provide a context for future research, a discussion of the general approach to research should also be included. This section must also address the center's plan for disseminating these results.

e. *Training, Technical Support, and Technology Transfer Plan:* Plans must be presented for the development and dissemination of training courses and technology transfer to be conducted by the HSRC, emphasizing specific activities to be conducted during the first year of operation. To the extent possible, this plan should specify the activity (training course, workshop, handbooks, etc.). For each activity, include subject matter, target audience, recruitment procedures, instructors, and other information of use in evaluating the quality of the training and technology transfer plans. Refer to section II.E.3. of this solicitation for a definition of training and technology transfer.

Do not append copies of proposed course material, syllabuses, etc. Tie the prescribed training and technology transfer plans as closely as possible to the description of the needs of the region-pair.

f. *Coordination:* The proposal must include a plan for coordinating the activities of the center with those of

organizations engaged in similar or related pursuits. This plan must identify other organizations and the ways in which coordination is to be achieved.

g. *Facilities and Equipment:* The proposal must identify the facilities and equipment which will be available to the center and, to the extent possible, the ways in which these items will be used.

h. *Non-Federal Support:* A description of the precise amounts and forms of non-Federal support proposed must be included. This should be categorized as clearly as possible, and must include the sources of support, the kind (cash, salaries, equipment, supplies, etc.), and the amount of each kind of support identified.

i. *Budgetary Justification:* An estimate of expenses and personnel must be provided for the first three years of operation, using the formats shown in Tables 1–3 (appended). As in the case of the research and training plans, more detailed budget information for the research and training programs is requested for the first year of operations (Table 1) than for the out-years (Table 2). Table 3 provides the format for showing estimated personnel allocations for the first three years of the center's operation. Explanations of entries in the tables are given below:

Table 1

- "Direct Costs" refers to estimated costs of salaries, fringe benefits, travel, equipment, supplies, contractual services (except for contracts to institutions outside of the HSRC to conduct research or training tasks (projects) for the HSRC), and miscellaneous costs.
- "Contracts" refers to dollars allocated via agreements with other research or training institutions outside of the HSRC to conduct all or part of an HSRC's project or projects.
- "Indirect Costs" means the total of overhead payments made to all institutions of the HSRC.
- "Project 1, Project 2 . . . Project N" refers to the individual major research or training projects proposed. Identify these by project title. Include here projects conducted outside the HSRC under contract.
- "Unallocated Resources" means all funds reserved for research or training projects in the first year of operation which have not yet been chosen. This category is an indication of the degree to which the first year of the research or training programs have been planned.
- As indicated in section II.E.3. of this solicitation, the proposer may use his own classification system to determine whether a specific activity is training or technology transfer.
- "Tech. Transfer" refers to all costs in the given budget category (direct costs, contracts, etc.) associated with technical transfer activities.
- "Management" refers to those costs strictly associated with day-to-day operation of the center, such as the salaries and benefits of administrative employees and travel strictly associated with administration and management of the center.

Table 2

- "Direct Costs," "Contrasts," and "Indirect Costs" are the same as defined for Table 1.
- "Ongoing Projects" refers to total research costs for all research projects in place that were in place the preceding year.
- "New Projects" refers to total research costs for all research projects initiated in the year under consideration.
- "Design/Development" refers to total costs associated with all training work except the actual conduct of training programs.
- "Delivery" refers to total costs associated with the actual conduct of training.
- "Training", "Technology Transfer", and "Management" have the same meanings as in Table 1.

Table 3

- "% of Time" refers to the percentage of time the person identified is expected to spend on HSRC-related activities for the year indicated. Key investigators on contracted tasks must also be identified.
- "Est. Cost" refers to the estimated amount of salary and fringe benefits for the person identified for the year indicated.
- "Center Director" is self explanatory.
- "Person 1, 2 . . . N" means any administrative employee other than the center director who can be identified or whose function is clearly known.
- "Principal Investigator" signifies that, where possible, each key investigator should be identified by name.
- "T/T Person 1, 2 . . . N" refers to training or technology transfer specialists who will perform key functions for the center.

3. Page Limitation

The body of the proposal, exclusive of cover page, table of contents, cover letter, resume, and budget description, *must not exceed 40 double-spaced, 8½ by 11 inch pages, including graphs, tables, and pictures.* Typeface must be standard 10–12 characters per inch. (Do not reduce.) The cover letter and each resume must not exceed two pages apiece. Response to Items IV.B.2.h. and i. of this solicitation together *cannot* exceed a total of nine pages.

If any of these limitations are exceeded, the proposal will be returned without further consideration.

V. Schedule

The following schedule will be followed for solicitation, review, and selection of the HSRCs.

Event	Date
● Solicitation	3/21/88
● Closing date for proposals received in EPA	5/27/88
● Review of proposals	7/8/88
● Selection of awardees	9/88
● Five HSRCs in place	12/88

VI. Proposal Evaluation

A. Review and Awards Selection Process

The first step in the review and selection process will consist of an administrative review by OER to determine eligibility and compliance with administrative and legislative requirements. Following that, proposals will be divided into five groups corresponding to the five region-pairs identified in Section II.D. of this solicitation. For each region-pair, a panel will be convened, consisting of experts from the fields of engineering, physics, chemistry, hydrology, geology, environmental biology, and related subspecialties. Each panel will also include experts in training and technology transfer. Not more than 20% of the total membership of any panel will consist of training and technology personnel.

All reviewers for a given region-pair competition will come from institutions located outside that region-pair. All proposals in each of the five region-pair competitions will be evaluated for technical merit. Those proposals which pass an initial technical review will be scored. In the case of a run-off, a site visit by the review panel to each of the top scoring institutions may be necessary. Each of the five panel chairmen will make recommendations for funding based on the established scores. These scores and recommendations will be transmitted to EPA. The Assistant Administrator for EPA's Office of Research and Development will make the final selection.

B. Evaluation Criteria

The following criteria will be used to evaluate proposals:

1. Qualifications of Center Director and Staff

This criterion will be used to determine the level of expertise of the center director and staff, and to determine whether the proposed skills mix is appropriate and satisfactory.

2. Quality of Discussion of Region-Pair's Problems

This criterion will be used to judge both the depth and breadth of the applicant's knowledge of the hazardous substance problems associated with his region-pair.

3. Quality of the Research Plan

The research plan will be judged on the basis of its technical merit, innovation, and applicability to regional needs. Ability to disseminate research results will be a factor in evaluating this part of the proposal.

4. Quality of Training, Technical Support, and Technology Transfer Plan

Judgment of the proposal against this criterion will be based on specificity, completeness and quality of the plan, and applicability to the needs of the region-pair.

5. Quality of Plan to Coordinate Research and Training with User Needs and Other Organizations Engaged in Related Activities

Each applicant will be judged on the extent to which the proposal provides for integration and coordination of the center's activities with related efforts, including activities at the same institution, other universities and HSRCs, State and local efforts, or other relevant organizations. Judging will be based both on demonstrated knowledge of the mission and activities of other organizations and on the mechanisms proposed for achieving coordination.

6. Availability and Adequacy of Facilities and Equipment

This criterion relates to the physical adequacy of the institution or institutions to carry out the proposed work. This includes the presence of required buildings and equipment, and the extent to which they are available for use by the center.

7. Amount, Sources, and Kinds of Non-Federal Support Available

While the solicitation requires that at least 20% of the center's total support be provided through non-Federal contributions, proposals will be judged on the specific amount of matching funds which they can provide, the reliability of the sources of those resources, and the kind of support which is being proposed.

8. Budgetary Justification

This criterion will be used to determine the adequacy of the proposed budget and personnel allocation (as indicated in table 1–3) based on the research and training plan and the relative proportion of operating to management costs. EPA believes that management costs for each HSRC should be kept to a minimum.

VII. Mechanism of Support

Support will take the form of a Federal assistance agreement as provided for by the Federal Grant and Cooperative Agreement Act of 1977. Such agreements are subject to provisions of EPA's General Grant Regulations (40 CFR Parts 30 and 40, Research Grants) and to special conditions to be established in each specific agreement. Each of the five winners will be requested to submit a full Application for Federal Assistance (EPA Form 5700–12 rev. 4/78). Application kits with full instructions may be obtained by writing to: U.S. Environmental Protection Agency, Office of Exploratory Research (RD–675), 401 M Street, Southwest, Washington, DC 20460.

It is emphasized that proposals responding to this solicitation do not constitute a formal application to EPA for Federal assistance. Only winners of the competition will be asked to submit formal applications as indicated above.

VIII. Duration of Agreement

EPA plans to support each HSRC for a maximum period of eight years. The project period of the initial agreement will be three years. During the second year of the agreement, a peer review panel, convened by EPA, will conduct a site visit at the center, and report its findings and recommendations to EPA. This review will be used to determine whether support of the center will continue with a five-year agreement following the completion of the three-year agreement. The five-year renewal agreement, if awarded, is provided with the understanding that no further agreements can be awarded without another competition for HSRC status.

Continued support of the HSRCs by EPA is contingent upon the availability of funds to support this activity.

IX. Inquiries

Inquiries about the EPA Hazardous Substance Research Centers Program should be made to:

Karen Morehouse, Office of Exploratory Research (RD–675), U.S. Environmental Protection Agency, 401 M Street, Southwest, Washington, DC 20460, (202) 382–5750,

or

Robert Papetti, Office of Exploratory Research (RD–675), U.S. Environmental Protection Agency, 401 M Street, Southwest, Washington, DC 20460, (202) 382–7473.

Approved for Publication:

Erich Bretthauer,

Acting Assistant Administrator for Research and Development.

March 17, 1988.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-803-DR]

Federated States of Micronesia; Amendment To Major-Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the Federated States of Micronesia (FEMA-802-DR), dated November 25, 1987, and related determinations.

DATED: March 14, 1988.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3614.

Notice: Notice is hereby given that, effective this date and pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint David P. Grier, IV of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

This action terminates my appointment of Alfred A. Hahn as Federal Coordinating Officer for this disaster.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No: 224-010960-002

Title: Maryland Port Administration Marine Terminal Agreement

Parties:

Maryland Port Administration (MPA)
Maher Terminals, Inc. (Maher)

Synopsis: The proposed agreement amends the terms of the basic agreement and lease between MPA and Maher to eliminate Farrell Lines' participation thereunder.

By Order of the Federal Maritime Commission.

Dated: March 16, 1988.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notice, Acquisition of Shares of Banks or Bank Holding Companies; Elmer H. Austermann, Jr. et al.

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 7, 1988.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St louis, Missouri 63166:

1. *Elmer H. Austermann, Jr.*, Florissant, Missouri; to acquire 100 percent of the voting shares of Mathes Bancshares, Inc., Ellington, Missouri, and thereby indirectly acquire Farmers State Bank of Ellington, Missouri.

Board of Governors of the Federal Reserve System, March 16, 1988.

William W. Wiles,

Secretary of the Board.

[FR Doc. 88-6153 Filed 3-21-88; 8:45 am]

BILLING CODE 6210-01-M

Baer Holding Ltd.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under §225.23(a)(2) or (f)) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 13, 1988.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Baer Holding Ltd.*, Zurich, Switzerland; to acquire Harbor Capital Management Company, Inc., Boston, Massachusetts, and thereby engage in providing portfolio investment advice to investment companies, trusts, estates, religious and other charitable organizations, pension and profit-sharing plans and wealthy individuals pursuant to § 225.25(b)(4) of the Board's Regulation Y. As party of the propsoal, Applicant intends to provide investment advisory services to one or more de novo open-end investment companies through its existing subsidiary, Julius Baer Investment Management, Inc.

Board of Governors of the Federal Reserve System, March 16, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

1889 Bankcorp et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and section 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 13, 1988.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *1889 Bankcorp*, North Branch, Michigan; to become a bank holding company by acquiring 100 percent of the voting shares of Pioneer Bank, North Branch, Michigan.

2. *Waymar Bancorporation*, Spirit Lake, Iowa; to become a bank holding company by acquiring 98.52 percent of the voting shares of First Bank and Trust, Spirit Lake, Iowa. Comments on this application must be received by April 1, 1988.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Bancorp II, Inc.*, Kansas City, Kansas; to become a bank holding company by acquiring 97.87 percent of the voting shares of The Citizens Bank of Pilot Grove, Pilot Grove, Missouri.

Board of Governors of the Federal Reserve System, March 16, 1988.

BILLING CODE 6760-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicaid Program; Hearing on Reconsideration of Disapproval of Michigan State Plan Amendment

AGENCY: Health Care Financing Administration (HCFA), HHS

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on April 19, 1988, in Chicago, Illinois to reconsider our decision to partially disapprove Michigan State Plan Amendment 86-7.

CLOSING DATE: Requests to participate in the hearing as a party must be received by the Docket Clerk April 6, 1988.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Hearing Staff, Bureau of Eligibility, Reimbursement and Coverage, 365 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 966–4470.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove a Michigan State Plan Amendment.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained in 45 CFR 213.15(c)(1).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The State of Michigan has submitted a plan amendment which revises its DRG plan for Medicaid reimbursement of inpatient hospital services effective April 1, 1986. One portion of the amendment proposes the elimination of the blending of hospital specific rates with statewide average rates. The issue in this matter is whether the elimination of the blended rate provision violates Federal regulations at 42 CFR 447.250–447.271.

HCFA considers the elimination of the provision for blending hospital specific and statewide rates a significant change to the methods and standards used to determine payment rates. While aggregate State payments may not be affected, the change is significant since it affects the rate of each provider in the State. The Federal regulations at 42 CFR 447.250–250.271 specify the requirements with which a State must comply for approval of significant plan changes. The State has not provided an adequate assurance as required by 42 CFR 447.253(b)(2) that it has made a finding that the payments are not expected to exceed the amount that would have been paid under the Medicare principles of reimbursement. The State's submission dated May 15, 1987, contains an upper limit finding that HCFA believes is not acceptable since it compares the average Medicare rate in the State to the average State Medicaid rate. HCFA believes the finding does not comply with the regulation at 447.253(b)(2) which requires the State to apply, for purposes of cost comparison, the Medicare principles of reimbursement to Medicaid services when making an upper limit determination. In addition, the State did not publish public notice timely as required by 42 CFR 447.253(f). Since the State did not publish public notice until August 11, 1987, the earliest effective date, if the amendment were otherwise approvable, would be August 12, 1987.

The notice to Michigan announcing an administrative hearing to reconsider our disapproval of portions of its State plan amendment reads as follows:

Mr. C. Patrick Babcock,
Director, Department of Social Services, P.O. Box 30037, Lansing, Michigan 48909

Dear Mr. Babcock: This is to advise you that your request for reconsideration of the decision to disapprove Michigan State Plan Amendment 86–7 was received on February 18, 1988.

Michigan SPA 86–7 would amend the Michigan reimbursement plan for payment of inpatient hospital services by eliminating the blending of hospital specific rates with statewide average rates.

You have requested a reconsideration of whether this plan amendment conforms to the requirements for approval under the Social Security Act and pertinent Federal regulations.

There are two issues in this matter. The first issue is whether the State has provided an adequate assurance as required by 42 CFR 447.253(b)(2) that it has made a finding that the payments are not expected to exceed the amount that would have been paid under the Medicare principles of reimbursement. The second issue is whether the State published timely public notice as required by 42 CFR 447.253(f).

I am scheduling a hearing on your request to be held on April 19, 1988, at 10:00 a.m. in Room A–824, 175 West Jackson Boulevard, Chicago, Illinois. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Stanley Krostar as the presiding official. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (301) 966–4470.

Sincerely,

William L. Roper, M.D.,
Administrator.

(Sec. 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: March 15, 1988.

William L. Roper,
Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

Health Resources and Services Administration

Public Health Service; Program Announcement and Proposed Funding Priority and Proposed Review Criteria for Grants for Faculty Training Projects in Geriatric Medicine and Dentistry

The Health Resources and Services Administration announces the acceptance of applications for Fiscal Year 1988 for Grants for Faculty Training Projects in Geriatric Medicine and Dentistry authorized by section 788(e) of the Public Health Service Act, as amended by the Omnibus Health Act of 1986, Pub. L. 99–660 enacted on November 14, 1986, and Pub. L. 100–177, the Public Health Service Amendments of 1987, and invites comments on the proposed funding priority and proposed review criteria set out below.

Section 788(e) authorizes the award of grants to accredited public or private nonprofit schools of medicine or osteopathy, public or private nonprofit teaching hospitals or graduate medical education programs to provide support, including traineeships and fellowships, to train physicians and dentists who plan to teach geriatric medicine or geriatric dentistry. One-year retraining programs, one-year fellowship programs and two-year fellowship programs are eligible for support.

Approximately $2.7 million is available for Grants for Faculty Training Projects in Geriatric Medicine and Dentistry in Fiscal Year 1988. It is expected that 15 projects averaging $180,000 will be supported with these funds.

The Public Health Act requires that geriatrics training be provided through one or both of the following training options:

(1) A one-year retraining program in geriatrics for physicians who are faculty members in departments of internal medicine, family medicine, gynecology, geriatrics, and psychiatry at schools of medicine and osteopathy, and dentists who are faculty members at schools of denistry or at hospital departments of dentistry; and

(2) A one-year or two-year internal medicine or family medicine fellowship program with emphasis in geriatrics, which shall provide training in clinical geriatrics and geriatric research for physicians who have completed graduate medical education programs in internal medicine, family medicine, psychiatry, neurology, gynecology, or rehabilitation medicine, and dentists who have completed postdoctoral dental education programs.

The Act further requires each project for which a grant is made under this provision to include the following:

(a) Be staffed by full-time teaching physicians who have experience or training in geriatric medicine;

(b) Be staffed by full-time or part-time teaching dentists who have experience or training in geriatric dentistry;

(c) Be based in a graduate medical education program in internal medicine or family medicine, or a department of geriatrics in existence as of December 1, 1987;

(d) Provide participants in the project with exposure to a diversified population of elderly individuals; and

(e) Provide training in geriatrics and exposure to the physical and mental disabilities of elderly individuals through a variety of service rotations, such as geriatric consultation services, acute care services, dental services, geriatric psychiatry units, day and home care programs, rehabilitation services, extended care facilities, geriatric ambulatory care and comprehensive evaluation units, and community care programs for elderly mentally retarded individuals.

Proposed Review Criteria

The Secretary, after consultation with the National Advisory Council on Health Professions Education will approve or disapprove all applications, taking into consideration the following proposed review criteria:

(1) The extent to which the proposed training program will prepare physicians and dentists to perform the research, teaching, administrative and clinical duties of a faculty member specializing in geriatrics;

(2) The degree to which the project plan adequately provides for meeting the project requirements including (a) through (e) as set forth above;

(3) The administrative, management and resource capability of the applicant to carry out the proposed project in a cost-effective manner;

(4) The potential for the applicant to continue the program without Federal support after completion of the approved project period; and

(5) The extent to which the project will increase the number of training opportunities available for individuals who want to prepare for academic careers in geriatric medicine and dentistry.

The proposed general criteria are consistent with other Title VII programs. The criteria specific to the program are designed to meet the legislative intent for increased opportunities for physicians and dentists to acquire skills and knowledge necessary to teach geriatric medicine and dentistry.

Proposed Funding Priority

The Department is proposing to give funding priority in the review process to applicants who propose substantial specific efforts to recruit minority trainees. The need to increase training opportunities for minorities in health professions continues to be a top national priority. This proposed priority is consistent with funding considerations in other Title VII programs.

Interested persons are invited to comment on the proposed funding priority and proposed review criteria. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the Fiscal Year 1988 award cycle, this comment period has been reduced to 30 days. All comments received on or before April 21, 1988, will be considered before the final funding priority and review criteria are established. No funds will be allocated or final selections made until a final notice is published indicating whether the funding priority and review criteria will be applied.

Written comments should be addressed to:

Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C–25, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Medicine, Bureau of Health Professions, at the above address weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m.

Application materials will not be automatically mailed to prospective applicants. Thus, requests for application materials and questions regarding grants policy should be directed to:

Grants Management Officer (D–31), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C–22, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6880.

Should additional programmatic information be required, please contact:

Multidisciplinary Programs Section, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C–25, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6817.

The standard application form and general instructions Form PHS 6025–1 HRSA Competing Training Grant Application have been approved by the Office of Management and Budget. The supplemental instructions have been submitted for OMB approval.

To receive consideration, applications must meet the deadline of May 6, 1988, which means they must either be:

(1) *Received* on or before the deadline date, or

(2) *Postmarked* on or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

This program is listed at 13.156 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: March 15, 1988.

David N. Sundwall,
Administrator, Assistant Surgeon General.

BILLING CODE 4160-15-M

Public Health Service

Availability of Grants for Minority Community Health Coalition Demonstration Projects

AGENCY: Office of Minority Health/Office of the Assistant Secretary for Health, PHS, DHHS.

ACTION: Notice of availability of funds and request for applications under the Office of Minority Health's Program of

Grants for Minority Community Health Coalition Demonstration Projects.

SUMMARY: The Office of Minority Health announces the availability of grants to provide support, for a period which will not exceed two years, for projects which demonstrate methods of developing community health coalitions which can effectively promote disease risk factor reduction within minority populations.

Background

The Report of the Secretary's Task Force on Black and Minority Health identified six health problems that account for 80 percent of the excess deaths among minorities. Excess deaths are the difference between actual minority deaths and the number of deaths which would have been expected if the minority population had the same age- and sex-specific death rates as the white population. Every minority group does not suffer from excess deaths in each category. However, the six health problems became priority issue areas for Task Force study. Listed in alphabetical order, they are:

- Cancer
- Cardiovascular disease and stroke
- Chemical dependency
- Diabetes
- Homicide, Suicide, and Accidents (unintentional injuries)
- Infant mortality.

AIDS

In recognition of the severity of the problem of Acquired Immunodeficiency Syndrome (AIDS) among the minority populations, Congress appropriated funds in Fiscal Year 1988 for the Office of Minority Health to use in ways specifically targeted at AIDS in minority populations. One mechanism by which the Office of Minority Health will target AIDS is to add AIDS as a seventh health problem to the above list of topic areas for this demonstration grants program in Fiscal Year 1988. *For applicant organizations that plan to submit AIDS demonstration applications*, it is important to describe existing efforts in AIDS education and prevention in their local community (e.g., by the local or State health department or community-based organization), and how the applicants' proposed interventions to prevent AIDS or HIV infection would complement those existing efforts.

Please note that these Minority Community Health Coalition Demonstration Projects are but one mechanism by which the Office of Minority Health intends to utilize its Fiscal Year 1988 AIDS appropriation. For more information on the Office of Minority Health AIDS initiative, please call Jacqueline Bowles, M.D., at (202) 245-0020.

The risk factors for these seven priority areas involve behavior or preventable conditions which are potentially modifiable but are in some cases resistant to change. In order to effect health behavior change, an individual must be motivated beyond that typically achieved as the result of health information or media campaigns alone. In addition, conventional health promotion activities are frequently not effective in reaching minority populations. It appears that change can be achieved by community-based information dissemination, awareness, support, and exhortation, particularly if such a community health campaign is carried out using familiar, aas well as influential institutions such as churches and schools, and organized by recognized community leaders.

Moreover, in many cases it may be insufficient to simply pressure individuals to change behavior without offering positive alternatives. For example, if teens are being encouraged to avoid use and abuse of drugs and alcohol, it may also be important to organize and offer constructive alternatives such as career-oriented activities.

The following is a list of the major health problems with their associated modifiable risk factors, some of which are implicated in more than one health problem:

Cancer: Tobacco, Diet, Alcohol, Environment.

Cardiovascular Disease and Stroke: Hypertension, Diet, Tobacco, Sedentary life style, Obesity.

Chemical Dependency: Direct behavioral outcome of alcohol and other drugs of abuse.

Diabetes: Obesity, Diet.

Infant Mortality: Smoking, Alcohol, Drugs, Late or no prental care, Teen pregnancy, Nutrition.

Homicide: Alcohol, Drugs, Poor conflict resolution skills.

Suicide: Alcohol, Drugs, Depression.

Unintentional Injuries: Alcohol, Drugs, Environmental hazards.

AIDS: Intravenous drug use, and High risk sexual practices, (e.g., unprotected intercourse, with multiple partners).

Many of the above noted risk factors are of interest to, and within the purview of, a number of organizations within communities. In addition, community organizations have different and varying levels of influence over the behavior of individuals.

This announcement is the third annual notice for this grant program. In the past Fiscal Year 1987, the Office of Minority Health received 138 applications of which 38 were approved and six (6) grants awarded for a total of $1.15 million. One hundred applications were disapproved because of a variety of deficiencies. Several applications may have been in the approval range with some technical assistance. Others would have required much more work in the pre-application stage. Given the time and resources typically involved in researching, developing, and writing an application, potential applicants should seriously consider whether or not they should apply at this time or wait until they establish stronger linkages with other community organizations and/or develop greater expertise in planning and writing their proposals. Applicants wishing to improve their chances for approval should pay *particular attention to both the Supplemental and General Instructions provided with the grant application* to ensure that their applications are responsive to each of the following concerns under the following headings:

Project Objectives

1. Clearly describe the goals and objectives of the proposed project;

2. Identify, describe, and document health problem areas and related risk factors in the target population;

3. Include realistic timetables for accomplishing the objectives;

Target Population

4. Define the target population(s) and identify which interventions are proposed for which minority groups;

Coalition

5. Provide evidence that a valid community-based coalition exists or that organization, which have worked together in the past, are now proposing to focus their energies on these risk reduction activities;

6. Describe in detail the organization of the coalition and the respective roles of coalition members and other participants;

Intervention

7. Describe plans for implementing the intervension(s), presenting in step-by-step fashion the specific efforts to be undertaken by each key component of the coalition, and how these various efforts will address the problems identified;

8. Provide a detailed description of intervention strategies that address the broad concept of the application rather than just an analysis of medical records of minority individuals, as in a limited clinical trial;

Project Management and Staffing

9. Provide detailed management plans that clearly delineate each coalition member's area of responsibility and how specified key staff of member organizations will be accountable for carrying out their responsibility;

10. Describe the duties and requisite qualifications of current staff, and of any staff and consultant positions to be filled after the grant award; and

11. Identify and provide supporting documentation (e.g., curriculum vitae) for each individual proposed for key staff positions to show appropriate experience and qualifications. Particularly suitable will be experience in community-based programs and/or health promotion programs, as well as related treatment and research experience.

Evaluation

12. In the evaluation section, specify the overall evaluation plans and the particular process and outcome objectives, indicating how each of these will be measured, including the results of the interventions.

Authority: This program is authorized under section 301 of the Public Health Service Act, as amended.

Program Objectives

The objectives of the program are to fund projects which:

(1) Provide epidemiological evidence of the health problem(s) and risk factor(s) of the minority population(s) which are the targets of the applicant's proposal.

(2) Provide detailed and specific methods for risk factor reduction through the use of a community coalition targeted to a specific minority population and to identified risk factors.

(3) Demonstrate a sound organizational scheme for the coalition which assures adequate involvement and representation of both coalition members and community leaders.

(4) Evaluate the process of establishing and operating the coalition and how its activities will impact on the risk factors and health problem areas identified in the target population through the community coalition.

(5) Demonstrate experience of the applicant and some coalition members with community-based projects, either focused on health or other community concerns.

Definitions

For the purpose of this grant program, the following definitions are provided:

(1) *Health Problem Areas*—One of the seven priority issue areas identified in the Secretary's Task Force report or by the Office of Minority Health. They are: (a) cancer; (b) cardiovascular disease and stroke; (c) chemical dependency; (d) diabetes; (e) homicide, suicide and unintentional injuries; (f) infant mortality; and (g) AIDS.

(2) *Risk Factors*—The environmental and behavioral influences capable of causing ill health with or without previous predisposition. The term "risk factor" is also used to denote an aspect of personal lifestyles and behavior known, on the basis of epidemiological evidence, to be associated with one or more diseases or health conditions considered important to prevent.

These include use of tobacco, poor dietary habits, obesity, severe emotional stress, depression, poor conflict resolution skills, abuse of alcohol and drugs, intravenous drug use, late or no prenatal care, teen pregnancy, high risk sexual practices, (e.g., unprotected intercourse, with multiple partners), environmental hazards, and others.

(3) *Community*—A defined geographical area in which persons live, work, and recreate and is characterized by: (1) formal and informal communication channels; (2) formal and informal leadership structures for the purpose of maintaining order and improving their conditions; and (3) its capacity to serve as a focal point for addressing societal needs including health needs.

(4) *Community Coalition*—The coming together of individuals from and representatives of organizations and institutions in a community for the purpose of collaborating on specific community concerns, and seeking resolution of those concerns. For purposes of this grant program, community coalitions are characterized by the six elements listed below.

A community coalition:

- Assumes a variety of interests converging on an agreed upon mission.
- Requires resource participation. Each coalition member organization brings a certain resource to the coalition to enable the coalition to accomplish its mission.
- Requires that each member organization has a specific role within the coalition. This role, defined by the individual member, is distinctive among the other members. Use of resources may be one way of defining each role.
- Requires that each member organization establish both a relationship with the coalition as an entity (vertical relationship) and with other members of the coalition (horizontal relationship). Members must be able and willing to work with one another. Formalizing these relationships to make explicit the specified roles may be achieved through development of memoranda of understanding/agreement between each member organization and the coalition, and between members as necessary.
- Requires a long term commitment on the part of each member organization since the problem to be addressed is not usually amenable to short term solutions.
- Must document its activities to ensure a written history of and, thus, a continuity to its work that is not dependent upon the active participation of any single person. Such documentation can include the memoranda of understanding/agreement mentioned above.

(5) *Minority Populations*—As defined by the Report of the Secretary's Task Force on Black and Minority Health, they include: Asian/Pacific Islanders, Blacks, Hispanics, and Native Americans/Alaska Natives (which include Native Hawaiians).

Availability of Funds

The Office of Minority Health intends to make available approximately $1.6 million to be expended by grantees over a two-year project period. It is anticipated that eight individual grants of up to $200,000 (total costs including indirect costs) each for the two-year project period will be awarded from these funds. OMH hopes to award two of the eight grants in the AIDS area, one targeted to the Black population and one targeted to the Hispanic population. Such awards, however, like all award decisions will be based on the types and quality of the applications received.

Applicant Eligibility

Eligible applicants are public and private nonprofit organizations and for-profit organizations *except for all current grantees under this program*, since these grantees are considered not eligible. The applicant organization is the lead agency for the coalition and is responsible for management of the Project and will serve as the fiscal agent for the Federal funds awarded.

Federal demonstration grant support is not expected to result in more than one award in any Standard Metropolitan Statistical Area (SMSA) unless an additional project in an SMSA was to be targeted to another of the four major minority groups—Asian/Pacific Islanders, Blacks, Hispanics, and Native Americans/Alaska Natives. Efforts will be made to achieve geographic and ethnic distribution of awards as well as cover the various health problems identified above. There is no lower limit for the size of the population targeted by the applicant, but there must be a reasonable relationship between the level of effort involved in the coalition and the size of the target population and the health problem(s) to be addressed. Similarly, the geographic distribution of the target population must be such that effecting risk factor reduction is feasible.

The target risk factor(s) must be epidemiologically justified on the basis of health problem patterns in the population. It is suggested that applicants limit the number of disease or health problem areas to a primary one with one secondary problem area (with their associated risk factors) on which a coalition plans to focus, as opposed to being all-inclusive, in order to maximally utilize resources to achieve the greatest reduction in the selected risk factor(s).

Applications

1. Copies

The forms used for applying for grants under this program are either Form PHS 5161–1 for State and local governments or Form PHS 398 for all others. Copies of the application kit may be obtained from the Grants Management Branch, Room 18A10, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

2. Deadlines

Applications shall be considered meeting the deadline if they are received on or before 5:30 pm on June 8, 1988.

3. Late Applications

Applications which do not meet the criterion in paragraph 2 immediately above will be considered late applications and will be returned to the applicant.

4. Reviews

Applications are subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs. Applications for funding will be subject to State review. All comments from a State office must be received by 60 days after the due date by the program grants management office. Applicants should contact State Single Points of Contact (SPOC) early in the application preparation process. A list of addresses of the SPOCs is enclosed with the application material.

5. Project Budget

Funds may be used to cover the cost of personnel to coordinate the coalition's activities, for consultants, support services and materials. Funds may not be used for building construction costs or building alterations and renovations. Also, funds may not be used to purchase equipment except as may be acceptably justified in relation to conducting the project.

6. Cost Participation

It is expected that a portion of the program's costs will be borne by coalition members or by other non-federal sources such as business, labor, local government, or community funds. Cost participation for those grants in FY 1987 ranged between $60,000 and $134,000, and was either in-kind or direct funds contributions.

7. Review Criteria

Applications will be reviewed and evaluated in terms of the evidence presented in the application regarding the ability of the applicant to meet program objectives. Of specific importance will be the following criteria under the listed headings. (An indication of the qualitative weight appears in parentheses after each criterion.):

Project Objectives

(1) The scientific and technical merit of the described proposed project, and the consistency of the project's goals and objectives with those of the Demonstration Grant Program and the Office of Minority Health. (high)

Target Disease(s), Risk Factor(s), and Minority Group

(2) The justification for the choice of disease(s) and risk factor(s) to be targeted, and their direct relationship to the epidemiologic characterization(s) of the target minority population(s). (high)

Coalition

(3) The degree to which the composition of coalition members is a logical choice based on target population, target risk factor(s) and intervention(s) to be demonstrated. (high)

(4) The degree of commitment of each coalition member to the coalition and to the proposed implementation plan, including the amount or extent of support indicated by coalition members to cover a portion of project needs. (medium)

Intervention

(5) Coherence, feasibility, and realistic approach of the intervention strategy of the implementation methods described. The specificity of the methods to address the target risk factor(s) in the target population(s) will be given significant weight in the review of the application. (high)

Project Management and Staffing

(6) Adequacy of qualifications and time allocations of proposed regular staff, both paid and voluntary, and of the proposed program and technical management of the project. (high)

(7) Relevant experience and qualifications of the managers of the applicant organization to provide administrative and fiscal management of the grant. (medium).

(8) Adequacy of medical/scientific/public health technical expertise available to the coalition for its use. (low)

Evaluation

(9) Appropriateness of the process and outcome objectives, and adequacy of the evaluation plan to measure the development of the coalition as well as indicators and trends of outcome changes based on the goals and objectives of the application. (medium)

(10) Likelihood that the project will demonstrate whether or not community health coalitions can effectively promote risk factor reduction among minority populations (medium)

(11) Likelihood that the project will continue beyond the two year funded project period. (medium)

8. Information and Technical Assistance Contacts

Information on application procedures and copies of application forms may be obtained from Ralph Sloat, Grants Management Officer, Room 18A10, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857 (phone (301) 443–4033).

Technical assistance on the programmatic content of the application may be obtained from J. Henry Montes, Office of Minority Health, Room 118–F, HHH Bldg., Washington, D.C. 20201 (telephone /202/ 245–0020). For additional information on the OMH AIDS Program, please contact Jacqueline Bowles, M.D., at the same address and telephone number.

(The Catalog of Federal Domestic Assistance Number for the program is 13.137)

Dated: February 23, 1988.

Herbert W. Nickens,

Director, Office of Minority Health.

BILLING CODE 4160-17-M

Social Security Administration

Social Security Disability Program Demonstration Projects

SUMMARY: The Commissioner of Social Security announces the following demonstration projects to be conducted under the authority of Pub. L. 96–265, section 505(a), as amended by Pub. L. 99–272, section 12101. Fifteen projects, which will focus on vocational assessment, rehabilitation and placement into competitive employment, will be funded under this section of the law. Section 222(a) of the Social Security Act will be waived to conduct these projects, permitting direct referral of Social Security disability insurance (SSDI) beneficiaries from the Social Security Administration (SSA) or the State agencies that make disability determinations for SSA, to the organizations conducting the demonstration. Each project will develop selection criteria, but participation by beneficiaries is totally voluntary. We are publishing this notice to comply with 20 CFR 404.1599, which requires publication of a notice in the **Federal Register** before starting certain demonstration projects.

FOR FURTHER INFORMATION CONTACT: Malcolm H. Morrison, Ph.D., Social Security Administration, Office of Disability, 2223 Annex Building, 6401 Security Boulevard, Baltimore, Maryland 21235, Phone (301) 965–0091.

Background Information

The Social Security Disability Amendments of 1980, Pub. L. 96–265, section 505(a), as amended by Pub. L. 99–272, section 12101, directs the Secretary of Health and Human Services to develop and carry out experiments and demonstration projects designed to: (1) Encourage disabled beneficiaries to return to work, and (2) accrue trust fund savings or otherwise promote the objectives or facilitate the administration of Title II of the Social Security Act. Section 505 of Pub. L. 96–265, as amended by Pub. L. 99–272, section 12101, also authorizes the Secretary to waive certain provisions of the Social Security Act as is necessary to conduct these experiments and demonstration projects. This includes waive of section 222(a) of the Act which requires SSA to refer disability beneficiaries to State vocational rehabilitation (VR) agencies unless the State is unwilling or does not have an approved VR plan.

Overall Objectives

SSA wished to assist SSDI beneficiaries in returning to competitive employment. SSA hopes to achieve significantly improved integration and use of VR and other employment program resources providing for more employment opportunities, better mechanisms for identifying and referring candidates for rehabilitation and other employment sevices, more effective incentives for rehabilitation and employment, increased access to employment service system and networks, and more effective and efficient employment intervention for beneficiaries.

Description of the Demonstration Projects

(1) *Ability Information Systems, (AIS) Inc.;* Spokane, Washington; "Rapid Referral Program (RRP) for Individuals Over 50 in the Olympia, Washington, Disability Determination Services (DDS);" Projected duration: 14 months.

The Washington DDS will work with AIS to identify approximately 1000 SSDI applicants over age 50 who have transferable work skills. AIS will then use a computerized job matching system to match applicant skills to jobs that exist in the labor market in significant numbers. Participants will be provided with information about labor market conditions affecting employment, possible employment opportunities, potential employers, vocational training and rehabilitation resources, and adaptive devices. AIS will follow up with participants to find out if they have returned to work, and will use this and other data collected to determine the effectiveness of their RRP.

(2) *Aging in America, (AIA), Inc.;* Bronx, New York; "Placement Outcomes of Aging in America's Employment Program for Older Disabled Adults: A Comparison of Recent and Long-Term SSDI and Non-SSDI Beneficiaries;" Projected duration: 24 months.

AIA will employ aggressive marketing and outreach efforts to identify and recruit 100 SSDI beneficiaries over the age of 45. After an employment assessment interview, all participants will be provided training in job-seeking skills and placement services, utilizing AIA's established network of 400 businesses in the New York area. Client profiles will be developed featuring the sociodemographic, economic, and health characeristics of SSDI beneficiaries who do return to work, and the rate at which they return to work will be compared to that of a sample of 100 "non-beneficiaries" who have received idential services.

Analyses of client characteristics, placement rates, and employment success will be featured in a monograph guide to rehabilitation and re-employment programs targeting older SSDI beneficiaries. Of the beneficiaries served, it is expected that 50 will be placed in employment and that 40 of these will be employed for at least 12 months.

(3) *Baltimore County Economic Development and Rehabilitation Alliance, Inc.; Baltimore, Maryland; "Comprehensive Job Placement Model through Rehabilitation Engineering;" Projected duration: 24 months.*

Using selection criteria that will be established with the assitance of a private-sector rehabiliation consultant, the Maryland Disability Determination Service (DDS) will refer 50 SSDI beneficiaries to the grantee. Project clients will be provided with a variety of VR services, including evaluation, job development and analysis, computerized job matching, counseling, training, and placement. Job sites will be modified with customized low-cost adaptions, all of which will have immediate and practical utility in the workplace. In-home employment opportuntiies will be created for some SSDI beneficiaries having impairments that would ordinarily prevent placement in competitive employment. Seventy-five percent of all clients served will be placed in jobs that will provide gainful employment for at least 6 months.

(4) *Comprehensive Rehabilitation Services (CRS);* Sierra Madre, California; "Cast Management and Placement Project (CMPP);" Projected duration: 24 months.

The Oregon, Minnesota, and Pennsylvania DDSs will each refer 100 SSDI beneficiaries to CRS each month for telemarketing of SSA work incentives which is expected to increase the percentage of referred beneficiaries who accept VR services. CRS will encourage SSDI beneficiaries to apply for and utilize a broad spectrum of VR services, including State VR, private nonprofit VR, independent living services, and any additional services that might expedite a particular beneficiary's return to work. CRS will also use an expert system to idenfity transferable skills, in order to expedite case acceptance and management. Early referrals for job placement and the presence of full-time job developing is expected to promote early return to gainful employment for about 100 clients during the 2 years that CMPP is in operation. Major products will include a replication kit including program procedures and as staff training manual, a protocol for telemarketing work incentives, and a complete project evaluation including tables and graphs summarizing project outcomes, and journal article(s).

(5) *Goodwill Industries of Southeastern Wisconsin, Inc.;* Milwaukee, Wisconsin; "Vocational Options Project (VOP);" Projected duration: 12 months.

BEST COPY AVAILABLE

OL 53 ISS 55 MR 22 988 MI

The Wisconsin DDS will refer SSDI beneficiaries to the VOP and at least 100 of these beneficiaries will participate in a 5-day seminar which incorporates vocational testing, self-appraisal exploration, and training in decisionmaking. Goodwill Industries of Southeastern Wisconsin will determine the ability of their VOP to increase as SSDI beneficiary's ability to make appropriate vocational decisions by analyzing the results of tests administered to participants before and after the seminar.

(6) *International Rehabilitation Associates (IRA);* Wayne, Pennsylvania; "Private Insurance Rehabilitation Techniques and the Development of a Predictive Model;" Projected duration: 24 months.

The Florida and Colorado DDSs will refer new SSDI beneficiaries to IRA which will select 100 candidates for intensive VR services, including job skills assessment, training in job seeking skills, couseling, and assistance in job placement. IRA will compare the placement rate and the work activity/history of its test group to the placement rate and the work activity/history of a control group. A 30 percent placement rate is projected for the experimental group. Using descriptive data obtained during this study, IRA will also develop a model predictive of SSDI beneficiaries' probability of returning to work. The early intervention and screening of referrals employed in this project are expected to result in cost-effective rahabilitiation. This project will also enhance SSDI beneficiaries' access to private-sector VR services.

(7) *Jewish Employment and Vocational Service (JEVS);* Philadelphia, Pennsylvania; "Early Vocational Rehabilitation Assessment Prototype (EVRAP);" Projected duration: 20 months.

JEVS will modify its existing Early Vocational Rehabilitation Assessment system to include data on physical and mental capacities and environmental tolerances. JEVS also will add new job titles to its database, so that EVRAP results can be compared to the requirements of those occupations listed in the Department of Labor's *Dictionary of Occupational Titles*, to determine which occupations an individual client might be capable of performing. Clients will then be counseled and encouraged to consider occupations they may not have worked in previously. JEVS will provide a working prototype capable of providing detailed reports quickly enough so that it can, if SAA desires, be incorporated into the disability determination process.

(8) *Karr Rehabilitation Services, Inc.;* Minneapolis, Minnesota; "Alternative VR Resources;" Projected duration: 24 months.

The Minesota DDS will refer to Karr 100 recently entitled SSDI beneficiaries who have been scheduled for medical reexaminations. These beneficiaries will then be evaluated by a rehabilitation specialist and considered for vocational assessment and job placement. Karr expects to place 40 project participants with former employers. Throughout this project, Karr will pursue the development, testing, and refinement of screening criteria to more accurately determine the rehabilitation potential of SSDI beneficiaries and the coordination of medical case management with VR services. Karr will also establish a supplemental funding base through co-payment arrangements with other disability insurance carriers involved with participants in its project.

(9) *Menninger Foundation;* Topeka, Kansas; "Expanding Disabled Worker SSDI Applicant Access to Return-to-Work Services through Independent Case Manager;" Projected duration: 24 months.

Using the Menninger Return-to-Work Scale, SSA field offices and the Menninger Foundation will work together to identify SSDI beneficiaries who have good potential for returning to work and who would be likely to benefit from rehabilitation services. Participants will be assigned randomly for pre- and post-adjudicative referral to case managers, who will provide referrals for various rehabilitation services. The Menninger Foundation will determine any difference in the return-to-work rate of persons who are counseled regarding the availability of VR services and the possibility of returning to work before they are awarded disability benefits and persons who are counseled after they are awarded benefits.

(10) *Set Industries;* Hardwick, Vermont, "Transitional Employment through the Use of a Voucher for SSA Beneficiaries;" Projected duration: 24 months.

Set Industries will develop a voucher system which will permit self-referral of SSDI beneficiaries for a variety of VR services. This system will give beneficiaries greater control over the allocation of the rehabilitation resources that are available to them. Set will provide services to 30 SSDI beneficiaries over the course of the project, and expects to place approximately 65 percent (19) of them in employment. Set will also provide, through public relations and training seminars for employers and line supervisors, the skills and training technologies needed to manage the training of SSDI beneficiaries and maintain them in employment. Support and training team models will be offered to deal with individual problems in returning to work, and should increase the average length of employment of those SSDI beneficiaries who are placed in jobs.

(11) *S.L. Start and Associates, Inc.;* Spokane, Washington; "Rapid Intervention and Employment Project;" Projected duration: 12 months.

The Washington DDS will work with Start to select SSDI beneficiaries for comprehensive vocational assessment. Start will use a computerized labor market survey to identify prospective employers for project participants. All participants will attend a 3 or 4-day job-search workshop and counseling seminar to help them find employment in suitable occupations, as identified through skills analysis and job-search techniques. A job club will be organized for all participants and used to locate and maintain employment.

(12) *Tampa General Rehabilitation Center;* Tampa, Florida; "Job Re-Entry for Traumatically Brain Injured;" Projected duration: 24 months.

The Florida DDS will refer to the grantee SSDI beneficiaries who have sustained brain injuries. The grantee will provide individual assistance through the development of rehabilitation plans and a supported employment system. The usual transitional gaps between disciplines and program components will be reduced by vocational specialists who will work with each individual as he/she moves through the program. Clients will *not* be "passed around" among professionals. This project will integrate medical and vocational information in an evaluation system addressing the cognitive, social/psychological, personality, family support, and functional skills required for job re-entry. Thirty SSDI beneficiaries will be returned to gainful employment over the life of the program.

(13) *University of Cincinnati, Department of Physical Medicine and Rehabilitation;* Cincinnati, Ohio; "Disability Management of Social Security Beneficiaries: A Physical Medicine and Vocational Rehabilitation Work Return Demonstration Project;" Projected duration: 24 months.

This project will demonstrate a medical-allied health-VR team approach in the evaluation, case management, and job-placement of SSDI beneficiaries. Two hundred SSDI beneficiaries will be recruited from lists provided by SSA and will then receive physical

capacities, work capacities, vocational, and psychosocial evaluations followed by individual and group counseling on an as-needed basis. Individualized placement plans will be developed for all participants, and a pilot recruitment effort and job placement plans will be developed with the University of Cincinnati. Referrals will be made also to public and private employment services. The primary criterion for judging the project's success will be effective and sustained job placement.

(14) *Valpar International Corporation;* Tucson, Arizona; "An Early Intervention Assessment Model for the Vocational Rehabilitation of SSDI Beneficiaries;" Projected duration: 17 months.

The Arizona DDS will work with Valpar to select SSDI beneficiaries for vocational assessment. Valpar will conduct comprehensive vocational testing and computerized job searches for all participants in the project, and will cooperate with the State VR agency in constructing rehabilitation plans and providing additional services that might be needed to help SSDI beneficiaries find employment in the occupations to which they have been matched. The data obtained in this study will also be used to identify appropriate vocational assessment procedures for various applicant profiles.

(15) *Vision Center of Central Ohio;* Columbus, Ohio; "Vocational Assessment for Early Rehabilitation Intervention Among SSI/SSDI Applicants;" Projected duration: 24 months.

Three different assessment models (ranging from a simple screening model to an in-depth, comprehensive evaluation) will be developed and tested during the first year. The model which is found to be most predictive of rehabilitation potential will then be applied to the participants and refined based on analyses of data generated from followup and validation periods. Participants will be assigned randomly to one of the three methods of assessment, and each participant will be followed up to assess vocational development. The skills, abilities, and motivation of the participants will be analyzed to identify those variables which are most predictive of future vocational success.

Statutory and Regulatory Provision To Be Waived

Section 222(a) of the Social Security Act is being waived for the purpose of conducting these demonstration projects. This section requires that SSA refer disabled persons to State VR agencies. This waiver authorizes SSA to refer SSDI beneficiaries to the funded organizations.

Authority: Sec. 505(a) of the Social Security Disability Amendments of 1980, Pub. L. 96-265, as amended by Pub. L. 99-272, section 12101.

(Catalogue of Federal Domestic Assistance Programs No. 13.812-Assistance Payment-Research)

Dated: January 25, 1988

Dorcas R. Hardy,

Commissioner of Social Security.

BILLING CODE 4190-11-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA-060-08-4212-11; CA 20237]

California: Realty of Action, Classification of Public Lands for Recreation and Public Purposes in San Bernardino County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, Lease of Public Lands for Recreation and Public Purposes, CA 20237.

SUMMARY: The following described public land has been examined and found suitable for recreation and public purposes. The land is hereby classified as suitable for recreation and public purposes under the Recreation and Public Purposes Act (R&PP) of June 14, 1926, as amended (44 Stat. 741; 43 U.S.C. 869 et. seq.) and the regulations thereunder (43 CFR 2912):

Mount Diablo Meridian, California

T. 30 S., R. 41 E.,
Section 6: Lot 87;
Containing .415 acres ±

SUPPLEMENTARY INFORMATION: The County of San Bernardino has filed an application to lease the above described public land under authority of the Act of June 14, 1926, as amended. The proposed public use is for the construction of a community fire station, which will enhance the existing fire protection services for the community of Red Mountain.

The effective date of this classification is sixty (60) days from the date of publication of this notice in the **Federal Register**. The classification is consistent with the regulations set forth in 43 CFR Parts 2410 and 2430. The land is located adjacent to Highway 395 in the town of Red Mountain, California and is physically suitable for the proposed use.

The lease, when issued, will be subject to the provisions of the R&PP Act, applicable regulations of the Secretary of the Interior and will contain the following reservations to the United States:

1. All mineral deposits in the land so leased, and to it, or persons authorized by it, the right to prospect for, mine and remove such deposits from the same under applicable law and regulations as the Secretary of the Interior may proscribe.

2. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, (26 Stat. 391; 43 U.S.C. 945).

3. A right-of-way for a buried natural gas pipeline granted to Pacific Gas and Electric Company pursuant to Sec. 28 of the Act of February 25, 1920, as amended (30 U.S.C. 185); BLM Serial No. LA-0139393.

4. A right-of-way for a water pipeline granted to Randsburg Water Company pursuant to the Act of February 15, 1901 (43 U.S.C. 959); BLM Serial No. LA-0164135.

Third Party Reservations:

The following public lands are currently encumbered by mining claims:

1. Claim No. CAMC 48442; located by Mines Exploration, Inc. on September 15, 1975 in T. 30 S., R. 41 E., MDM, Section 6: NE¼, San Bernardino County, California.

2. Claim No. CAMC 151475; located by A-Able Plumbing Et. al., on March 25, 1984 in T. 30 S., R. 41 E., MDM, Section 6: NE¼, San Bernardino County, California.

BLM policy requires that public lands encumbered by mining claims upon which a validity determination has not been made may not be leased under the provisions of the R&PP Act. The BLM will not spend any of its funds to undertake a validity determinations for the sole purpose of conveying property under the provisions of the R&PP Act. If the County of San Bernardino wishes to expend funds to undertake validity contests of the above mining claims, they may make a request for such action of the Authorized Officer (BLM) and such contest may proceed if the BLM deems it appropriate after considering all of the issues. The County of San Bernardino will be responsible for the full expense of any contest proceedings.

Until such time as the County of San Bernardino requests validity determinations and contests, the public land encumbered by the above described mining claims will be omitted from any future R&PP lease offering to the County of San Bernardino.

The land is not required for any federal purposes. The lease is consistent with the objectives and recommendations of the California Desert Plan.

Publication of this notice in the **Federal Register** shall segregate the subject public land from appropriation under any other public land laws, including locations under the mining laws. If after 18 months following the publication of this notice in the **Federal Register**, a lease has not been issued for the purpose for which the lands have been classified, the segregative effect of the classification shall automatically expire and the public lands classified in this notice shall return to their former status without further action by the authorized officer.

Detailed information concerning this action is available for review at the California Desert District Office, Bureau of Land Management. For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, California Desert District, 1695 Spruce Street, Riverside, California 92507. Objections will be reviewed by the State Director, Bureau of Land Management, who may sustain, vacate or modify this realty action. In the absence of any objection, this realty action will become the final determination of the Department of the Interior.

Dated: March 15, 1988.

Dennis B. McLane,

Acting, District Manager.

BILLING CODE 4310-40-M

Moab District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Moab, Interior.

ACTION: Moab District Advisory Council Meeting.

SUMMARY: The Moab District Advisory Council will meet Tuesday, April 19, beginning at 6 p.m. in the Tamarisk Inn in Green River. Following a no-host dinner, there will be a briefing on the field trip that will take place the next day. A field trip of the San Rafael Resource Area will take place on Wednesday, April 20. The tour will leave the Tamarisk Inn in Green River at 8 a.m. and arrive in Price, Utah at approximately 5 p.m. The purpose of the field trip is to review part of the area being discussed in the draft San Rafael Resource Management Plan and Draft Environmental Impact Statement (RMP/EIS). Anyone may attend the meeting and field trip, but must provide their own transportation and lunch. On Thursday, April 21, an office meeting will be held at Emery County Courthouse, second floor, room 211. The agenda is as follows:

1. Election of Chairperson and Vice Chairperson for 1988.
2. San Rafael Resource Area Draft Resource Management Plan
3. Selected program updates
4. New Business
5. Opportunity for public comment
6. Finalization of resolutions
7. Adjourn

All Advisory Council meetings are open to the public. Persons wishing to make a comment to the Council must notify the BLM by April 18. Depending on the number of people desiring to make a statement, a per-person time limit may be established. For further information, contact: Mary Plumb, Public Affairs Officer, P.O. Box 970, Moab, Utah 84532. Phone (801) 259-6111.

Brent Northrup,

Acting District Manager.

BILLING CODE 4310-70-M

Recreation Entrance Fees

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given of intent to raise entrance fees at two park areas and add vehicle fees at two other park areas of the 127 units of the National Park System currently charging fees. Entrance fees will also be established at an additional 14 parks. A total of 141 of the existing 341 park areas are proposed for the 1988 entrance fee program. Current per person fee rates are $2 and $1 and will increase to $4 per person only in Yellowstone National Park and Grand Teton National Park. Current vehicle fee rates are $3 and $5 and will increase to $10 per vehicle only in Yellowstone National Park and Grand Teton National Park. The single-visit entry permit is reciprocal for these two parks. Single-visit vehicle fees of $3 and $5 will be in effect at Harpers Ferry National Historical Park and Fort Pulaski National Monument, respectively. With the exception of the four identified parks, 1987 entrance fee rates will remain unchanged in 1988 for the other 123 parks. The entrance fee parks are listed below.

List Parks

The cost of a Golden Eagle Pass remains at $25. This annual pass, valid on a calendar-year basis, will admit the permittee (and any accompanying persons in a single, private, noncommercial vehicle, or alternatively, the permittee, accompanying spouse, children, and parents where entry is by any means other than private, noncommercial vehicle to any designated entrance fee park within the National Park System. The pass does not cover recreation use fees, such as camping, or fees for special recreation permits.

The Annual Park-Specific Pass will again be available at each designated entrance fee park for $10 or $15. This pass conveys the same privileges as the Golden Eagle Pass, but only for the specific park for which the Annual Park-Specific Pass is purchased.

The Golden Age Passport (for persons 62 years of age and older) and the Golden Access Passport (for persons blind or permanently disabled) provide for free entrance and a 50 percent discount for user fees (camping, parking, cave tours, etc.) charged by the National Park Service.

There are no entrance fees for children 16 years of age and under or for organized school groups or outings conducted for educational purposes by schools or other bona fide educational institutions.

August 25 is designated annually as a fee-free day when entrance fees will not be charged. This date celebrates the establishment of the National Park Service in 1916. For those parks whose high visitation season does not encompass this date, the respective park Superintendent shall designate a fee-free day during the high visitation season in lieu of August 25.

DATES: The entrance fee rates are effective April 23, 1988.

ADDRESSES: A listing of entrance fee parks may be obtained from: National Park Service, Branch of Resource and Visitor Protection (650), Main Interior Building, P.O. Box 37127, Washington, DC, 20013-7127.

FOR FURTHER INFORMATION CONTACT: Weston P. Kreis, Recreation Fee Coordinator, at the address given above, telephone (202) 343-2205 or FTS 343-2205.

SUPPLEMENTARY INFORMATION: Public Law 100-203, approved December 22, 1987, which amended the Land and Water Conservation Fund Act of 1965 provided the National Park Service authority to charge entrance fees at units of the National Park System until the year 2015. This law supplants the temporary authority granted by Pub. L. 99-591 that expired September 30, 1987, and a series of Continuing Resolutions between that date and enactment of Pub. L. 100-203.

William Penn Mott, Jr.,

Director, National Park Service.

Date: March 17, 1988.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Public Information Collection Requirements Submitted to OMB for Review

The Agency for International Development (A.I.D.) submitted the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Comments regarding these information collections should be addressed to the OMB reviewer listed at the end of the entry no later than ten days after publication. Comments may also be addressed to, and copies of the submissions obtained from the Reports Management Officer, John H. Elgin, (703) 875-1608, IRM/PE, Room 1100B, SA-14, Washington, DC 20523.

Date Submitted: March 11, 1988.

Submitting Agency: Agency for International Development.

OMB Number: 0412-0514.

Type of Submission: Renewal.

Title: Rules and Procedures Applicable to Commodity Transactions.

Purpose: A.I.D. finances transactions under Commodity Import Programs and needs to assure that the transaction complies with applicable statutory and regulatory requirements. In order to assure compliance and request refund when appropriate, information is required from host country importers, suppliers receiving A.I.D. funds, and banks making payments for A.I.D.

Reviewer: Francine Picoult (202) 395-7340, Office of Management and Budget, Room 3201, New Executive Office Building, Washington, D.C. 20503.

Date. March 11, 1988.

John H. Elgin,

Planning and Evaluation Division.

BILLING CODE 6116-01-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31243]

Declaratory Order—Control—Rio Grande Industries, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of procedural schedule.

SUMMARY: The Commission sets a procedural schedule for replies and rebuttal to the Petition for Declaratory Order filed by Morgan Stanley.

DATES: Replies are due on April 11, 1988. Rebuttal is due by April 21, 1988.

ADDRESSES: Send pleadings referring to Finance Docket No. 31243 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423
(2) Send five additional copies to: Office of Proceedings, Room 2118, Interstate Commerce Commission, Washington, DC 20423
(3) Petitioner's representative: Dennis G. Lyons, Arnold & Porter, 1200 New Hampshire Avenue, NW., Washington, DC 20036

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202) 275-7245. [TDD for hearing impaired: (202) 275-1721]

SUPPLEMENTARY INFORMATION: By petition filed February 26, 1988, the Morgan Stanley Group, Inc., and its affiliates (Morgan Stanley) seek a declaratory order, under 49 CFR 1117.1 and 5 U.S.C. 554(e). They request a declaration that none of them will be in control, under the Interstate Commerce Act (the Act), of Rio Grande Industries or its subsidiaries (Rio Grande) after consummation of the transaction proposed in Finance Docket No. 32000.

By agreement, Morgan Stanley will provide a significant portion of the financing for the acquisition by Rio Grande of the Southern Pacific Transportation Company (SPT). Because some elements of the agreement may give rise to the question of whether Morgan Stanley will have control under the Act, Morgan Stanley seeks assurance that its interest does not constitute control.

We believe the record will benefit by public participation. Consequently, we will establish the schedule below, for replies and rebuttal, on the question of control. Replies must be served on counsel for Morgan Stanley: Dennis G. Lyons, Arnold & Porter, 1200 New Hampshire Ave., NW., Washington, DC 20036. Copies of the petition are available from the same source.

This decision will not significantly affect the quality of the human environment or energy conservation.

It is ordered:

1. Replies to Morgan Stanley's Petition for Declaratory Order must be filed by April 11, 1988.

2. Rebuttal must be filed by April 21, 1988.

3. This decision is effective on the date of service.

Decided: March 14, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Sterrett, Simmons, and Lamboley. Commissioner Sterrett did not participate in the disposition of this proceeding.

Noreta R. McGee,

Secretary.

DEPARTMENT OF JUSTICE

Antitrust Division

Voluntary Agreement and Plan of Action To Implement The International Energy Program; Amendment

The Assistant Attorney General of the Antitrust Division has amended the Voluntary Agreement and Plan of Action to Implement the International Energy Program to incorporate the approved "Second Plan of Action to Implement the International Energy Program" and to make conforming technical changes to the Voluntary Agreement. The Agreement was amended pursuant to powers granted to the Attorney General by section 252 of the Energy Policy and Conservation Act, 42 U.S.C. 6272, and delegated to the Assistant Attorney General by regulation, 28 CFR 0.41(i). The test of the amendments and notice of our intention to adopt them were published on February 2, 1988 (53 FR 2866). The amendments were effective February 22, 1988. The Voluntary Agreement, prior to amendment, is published at 2 CCH Federal Energy Guidelines, ¶15,845.

Charles F. Rule,

Assistant Attorney General, Antitrust Division.

BILLING CODE 4410-10-M

DEPARTMENT OF LABOR

The Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463 as amended), notice is hereby given of a meeting of the Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: April 12, 1988, 9:30 a.m., Rm. S4215 A&B Frances Perkins, Department of Labor Building, 200 Constitution Avenue NW., Washington, DC 20210.

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. 552b(c)(1). The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

FOR FURTHER INFORMATION CONTACT: Fernand Lavallee, Executive Secretary, Labor Advisory Committee, Phone: (202) 523-6565.

Signed at Washington, DC this 11th day of March 1988.

Eugene K. Lawson,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510-28-M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; CSX Transportation et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has

instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than April 1, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than April 1, 1988.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW, Washington, DC 20213.

Signed at Washington, DC, this 14th day of March 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance

[TA-W-20,213]

National Aluminum Corp., Murrysville, PA; Dismissal of Application for Reconsideration

Pursuant to 29 CRF 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at National Aluminum Corporation, Murrysville, Pennsylvania. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-20,213; National Aluminum Corporated Murrysville, Pennsylvania (March 7, 1988.)

Signed at Washington, DC this 15th Day of March 1988.

Marvin M. Fooks,

Acting Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

Extension of Advisory Committee Charter

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of extension of Advisory Committee Charter.

SUMMARY: After consultation with the General Services Administration, the Department of Labor has extended the Charter for the Mine Safety and Health Administration's Advisory Committee on Standards and Regulations for Diesel-Powered Equipment in Underground Coal Mines for the period April 27, 1988 through July 17, 1988.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Room 631, Arlington, Virginia 22203; phone (703) 235-1910.

SUPPLEMENTARY INFORMATION: Notice is given that, after consultation with the General Services Administration, the Department of Labor has extended the Charter of the Advisory Committee on Standards and Regulations for Diesel-Powered Equipment in Underground Coal Mines for the period April 27, 1988, through July 17, 1988. The Charter was to expire on April 27, 1988. This action is necessary and in the public interest.

The Committee will provide recommendations on proposed standards for diesel-powered equipment in underground coal mines. The Committee consists of nine members and includes two representatives from labor, and two representatives of the coal mining industry. The Committee's statutorily mandated majority is composed of five individuals who have no economic interests in the coal or other mining industry and who are not operators, miners or officers or employees of the federal government or any state or local government. The Committee's Charter will be filed with the General Services Administration and the appropriate Congressional Committees.

Signed at Washington, DC, this 17th day of March, 1988.

Ann McLaughlin,

Secretary of Labor.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment on The Arts; Music Advisory Panel, Jazz Fellowship Prescreening; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Jazz Fellowship Prescreening) to the National Council on the Arts, will be held on April 4–6, 1988 from 9:00 a.m.–5:30 p.m. in Room 714 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Yvonne M. Sabine,

Acting Director, Council and Panel Operations, National Endowment for the Arts.

March 14, 1988.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the full Committee, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published February 24, 1988 (53 FR 5482). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the April 1988 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone: 202/634–3265, ATTN: Barbara Jo White) between 7:30 a.m. and 4:15 p.m., Eastern Time.

ACRS Subcommittee Meetings

Occupational and Environmental Protection Systems, March 22 and 23, 1988, Washington, DC—POSTPONED.

Instrumentation and Control Systems, March 24, 1988, Washington, DC. The Subcommittee will review the NRC Staff's analysis and study to limit the scope of USI A–47, "Safety Implications of Control Systems."

Human Factors, March 28, 1988, Washington, DC. The Subcommittee will review: (1) The Human Factors Research Program Plan, (2) the Fitness for Duty Rule, and (3) Policy Statement on Training and Qualification.

Structural Engineering, March 30, 1988, Culver City, CA. The Subcommittee will review the Piping and Fitting Reliability Program.

Babcock and Wilcox Reactor Plants, March 30 and 31, 1988, Washington, DC—POSTPONED to May 3–4, 1988.

Advanced Pressurized Water Reactors, April 5, 1988, Washington, DC. The Subcommittee will discuss and hear presentations from Westinghouse representatives and the NRC Staff regarding the PRA for *W*APWR (RESAR SP/90) design.

Babcock and Wilcox Reactor Plants (Rancho Seco), April 6, 1988, Washington, DC. The Subcommittee will discuss issues relating to the restart of Rancho Seco following its December 1985 shutdown.

Thermal Hydraulic Phenomena, April 19, 1988, Washington, DC. The Subcommittee will review the draft Models and Correlations Document for the RELAP/5 thermal hydraulic code.

Thermal Hydraulic Phenomena, April 20, 1988, Washington, DC. The Subcommittee will discuss a proposed report on thermal hydraulic research for consideration by the ACRS.

Reliability Assurance, April 21, 1988, Washington, DC. The Subcommittee will be briefed on the final outcome of the Equipment Qualification-Risk Scoping Study. The Subcommittee will review also the final version of Regulatory Guide 1.100, "Seismic Qualification of Electrical and Mechanical Equipment."

Thermal Hydraulic Phenomena, April 21, 1988 (a.m. only), Washington, DC. The Subcommittee will review the final version of the proposed ECCS Rule.

Babcock & Wilcox Reactor Plants, May 3 and 4, 1988, Washington, DC. The Subcommittee will continue its review of the long-term safety review of B&W reactors.

Thermal Hydraulic Phenomena, May 18, 1988, Washington, DC. The Subcommittee will review the *W* revised ECCS Model for 2-loop Upper Plenum Injection (UPI) plants.

Regional Programs, May 24, 1988, Atlanta, GA. The Subcommittee will review the activities under the control of the NRC Region II Office.

Improved LWRs, May 25, 1988, Washington, DC. The Subcommittee will discuss Chapters 3, 4, and 5 of the EPRI ALWR Requirements document.

Metal Components, May 26, 1988, Washington, DC. The Subcommittee will discuss the quality of fasteners in nuclear power plants, and BWR reactor pressure vessel in-service inspections.

Advanced Boiling Water Reactors, June 1, 1988, Washington, DC. The Subcommittee will begin its review of the GE ABWR. This meeting will concentrate on the first review module consisting of SAR Chapters 4, 5, 6, and 15–1.

Waste Management, June 7–8, 1988, Washington, DC. The Subcommittee will review pertinent nuclear waste management topics to be determined conjointly with the NRC Staff during an agenda planning session on April 15, 1988.

Thermal Hydraulic Phenomena, June 21, 1988 (tentative), Location to be determined. The Subcommittee will review the status of ithe MIST Phase III and IV Programs and the proposed OTSG Follow–on Program.

Advanced Pressurized Water Reactors, Date to be determined (April/May), Washington, DC. The Subcommittee will review the licensing review bases document being developed for Combustion Engineering's Standard Safety Analysis Report-Design Certification (CESSAR-DC).

Safety Philosophy, Technology and Criteria, Date to be determined (April/May), Washington, DC. The Subcommittee will review the status of NUREG–1251 (Implications of Chernobyl) and the NRC Staff's program (at BNL) to address the implications of Chernobyl in regard to severe reactivity transients. The Subcommittee may review also the Staff's final version of a proposed generic letter on USI A–17, "Systems Interactions."

Generic Items, Date to be determined (April/May), Washington, DC. The Subcommittee will discuss: (1) ISAP-II Program and associated Policy Statement, and (2) Integration of Related Generic Issues.

Decay Heat Removal Systems, Date to be determined (mid-May), Washington, DC. The Subcommittee will continue its review of the NRC Staff's resolution position of USI A–45.

Advanced Pressurized Water Reactors, Date to be determined (May), Washington, DC. The Subcommittee will discuss the comparison of *W*APWR (RESAR SP/90) design with other modern plants (in U.S. and abroad).

Advanced Pressurized Water Reactors, Date to be determined (May/June), Washington, DC. The Subcommittee will review the draft SER in regard to the reactor, reactor coolant system, and regulatory conformance for the *W*APWR RESAR SP/90 design.

Containment Requirements, Date to be determined (May/June), Washington, DC. The Subcommittee will review the NRC Staff's document on interim recommendations for containment performance and improvements (BWR Mark I only).

Occupational and Environmental Protection Systems, Date to be determined (May/June), Washington, DC. The Subcommittee will review: (1) The "hot particle" problem, (2) monitoring the quality and quantity of airborne radionuclides in/out of containment following an accident, (3) the emergency planning rule, (4) the control room habitability report by ANL, and (5) other related matters.

Severe Accidents, Date to be determined (May/June), Washington, DC. The Subcommittee may review the hydrogen control measures for BWRs and Ice Condenser PWRs (USI A–48) (tentative). The Subcommittee will review also the final version of the NRC Staff's proposed generic letter on Individual Plant Examinations (IPEs).

Decay Heat Removal Systems, Date to be determined (June/July), Washington, DC. The Subcommittee will review the proposed resolutions of Generic Issue 23, "RCP Seal Failures," and Generic Issue 99, "Loss of RHR Capability in PWRs."

Decay Heat Removal Systems, Date to be determined, Washington DC. The Subcommittee will explore the issue of the use of feed and bleed for decay heat removal in PWRs.

Systematic Assessment of Experience, Date and location to be determined, Washington, DC. The Subcommittee will review the Diagnostic Evaluation Program and other related staff plant review efforts.

Thermal Hydraulic phenomena, Date to be determined, Washington, DC. The Subcommittee will discuss the status of Industry best-estimate ECCS Model submittals for use with the revised ECCS Rule.

Auxiliary Systems, Date to be determined, Washington, DC. The Subcommittee will discuss the: (1) Criteria being used by utilities to design Chilled Water Systems, (2) regulatory requirements for Chilled Water Systems design, and (3) criteria being used by the NRC Staff to review the Chilled Water Systems design.

ACRS Full Committee Meeting

April 7–9, 1988—Items are tentatively scheduled.

*A. *Beaver Valley Nuclear Power Station (Open)*—Briefing and discussion regarding proposed restart of the Beaver Valley nuclear station.

*B. *Nuclear Power Plant Safety (Open)*—Briefing regarding proposed IAEA General Principles for reactor safety.

*C. *Generic Issues (Open)*—Discuss proposed ACRS comments/recommendations regarding the effectiveness of the NRC Staff process that deals with generic issues and unresolved safety issues.

*D. *Fitness for Duty (Open)*—Briefing regarding proposed NRC's Fitness for duty Rule.

*E. *ACRS Policies and Procedures (Open)*—Discuss ACRS practices regarding activities of ACRS members.

*F. *Important Safety-Related Issues (Open)*—Discuss proposed hierarchical structure for important safety-related issues.

*G. *Advanced Reactors (Open)*—Review proposed key design features for advanced gas-cooled and liquid-metal-cooled nuclear power plants.

*H. *Meeting with NRC Commissioners (Open) (tentative)*—Meeting to discuss the basis for a proposed NRC rule for maintenance of nuclear power plants.

*I. *Training and Qualification of Reactor Operators (Open)*—Review of proposed NRC policy statement regarding training and qualification of nuclear power plant operators.

*J. *Meeting with Director, NRC Office of Reactor Regulation (Open) (tentative)*—Discuss matters of mutual interest.

*K. *Human Factors (Open)*—Review and comment regarding proposed NRC research program.

*L. *Future ACRS Activities (Open)*—Discuss anticipated subcommittee activities and items proposed for consideration by the full Committee.

*M. *ACRS Subcommittee Activities (Open)*—Reports and discussion regarding designated ACRS subcommittee activities including safety implications of control systems, nuclear radwaste management and disposal, and committee activities related to radwaste management and disposal.

N. *Appointment of New Members (Closed)*—Discuss qualification of persons proposed for appointment to the Committee and the internal allocation of resources.

May 5–7, 1988—Agenda to be announced.

June 2–4, 1988—Agenda to be announced.

Date: March 16, 1988.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 50–320]

Meeting of the Advisory Panel for the Decontamination of Three Mile Island, Unit 2 GPU Nuclear Corp.

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel for the Decontamination of Three Mile Island, Unit 2 (TMI–2) will be meeting on April 14, 1988, from 7:00 p.m. to 10:00 p.m. at the City of Lancaster Council Chambers, 100 South Queen Street, Lancaster, PA. The meeting will be open to the public.

At this meeting, the Panel will receive a status report on the progress of defueling from the licensee, General Public Utilities Nuclear Corporation. The licensee will also provide the Panel with current design information describing the accident-generated water evaporator. Members of the Panel will discuss the current offsite radiological monitoring program. Representatives of the NRC will describe the NRC funded research program to obtain and examine test specimens from the bottom of the TMI–2 reactor vessel. Members of the public will be given the opportunity to address the Panel.

Further information on the meeting may be obtained from Dr. Michael T. Masnik, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–1373.

Dated: March 17, 1988.

For the Nuclear Regulatory Commission.

John C. Hoyle,

Advisory Committee, Management Officer.

BILLING CODE 7590-01-M

Cleveland Electric Illuminating Co. et al.; Request To Suspend The Perry Nuclear Power Plant Antitrust License Conditions; Time For Filing Comments Extended

On September 18, 1987, the Ohio Edison Company (Ohio Edison) requested the Director of the Office of Nuclear Reactor Regulation to amend the antitrust license conditions that are attached to the Perry Nuclear Power Plant (Perry) operating license, No. NPF–58. Although the Perry operating license was issued to Cleveland Electric Illuminating Co., Toledo Edison Co., Duquesne Light Co. and Ohio Edison, Ohio Edison's amendment requested suspension of the antitrust license conditions only as they apply to Ohio Edison.

Notification of receipt of this amendment request was published in the **Federal Register** (Vol. 52 p. 48473) on December 22, 1987 and comments were sought from the public within 45 days. By motion dated January 29, 1988, American Municipal Power-Ohio, Inc. (AMP-Ohio) requested an extension of time until March 7, 1988 in which to file its comments on Ohio Edison's amendment request. Staff granted AMP-Ohio's initial request for a time extension on February 4, 1988. By letter to the Director of the Office of Nuclear Reactor Regulation dated February 29, 1988, AMP-Ohio has requested another time extension to file its request that its comments in the captioned proceeding. Counsel for AMP-Ohio indicated in its request that its client and Ohio Edison "* * * were close to a comprehensive, long-term power supply and interconnection agreement which would significantly alter the relationship between Ohio Edison and many of AMP-Ohio's municipal electric members (and thus the nature of AMP-Ohio's comments in this docket)." The agreement in question has yet to be finalized and AMP-Ohio has requested a 30-day extension until April 6, 1988, in which to file its comments.

Given the apparent progress in the AMP-Ohio/Ohio Edison negotiations to date and the prospects for resolution of the issues that exist between these two parties if the comment period is extended, staff hereby grants AMP-Ohio's request (which is unopposed by Ohio Edison) and extends the time for comments from the public on Ohio Edison's amendment until April 6, 1988. Staff hopes this time extension will contribute to a timely resolution of the issues that remain outstanding between AMP-Ohio and Ohio Edison.

Any person who wishes to express views pursuant to the antitrust issues raised in this amendment request, should submit said views by April 6, 1988 to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Chief, Policy Development and Technical Support Branch, Office of Nuclear Reactor Regulation.

For the Nuclear Regulatory Commission.

Cecil O. Thomas,

Chief, Policy Development and Technical Support Branch Program Management, Policy Development and Analysis Staff, Office of Nuclear Reactor Regulation.

[FR Doc. 88–6201 Filed 3–21–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–302]

Florida Power Corp. et al.; Consideration of Issuance of Amendment To Facility Operating License and Opportunity For Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–72, issued to Florida Power Corporation, et al. (the licensee), for operation of the Crystal River Unit 3 Nuclear Generating Plant located in Citrus County, Florida.

The amendment would revise Technical Specification (TS) 3.8.1.1 to provide more appropriate actions to be taken when one of the batteries or battery chargers supplying DC control power to the 230 KV switchyard breakers is inoperable. It would also increase the allowable outage time to allow surveillance testing of the batteries within the Action Statement time interval while Units 1 and 2 (where the battery is located) are shutdown, rather than operating as is presently done. Thus, the DC systems will not have to be removed from service while those units are operating.

The revision to TS 4.8.1.2 would clarify the surveillance and equipment required to be operable in Modes 5 and 6, and would not result in changes from the current surveillance requirements.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 21, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union ast (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Herbert N. Berkow: (petitioner's name and telephone number); (date petition was mailed); (plant name); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to R. W. Neiser, Senior Vice President and General Counsel, Florida Power Corporation, P.O. Box 14042, St. Petersburg, Florida 33733.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated January 20, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Crystal River Public Library, 668 N. W. First Avenue, Crystal River, Florida 32629.

Dated at Rockville, Maryland, this 16th day of March, 1988.

For the Nuclear Regulatory Commission.

Herbert N. Berkow,

Director, Project Directorate II–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–6202 Filed 3–21–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50–387 and 50–388]

Pennsylvania Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating Licenses Nos. NPF–14 and NPF–22 issued to Pennsylvania Power and Light Company (the licensee) for operation of the Susquehanna Steam Electric Station Units 1 and 2, located in Luzerne County, Pennsylvania.

The proposed amendment would change Technical Specification Section 4.8.2.1.d.2.b to increase the load profiles for batteries 2D612 and 2D622 and decrease the load profiles for batteries 2D632 and 2D642. These changes are deemed necessary to accommodate the installation of ATWS Alternate Rod Injection solenoid valves, and to recognize increased loads associated with emergency lighting for batteries 2D612 and 2D622 and decreased loads associated with emergency lighting for batteries 2D632 and 2D642. In addition, the licensee requests deletion of page ¾ 8–14 in the Unit 2 Technical Specifications as it represents redundant information presented on page ¾ 8–13a.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By April 21, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Butler: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes an additional notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated January 8, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Dated at Rockville, Maryland, this 15th day of March 1988.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I-2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25462; File No. SR-Amex-88-3]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc.; Repeal of the Special Listing Criteria for Real Estate Investment Trusts

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 22, 1988, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to repeal section 114 of the Company Guide which requires that Real Estate Investment Trusts be evaluated against special listing criteria.

The text of the proposed rule change is available at the Office of the Secretary, American Stock Exchange, Inc. and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the purposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organizations has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

In 1971, the Amex, alone among the major marketplaces, adopted special financial and corporate governance related listing criteria for Real Estate Investment Trusts ("REITs"). REITs were then a relatively new form of business entity, and it was perceived that they posed risks to investors that were not evident in other business entities.

Since these guidelines were adopted, some 17 years ago, the environment has changed significantly. The market today is well acquainted with the REIT format, and industry-wide governance standards have evolved. Moreover, these are now a variety of publicly available real estate investment vehicles, the listing eligiblity of which would be determined by application of the Exchange's basis listing criteria. Given these changes, and since the same fundamental analysis is required for evaluating a real estate entity—whether or not organized as a REIT—there appears little, if any, justification for continuing to require special criteria for REITs.

(2) Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that the Exchange's basis listing criteria are adequate to protect investors and the public interest.

B. Self-Regulatory—Organization's Statement on Burden on Competition

The proposed rule change will remove or lessen existing burdens on competition in that no other marketplace has special evaluative criteria for REITs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Time of Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if its find such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 12, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 15, 1988.

[FR Doc. 88-6234 Filed 3-21-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-25474; File No. SR-NASD-88-4]

Self-Regulatory Organizations; Proposed Amendment to the Rules of Fair Practice of the National Association of Securities Dealers, Inc.; Testimonial Advertisements

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 8, 1988, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to amend Article III, section 35(d)(2)(D) of its Rules of Fair Practice to limit the application of the NASD's current rule only to testimonials concerning the quality of a member's investment advice and to require disclosure of compensation paid to the person making the testimonial only if it is more than a nominal amount.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The NASD is amending Article III, section 35(d)(2)(D) to conform its terms to those of New York Stock Exchange ("NYSE") Rule 472.40(8) (which was amended subsequent to the adoption of the NASD rule), for purposes of consistency and reduction of unnecessary regulatory burdens on dual NASD/NYSE members.

The proposed amendment is consistent with the provisions of section 15A(b)(6) of the Act, in that the amendment will provide information to investors concerning the source of information provided in testimonial advertisements concerning the quality of a member's investment advice.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed amendment will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Rule Change Received from Members, Participants, or Others

The proposed amendment was published for comment in NASD Notice to Members 87-40 (June 22, 1987). Four comment letters were received regarding the proposed amendment. One commentator was in favor of the proposed amendment without reservation. The other three commentators favored adopting the amendment but recommended that the amendment's provisions include more explicit standards, e.g., that the term "nominal sum" be defined. The NASD considered the comments received and determined that, in the interest of consistency, the terms of the amendment should conform to those of NYSE Rule 472.40(8).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to file number SR–NASD–88–4 and should be submitted by April 12, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

Dated: March 16, 1988.

[FR Doc. 88–6235 Filed 3–21–88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–25481; File No. SR–NASD–88–7]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Filing and Order Granting Accelerated Approval to Proposed Rule Change

On February 23, 1988, The National Association of Securities Dealers, Inc. ("NASD") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder, [2] a proposed rule change to amend section 4(a)(4) of Appendix A, Article III, Section 30 of the NASD's Rules of Fair Practice to increase the initial and maintenance margin requirements for short positions in market index options.

The NADS's rules to establish a premium-based customer margin system for "short" options positions were approved by the Commission on September 26, 1985 and became effective in January 1986.[3] Filed in conjunction with all the options exchanges, the rules provide for a uniform margin system applicable to all options products based on the option premium plus a specified percentage of the current value of the underlying product. In pertinent part, the current requirements for index option products were based upon volatility studies conducted to determine margin requirements that would be sufficient to cover index option price changes. The NASD's current margin requirement for each short put or call option on a market index is 100% of the current market value of the option contract (*i.e.*, the current option premium value) plus 5% of the aggregate value of the underlying index reduced by the amount the option is out-of-the money, with a minimum of 100% of the current market value of the option contract plus 2% of the aggregate value of the underlying index.

Based upon recent events in the stock markets and volatility studies conducted during the week of October 19, 1987, however, the NASD has determined that these margin requirements should be increased. Therefore, the NASD proposes to increase initial and maintenance customer margin requirements for short options positions in market index options to 100% of the option's premium plus 10% of the underlying index's aggregate value, reduced by the amount the option is out-of-the money, but not less than the premium plus 5% of the aggregate value of the underlying index.

The requirement is designed to protect both investors and firms by assuring that these broad-market index option positions are adequately covered. In addition, the new margin requirements maintain for investors a reasonable cushion of protection in line with increased market volatility.

Because the proposed rule amendments will provide increased margin protection for customer options positions under current market conditions, the proposed rule change is consistent with section 15A(b)(6) under the Act,[4] which provides in pertinent part that the rules of a registered securities association be designed to promote just and equitable principles of trade and to protect investors and the public interest.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations applicable to a national securities association, and, in particular, the requirements of section 15A(b)(6),[5] which provides, in pertinent part, that the rules of the association must be designed to protect investors and the public interest. The increased margin requirements for market index options will provide more financial protection to the securities industry at a time of increased market volatility. The 5%/2% margin levels are based on historical volatility levels that are no longer valid in light of the events of the week of October 19, 1987. Hence, at a minimum, higher margin levels are needed to ensure the financial stability of member firms. At this time the NASD has determined to raise the initial margin level for market index options to premium plus 10%. The Commission believes this action is necessary as an interim step in assuring the adequacy of margin levels in light of recent market events. Because of concerns raised in the Commission's Report on the October 1987 Market Break about the effect on market volatility of margin levels on derivative products, however, the Commission reserves judgment both on the sufficiency of the level of margin set by the proposed rule change as well as the method of determining adequate margin.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication in the **Federal Register** in light of the increased stock market volatility during the week of October 19 and its effect on margin adequacy. In addition, the Commission notes that the American, Pacific, Philadelphia, and New York Stock Exchanges and the Chicago Board Options Exchange have adopted identical changes to their margin requirement rules.[6]

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by April 12, 1988.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Jonathan G. Katz,

Secretary.

Dated: March 15, 1988.

BILLING CODE 8010-01-M

[Release No. 34–25505; File No. SR–NASD–88–1]

Self-Regulatory Organizations; Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to Amendments to the Rules of Practice and Procedures for the Small Order Execution System and Part VI, Schedule D to the NASD By-Laws

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 2, 1988 the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. On March 9, 1988, the NASD filed a revised **Federal Register** exhibit. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of The Terms of Substance of The Proposed Rule Change

The NASD is proposing amendments to Part VI, Schedule D to the NASD By-Laws ("Schedule D") and to the Rules of Practice and Procedures for the Small Order Execution System ("SOES or SOES Rules").

II. Self-Regulatory Organization's Statement of The Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

Background

The Small Order Execution System was established to permit small orders in National Association of Securities Dealers Automated Quotation System ("NASDAQ") securities to be executed efficiently at the best price for the public customer. SOES average weekly volume doubled during the week of October 19, 1987. Notwithstanding the extraordinary volume during that and subsequent weeks, SOES remained open and operating and continues to provide investors an effective means for the execution of smaller orders. Problems were experienced, however. As a result, the NASD has concluded that certain improvements should be made to NASDAQ and SOES in particular in relation to the NASDAQ/National Market System ("NASDAQ/NMS") securites to assure that investors have access to an even more efficient and liquid market, especialy during periods of high volume. The Board of Governors believes that the most effective way to assure greater investor access is through enhancements to SOES and NASDAQ that will help alleviate the need for firms to rely on telephone contact.

Therefor, the NASD Board of Governors has approved amendments to Schedule D of the NASD By-Laws and the SOES Rules that would implement these changes. To summarize, the proposed rule change would:

1. Prohibit a firm that withdraws, on a unexcused basis, as a NASDAQ market maker in a security from re-entering NASDAQ as a market maker in that security for 20 business days;
2. Limits the acceptable reasons for an excused withdrawal from NASDAQ;
3. Make SOES participation mandatory for all market makers in NASDAQ/NMS securities;
4. Enable the NASD to establish different levels of maximum order size limits (e.g., 200, 500 and 1,000 shares) for SOES orders in NMS securities, depending on the characteristics of different securities;
5. Provide that SOES executions up to a specified limit will continue in a NASDAQ/NMS security when quotes are locked or crossed, with executions occurring at the best price; and
6. Eliminate preferencing of market makers during an NMS security locked or crossed market situation.

Description of Proposed Rule Changes

Penalty for Withdrawal as a NASDAQ Market Maker—The NASD is proposing to amend Schedule D to the NASD By-Laws (containing rules on the NASDAQ System) to prohibit a firm that withdraws from making a market in any NASDAQ security in an unexcused basis from reentering as a market maker in that security for 20 business days. Currently, market makers may withdraw from and reenter SOES without penalty and as a NASDAQ market maker after a two business day delayed. The NASD has concluded, however, that it is necessary to increase the penalty for unexcused withdrawals from the NASDAQ system from two business days to twenty business days to help assure that investors in those securities have access to a continuous, liquid market supported by as many market makers as possible. Unexcused withdrawal from SOES participation as market makes in a NASDAQ/NMS security shall constitute unexcused withdrawal of quotes from NASDAQ and shall subject market makers to the twenty business day penalty.

As in the past, market makers will continue to be able to obtain excused withdrawals. The conditions under which those withdrawals will be permitted would be limited under the proposal, however, to withdrawals due to physical circumstances beyond the market maker's control but would not include illness (*e.g.* equipment malfunction or relocation) or legal or regulatory considerations (*e.g.* compliance with SEC Rule 10b–6) or, with five business days advance notice to and approval by the NASD, religious holidays. A market maker obtaining an excused withdrawal could reenter NASDAQ according to the conditions of the withdrawal (*e.g.*, withdrawals for purposes of equipment relocation would permit market makers to reenter upon installation at the new location). The withdrawal of quotations because of pending news, a sudden influx of order or price changes, or to effect transactions with competitors shall not constitute acceptable reasons for granting excused withdrawal status.

[8] 17 CFR 200.30–3(a)(12) (1987).

Mandatory Participation in SOES—The SOES Rules and Schedule D are proposed to be amended to require that every market maker in every NASDAQ/NMS security also be a market maker in that security in SOES. SOES participation for market makers in NASDAQ securities that are not NASDAQ/NMS securities would continue to be voluntary. Further, transactions in SOES will be required to be cleared and settled through a registered clearing facility.

This change will facilitate the automatic execution of customers' small orders for every NASDAQ/NMS security without the need for telephone contact between the order entry and executing firm. Every firm making a market in a NASDAQ/NMS security will be participating in the automatic execution system. By mandating wider participation in SOES, the Board believes that the NASD will significantly improve investor access to the NASDAQ/NMS market, particularly in times of high volume.

Tiered Order Limits—The SOES Rules are proposed to be amended to provide that the NASD may establish different maximum order size limits of different NMS securities. As a small order system, SOES is available for retail agency orders of limited size. Most recently, the size limits have been 1,000 shares for NASDAQ/NMS securities and 500 shares for other NASDAQ securities. On the basis of experience, however, the Board of Governors has concluded that the efficiency and liquidity of SOES could be improved by refining order size limits of NMS securities so that different categories of securities having certain trading characteristics would be subject to different size limits. For example, orders in some securities may be restricted to a maximum size of 200 shares, others 500 shares, and still others, 1,000 shares. The NASD is developing a formula for three different ties of NASDAQ/NMS securities based on criteria such as share volume of non-block trading activity, price and number of market makers in the particular security.

SOES Executions in Locked or Crossed Markets—The SOES Rules are proposed to be amended to provide that order in NASDAQ/NMS securities will continue to be executed in a security notwithstanding the fact that NASDAQ/NMS quotations for that security are locked (*i.e.* at least one market maker is willing to buy for the same price as at least one market maker is willing to sell) or crossed (*i.e.* at least one market maker is willing to buy at a higher price than another is willing to sell). Under current procedures, SOES orders are executed in rotation against all market makers offering the "inside" or best quotation,[1] but automatic executions in a security cease if quotations as to that security become locked or crossed. In rapidly changing markets, it is more likely that quotations will be inadvertently locked or crossed as the use of telephones limits access to the market.

Under the proposal, automatic SOES executions in NASDAQ/NMS securities would continue even with locked or crossed quotes. All executions would be made against the firm causing the locked or crossed situation if its price is the best for the customer. In the event the market maker causing the locked or crossed market does not have the best price for the customer, the market maker with the best price will have its price executed. An order entry firm's indication of a preference for a particular market maker would not be recognized so that no other market maker would be required to execute at another dealer's locket or crossed quote. Although this charge may create greater potential exposure for firms and whose quotes are locked or crossed, it will help assure that investors have continuous access to SOES throughout periods of high volume and rapid price movement. The change will also provide an economic incentive for firms to keep their quotations current.

The proposal contains a provision to protect market makers in NASDAQ/NMS issues from open end liability and repeated executions in the event they are unable to respond and update their quotes and eliminate a locked or crossed market. The proposal defines "exposure limit" as the number of shares for which a market maker is willing to be exposed, i.e. have orders executed against it. SOES currently permits each market maker to set an exposure limit, i.e., specify the number of shares of any security on either side of the market that the system will execute against the firm's account. The proposal, however, contains a new concept, a "minimum exposure limit" which is defined as the number of shares equal to five times the maximum permitted order size for a given security. Each SOES market maker will be exposed in SOES for the minimum exposure limit but is free to set a higher limit at any time.

In the case of a locked or crossed market in a NASDAQ/NMS security, SOES will execute orders amounting to either the minimum exposure limit or the firm's then remaining exposure limit, whichever is greater, against the firm locking or crossing the market. Unless the firm's limit is changed, that firm's exposure is restricted, however, to the specified limits. Similarly, in a normal trading environment, the system will execute orders against a market maker in an amount equivalent to its exposure limit or the minimum exposure limit, whichever is greater. In either instance, when a firm's exposure limit has been reached, the firm will be suspended from SOES and subject to being automatically withdrawn by the system.

In view of the fact that withdrawal as a SOES market maker in NASDAQ/NMS securities would now carry a 20-business-day penalty, the Board of Governors concluded that any NASDAQ/NMS market maker subject to automatic removal because its exposure limit has been reached should be given a grace period within which to renew its limit or reenter a quote. The grace period is proposed to be a standard period established by the NASD from time to time depending upon market conditions and other factors.[2] The grace period initially will be five minutes, although under emergency conditions, for example, the Association could specify a different period. If a market maker fails to renew its exposure limit within the grace period, it will be automatically removed from SOES and prohibited from re-entering for 20 business days. Should a market maker be unable to respond because of equipment failure, it normally will be permitted to reenter when the equipment failure is removed.

SOES market makers subject to mandatory withdrawal from SOES and the 20-business-day penalty period discussed above, shall have the right to have their exclusion from SOES reviewed pursuant to the provisions of Article IX of the NASD Code of Procedure. These appeals are currently in place with respect to grievances concerning the NASDAQ system.

The proposed amendments are consistent with the provisions of sections 11A(a)(2) and 15A(b)(6) as the amendments to SOES would result in the fair and orderly handling of customer orders and, in general, would promote the protection of investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed rule amendments impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on the Proposed Rule Change Received from Members, Participants, or Others

The Association requested comments on the proposed amendments in the NASD Notice to Members, dated November 20, 1987 ("Notice"). In response to the Notice, the Association received 46 comment letters. Seventeen comment letters generally favored the proposed rule amendments, ten commentators favored a limited number (but not all) of the proposed rule amendments, and 19 commentators generally opposed the proposed rule changes, citing various reasons for so doing.

Many of the commentators opposing the rule amendments indicated their belief that the rule changes as proposed would impact negatively on market liquidity and have a disproportionate impact on smaller firms. In discussing specific aspects of the proposed rule amendments, several of the commentators in opposition focused on the proposed rule change that would make participation in SOES mandatory. In part, these commentators believed that mandatory SOES participation may expose market makers to undesirable risk and result in a substantial widening of spread positions to handle the increased risk. A number of commentators in opposition also focused on the proposed 30 day penalty for unexcused withdrawal from NASDAQ discussed in the Notice.[3] For the most part, these commentators argued that the penalty was far too burdensome. Finally, several commentators in opposition to the proposed amendments indicated their belief that the proposed requirement that a market be continuously made during times of illness or vacation places a burden on the resources of the trading desk as it results in the need for increased staffing.

In response to the comments in opposition to the rule amendments, the Board has amended its original proposal to provide for a review procedure under which members could appeal denials of requests for excused withdrawals expeditiously and seek to reenter SOES prior to the expiration of the penalty period. The Association also has established a minimum exposure limit of a market maker in SOES to five times the established trading size of that security (limited size) rather than ten executions (as originally proposed) unless the firm sets a higher limit. The Association has also added the occurrence of religious holidays as an acceptable excused withdrawal under specified circumstances.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to file number SR–NASD–88–1 and should be submitted by April 12, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

Dated: March 15, 1988.

[FR Doc. 88–6204 Filed 3–21–88; 8:45 am]

BILLING CODE 8010–01–M

---

[1] An order entry firm can send an order to the SOES market maker of its choice. This is referred to as "preferencing". If this is done, the order is executed at the best price for that market maker's account even if its quote is not the best.

[2] The NASD must submit a proposed rule change pursuant to section 19(b) of the Act prior to altering the grace period.

[3] A penalty period of 30 calendar days was put forth in the Notice. The Association has determined, however, that a 20 business day period, which is generally equivalent to 30 calendar days, should be imposed instead because other time periods in Schedule D are expressed in business days. The rule filing, thus, proposes a 20 business day penalty period.

[Release No. 34–25471; File No. SR–NSCC–87–10]

Self-Regulatory Organizations; National Securities Clearing Corporation; Order Approving a Proposed Rule Change

On September 30, 1987, the National Securities Clearing Corporation ("NSCC") filed a proposed rule change (File No. SR–NSCC–87–10) with the Commission pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),[1] to authorize a service to reconfirm and reprice fails. On November 18, 1987, the Commission published notice of this proposed rule change in the **Federal Register** to solicit comments from interested persons.[2] One comment was received expressing support for the proposed rule change.[3] As discussed below, this order approves the proposal.

I. Description

The proposed rule change will authorize NSCC to provide a new service to members, to be known as the Reconfirmation and Pricing Service ("RECAPS"). RECAPS would enable members to reconfirm and reprice transactions which were originally compared trades, but which did not settle, *i.e.*, failed trades.

RECAPS will be available to all NSCC members and will be offered to NSCC members for municipal, equity, and other securities (such as zero coupon instruments). RECAPS will be offered on a periodic basis, as needed. At this time, NSCC anticipates that RECAPS will be run no more often than quarterly.

In general, RECAPS will operate as follows: Participants will submit RECAPS input on a designated day, currently anticipated to be a Friday; NSCC will compare member trade submissions on the following day, Saturday; and, for compared trades, final contract sheets and settlement instructions will be issued on the next day, Sunday. Securities eligible for Continuous Net Settlement (CNS) will settle through CNS on a day NSCC specifies, currently anticipated to be two days after issuance of settlement instructions, or Tuesday. For non-CNS eligible securities issues, NSCC will issue to members using RECAPS balance orders or receive and deliver tickets designating settlement obligations. Members would settle money differences at NSCC on the same day. RECAPS will not be a guaranteed service and the proposed rule change would authorize NSCC to reverse any money credit given to a participant if the *contra* party fails to pay.

---

[1] 15 U.S.C. 78s(b)(1).

[2] Securities Exchange Act Release No. 25113 (November 10, 1987), 52 FR 44256 (November 18, 1987). ("Notice of Filing").

[3] *See* letter from Herbert I. Levitt, General Partner, Spear, Leeds & Kellogg, to Michael A. Macchiaroli, Assistant Director, Division of Market Regulation, SEC, received January 20, 1988.

In calculating payment obligations on RECAPS trade submissions, NSCC will use a variety of pricing sources. NSCC will use its current sources to price equity securities traded on national securities exchanges, through NASDAQ facilities or the over the counter market. Municipal securities will be priced according to information provided to NSCC under contract by Kinney Information Services.

The proposal also establishes fees for member use of the RECAPS service. NSCC has proposed RECAPS fees of $0.25 per submission per CUSIP to price securities and $0.50 per item submitted for recomparison.

II. NSCC's Rationale

NSCC believes the rule change is consistent with the requirements of the Act because RECAPS will help facilitate the resolution of fails, and thus will enhance the national clearance and settlement system.

III. Discussion

The Commission believes that the proposal is consistent with section 17A of the Act, among other things, because RECAPS promotes the prompt and accurate clearance of settlement of trades. As described above, RECAPS is designed to convert failed trades into completed trades. Failed trades which participants submit into the RECAPS system are re-priced and re-submitted to participants on RECAPS contract sheets for settlement.[4]

NSCC has conducted two RECAPS pilot programs to determine the effectiveness of the system. The first pilot program[5] included only municipal bonds. Of the 4,162 sides submitted, 2,126 sides (51%) were matched and 2,036 sides (49%) were unmatched.[6] The second pilot program included equities, municipals, and zero coupon bonds. Of 13,111 sides submitted, during the second pilot, 65% were compared.[7] As the result of both pilot programs, the compared trades were processed for settlement. The pilot programs have shown that RECAPS can successfully convert failed trades into completed trades by bringing the failed trades to the firms' attention and providing a mechanism for firms to work to resolve the failed trades.

The Commission also believes RECAPS promotes prompt and accurate clearance and settlement of securities transactions by reducing broker-dealer financing costs associated with outstanding failed trades. Fails increase broker-dealers' financing costs because when the delivering broker-dealer fails to deliver the securities, the receiving broker-dealer must incur financing costs to borrow stock in order to deliver the securities to its customer.

The Commission also believes that the fees NSCC proposes to charge for its RECAPS service are consistent with section 17A(b)(3)(D) as they provide for the equitable allocation of reasonable dues, fees and other charges among NSCC's participants. The fees consist of a fee per CUSIP number submitted to price the securities and a fee per item submitted for recomparison. As stated in NSCC's filing, these fees are intended to recover NSCC's costs of operating the system.

IV. Conclusion

For the reasons discussed above, the Commission finds that the proposed rule change is consistent with the Act and, in particular, section 17A.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR–NSCC–87–10) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: March 15, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-25466; File No. SR-NYSE-88-05]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by New York Stock Exchange, Inc., Opening Price Settlement of Expiring Options on the NYSE Composite Index

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 14, 1988, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On March 13, 1987 the Exchange filed a proposed rule change to change the settlement pricing of expiring stock index options to the opening prices on expiration Friday. (*See* SR–NYSE–87–08 and 3/16/87 Letter to Sharon M. Lawson, Branch Chief, SEC, from Daniel P. Odell, Assistant Secretary, NYSE (collectively, the "Temporary Rule Filing") and Release No. 34–24276 (March 27, 1987).) In particular, the Exchange modified the definition of "Current Index Group Value" in Rule 700(b)(17) to permit the Exchange to specify that the value upon exercise of options on the NYSE Composite Index and the NYSE Beta Index on expiration Friday is to be calculated from the opening prices for the constituent stocks on that day. The Exchange made conforming changes to the contract specifications for options on both indexes to make clear that trading ceases on the Thrusday before expiration Friday.[1]

---

[4] *See generally,* Securities and Exchange Commission *The October 1987 Market Break: A Report by the Division of Market Regulation,* 10-1 to 10-5, February 1988.

[5] RECAPS was approved on a pilot basis and was conducted on June 10–22, 1987. Securities Exchange Act Release No. 24519 (May 27, 1987), 52 FR 21140 (June 4, 1987).

[6] *See* letter from Michael J. Simon, Vice President and Associate General Counsel, NSCC, to Michael A. Macchiaroli, Assistant Director, Division of Market Regulation, SEC, dated July 13, 1987.

[7] *See* letter from Michael J. Simon, Vice President and Associate General Counsel, NSCC, to Jonathan Kallman, Assistant Director, SEC, dated November 27, 1987. *See also, RECAPS: A Second Pilot Conducted in December,* NSCC Participant Report, No. 35 (Jan. 1988) p. 7.

[1] The NYSE Beta Index was delisted by the Exchange effective December 31, 1987. Therefore, references to the Beta Index in these and subsequent Exchange Filings on the settlement pricing of expiring stock index options are no longer pertinent.

The Temporary Rule Filing was effective only with respect to contracts expiring in June, 1987. On April 3, 1987, the Exchange filed a proposed rule change to make permanent the rule changes proposed in the Temporary Rule filing. (*See,* SR–NYSE–87–11 (the "Permanent Rule Filing").) Thereafter, it became evident that the publication, comment and approval procedures for the permanent Rule Filing would not be completed before the Exchange opened for trading its contracts expiring in July, 1987. Accordingly, on April 10, 1987, the Exchange filed a proposed rule change that extended the Temporary Rule Filing to the July expiration date. (SR–NYSE–87–13.)

On May 15, 1987, the Commission approved the Permanent Rule Filing, but only in relation to contracts expiring in August and September. (Release No. 34–24466.) This was intended to permit the Commission to evaluate the June expiration before deciding on permanent approval. The Exchange subsequently learned that the Commission wished to evaluate the September expiration as well before acting on the Exchange's permanent approval request. Therefore, on August 13, 1987, the Exchange filed another proposed rule change that extended the Permanent Rule Filing to the December expiration date. (SR–NYSE–87–28.) The Commission approved the extension on August 24, 1987. (Release No. 34–24847.) Because the Commission required additional time in which to evaluate the September expiration, on October 16, 1987, the Exchange filed another proposed rule change to extend the Permanent Rule Filing to the March expiration date. (SR–NYSE–87–34.) The Commission approved that extension on October 16, 1987 (Release No. 34–25040).

The Exchange understands that owing to the market break of October, 1987, and the ensuing demands on the Commission staff, the Commission now needs additional time in which to evaluate the Exchange's permanent approval request. Accordingly, the proposed rule change extends to all option contracts on the NYSE Composite Index that are listed on or prior to the September, 1988, expiration date the Commission's approval of the Permanent Rule Filing on a temporary basis.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the rule extended by the proposed rule change is to ameliorate the impact of the concurrent expiration of index options and futures on the markets for individual stocks and on the stock market as a whole. The Exchange believes that settling index futures and options based upon the opening prices of the constituent stocks, and thereby permitting use of the Exchange's opening procedures in handling the accompanying stock volume, is the best strategy for addressing widely-held concerns about the actual and potential impact of the derivative products on the pricing mechanism and integrity of the stock market.

The basis under the 1934 Act for the proposed rule change is section 6(b)(5), which requires that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance on the purposes of the 1934 Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding the proposed rule change. The Exchange has not received any unsolicited written comments from members or other interest parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has requested that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the 1934 Act. As noted above, the Commission's most recent approval on a temporary basis of the Exchange's Permanent Rule Filing permitted the Exchange to change the settlement pricing of expiring stock index options to opening prices only through March, 1988. The Commission finds that accelerated approval of the proposed rule change will permit the Exchange to continue using expiration valuation based upon the opening prices of the underlying stocks for contracts on the NYSE Composite Index listed on or prior to the September expiration, thus maintaining the continuity and order of the Exchange's marketplace while the Commission further considers the Exchange's permanent request.

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 12, 1988.

It therefore is ordered, pursuant to section 19(b)(2) of the 1934 Act,[8] that the proposed rule change is approved.

BILLING CODE 8010-01-M

[Release No. 34-25472; File No. SR-PSE-88-03]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by Pacific Stock Exchange, Inc.; Pilot Program for Display of Multiple-Series and Stock/Option Orders

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 3, 1988, the Pacific Stock Exchange, Incorporated ("PSE" or the "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE, pursuant to Rule 19b-4 under the Securities Exchange Act (the "Act") of 1934, hereby proposes to extend a test of the dissemination of certain indications of market interest through the Autex Trading Information System ("AUTEX"). By Release dated May 29, 1987, (No. 34-24528; SR-PSE-87-07) the Securities and Exchange Commission approved a six-month test of a system by which PSE options members could display certain indications of interest for mutiple options series orders and/or stock/option orders through AUTEX. To complete the test of this program the Exchange requests an extension of three months.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

This proposal is for a continuation of a test to electronically disseminate indications of interest for certain types of options orders. The Exchange believes that three additional months are required to provide for ample input from members and customers as to the desirability of the system. The proposal is consistent with section 6(b)(5) of the Securities Exchange Act of 1934 in that it is intended to facilitate transactions in securities and will provide a greater ability to eliminate impediments in the marketplace.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change imposes a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 [2] and the rules and regulations thereunder. The Commission understands that use of the AUTEX system to date has been extremely limited. The three-month pilot program extension requested by the PSE should enable the Exchange to better educate its members as to the availability and advantages of the AUTEX system and guage more closely the potential demand for such a system.

The Exchange requests that the proposed rule change be granted accelerated effectiveness pursuant to section 19(b)(2) of the Act. The purpose of this rule filing is simply to extend for three months the operation of a pilot program approved previously pursuant to standard notice and comment procedures.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the proposal relates to a pilot program already published for comment and in operation for nine months. Based on its experience during the three-month pilot extension, the Commission anticipates that by the conclusion of this period (*i.e.,* May 29, 1988), the PSE will be able to make a determination as to whether to seek permanent status for the AUTEX program.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned, self-regulatory organization. All submissions sould refer to the file number in the caption above and should be submitted by April 12, 1988.

It therefore is ordered, pursuant to section 19(b)(2) of the Act,[3] that the proposed rule change is approved. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc.; Elimination of Odd-Lot Differentials on the Equity Floor

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 7, 1988, the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. (the "PHLX" or the "Exchange"), pursuant to Rule 19b-4 of the Securities Exchange Act of 1934 (the "Act") hereby proposes to abolish most odd-lot differentials charged on it equity floor.

The text of the proposed rule change is set forth below. [Brackets] indicate deletions; *italics* indicates additions.

Odd-Lot Orders Must be Given to Specialist

Rule 205. (a) Odd-lot orders shall be shown to the regular specialist before being shown to the alternate specialist. [Best execution is to be competitively determined based upon price as well as commissions, allowances, discounts or other fees, if any are charged.] If the regular specialist's offered execution of odd-lot orders, as so determined, will equal or better that of the alternate specialist, he shall purchase or sell for his own account such odd-lot orders in the security in which he is registered in accordance with the Provisions of Rules 225, [and] *227 and 229, as applicable.*

Odd-Lot Orders in Securities for Which Another Exchange is the Primary Market

Orders before opening sale.

Rule 227.(a)—unchanged.

(i) *Market* [O]*orders, including the odd-lot portion of partial round-lot (PRL) orders,* accepted by a specialist before [9:55] *9:25* o'clock a.m. shall be executed on the opening sale *for such* security in the primary market. [, plus or minus the odd-lot differential if any is charged.] *Market* [O]*orders, including the odd-lot portion of partial round-lot (PRL) orders,* accepted after [9:55] *9:25* o'clock a.m., and prior to the opening sale of the security in the primary market, shall be executed on the opening sale, provided such opening sale shall take place at a time which would reasonably effect such orders, otherwise they shall be executed on succeeding sales as the time thereof shall warrant.

Limit orders accepted by a specialist prior to the opening sale for such security in the primary market shall be executed at the limit price when a sale takes place in the primary market through the limit price.

Orders after opening sale.

(ii) After the opening transaction, specialists shall execute odd-lot[s] *market orders* on [the next transaction of such security in the primary market plur or minus the odd-lot differential if any is charged] *the PACE quote as defined in Rule 229.*

After the opening transaction, specialists shall execute the odd-lot portion of PRL orders at the same price as the round-lot portion. In the case of a PRL, the round-lot portions(s) of which is executed at more than one price, the odd-lot portion shall be executed at the same price as the last round-lot portion is executed.

After the opening transaction, specialists shall execute odd-lot limit orders at the limit price when a sale takes place in the primary market throughout the limit price. Committee to decide disputed price

(iii) The Committee shall determine the price of executed orders which are in dispute; and in the case of orders dependent on sales in the primary market before [10:10] *9:40* o'clock a.m. and after [3:20] *3:50* o'clock p.m. shall determine a fair and reasonable price for such orders regardless of the time such sales appeared on the tape.

Philadelphia Stock Exchange Automated Communication and Execution (PACE) System

Rule 229.—Unchanged.

. . . Supplementary Material.

General

.01 through and including .07(a)—unchanged.

.07(b) Market orders (round-lots of 600 to 1000 shares and PRL's of 601 to 1099 shares) entered after the opening shall not be subject to the execution parameters set forth in Rule 229 and shall be executed in accordance with other applicable rules of the Philadelphia Stock Exchange [.]*; provided, however, that the odd-lot portion of PRL's of 601 to 1099 shares shall be executed at the same price as the round-lot portion. In the case of a PRL order, the round-lot portion(s) of which is executed at more than one price, the odd-lot portion shall be executed at the same price as the last round-lot portion is executed.*

.08 Odd-lot market orders entered after the opening will be executed on the [next sale in the New York market plus or minus a differential if any is charged.] *PACE quote.*

.09 Odd-lot limit orders [and the odd-lot portion of PRL limit orders] will be executed at the limit price when a sale takes place on the New York market through the limit price. *The odd-lot portion of PRL limit orders up to 1099 shares will be executed at the same price as the round-lot portion. In the case of a PRL, the round-lot portion(s) of which is executed at more than one price, the odd-lot portion shall be executed at the same price as the last round-lot portion is executed.* An odd-lot stop [or stop limit] order which becomes a market order will be executed on the *PACE quote.* [next sale in the New York market plus or minus a differential if any is charged.] *An odd-lot stop limit order which becomes a limit order will be executed on the next sale in the New York Market at the limit price plus or minus a differential if any is charged.*

.10(a)—unchanged.

(b) Round-lot limit orders of 600 to 1000 shares and PRL's of 601 to 1099 entered after the opening shall not be subject to the execution parameters set forth in rule 229 and shall be executed in accordance with other applicable rules of the Philadelphia Stock Exchange*;* [.] *provided, however, that the odd-lot portion of PRL's of 601 to 1099 shares shall be executed at the same price as the round-lot portion. In the case of a PRL, the round-lot portion(s) of which is executed at more than one price, the odd-lot portion shall be executed at the same price as the last round-lot portion is executed.*

.11 through and including .15—unchanged

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change

The purpose of the proposed rule change is to abolish all differentials on odd-lot market orders and the odd-lot portion of partial round-lot ("PRL") market orders received by PHLX equity specialists through PHLX's automated execution system PACE or otherwise in any securities for which the PHLX is not the primary market. The rule change also makes clear that such differentials may not be charged for any limit orders received through PACE. Finally, while the rule change abolishes differentials for PACE odd-lot stop orders, differentials may be charged for executing PACE odd-lot stop limit orders.

The proposed rule change will reduce transaction costs of executing odd-lot orders and is, therefore, consistent with Section 6(b)(5) of the Act in that it removes "impediments to and perfect[s] the mechanism of a free and open market and a national market system" and promotes the protection of investors and the public interest. The proposal also is consistent with Section 11A of the Act in that it provides for "economically efficient execution of securities transactions" and assures the "practicability of brokers executing investors' orders in the best market."

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rules changes will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

With 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days or such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whethere the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted by April 12, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 16, 1988.

BILLING CODE 8010-01M

[Rel. No. IC-16317; 812-5466]

FB MTP Partners; Application

March 15, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: FB MTP Partners.

Relevant 1940 Act Sections: Exemption requested under sections 6(b), 6(e) and 45(a) from all provisions of the 1940 Act or, in the alternative, from all provisions except section 9, sections 17(a) and 17(d) (with certain exceptions), sections 36(a) and 36(b), and sections 37 through 53.

Summary of Application: Applicant, organized as an employees' security company, seeks an order exempting it from the above enumerated provisions of the 1940 Act to permit it to operate as a tax-advantaged investment program offered to eligible employees of, and certain persons providing services on retainer to, First Boston, Inc.

FILING DATE: The application was filed on March 2, 1983 and amended on April 28, 1984, October 17, 1984, and February 11, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on April 11, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certficate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, Park Avenue Plaza, 55 East 52nd Street, New York, New York 10055.

FOR FURTHER INFORMATION CONTACT: H.R. Hallock, Jr., Special Counsel (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representation: 1. Applicant is a general partnership organized under New York partnership law, and was conceived by senior management of First Boston, Inc. ("FBI"), to meet the desire of key employees for an in-house tax oriented investment program. FBI is a publicly-owned holding company whose principal affiliates, including The First Boston Corporation ("FBC"), are engaged in various facets of the investment banking securities business. FBI and its affiliates are collectively referred to as "First Boston".

2. All of Applicant's partners are "accredited investors" as defined under Rule 501 of Regulation D under the Securities Act of 1933, as amended ("1933 Act") and key persons who are employees or persons providing substantial services on retainer to First Boston. Additional partnership interests will be offered in the future only to persons who are employees or persons on retainer to First Boston and who will, at a minimum, meet the present standards of Rule 501(5), (6) or (7) under

Regulation D of the 1933 Act ("Eligible Persons"). Applicant states that it qualifies as an "employees' security company" under section 2(a)(13) of the Act.

3. FB MPT Inc., a Delaware corporation and a wholly-owned subsidiary of FBI, is the Managing Partner ("Managing Partner") of Applicant. Under their partnership agreement management authority is delegated to the Managing Partner, and the other partners may not participate in management except as an officer or director of the Managing Partner. Each director of the Managing Partner must be an investor in Applicant, on at least the same minimum terms and conditions as all other investors.[1] Each of Applicant's partners will have access to the Managing Partner's directors and support staff who will oversee the Applicant's activities.

4. Applicant requests an exemption from section 17(a) and the rules thereunder to the extent necessary to permit Applicant to (a) invest in, sell or resell, as appropriate, securities of companies or investment vehicles and other investment properties offered from or to First Boston or an affiliated entity of First Boston on a principal basis, including interests previously acquired for the account of First Boston of the type which are consistent with the investment objectives of Applicant; (b) purchase interests or property in, or lend money to, a company or other investment vehicle in which First Boston, an affiliated partnership of First Boston, or individual directors, officers, or employees of First Boston already own 5% or more of the voting securities of the company or vehicle, or where such company or vehicle is otherwise affiliated with First Boston or Applicant (including through the Applicant's ownership of 5% or more of the voting securities of such entity); (c) sell, tender, or grant options in securities or interests in a company or investment vehicle back to such entity, where that entity is affiliated with First Boston, a First Boston affiliated partnership or individual directors, officers or employees of First Boston otherwise than as a result of Applicant's ownership of voting securities; and (d) participate as a selling security holder in a public offering that is underwritten by First Boston or in which First Boston acts as a member of the underwriting or selling group.

5. These transactions will only be effected upon a determination of the board of directors of the Managing Partner that the terms of the transaction are reasonable and fair to the partners of the Applicant involved in the transaction and do not involve overreaching of Applicant or its partners on the part of any person concerned. Moreover, in any case where purchases or sales are made to or from an entity affiliated with Applicant's by reason of a 5% or more investment by a First Boston director, officer or employee, such individual will not participate in the Managing Partner's determination of whether or not to effect such purchase or sale.

6. Applicant requests an exemption from section 17(d) and Rule 17d-1 to permit it to engage in transactions in which First Boston or affiliated persons of Applicant may also be participants (arising from coinvestment, the receipt of fees for structuring, negotiating or managing an investment in the manner described in Applicant's application for exemption, or as a result of the participation of a subsidiary providing limited liability or other services to or for the benefit of the Applicant, or otherwise), on the undertaking that the Applicant will not make any joint investment in which First Boston, another First Boston affiliated partnership, or any officer, director or employee of the Managing Partner is a participant, directly or indirectly (otherwise than through an investment in or relationship with the Applicant or in a transaction with a participating subsidiary for the purpose of providing limited liability or sevices), *provided, however,* that this undertaking shall not apply (a) to 40% of the total assets of the Applicant, and (b) as to the remaining 60% of the total assets of the Applicant, to other investments by the Applicant in any other companies, partnerships or investment vehicles or property which are not sponsored, managed or underwritten on a principal basis by First Boston or its affiliates. Compliance with the foregoing will be determined at the time of the investment. Where the coinvestment by Applicant is on terms different than that made by the affiliated co-investor, the board of directors of the Managing Partner will make a determination at the time of such investment that such participation in such investment is not less advantageous than any other participant with respect to the making of such investment, maintaining its investment position or disposing of such position.

7. The undertaking not to make joint investments will not apply, however, to limit or prevent joint investment by Applicant and individual officers, directors or employees of First Boston making their own individual investment decisions apart from First Boston or an affiliated partnership, subject to the following limitations;

(a) the asset limitations on joint investments would apply to situations where one or more directors or principal executive officers of FBI, FBC or the Managing Partner who hold outstanding shares of common stock of FBI, aggregating 15% or more of the outstanding shares of common stock of FBI, make a joint investment with the Applicant (otherwise than through an investment by First Boston or an affiliated partnership); and

(b) in the case of a joint investment by Applicant and (i) any officer, director or employee of the Managing Partner, (ii) directors or principal executive officers of FBI or FBC who hold outstanding shares of common stock of FBI aggregating 15% or more of the outstanding common stock of FBI, or (iii) First Boston officers, directors or employees who hold individually or in the aggregate 15% or more of the equity interest of any joint investment, (in the case of (i), (ii) or (iii) above, otherwise than through an investment in an affiliated partnership) the Managing Partner undertakes to obtain a commitment from each such person that he or she will not dispose of his or her interest in such joint investment without giving sufficient, but not less than one day's, notice to the Managing Partner so that Applicant has the opportunity to dispose of its interest in the joint investment prior to or concurrently with such person.

8. In connection with the exemptions requested under Sections 17(a) and 17(d), the Managing Partner undertakes to use reasonable efforts to ascertain, prior to making any investment, whether First Boston, any Managing Director of First Boston, or any officer, director, or employee of the Managing Partner owns more than 5% of the equity of any entity in which Applicant plans to invest.

---

[1] The minimum commitment under the Applicant's 1984 offering obligated each Eligible Person to make payments totalling up to $150,000, plus mandatory overcalls. By letter dated March 9, 1988, Applicant's counsel confirmed that Applicant is not currently making any new investments. Counsel also acknowledged the view of the staff that under the circumstances, Applicant will not be required to file with the Commission a copy of its annual report to its partners as a condition to granting the application and, accordingly, that the requested exemptive relief from section 45(a) of the Act for confidential treatment of such reports is no longer necessary.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[Public Notice CM-8/1175]

Shipping Coordinating Committee; Meeting

The Shipping Coordinating Committee will conduct an open meeting at 0930 on Tuesday, 5 April 1988 in Room 2415 of U.S. Coast Guard Headquarters, 2100 Second St. SW., Washington, DC 20593. The purpose of the meeting is to review the 58th Session of the International Maritime Organization (IMO) Legal Committee held in October 1987, and to consider U.S. positions for the 59th Session scheduled for 25–29 April 1988 in London.

The 59th session of the IMO Legal Committee is an extra regular session agreed to by the IMO Council for the express purpose of considering possible revision of the 1974 Athens Convention relating to the Carriage of Passengers and their Luggage by Sea. Additional topics which will be considered after the Athens Convention are: (1) Liability and compensation for damage caused by the maritime carriage of Hazardous and Noxious Substances (HNS); and (2) the legal implications of United Nations work regarding illicit drug trafficking.

With respect to possible revision of the 1974 Athens Convention, this initiative derives from concern in the aftermath of the recent Herald of Free Enterprise disaster over what a number of nations have now come to regard as extremely low limits of liability. Shortly after the March 1987 ferry sinking, the United Kingdom submitted a proposal urging a priority Legal Committee review of the Athens Convention. Given the review mandate transmitted to the Legal Committee by the IMO Council last November, it is expected that the only aspects of the Athens Convention which will be considered are the actual limits of liability and the development of a rapid amendment mechanism.

While the U.S. took an active part in the preparatory work at IMO, the U.S. is not a party to the 1974 Athens Convention. In principle the U.S. supports this revision initiative as consistent with our overall desire to raise international liability limits to acceptable levels.

Work on the Athens Convention is expected to take two or three days at most. The Legal Committee should therefore have sufficient time at its 59th Session to begin deliberations on HNS, and also to give brief consideration to the implications for the Committee of ongoing United Nations work regarding illicit drug trafficking.

By way of background concerning HNS, in 1982 the Legal Committee completed a draft Convention which provided a two-tier regime of strict liability for the carriers and shippers of certain HNS transported in bulk on tank vessels. The proposed scheme, which entailed compulsory insurance coverage for owners and shippers, would have applied to those HNS which presented severe fire and explosion, toxicity, and/or marine pollution hazards.

In May 1984, IMO sponsored a Diplomatic Conference which took up the draft HNS Convention, as well as draft Protocols updating both the 1969 and 1971 Oil Spill Conventions. An HNS Convention was not adopted because no clear consensus could be achieved on the fundamental liability issues.

The starting point for the resumption of HNS negotiations will be an options paper submitted to the Legal Committee last October. The ten-nation submission proposed that the two liability schemes most worth exploring are: (1) Shipowner liability supplemented by compulsory cargo insurance; and (2) shipowner liability in the context of an overall revision of the 1976 International Convention on Limitation of Liability for Maritime Claims. The revision of the 1976 Convention would involve either raising the global limitation amounts to a level adequate to compensate HNS damage, or creating a special layer of HNS liability coverage available only for HNS damage.

Highlights of the Legal Committee's discussion of the HNS options paper at the October 58th Session are as follows:

1. Most delegations expressing views favored further work toward an international system of liability and compensation so that such a system could be in place before any major HNS catastrophe; this majority supported moving to HNS work on a priority basis early in 1988 and thus the subject was placed on the 59th Session agenda after the Athens Convention.

2. Many delegations expressed a preliminary preference for placing liability on the shipowner alone, without involving cargo or shipper interests; a number of these delegations expressed strong interest in using a revision of the 1976 Convention as the framework for an HNS regime.

3. The Committee was divided on the issue of packaged HNS, with the apparent majority in favor of their inclusion.

If an international HNS scheme is developed and implemented, the system would have significant impacts on a wide range of U.S. interests related to industry, government and the environment. These interests include, but are not limited to, owners/operators of vessels transporting bulk or packaged hazardous substances, chemical manufacturers, chemical shippers, marine terminal operators, port authorities, marine insurers, state and local governments, and environmental advocates.

In view of the significant potential impacts on U.S. maritime interests, the Shipping Coordinating Committee has held a series of four special public meetings devoted exclusively to HNS issues. This series of meetings was well attended by the broad spectrum of affected interests, and contributed significantly to the ongoing development of U.S. positions for the 59th Session. The outcome of this special series of HNS meetings will be reviewed at the 5 April 1988 meeting.

With respect to the legal implications of United Nations work regarding illegal drug trafficking, it is expected that the Legal Committee will give brief consideration to two important United Nations documents. The first is a Comprehensive Multidisciplinary Outline of Future Activities in Drug Abuse Control recently adopted by a United Nations Conference in Vienna, Austria, in June 1987. Target 28 of this Outline relates to the specific question of the exercise of control over ships on the high seas. The second document is the Draft Convention Against Illicit Traffic in Narcotic Drugs and Psychotropic Substances being developed by an intergovernmental group of experts convened under the auspices of the United Nations Economic and Social Council. This Convention is intended to promote international cooperation and coordination among national authorities, such as customs, police and judicial bodies, and to provide them with legal mechanisms to enhance their efficiency in interdicting illicit trafficking in all its phases. The Legal Committee has been asked to review both documents, with a view to deciding whether further work is required by the Committee.

The Shipping Coordinating Committee will also discuss the status of the proposed Resolution on Cooperation in Maritime Casualty Investigations first submitted to the IMO Legal Committee by Liberia and the United States at the 56th Session. This proposed Resolution, which is considered an important safety initiative by both the National Transportation Safety Board and the Coast Guard, was debated extensively at the 57th and 58th Sessions, but final action has yet to be taken.

Members of the public are invited to attend the 5 April 1988 Shipping Coordinating Committee meeting, up to the seating capacity of the room.

For further information pertaining to the issues to be discussed at the Shipping Coordinating Committee meeting, contact Captain Frederick F. Burgess, Jr. or Lieutenant Commander Frederick M. Rosa, Jr., U.S. Coast Guard (G–LMI), Washington, DC 20593, telephone (202) 267–1527.

Date: March 4, 1988.

Richard C. Scissors,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Proposed Advisory Circular; Powerplant Installation and Propulsion System Component Fire Protection Test Methods, Standards, and Criteria

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed advisory circular and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular (AC) concerning methods for fire testing of materials and components used in the powerplant fire zone areas of aircraft, as well as the rationale for these methods.

DATE: Comments must be received on or before July 20, 1988.

ADDRESS: Send all comments on the proposed AC to: Federal Aviation Administration, Attention: Transport Standards Staff, ANM–110, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Comments may be inspected at the above address between 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Patricia Siegrist, Transport Standards Staff, at the above address, telephone (206) 431–2128.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the AC may be obtained by contacting the person named above under "FOR FURTHER INFORMATION CONTACT." Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Commenters must identify the subject of the AC and submit comments in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Transport Standards Staff before issuing the final AC.

Discussion

Since about 1947 the basic powerplant fire protection compliance guidelines have been Safety Regulation Release (SRR) #259. This document outlined acceptable test methods to be used in showing compliance with the fire prevention requirements in the early Civil Air Regulations. Since that time, additional fire test standards, requirements, and methods have been developed and used with SRR #259. These include applicable Technical Standard Orders (TSOs) and later fire test burners and apparatus for evaluating flexible hoses and fire detectors, etc.

Appendix F to Part 25 of the Federal Aviation Regulations was issued only to provide acceptable fire testing methodology for showing compliance of materials used in passenger, cargo, and baggage compartments and for electrical components and wiring.

Powerplant installation fire test methodology (SRR #259) and other related data were available only in various documents and not very well assimilated and consolidated. This has caused some confusion on the part of the applicants and the FAA certification engineers as to what procedures to use when, and with what apparatus. The purpose of this AC is to provide, in a single document, the information necessary to show compliance with the applicable powerplant fire protection requirements of Parts 23, 25, 27, 29, and 33 of the Federal Aviation Regulations (FAR).

Issued in Seattle, Washington, on March 9, 1988.

Leroy A. Keith,

Manager, Aircraft Certification Division, Northwest Mountain Region.

FEDERAL COMMUNICATIONS COMMISSION

March 17, 1988.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, March 24, 1988, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, NW., Washington, DC.

Agenda, Item No., and Subject

Private Radio—1—*Title:* Reorganization and Deregulation of Part 97 of the Rules Governing the Amateur Radio Services. *Summary:* The Commission will decide whether to initiate a rule making action in this matter.

Common Carrier—1—*Title:* In the Matter of Policy for the Distribution of United States International Carrier Circuits Among Available Facilities During the Post-1988 Period. *Summary:* The Commission will consider whether to adopt a Report and Order concerning worldwide circuit distribution for the post-1988 period.

Common Carrier—2—*Title:* In the Matter of Access to Telecommunications Equipment and Services by the Hearing Impaired and Other Disabled Persons. *Summary:* The Commission will consider further action in this docket.

Common Carrier—3—*Title:* In the Matter of An Inquiry Relating to Preparation for the International Telecommunication Union World Administrative Radio Conference on the Use of the Geostationary-Satellite Orbit and the Planning of the Space Services Utilizing It. *Summary:* The Commission will consider whether to adopt a Report and Order in this proceeding.

Mass Media—1—*Title:* Amendment of Part 74 of the Commission's Rules regarding Satellite and Terrestrial Microwave Feeds to Noncommercial Educational FM Translators. *Summary:* The Commission will consider a Report and Order to amend certain rules pertaining to noncommercial educational FM translators.

Mass Media—2—*Title:* Amendment of Part 74 of the Commission's Rules regarding Satellite and Terrestrial Microwave Feeds to Noncommercial Educational FM Translators. *Summary:* The Commission will consider a Further Notice of Proposed Rule Making to amend certain rules pertaining to noncommercial FM Translators.

Mass Media—3—*Title:* Amendment of Part 74 of the Commission's Rules Concerning FM Translator Stations. *Summary:* The Commission will consider whether to initiate a proceeding to consider FM translator matters including those proposed in several petitions for rule making.

Mass Media—4—*Title:* Amendment of § 73.658(i) of the Commission's Rules, Concerning Network Representation of TV Stations in National Spot Sales; Request of Spanish International Network (SIN) For Waiver of § 73.658(i). *Summary:* The Commission will consider a *Further Notice of Proposed Rule Making* to seek further comment with respect to possible modifications to the television "network representation rule."

Mass Media—5—*Title:* Amendment of Parts 1, 63, and 76 of the Commission's Rules to Implement the Provisions of the Cable Communications Policy Act of 1984. *Summary:* The Commission will consider a Second Report and Order with respect to possible modifications to the signal availability measures in the cable rate regulation rules.

Mass Media—6—*Title:* Television Signal Availability on Cable Systems. *Summary:* The Commission will consider a Notice of Inquiry regarding the availability of TV signals on cable systems.

Mass Media—7—*Title:* Inquiry into § 73.1910 of the Commission's Rules and Regulations Concerning Alternatives to the General Fairness Doctrine Obligations of Broadcast Licensees. *Summary:* The Commission will consider a petition for reconsideration filed by Henry Geller and Donna Lampert concerning fairness doctrine alternatives.

Mass Media—8—*Title:* In re Complaint of Syracuse Peace Council against Television Station WTVH, Syracuse, New York. *Summary:* The Commission will consider petitions for reconsideration filed by Henry Geler and Donna Lampert and by Freedom of Expression Foundation with respect to its August 4, 1987, order in this proceeding regarding a fairness doctrine complaint against Meredith Corporation.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Sara Lawrence, Office of Public Affairs, telephone number (202) 632-5050.

H. Walker Feaster III,

Acting Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 5:20 p.m. on Wednesday, March 16, 1988, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a request for financial assistance pursuant to section 13(c) of the Federal Deposit Insurance Act.

In calling the meeting, the Board determined, on motion of Director C. C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: March 17, 1988.

Federal Deposit Insurance Corporation.

Margaret M. Olsen,

Deputy Executive Secretary.

BILLING CODE 6210-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES, INSTITUTE OF MUSEUM SERVICES

SUMMARY: This notice sets forth the agenda of a forthcoming meeting of the National Museum Services Board. This notice also describes the functions of the Board. Notice of this meeting is required under the Government in the Sunshine Act (Pub. L. 94-409) and the regulations of the Institute of Museum Services, 45 CFR 1180.84.

TIME AND DATE: 9:00 a.m, Friday, April 22, 1988.

STATUS: Open and closed.

ADDRESS: 1100 Pennsylvania Avenue, NW., Room MO-9, Washington, DC 20506, (202) 786-0536.

FOR FURTHER INFORMATION CONTACT: Ms. Christine Forbes, Executive Assistant to the National Museum Services Board, Room 510, 1100 Pennsylvania Avenue, NW., Washington, DC. 20506, (202) 786-0536.

SUPPLEMENTARY INFORMATION: The National Museum Services Board is established under the Museum Services Act, Title II of the Arts, Humanities, and Cultural Affairs Act of 1976, Pub. L. 94-462. The Board responsibility for the general policies with respect to the powers, duties, and authorities vested in the Institute under this Title. Grants are awarded by the Institute of Museum Services after review by the Board.

The meeting of April 22, 1988 will be open to the public from 9:00 a.m. until the closed session portion of item IV, section C and open again to the public from item IV, section D through discussion of item VI. The meeting will be closed to the public for the portion relating to discussion of grant applications in agenda item IV, section C pursuant to paragraphs 6, 9(B), and other relevant provisions of subsection (c) of section 552b of Title 5, United States Code and pursuant to 45 CFR 1180.88, because the Board will consider information that may disclose: Information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of privacy; and information the disclosure of which might significantly impede implementation of proposed agency actions related to the grant award process.

If you need special accommodations due to a disability, please contact: Institute of Museum Services, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202) 786-0536, TDD (202) 682-5496 at least seven (7) days prior to the meeting.

National Museum Services Board

Corrections

Federal Register
Vol. 53, No. 55
Tuesday, March 22, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 308

Rules of Practice and Procedures

Correction

In proposed rule document 88-3683 beginning on page 5392 in the issue of Wednesday, February 24, 1988, make the following corrections:

1. On page 5395, in the first column, in the second complete paragraph, in the sixth line, "south" should read "sought".

2. On the same page, in the second column, in the fourth complete paragraph, in the third line, "severed" was misspelled.

PART 308—[CORRECTED]

3. On page 5402, in the third column, the section heading for § 308.90 should read "Investigations confidential.".

§ 308.11 [Corrected]

4. On page 5405, in the first column, in § 308.11(a), in the second line, "(a)" should read "(1)".

§ 308.13 [Corrected]

5. On the same page, in the second column, in § 308.13(a)(1), the third line should read "served by the Board or its designee upon any party shall be served by the Executive Secretary or by".

§ 308.24 [Corrected]

6. On page 5408, in the first column, in § 308.24, in the section heading, "severance" was misspelled.

§ 308.25 [Corrected]

7. On the same page, in the same column, in § 308.25(a), in the first line, "of" should read "on".

§ 308.29 [Corrected]

8. On page 5410, in the second column, in § 308.29(a)(2), in the sixth line, "country" should read "county".

§ 308.33 [Corrected]

9. On page 5412, in the first column, in § 308.33, the second paragraph designated "(c)" and "(d)", should read "(d)" and "(e)" respectively.

§ 308.37 [Corrected]

10. On page 5413, in the third column, in § 308.37, in the first line, "(1)" should read "(a)" and in § 308.37(a)(1), in the 15th line, "Administrative" was misspelled.

§ 308.38 [Corrected]

11. On page 5414, in the second column, in § 308.38(e), in the fifth line, "party" should read "party may".

§ 308.95 [Corrected]

12. On page 5424, in the second column, in § 308.95(a)(1)(ii), in the fourth line, "any" should read "may".

§ 308.102 [Corrected]

13. On page 5426, in the first column, in § 308.102(c), the 12th line should read "participate in any further proceedings on the application unless the administrative law judge determines".

§ 308.103 [Corrected]

14. On same page, in the second column, in § 308.103(b)(1), in the first line, "new" should read "net".

Department of Education

34 CFR Parts 706, 707, and 708

Regional Educational Laboratories and Research and Development Centers Program; Proposed Rule and Notices

DEPARTMENT OF EDUCATION

34 CFR Parts 706, 707, and 708

Regional Educational Laboratories and Research and Development Centers Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Regional Educational Laboratories and Research and Development Centers Programs. These amendments are needed to implement certain provisions of the General Education Provisions Act (GEPA), as amended by Title XIV of the Higher Education Amendments of 1986, and to improve the operation of the programs.

DATE: Comments must be received on or before May 6, 1988.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Dr. Lawrence Bussey, Jr., Office of Research, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue NW., Suite 610, Washington, DC 20208-1633.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Dr. Lawrence Bussey, Jr. (202) 357-6249.

SUPPLEMENTARY INFORMATION: The Regional Educational Laboratories Program makes financial assistance available to regional educational laboratories established by public agencies or private nonprofit institutions. Each laboratory, under the sole guidance of a regionally representative governing board, serves the education needs of a specific geographic region of the Nation. The Research and Development Centers Program provides financial assistance, to conduct educational research and development, to institutions of higher education, institutions of higher education in consort with public agencies or nonprofit organizations, and interstate agencies established by compact that operate subsidiary bodies to conduct postsecondary educational research and development.

The Secretary is proposing changes in these regulations to comply with the provisions of GEPA, as amended by the Higher Education Amendments of 1986 and to improve the operation of the program. The major proposed changes are:

Sections 706.1, 706.5(b), and 708.12

A new type of award, special activities, is proposed. Only laboratories or centers that receive an institutional operations award are eligible to apply for an award for special activities. These awards would provide a mechanism for currently funded laboratories or centers to compete for funds to conduct additional educational research and development activities. Selection criteria for the special activities awards are also proposed.

Section 706.3

The Secretary proposes to select funding priorities from a list of biennial research priorities published for public comment in the **Federal Register** in accordance with section 405(b)(4) of GEPA, as amended.

The Secretary also proposes to amend the list of funding priorities to reflect the list of priority research and development needs in section 405(a)(3) of GEPA, as amended. The proposed amendments were also developed in consultation with researchers, practitioners, civic and business leaders, policymakers, interested citizens, and professional associations, some of whom participated in a series of regional forums sponsored by the Department.

Section 706.4(b)

Technical amendments concerning the applicability of these program regulations to contracts are proposed. The current regulations and the Federal Acquisition Regulation (FAR) in 48 CFR Chapter 1 apply to contracts under this program. The Secretary proposes to incorporate the sections of these regulations listed in 34 CFR 706.4(b)(2), to the extent they are consistent with the FAR, into any solicitation for a contract under these programs.

Section 706.23

The Secretary proposes additional factors to be considered in selecting applications for institutional operations awards for laboratories and centers.

Section 707.20(a)

The Secretary proposes amendments to clarify the role of the regionally representative governing boards of the laboratories. Section 405(d)(A)(i) of GEPA, as amended, specifies that a governing board shall guide each laboratory and establish the regional agenda of the laboratory, consistent with the priority research and development needs of the Secretary. The Secretary proposes that the regionally representative governing board of each laboratory serve as the sole entity that guides the laboratory's activities and determines the regional agenda of the laboratory.

Section 707.20(g)

A new post award requirement, peer review, is proposed for laboratory awards. The Secretary proposes to require that a laboratory establish a peer review process to evaluate its products, research instruments, and self-evaluation designs.

Section 708.10(b)

The Secretary also proposes a new selection criterion for center planning awards. The purpose of this criterion, potential to influence practice, is to ensure that planning activities will address the needs of practitioners.

Section 708.11(d)

A new selection criterion for institutional operations awards for centers is proposed. The purpose of this criterion, technical soundness, is to ensure that the research design of a center is adequate to carry out the proposed activities.

Section 708.21

The Secretary proposes criteria, in addition to those in the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.253, for continuation awards. The additional criteria address the quality of the project already completed by a center and the proposed activities to be conducted under the continuation award.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. None of the proposed changes will place unnecessary burden on small entities submitting applications. The proposed changes will remove obsolete provisions from the regulations and create greater flexibility in administering the program. These changes will reduce unnecessary burden imposed by existing regulations and will benefit all applicants.

Paperwork Reduction Act of 1980

Sections 706.11, 707.10, 707.11, 707.12, 708.10, 708.11 and 708.12 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review. (44 U.S.C. 3504(h)).

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Suite 610, 555 New Jersey Avenue NW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comments on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects

34 CFR Part 706

Colleges and universities, Education, Educational research, Grant programs—education, Local educational agencies, Nonprofit organizations, Reporting and recordkeeping requirements, State educational agencies.

34 CFR Part 707

Colleges and universities, Education, Educational research, Grant programs—education, Local educational agencies, Nonprofit organizations, Reporting and recordkeeping requirements, State educational agencies.

34 CFR Part 708

Colleges and universities, Education, Educational research, Grant programs—education, Local educational agencies, Nonprofit organizations, Reporting and recordkeeping requirements, State educational agencies.

(Catalog of Federal Domestic Assistance Number 84.117: Educational Research and Development)

Dated: February 24, 1988.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Parts 706, 707 and 708 to read as follows:

PART 706—REGIONAL EDUCATIONAL LABORATORIES AND RESEARCH AND DEVELOPMENT CENTERS PROGRAMS: GENERAL PROVISIONS

Subpart A—General

Sec.
706.1 What are the Regional Educational Laboratories and Research and Development Centers Programs?
706.2 Who is eligible for an award?
706.3 What priorities may the Secretary establish?
706.4 What regulations apply?
706.5 What definitions apply?

Subpart B—How Does One Apply for an Award?

706.10 What assurances must an applicant make?
706.11 What information is needed for a multi-year project for institutional operations?

Subpart C—How Does the Secretary Make an Award?

706.20 How does the Secretary evaluate an application?
706.21 What additional procedures may the Secretary use to determine which applications will be selected for funding?
706.22 What additional factors may the Secretary consider in selecting an application for a planning award?
706.23 What additional factors does the Secretary use to select an application for an institutional operations award?

Authority: 20 U.S.C. 1221e, unless otherwise noted.

Subpart A—General

§ 706.1 What are the Regional Educational Laboratories and Research and Development Centers Programs?

Under the Regional Laboratories and Research and Development Centers Programs, the Secretary provides support for planning, institutional operations, and special activities of regional educational laboratories and research and development centers.

(Authority: 20 U.S.C. 1221e)

§ 706.2 Who is eligible for an award?

(a) The following parties are eligible to apply for awards for the planning of a laboratory or center:

(1) Public or private organizations, institutions or agencies.

(2) Individuals.

(b) The following parties are eligible to apply for awards for institutional operations:

(1) For regional educational laboratories, public agencies or private nonprofit organizations.

(2) For research and development centers, institutions of higher education, institutions of higher education in consort with public agencies or private nonprofit organizations or interstate agencies established by compact that operate subsidiary bodies established to conduct postsecondary educational research and development.

(c) In any fiscal year, the Secretary may make grants for special activities to regional educational laboratories or research and development centers that receive institutional operations awards in the same fiscal year.

(Authority: 20 U.S.C. 1221e)

§ 706.3 What priorities may the Secretary establish?

(a) The Secretary may select funding priorities from a list of biennial research priorities published in the **Federal Register** for public comment pursuant to section 405(b)(4) of the Act, and published in final form in the **Federal Register**. These biennial research priorities may include one or more priorities from paragraph (b) of this section.

(b) The Secretary may also select one or more funding priorities by choosing from the following list of individual priorities or a combination of these priorities:

(1) Learning.

(2) Teaching.

(3) Technology in education.

(4) Instructional processes and materials, including textbooks and computer software for instruction.

(5) Education and staff development for teachers, administrators and other education staff.

(6) Organization and management of schools, including effective education leadership.

(7) Evaluation and indicator measures, including testing, measurement, and standards of performance.

(8) Governance of education, including school board policies and practices.

(9) Educational finance and productivity.

(10) Education and the law.

(11) Dissemination and knowledge utilization in education.

(12) Improvement in education, including State and local reform initiatives.

(13) Student achievement, including students' motivation to learn, their failure to learn, and their failure to attend school and graduate.

(14) Home, family, cultural, and community influences on education, including parental choice and involvement in schooling.

(15) Education, work, and careers.

(16) Equity and excellence, including the effects of ability grouping.

(17) Guidance and counseling.

(18) International education.

(19) English literacy, including reading, writing, and language skills.

(20) Mathematics.

(21) Science.

(22) Foreign languages.

(23) Early childhood education.

(24) History and social sciences, including economics, geography, political science, sociology, anthropology, and psychology.

(25) Physical and health education.

(26) Humanities, including music, art, literature and dance.

(27) Citizenship and character education.

(28) Elementary education.

(29) Secondary education.

(30) Early adolescent education.

(31) Adolescent education.

(32) Postsecondary education.

(33) Adult and continuing education.

(34) Teachers.

(35) School professionals and personnel.

(36) Public and private educational institutions.

(37) School discipline and crime in the schools.

(38) Education of special populations, including the educationally disadvantaged or students-at-risk, those with limited English proficiency, the handicapped, immigrants, and the academically gifted and talented.

(Authority: 20 U.S.C. 1221e)

§ 706.4 What regulations apply?

(a) *Grants.* The following regulations apply to grants under this program:

(1) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions That Apply to Department Regulations), Part 78 (Education Appeal Board), and Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments).

(2) The regulations in this Part 706 and in 34 CFR Parts 707 and 708.

(b) *Contracts.* (1) The following regulations apply to contracts under this program;

(i) The Federal Acquisition Regulation (FAR) in 48 CFR Chapter 1.

(ii) The Eduction Department Acquisition Regulation (EDAR) in 48 CFR Chapter 34.

(2) Requirements substantially similar to the following sections of the regulations in this Part 706 and 34 CFR Parts 707 and 708 will be incorporated into the solicitation for a laboratory or center contract, to the extent that these sections are consistent with applicable regulations in the FAR and EDAR:

(i) *Part 706.* Sections 706.1, 706.5, 706.10, 706.11, 706.22 and 706.23.

(ii) *Part 707.* Sections 707.1, 707.2, 707.10, 707.11, 707.12, and 707.20.

(iii) *Part 708.* Sections 708.1, 708.10, 708.11, 708.12, and 708.20.

(Authority: 20 U.S.C. 1221e)

§ 706.5 What definitions apply?

(a) *Definitions in EDGAR.* The following terms used in these regulations are defined in 34 CFR 77.1:

Applicant
Application
Award
Department
EDGAR
Grant
Nonprofit
Private
Public
Secretary
State

(b) *Other definitions.* The following definitions also apply to this part:

"Act" means the General Education Provisions Act, as amended.

"Center" means an educational research and development center authorized under section 405(d)(4)(A)(ii) of the Act.

"Contract" means a procurement contract entered into by the Federal government to purchase, rent, lease or otherwise obtain supplies or services from nonfederal sources.

"Educational research" means basic and applied research, development, planning, surveys, assessments, evaluations, investigations, experiments, and demonstrations in the field of education and related fields.

"Institution of higher education" means an institution of higher education as defined in section 1201 of the Higher Education Act of 1965, as amended.

"Institutional operations" means the activities of a laboratory or center conducted under a long-term plan approved by the Secretary.

"Laboratory" means a regional educational laboratory authorized under section 405(d)(4)(A)(i) of the *Act.*

"Mission" means the priority or priorities for the laboratory or center established by the Department in accordance with § 706.3.

"Planning" means activities related to preparing an application for institutional operations of a laboratory or center.

"Special activities" means activities carried out by a Regional Educational Laboratory or a Research and Develoment Center in addition to those included in its institutional operations award.

(Authority: 20 U.S.C. 1141; 1221e)

Subpart B—How Does One Apply for an Award?

§ 706.10 What assurances must an applicant make?

In its application for an award for institutional operations, an applicant shall make assurnces that the laboratory or center involved will—

(a) Be responsible for the conduct of the research and development activities in its approved application;

(b) Prepare a long-range plan relating to the conduct of those research and development activities;

(c) Ensure that information developed as a result of those research and development activities, including new educational methods, practices, techniques, and products, are appropriately disseminated;

(d) Provide technical assistance to the appropriate educational agencies and institutions; and

(e) To the extent practicable, providing training for individuals, emphasizing training opportunities for women and members of minority groups, in the use of new educational methods, practices, techniques and products developed in connection with those activities.

(Authority: 20 U.S.C. 1221e)

§ 706.11 What information is needed for a multi-year project for institutional operations?

In addition to the information required in 34 CFR 75.117, an application for a multi-year project for institutional operations must contain a mission statement for the proposed laboratory or center as a whole. The mission statement must describe goals and objectives for each year of the proposed project and discuse how they relate to the specific activities described in the application.

(Authority: 20 U.S.C. 1221e)

Subpart C—How Does the Secretary Make an Award?

§ 706.20 How does the Secretary evaluate an application?

(a) For each competition the Secretary uses the applicable selection criteria in 34 CFR 707.10, 707.11, 707.12, 708.10, 708.11 or 708.12 to evaluate applications for new awards under this program.

(b) The maximum score for all the criteria in each section is 100 points, including any reserved points to be distributed in accordance with paragraphs (d) and (e) of this section.

(c) Subject to paragraphs (d) and (e) of this section, the maximum possible score for each criterion is indicated in parentheses.

(d) For any competition for laboratory awards, the Secretary distributes 5 additional points to the criterion on budget and cost effectiveness in the applicable section (34 CFR 707.10, 707.11, or 707.12).

(e) For any competition for center awards, the Secretary assigns 10 additional points to one or more of the criteria described in the applicable section (34 CFR 708.10, 708.11, or 708.12).

(Authority: 20 U.S.C. 1221e)

§ 706.21 What additional procedures may the Secretary use to determine which applications will be selected for funding?

In addition to the review procedures in 34 CFR 75.217, the Secretary may use the following procedures to determine which applications will be selected for funding:

(a) After review of applications and preparation of a rank order of the applications in accordance with 34 CFR 75.217(b) and (c) and § 706.20, the Secretary may select applications for further consideration on the basis of the rank order and the factors in 34 CFR 75.217(d). The Secretary informs each applicant whether its application has been chosen for further consideration.

(b)(1) Each applicant chosen for further consideration shall submit any additional information requested by the Secretary.

(2) In requesting additional information of applicants chosen for further consideration, the Secretary—

(i) Provides applicants with a reasonable opportunity to revise and resubmit their applications; and

(ii) Does not provide information to any applicant about the contents of other applications chosen for further consideration, or otherwise provide any information that could give an applicant a competitive advantage over other applicants.

(c) The Secretary may conduct site visits to all or some of the applicants to obtain further information on the activities described in an application and an applicant's capability to perform those activities.

(Authority: 20 U.S.C. 1221e)

§ 706.22 What additional factors may the Secretary consider in selecting an application for a planning award?

In addition to the selection criteria in 34 CFR 707.10 or 708.10 and the additional information in accordance with § 706.21, the Secretary considers the following in making awards for planning of a laboratory or center:

(a) The relationship between the technical merit of the proposed educational research and development program and its cost in comparison to other proposed programs.

(b) The extent to which funding an application would contribute to a collection of laboratory and center activities that are both diverse and balanced.

(Authority: 20 U.S.C. 1221e)

§ 706.23 What additional factors does the Secretary use to select an application for an institutional operations award?

In addition to the criteria in 34 CFR 707.11 and 708.11 and the additional information obtained in accordance with § 706.21, the Secretary considers the following in making awards for institutional operations of a laboratory or center:

(a) The extent to which funding an application would contribute to a collection of laboratory and center activities that are both diverse and balanced; and

(b) The relationship between the technical merit of the proposed program and its cost in comparison to other proposed programs.

(Authority: 20 U.S.C. 1221e)

PART 707—REGIONAL EDUCATIONAL LABORATORIES

Subpart A—General

Sec.
707.1 What regulations apply?
707.2 What geographic regions do the laboratories serve?

Subpart B—How Does the Secretary Make an Award?

707.10 What are the selection criteria for laboratory awards for planning?
707.11 What are the selection criteria for laboratory awards for institutional operations?
707.12 What are the selection criteria for laboratory awards for special activities?

Subpart C—What Conditions Must Be Met by a Grantee?

707.20 What requirements must be met by a grantee?

Authority: 20 U.S.C. 1221e, unless otherwise noted.

Subpart A—General

§ 707.1 What regulations apply?

The regulations in this part and the regulations cited in 34 CFR 706.5 apply to awards for regional educational laboratories.

(Authority: 20 U.S.C. 1221e)

§ 707.2 What geographic regions do the laboratories serve?

(a) A laboratory established under this program serves one of the following geographic regions:

(1) Connecticut, Maine, Massachusetts, New Hampshire, New York, Puerto Rico, Rhode Island, Vermont, Virgin Islands.

(2) Delaware, District of Columbia, Maryland, New Jersey, Pennsylvania.

(3) Kentucky, Tennessee, Virginia, West Virginia.

(4) Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina.

(5) Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, Wisconsin.

(6) Arkansas, Louisiana, New Mexico, Oklahoma, Texas.

(7) Colorado, Kansas, Missouri, Nebraska, North Dakota, South Dakota, Wyoming.

(8) Arizona, California, Nevada, Utah.

(9) Alaska, Idaho, Montana, Oregon, Washington.

(10) American Samoa, Guam, Hawaii, Palau (only to the extent authorized by section 104 of Pub. L. 99–658 and until the effective date of the Compact of Free Association with the Government of Palau), and, to the extent approved by the Secretary, the Marshall Islands and the Federated States of Micronesia (in accordance with section 228 of the Compact of Free Association as set forth in section 201 of Pub. L. 99–239).

(b) For each competition for a laboratory award, the Secretary announces which one or more of the geographic regions designated in § 707.2(a) will be served.

(c) In the event that funding of a particular laboratory serving a region under this program is discontinued, the Secretary may provide additional funds to another laboratory for continuation of laboratory services to States in that region.

(Authority: 20 U.S.C. 1221e)

Subpart B—How Does the Secretary Make an Award?

§ 707.10 What are the selection criteria for laboratory awards for planning?

The Secretary uses the following criteria to evaluate applications for laboratory awards for planning:

(a) *Understanding of the educational settings and issues in the region* (25 points). The Secretary reviews each application to determine the extent to which the applicant—

(1) Understands the educational settings and issues in the region;

(2) Demonstrates knowledge of the strengths and needs of the educational systems—public and private, elementary, secondary, and postsecondary—in the region;

(3) Understands significant trends expected to influence education in the region over the next five years;

(4) Demonstrates knowledge of the capabilities of existing organizations that provide research, dissemination, training, and assistance to educational agencies in the region and how a laboratory can complement their work; and

(5) Understands the barriers and challenges facing a laboratory in the region and ways of overcoming them.

(b) *Organizational ability to conduct planning and design tasks* (20 points). The Secretary reviews each application to determine the organizational ability of the applicant to conduct the required planning and design tasks, including—

(1) The extent to which the applicant has successful experience in planning or conducting multi-State activities related to educational research and development; and

(2) Whether the existing relationships in the region give the applicant access to important groups of clients in the region and contribute to cooperative planning activities.

(c) *Plan of operation* (20 points). The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(1) The quality of the design of the project;

(2) The extent to which the management plan ensures proper and efficient administration of the project;

(3) The degree to which the objectives of the project relate to the purpose of the program;

(4) The adequacy of the applicant's plans to use its resources and personnel to achieve each objective; and

(d) *Quality of key personnel* (20 points).

(1) The Secretary reviews each application to determine the qualifications of the key personnel the applicant plans to use in the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (d)(1)(i) and (ii) of this section will commit to the project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping conditions.

(2) To determine personnel qualifications under paragraphs (d)(1)(i) and (ii) of this section, the Secretary considers—

(i) Experience and training, in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the quality of the project.

(e) *Budget and cost-effectiveness* (0 points). The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project; and

(2) Costs are reasonable in relation to the objectives and activities of the project.

(f) *Evaluation plan* (5 points). The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(1) Are appropriate for the project; and

(2) To the extent possible, are objective and produce data that are quantifiable.

(g) *Adequacy of resources* (5 points). The Secretary reviews each application to determine the adequacy of the resources to be devoted to the project, including facilities, equipment and supplies.

(Authority: 20 U.S.C. 1221e)

§ 707.11 What are the selection criteria for laboratory awards for institutional operations?

The Secretary uses the following criteria to evaluate applications for laboratory awards for institutional operations:

(a) *Understanding of and responsiveness to regional needs* (10 points). The Secretary reviews each application to determine the applicant's understanding of and responsiveness to the needs of the region, including—

(1) The degree to which the applicant demonstrates an understanding of current and projected educational conditions and needs in the region;

(2) The extent to which the applicant proposes adequate mechanisms and procedures for assessing the educational research and development needs and capabilities of the region and for determining laboratory priorities; and

(3) The quality of the applicant's analysis of strategic options and a plan for responding to regional needs.

(b) *Strength of relationships with the region* (15 points). The Secretary reviews each application to determine the strength of the applicant's relationship with the region to be served, including—

(1) The extent to which the proposed governing board's membership reflects regional interests and constituencies;

(i) The quality of the applicant's plans for a governing board designed to take an active role in setting policy and determining the regional agenda of the laboratory;

(ii) The extent to which the applicant's plans for a governance structure provide the organizational autonomy necessary for neutrality, balance, and equity in the selection of clients and the delivery of services;

(2) The quality, extent, and feasibility of proposed collaborative relationships with appropriate organizations, such as—

(i) Public education agencies at State, intermediate, and local levels;

(ii) Educational research and development agencies;

(iii) Organizations providing assistance in the use of research outcomes;

(iv) Clearinghouses, including those compromising the Education Resources Information Clearinghouse system;

(v) Professional associations;

(vi) Institutions of higher education;

(vii) Community-based organizations;

(viii) Business and industry; and

(ix) National Diffusion Network: State and Private School Facilitators; and

(3) Evidence of successful work in the past with organizations listed in paragraph (b)(2) of this section.

(c) *Institutional capability* (15 points). The Secretary reviews each application to determine the qualifications of the applicant to sustain a long-term, high-quality, and coherent program of research and services, including—

(1) The extent to which adequate organizational mechanisms and procedures exist for managing work internally and in collaboration with other institutions;

(2) The degree to which there are adequate procedures for quality control and self-evaluation; and

(3) The degree to which there are adequate plans for effecting improvement in organizational performance and staff development during the project period.

(d) *Plan of operation* (25 points). The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(1) Quality in the design of the project;

(2) The degree to which the management plan ensures proper and efficient administration of the project;

(3) The degree to which the objectives of the project relate to the mission of the laboratory;

(4) The adequacy of the applicant's plans to use its resources and personnel to achieve each objective;

(5) The quality of the applicant's plan to provide equitable services to students and teachers in elementary and secondary public and private schools;

(6) The extent to which proposed activities relate logically to statements of regional needs and priorities;

(7) The degree of coherence of work within and among program activities;

(8) The extent to which the proposed activities complement related efforts inside and outside the region;

(9) The extent of the anticipated contribution of the work to educational improvement; and

(10) The appropriateness of provisions for sequencing and pacing work activities.

(e) *Quality of key personnel* (20 points).

(1) The Secretary reviews each application to determine the qualifications of the key personnel the applicant plans to use in the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (e)(1)(i) and (ii) of this section will commit to the project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(2) To determine personnel qualifications under paragraphs (e)(1) (i) and (ii) of this section, the Secretary considers—

(i) Experience and training, in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the project.

(f) *Budget and cost-effectiveness* (0 points). The Secretary reviews each application to determine the adequacy of the budget and cost effectiveness, including the extent to which—

(1) The budget for the project is adequate to support the project activities; and

(2) Costs are reasonable in relation to the objectives of the project.

(g) *Evaluation plan* (5 points). The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the adequacy of—

(1) A peer review process for evaluating laboratory products, research instruments, and self-evaluation designs;

(2) The participation of the governing board in setting requirements and examining results of laboratory self-evaluation of activities and outcomes;

(3) The methods which document the laboratory's progress in relation to its objectives; and

(4) The methods which document the impact of the laboratory's program on the needs of those served in the designated region.

(h) *Adequacy of resources* (5 points). The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

(Authority: 20 U.S.C. 1221e)

§ 707.12 What are the selection criteria for laboratory awards for special activities?

The Secretary uses the following criteria to evaluate applications for laboratory awards for special projects:

(a) *Strength of relationships with appropriate organizations and agencies in the region* (15 points). The Secretary reviews each application to determine the quality, extent and feasibility of proposed collaborative relationships of the laboratory with organizations listed in § 707.11(b)(2) to the focus and purpose of the special activity.

(b) *Institutional capability* (15 points). The Secretary reviews each application to determine the adequacy of the laboratory's organizational capacity for implementing the special activity.

(c) *Plan of operation* (30 points). The Secretary reviews each application to determine the quality of the plan for implementing the special activity.

(d) *Quality of key personnel* (25 points). The Secretary reviews each application to determine the qualifications of the key personnel, including experience and training related to the objectives of the activity.

(e) *Budget and cost-effectiveness* (0 points). The Secretary reviews each application to determine the adequacy and cost effectiveness of the budget for the special activity.

(f) *Evaluation plan* (5 points). The Secretary reviews each application to determine the quality of the evaluation plan to document accomplishment of the activity's objectives.

(g) *Adequacy of resources* (5 points). The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the activity, including facilities, equipment, and supplies.

(Authority: 20 U.S.C. 1221e)

Subpart C—What Conditions Must Be Met by a Grantee?

§ 707.20 What requirements must be met by a grantee?

An applicant receiving a laboratory award for institutional operations shall meet the following post-award requirements:

(a) Establish a governing board that—

(1) Is the sole entity that—

(i) Guides and directs the laboratory in satisfying the terms and conditions of the award; and

(ii) Determines the regional agenda of the laboratory, consistent with the priority research and development needs established by the Secretary; and

(2) Reflects a balanced representation of the States in the region, as well as the interests and concerns of regional constituencies.

(b) Facilitate communication among educational agencies and individuals in the region.

(c) Identify concerns and priorities through regionally representative governing and advisory structures and activities that help regional clients define their needs.

(d) Conduct applied research, development, and related activities to address regional needs.

(e) Promote the use in the region of research and development results from all sources inside and outside the region, including the laboratory.

(f) Collaborate with centers, other laboratories, the Education Resources Information Clearinghouses, and the National Diffusion Network: State and Private School Facilitators.

(g) Establish a peer review process for evaluating laboratory products, research instruments, and self-evaluation designs.

(Authority: 20 U.S.C. 1221e)

PART 706—RESEARCH AND DEVELOPMENT CENTERS

Subpart A—General

Sec.
706.1 What regulations apply?

Subpart B—How Does the Secretary Make an Award?

706.10 What are the selection criteria for awards for center planning?
706.11 What are the selection criteria for center awards for institutional operations?
706.12 What are the selection criteria for center awards for special activities?

Subparts C—D [Reserved]

Subpart E—What Conditions Must Be Met After an Award?

706.20 What requirements must be met by a grantee?
706.21 What additional factors does the Secretary consider in making continuation awards?

Authority: 20 U.S.C. 1221e, unless otherwise noted.

Subpart A—General

§ 706.1 What regulations apply?

The regulations in this part and the regulations cited in 34 CFR 706.4 apply to awards for research and development centers.

(Authority: 20 U.S.C. 1221e)

Subpart B—How Does the Secretary Make an Award?

§ 706.10 What are the selection criteria for awards for center planning?

The Secretary uses the following criteria to evaluate applications for awards for center planning:

(a) *Mission and strategy* (40 points). The Secretary reviews each application to determine the extent to which the applicant understands the state of knowledge and practice with respect to the problem area and priorities of the center for which the applicant is applying, including the extent to which the applicant shows—

(1) An understanding of the mission of the proposed center;

(2) Knowledge of relevant research and theory;

(3) Knowledge of relevant problems in educational practice;

(4) Familiarity with relevant strategies of research, development, and dissemination; and

(5) Familiarity with strategies for relating to other organizations in educational research, development, and practice.

(b) *Potential to influence practice* (20 points). The Secretary reviews each application to determine if the planning process will address strategies for influencing educational practice, including—

(1) The extent to which the project will address practitioners' needs as identified; and

(2) The extent to which the planning process will result in a design that will yield knowledge that can be used in an educational setting.

(c) *Plan of operation* (10 points). The Secretary reviews each application to determine the qualify of the plan of operation for the project, including—

(1) The quality in the design of the project;

(2) The effectiveness of the management plan; and

(3) The degree to which the research needs of both public and private elementary and secondary schools or institutions of higher education will be addressed.

(d) *Quality of key personnel* (20 points).

(1) The Secretary reviews each application to determine the qualifications of the key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the center's key personnel to be involved in the center's planning;

(iii) The time that each person referred to in paragraphs (d)(1) (i) and (ii) of this section will commit to the project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(2) To determine personnel qualifications, under paragraphs (d)(1) (i) and (ii) of this section the Secretary considers—

(i) Experience and training, in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the quality of the project.

(Authority: 20 U.S.C. 1221e)

§ 706.11 What are the selection criteria for center awards for institutional operations?

The Secretary uses the following criteria to evaluate applications for center awards for institutional operations:

(a) *Mission and strategy* (15 points). The Secretary reviews each application to determine the extent to which the applicant understands the state of knowledge and practice related to the priorities established by the Secretary for the center's mission, including—

(1) The extent of the applicant's understanding of the mission of the proposed center;

(2) How the activities of the proposed center will contribute to the advancement of relevant theory and practice;

(3) The quality of plans to establish effective working relations with other organizations in educational research, development, and practice;

(4) The quality of the plans to address the problems of special populations and of both public and private institutions in terms of the mission of the proposed center; and

(5) The quality of long-range plans for developing an appropriate, coherent, and effective program of educational research, development, and dissemination.

(b) *Institutional capability* (15 points). The Secretary reviews each application to determine the capabilities of the host institution to sustain a long-term, high-quality, and coherent program of research, development, and dissemination, in the mission area, including the extent to which the application shows evidence of—

(1) An appropriate organizational structure and commitment to provide the services of appropriate faculty or staff members from the applicant's organization;

(2) An appropriate mixture of scholarly and practitioner backgrounds in the project staff of the applicant;

(3) Past successes of the applicant in collaborating with individuals and organizations to conduct educational research and development;

(4) Structure and governance arrangements likely to provide appropriate direction, quality control, and cost effective management; and

(5) Availability of appropriate resources for the effective implementation of research and development activities.

(c) *Plan of operation* (15 points). The Secretary reviews each application to determine the quality of the plan of operation for the proposed center, including—

(1) The degree to which the plan for center management ensures proper and efficient administration of the project;

(2) The effectiveness of proposed strategies for providing national leadership within the center's mission;

(3) The extent to which the applicant shows promising strategy for disseminating center products, including the identification of intended audiences and reasonable timelines for dissemination;

(4) The adequacy of the applicant's plans to use its resources and personnel to achieve each objective; and

(d) *Technical soundness* (20 points). The Secretary reviews each application to determine the technical soundness of the proposed research, including—

(1) The extent to which the applicant demonstrates a thorough knowledge of current research and development concepts, theories, and outcomes and relates these to the proposed activities and the mission of the center;

(2) The adequacy of the research design and methodologies to address the research questions posed; and

(3) Evidence that, where appropriate, the perspectives of a variety of disciplines are used.

(e) *Quality of key personnel* (15 points).

(1) The Secretary reviews each application to determine the qualifications of the key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project; and

(iii) The applicant's policy, as part of its nondiscriminatory employment practices, to ensure that its personnel are selected without regard to race, color, national origin, gender, age, or handicapped condition.

(2) To determine personnel qualifications under paragraphs (e)(1)(i) and (ii) of this section the Secretary considers—

(i) Experience and training in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the project.

(f) *Budget and cost-effectiveness* (5 points). The Secretary reviews each application to determine the extent to which the project has an adequate budget and is cost effective, including the extent to which—

(1) The budget for the project is adequate to support the project activities;

(2) The equipment and supplies that the applicant plans to use are adequate; and

(3) Costs are reasonable in relation to the objectives and activities of the project.

(g) *Evaluation plan* (5 points). The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the adequacy of—

(1) The peer review process for evaluating research instruments and products;

(2) The plan for advisory board evaluation of center research activities and resources;

(3) The methods which will be used to document the center's progress in relation to its objectives; and

(4) The methods which will be used to document the impact of the center's program on its target audiences.

(Authority: 20 U.S.C. 1221e)

§ 706.12 What are the selection criteria for center awards for special activities?

The Secretary uses the following criteria to evaluate applications for awards for special activities:

(a) *Mission and strategy* (15 points). The Secretary reviews each application to determine the extent to which the special activity contributes to the current mission of the center, including the extent to which—

(1) The program of work will contribute to the advancement of relevant theory and practice;

(2) The plans to establish working relations, as appropriate, with other organizations in educational research, development, and practice will be effective;

(3) The proposed activities will advance the center's mission;

(4) The proposed activities incorporate plans to address the problems of special populations and of both public and private elementary and secondary schools and institutions of higher education in terms of the mission of the proposed center.

(b) *Capacity of center* (10 points). The Secretary reviews each application to determine whether the institution has the appropriate organization and fiscal resources to complete the special activity, including—

(1) Strong evidence of an effective organizational structure and a commitment to provide the services of appropriate faculty or staff members from the applicant's organization;

(2) Inclusion of an appropriate mixture of scholarly and practitioner backgrounds in the project staff of the applicant;

(3) Structure and governance arrangements likely to provide appropriate direction, quality control, and cost effective management; and

(4) Adequate allotment of resources and facilities.

(c) *Plan of operation* (20 points). The Secretary reviews each application to determine the adequacy of the plan of operation for the activities and how they complement the center's current plans, including—

(1) The extent to which an effective plan of project management ensures proper and efficient administration of the activities;

(2) The extent to which the applicant plans to use its resources and personnel to achieve each objective; and

(3) The degree to which the research needs of both public and private elementary and secondary schools and institutions of higher education are addressed by the proposed research, if appropriate.

(d) *Technical soundness* (25 points). The Secretary reviews each application to determine the technical soundness of the proposed activities, including—

(1) The extent to which the application demonstrates a thorough knowledge of current research and development concepts, theories, and outcomes and relates this knowledge to the proposed activity and the mission of the center;

(2) The adequacy, as appropriate, of the research design and methodologies to address the research questions posed; and

(3) The extent to which, where appropriate, the perspectives of a variety of disciplines are used.

(e) *Quality of key personnel* (15 points). The Secretary reviews each application to determine the qualifications of the key personnel assigned to the special activities project, including the adequacy of—

(1) The qualifications of the project director;

(2) The qualifications of each of the other key personnel to be used in the project; and

(3) The applicant's policy, as part of its nondiscriminatory employment practices will ensure that its personnel are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(4) To determine personnel qualifications under paragraphs (e) (1) and (2) of this section, the Secretary considers—

(i) Experience and training in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the project.

(f) *Budget and cost-effectiveness* (5 points). The Secretary reviews each application to determine the appropriateness of the budget in relation to the proposed activities, including the extent to which—

(1) The budget for the project is adequate to support the project activities;

(2) The facilities' equipment and supplies that the applicant plans to use are adequate; and

BEST COPY AVAILABLE

(3) Costs are reasonable in relation to the objectives and activities of the project.

(Authority: 20 U.S.C. 1221(e))

Subparts C—D [Reserved]

Subpart E—What Conditions Must Be Met After an Award

§ 708.20 What requirements must be met by a grantee?

A grantee receiving an award for institutional operations shall—

(a) Provide national research leadership with respect to the mission of its center;

(b) Establish and maintain a nationally representative advisory panel; and

(c) Collaborate with laboratories, other centers, appropriate Education Resources Information Clearinghouses, and National Diffusion Network: State and Private School Facilitators.

(Authority: 20 U.S.C. 1221e)

§ 708.21 What additional factors does the Secretary consider in making continuation awards?

In making continuation awards under 34 CFR 75.253, the Secretary considers, among other factors, whether—

(a) All products and reports that were due during the budget period that is about to end have been received by the Department;

(b) The project's activities have been carried out in a manner consistent with the previously approved application;

(c) The products and reports are of adequate technical quality; and

(d) The project plans for the subsequent budget period are likely to advance the mission of the center, including the extent to which—

(1) The potential of any new or redirected research project or other center activity within the scope of the project plan will advance the mission of the center;

(2) The center's plan of operation for managing these activities is adequate;

(3) Any new research projects or other activities are technically sound;

(4) The center's personnel are qualified to accomplish the proposed activities; and

(5) The budget is appropriate in relation to the scope of the proposed activities.

BILLING CODE 4000-01-M

DEPARTMENT OF EDUCATION

[CFDA No. 84.117F]

Inviting Applications for New Awards Under the Research and Development Centers Program for Fiscal Year 1988

Purpose: To fund a research and development center to study technology in education, as it affects learning, teaching, evaluation and indicator measures, and organization and management of schools.

Deadline for Transmittal of Applications: June 10, 1988.

Applications Available: March 29, 1988.

Available Funds: $900,000.

Estimated Size of Award: $900,000 (first year).

Number of Awards: 1.

Project Period: Up to 5 years.

Applicable Regulations: (a) The regulations for the Regional Educational Laboratories and Research and Development Centers Programs as proposed to be codified in 34 CFR Parts 706 and 708. Applications will be accepted based on the notice of proposed rulemaking published in this issue of the **Federal Register**. If any substantive changes are made in the final regulations for these programs, applicants will be given an opportunity to revise or resubmit their applications. (b) the Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, and 78.

Priorities: The Secretary has chosen from the list of priorities in proposed 34 CFR 708.3(b) the following as absolute priorities: technology in education; learning; teaching; evaluation and indicator measures, including testing, measurement, and standards of performance; and organization and management of schools, including effective education leadership. Only applications that propose a research and development center addressing all five priority areas will be considered under this competition.

Within this absolute priority the Secretary is interested in research and related activities that will increase school productivity and student achievement by applying advanced technology to problems associated with restructuring of schools, testing and assessment of students, and the teaching and learning of content subjects. However, applications meeting this invitational priority will not receive an absolute or competitive advantage over other applications within the absolute priority.

Weighting for Selection Criteria: The proposed program regulations at 34 CFR 706.20(e) authorize the Secretary to distribute an additional 10 points among the criteria described in the regulations at 34 CFR 708.11 to bring the total to a maximum of 100 points. The Secretary will distribute the reserved 10 points as follows: 5 additional points to the criterion at § 708.11(a) (Mission and strategy), bringing the total for this criterion to 20 points; and 5 additional points to the criterion at § 708.11(b) (Institutional capability), bringing the total for this criterion to 20 points.

For Applications or Information Contact: Dr. Anne E. Sweet, Office of Research, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue NW., Mail Stop 1606, Washington, DC 20208 Telephone Number (202) 357–6043.

There will be a briefing for prospective applicants on April 15, 1988 from 9:30 a.m. to 11:30 a.m. in Room 326, 555 New Jersey Avenue NW., Washington, DC 20208.

Program Authority: 20 U.S.C. 1221e.

Dated: March 8, 1988.

Chester E. Finn, Jr,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

[CFDA No. 84.117C–2]

Inviting Applications for New Awards Under the Research and Development Centers Program for Fiscal Year 1988

Purpose: To support a research and development center to study organization and management of schools, including effective education leadership.

Deadline for Transmittal of Applications: June 10, 1988.

Applications Available: March 29, 1988.

Available Funds: $1,000,000.

Estimated Average Size of Awards: $1,000,000 (per year).

Estimated Number of Awards: 1.

Project Period: Up to 5 years.

Applicable Regulations: (a) The regulations for the Regional Educational Laboratories and Research and Development Centers Programs as proposed to be codified in 34 CFR Parts 706 and 708. Applications will be also accepted based on the notice of proposed rulemaking published in this issue of the **Federal Register**. If any substantive changes are made in the final regulations for these programs, applicants will be given an opportunity to revise or resubmit their applications. (b) The Notice of Proposed Biennial Research Priorities published in the **Federal Register** on November 20, 1987 (52 FR 44625). Applications will be accepted based on the Notice of Proposed Biennial Research Priorities. If any substantive changes affecting the priority chosen for this competition are made in the final biennial research priorities, applicants will be given an opportunity to revise or resubmit their applications. (c) The Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, and 78.

Priorities: The Secretary has chosen from the notice of proposed biennial research priorities published in the **Federal Register** on November 20, 1987 (52 FR 44625) the following as an absolute priority: Management and organization of schools. This priority includes examining the dynamics of educational organizations, management and leadership strategies and how leadership practices can improve instructional programs, school discipline, and school productivity.

Within this absolute priority the Secretary invites applications proposing research and related activities based on theories and findings from disciplines complementary to education administration, such as sociology, management, and public administration. Further, the Secretary invites applications that will examine short-term as well as long-term improvement of practice in K–12 public and private schools, and the linkage of school leadership practices to increases in student achievement. However, applications that meet these invitational priorities will not receive an absolute or competitive advantage over applications within the absolute priority that do not meet these invitational priorities.

Weighting for Selection Criteria: The proposed program regulations at 34 CFR 706.20(e) authorize the Secretary to distribute an additional 10 points among the criteria described in the regulations at 34 CFR 708.11 to bring the total to a maximum of 100 points. The Secretary will distribute the reserved 10 points as follows: 5 additional points to the criterion at § 708.11(a) (Mission and strategy), bringing the total for this criterion to 20 points; and 5 additional points to the criterion at § 708.11(d) (Technical soundness), bringing the total for this criterion to 25 points.

For Applications or Information Contact: Dr. Robert Slater, Office of Research, Office of Educational Research and Improvement, U.S. Department of Education, Room 627E, 555 New Jersey Avenue NW., Washington, DC 20208. Telephone Number (202) 357-6218.

There will be a briefing for prospective applicants on April 15, 1988 from 2:00 p.m. to 4:00 p.m. in Room 326, 555 New Jersey Avenue NW., Washington, DC 20208.

Program Authority: 20 U.S.C. 1221e.

Dated: March 8, 1988.

Chester E. Finn, Jr.,

Assistant Secretary for Educational Research and Improvement.

The President

Proclamation 5777—National Agriculture Day, 1988

Executive Order 12631—Working Group on Financial Markets

Federal Register
Vol. 53, No. 55
Tuesday, March 22, 1988

Presidential Documents

Title 3—

The President

Proclamation 5777 of March 18, 1988

National Agriculture Day, 1988

By the President of the United States of America

A Proclamation

As a Nation we are blessed deeply and in many ways. The agriculture that sustains us is truly one of those blessings. We do well to give thanks for our bountiful crops. They are the yield of our fertile fields; of the skills and cooperation of countless Americans, including farmers, ranchers, scientists, farm organizations, commerce, and government; and, surely, of the liberty in which the American people are free to work, create, and produce for their mutual benefit.

Some of the world's best farmland is here in our country; roughly half of the land in the contiguous United States has a capacity for crop production. Our bounty supplies needs both at home and abroad; today, one American farmer produces enough food and fiber for 114 people. Our agricultural production, processing, and marketing provide jobs, generate wealth, and strengthen our economy, our standard of living, and our position in world trade markets. Thanks to our agricultural efficiency, American consumers, on average, spend less of their income on food than do citizens of any other nation.

As we give thanks for our rich harvests, let us be sure to express gratitude to all those in agriculture and its related endeavors who through the years have contributed so much to our Nation and the world and who continue to shape and to share the spirit and the heritage of the American people.

The Congress, by Senate Joint Resolution 265, has designated March 20, 1988, as "National Agriculture Day" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 20, 1988, as National Agriculture Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of March, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Executive Order 12631 of March 18, 1988

Working Group on Financial Markets

By virtue of the authority vested in me as President by the Constitution and laws of the United States of America, and in order to establish a Working Group on Financial Markets, it is hereby ordered as follows:

Section 1. *Establishment.* (a) There is hereby established a Working Group on Financial Markets (Working Group). The Working Group shall be composed of:

(1) the Secretary of the Treasury, or his designee;

(2) the Chairman of the Board of Governors of the Federal Reserve System, or his designee;

(3) the Chairman of the Securities and Exchange Commission, or his designee; and

(4) the Chairman of the Commodity Futures Trading Commission, or her designee.

(b) The Secretary of the Treasury, or his designee, shall be the Chairman of the Working Group.

Sec. 2. *Purposes and Functions.* (a) Recognizing the goals of enhancing the integrity, efficiency, orderliness, and competitiveness of our Nation's financial markets and maintaining investor confidence, the Working Group shall identify and consider:

(1) the major issues raised by the numerous studies on the events in the financial markets surrounding October 19, 1987, and any of those recommendations that have the potential to achieve the goals noted above; and

(2) the actions, including governmental actions under existing laws and regulations (such as policy coordination and contingency planning), that are appropriate to carry out these recommendations.

(b) The Working Group shall consult, as appropriate, with representatives of the various exchanges, clearinghouses, self-regulatory bodies, and with major market participants to determine private sector solutions wherever possible.

(c) The Working Group shall report to the President initially within 60 days (and periodically thereafter) on its progress and, if appropriate, its views on any recommended legislative changes.

Sec. 3. *Administration.* (a) The heads of Executive departments, agencies, and independent instrumentalities shall, to the extent permitted by law, provide the Working Group such information as it may require for the purpose of carrying out this Order.

(b) Members of the Working Group shall serve without additional compensation for their work on the Working Group.

(c) To the extent permitted by law and subject to the availability of funds therefor, the Department of the Treasury shall provide the Working Group with such administrative and support services as may be necessary for the performance of its functions.

Ronald Reagan

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 15; at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC
RESERVATIONS: Carolyn Payne, 202-523-3187

BOSTON, MA

WHEN: April 19; at 9 a.m.
WHERE: Thomas P. O'Neill, Jr. Federal Building,
Auditorium,
10 Causeway Street,
Boston, MA.
RESERVATIONS: Call the Boston Federal Information Center, 617-565-8123

Title 3—

The President

Presidential Determination No. 88-11 of March 7, 1988

Determination Under Section 2(b)(2) of the Export-Import Bank Act of 1945, as Amended—People's Republic of China

Memorandum for the Secretary of State

Pursuant to Section 2(b)(2) of the Export-Import Bank Act of 1945, as amended, I determine that it is in the national interest for the Export-Import Bank of the United Sates to extend credit in the amount of approximately $151,000,000 to the People's Republic of China in connection with the purchase of equipment and services for the construction of the Shidongkou coal-fired power plant.

You are authorized and directed to report this determination to the Congress and publish it in the Federal Register.

Ronald Reagan

Proclamation 5778 of March 21, 1988

Afghanistan Day, 1988

By the President of the United States of America

A Proclamation

March 21 marks the beginning of a new year in a bitter decade for the people of Afghanistan. This may well be a climactic year, and we hope with the Afghan people that it will see the complete withdrawal of Soviet troops and self-determination for the people of Afghanistan. For more than 8 years, the courageous Afghans have suffered and died under the boot of the Soviet Army, which invaded to prop up an illegitimate, unrepresentative, and discredited regime. Let us take this occasion, therefore, to remember the sorrow and to salute the heroism of the Afghan people. They have fought valiantly and against heavy odds to free themselves from the yoke of oppression—from assaults on their liberty, their sovereignty, their dignity, their lives, and their very way of life.

It now appears possible that the tenacity and tremendous sacrifices of the Afghan people will bear fruit in the coming period. The Soviet leadership seems to have finally recognized that the will of the Afghan people to be free cannot be broken. Indications of Soviet willingness to withdraw are an important step forward, though their seriousness can be proven only by the actual, and total, removal of Soviet troops from Afghan soil. To be acceptable, Soviet withdrawal must be complete, irreversible, and verifiable.

Our objectives have been and remain: prompt and complete withdrawal of Soviet forces; restoration of Afghanistan to an independent, nonaligned status; self-determination for the Afghans; and return of refugees in safety and honor. I reiterated this commitment and our support for the brave Afghan Mujahidin in my meeting last November with Afghan Alliance leader Yunis Khalis. I said the same to General Secretary Gorbachev last December.

The United States Government has also repeatedly told the Soviet leadership that any guarantees of noninterference that they and we would undertake must be symmetrical. An agreement at Geneva must not serve as a pretext for continued Soviet military support to the discredited minority Kabul regime. Some 120 members of the United Nations have voted year after year for self-determination in Afghanistan, recognizing that the present government in Kabul does not represent the Afghan people but is a direct result of outside interference. The Mujahidin and the refugees are the true voice of the Afghan people.

I am proud of the strong support provided the Afghan cause over the past 7 years by my Administration, by the United States Congress, and by the American people. Our commitment to the freedom of the Afghan people will not end should the Soviets withdraw. We will join other nations and international organizations to help the Afghans rebuild their country and their institutions; millions of men, women, and children will be returning to a country devastated by Soviet aggression.

The United States has consistently supported the Afghans in their long ordeal. That support will continue. We will rejoice with them when true peace is achieved and Afghanistan once again takes it rightful place in the community of nations. Let us pray and strive to make sure that this moment of liberation will come soon.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim March 21, 1988, as Afghanistan Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 21st day of March, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 53, No. 56
Wednesday, March 23, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

Raisins Produced From Grapes Grown in California; Final Free and Reserve Percentages for the 1987–88 Crop Year for Certain Varietal Types of Raisins

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule invites comments on the establishment of final free and reserve percentages for Natural (sun-dried) Seedless, Dipped Seedless, and Oleate and Related Seedless raisins from California's 1987 raisin crop production. These percentages are intended to stabilize supplies and prices, and help counter the destabilizing effects of the burdensome oversupply situation facing the raisin industry. Raisins in the free percentage category may be shipped immediately to any market, while reserve raisins must be held by handlers in a reserve pool for the account of the Raisin Administrative Committee (Committee), the administrative agency responsible for local administration of the federal marketing order regulating the handling of raisins produced from grapes grown in California. Under the order, reserve raisins may be: Sold at a later date by the Committee to handlers for free use; used in diversion programs; exported to authorized countries; carried over as a hedge against a short crop the following year; or disposed of in other outlets noncompetitive with those for free raisins.

DATE: Interim final rule effective August 1, 1987 through July 31, 1988. Comments which are received by April 22, 1988, will be considered prior to any finalization of this interim final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, Room 2085, South Building, P.O. Box 96456, Washington, DC 20090-6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Patricia A. Petrella, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Room 2525, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Order No. 989 (7 CFR Part 989), as amended, regulating the handling of raisins produced from grapes grown in California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This interim final rule has been reviewed under Executive Order 12291 and Departmental Regulation No. 1512–1 and has been determined to be a "non–major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 23 handlers of California raisins subject to regulation under the raisin marketing order, and approximately 5,000 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of raisins may be classified as small entities.

The order prescribes procedures for computing trade demands and preliminary and final percentages that establish the amounts of raisins that can be marketed throughout the season. The regulations apply to all handlers of California raisins. While this action may restrict the amount of raisins that enter domestic markets, final free and reserve percentages are intended to lessen the impact of the projected oversupply situation facing the industry and promote stronger marketing conditions, thus stabilizing prices and supplies and improving grower returns. In addition to the quantity of raisins released under the preliminary percentages and to be released under the final percentages, the order specifies methods to make available additional raisins to handlers by authorizing sales of reserve pool raisins for use as free tonnage raisins under "10 plus 10" offers, export sales, and school lunch programs.

The U.S. Department of Agriculture's Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders (Guidelines) specify that 110 percent of recent years' sales be made available to primary markets each season. This requirement will be met by the establishment of final percentages which release 100 percent of the computed trade demand for each varietal type, and the additional release of such raisins to handlers under "10 plus 10" offers. The "10 plus 10" offers are two simultaneous sales of reserve pool raisins which are made available to handlers each season. For each such offer, at least 10 percent of the prior year's shipments are made available for free use.

Pursuant to § 989.54(a), the Committee met on August 13, 1987, to review shipment data, inventory data, and other matters relating to the supply of raisins of all varietal types. The Committee computed a trade demand for each varietal type for which a free tonnage percentage may be recommended using a formula prescribed in that paragraph. The trade demand is 90 percent of the prior year's shipments of free tonnage and reserve tonnage raisins sold for free use for each varietal type into all market outlets, adjusted by subtracting the carryin of each varietal type on August 1 of the current crop year and adding to the trade demand the desirable carryout for each varietal type at the end of that crop year. The order prescribes that the desirable carryout for the 1987–88 crop year shall be 60,000 tons for Natural Seedless and 1,500 tons for Dipped Seedless and Oleate and Related Seedless raisins. The carryins used for adjusting the trade demands were 91,854, 4,177, and 2,659 tons, respectively, for Natural (sun-dried) Seedless, Dipped Seedless, and Oleate and Related Seedless raisins.

In accordance with these provisions, the Committee computed and announced a trade demand of 236,105 tons for Natural (sun-dried) Seedless raisins, 4,501 tons for Dipped Seedless raisins, 994 tons for Oleate and Related Seedless raisins, 12,983 tons for Golden Seedless raisins, 439 tons for Sultanas, −69 tons for Muscat raisins, 3,469 tons for Zante Currant raisins, and 1,210 tons for Monukka raisins.

As required under § 989.54(b), the Committee met on October 5, 1987, and computed and announced preliminary crop estimates and preliminary free and reserve percentages for: Natural (sun-dried) Seedless of 320,836 tons and 48 percent free, 52 percent reserve; Dipped Seedless of 5,531 tons and 53 percent free, 47 percent reserve; and Oleate and Related Seedless of 1,910 tons and 34 percent free, 66 percent reserve. Handlers operate under the preliminary percentages until the industry is able to obtain a more accurate estimate of the raisin production for that year. The field price for all three varietal types had been established. Hence, in accordance with § 989.54(b), the preliminary free and reserve percentages computed and announced by the Committee for the three varietal types released 85 percent of each varietal type's computed trade demand. Preliminary percentages were not announced for the other varietal types; therefore, the total available supply was released for each.

Pursuant to § 989.54(c), the Committee may adopt interim free and reserve percentages. Interim percentages may release up to 99 percent of the computed trade demand for each varietal type for which preliminary percentages have been computed and announced. On November 30, 1987, for Oleate and Related Seedless raisins, interim percentages of 90 percent free and 10 percent reserve were adopted. Interim percentages for Natural (sun-dried) Seedless of 66 percent free and 34 percent reserve and for Dipped Seedless of 72 percent free and 28 percent reserve, were computed and announced on January 21, 1988, when final percentages were recommended. The interim percentages for Natural (sun-dried) Seedless and Dipped Seedless released 99 percent of their computed trade demands, while for Oleate and Related Seedless raisins 97 percent of the trade demand was released.

Under § 989.54(d) of the order, the Committee is required to recommend to the Secretary, no later than February 15 of each crop year, final free and reserve percentages which, when applied to the final production estimate of a varietal type, will tend to release the full trade demand for any varietal type for which preliminary or interim percentages have been computed and announced. At that time, the Committee has more information available, including the final crop estimate and other information, on which to base the determination of final free and reserve percentages.

On January 21, 1988, the Committee met and recommended final free and reserve percentages for the 1987–88 crop year and made its final production estimates for Natural (sun-dried) Seedless, Dipped Seedless, and Oleate and Related Seedless raisins.

The Committee's final estimate of 1987–88 production of Natural (sun-dried) Seedless raisins totaled 350,630 tons, which includes the 1987 diversion tonnage of 30,000 tons (29,794 tons more than its preliminary estimate). Dividing the computed trade demand of 236,105 tons by the final estimate of production results in a final free percentage of 67.33 percent. The Committee rounded that percentage to 67 percent which results in a final reserve percentage of 33 percent.

For Dipped Seedless raisins, the Committee's final estimate of 1987–88 production totaled 6,150 tons (619 tons more than its preliminary estimate). Dividing the computed trade demand of 4,501 tons by the final estimate of production results in a final free percentage of 73.18 percent. The Committee rounded that percentage to 73 percent which results in a final reserve percentage of 27 percent.

For Oleate and Related Seedless raisins, the Committee's final estimate of 1987–88 production totaled 1,071 tons (839 tons less than its preliminary estimate). Dividing the computed trade demand of 994 tons by the final production estimate results in a free percentage of 92.81 percent. The Committee rounded that percentage to 93 percent which results in a final reserve percentage of 7 percent.

Based on available information, the Administrator of the AMS has determined that the issuance of this interim final rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant information presented, including the Committee's recommendations, and other information, it is found that this regulation, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The relevant provisions of this part require that the percentages designated herein for the 1987–88 crop year apply to all Natural (sun-dried) Seedless, Dipped Seedless and Oleate and Related Seedless raisins acquired from the beginning of that crop year; (2) handlers are currently marketing 1987–88 crop raisins of these varietal types and this action must be taken promptly to achieve its purpose of making the full trade demand quantities computed by the Committee for these varietal types available to handlers; and (3) handlers are aware of this action which was recommended by the Committee at an open meeting and need no additional time to comply with these percentages.

List of Subjects in 7 CFR Part 989

Marketing agreements and orders, Grapes, Raisins, California.

For the reasons set forth in the preamble, 7 CFR Part 989 is amended as follows:

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 989 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 989.240 is added to Subpart—Supplementary Regulations to read as follows:

(This section will not appear in the annual Code of Federal Regulations):

§ 989.240 Final free and reserve percentages for the 1987–88 crop year.

The final percentages of standard Natural (sun-dried) Seedless, Dipped Seedless, and Oleate and Related Seedless raisins acquired by handlers during the crop year beginning August 1, 1987, which shall be free tonnage and reserve tonnage, respectively, are designated as follows:

	Free percentage	Reserve percentage
Natural (sun-dried) Seedless	67	33
Dipped Seedless	73	27
Oleate and Related	93	7

Dated: March 18, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

Reconsideration of Enforcement Policy Provision Involving Reopening Closed Cases

AGENCY: Nuclear Regulatory Commission.

ACTION: Policy statement: Modification.

SUMMARY: The NRC is publishing a minor modification to its Enforcement Policy to clarify its policy on reopening closed enforcement actions. This policy is codified as Appendix C to 10 CFR Part 2.

DATES: Since this action concerns a general statement of policy, no prior notice is required and, hence, this modification to the Enforcement Policy is effective March 23, 1988. Comments may be submitted on or before May 23, 1988.

ADDRESSES: Send comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. ATTN: Docketing and Service Branch. Hand deliver comments to: Room 1121, 1717 H Street NW., Washington, DC between 7:30 a.m. to 4:15 p.m.

Copies of comments may be examined at the NRC Public Document, 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: James Lieberman, Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, (301-492-0741).

SUPPLEMENTARY INFORMATION: The Commission on September 23, 1987 issued a revised Enforcement Policy (52 FR 36215, September 28, 1987) in which Section V.F. addressed reopening closed enforcement actions. Section V.F. provided that if significant new information is received which indicates that a previous enforcement sanction was incorrectly applied, the action could be reopened. The policy also stated that (1) reopening should occur only if remedial action is necessary to abate a continued harm or if the new information shows that the violation was less serious than originally believed or that the violation did not occur, and (2) normally actions would not be reopened where the only change to the prior action would be to increase the severity level of a violation or to impose or increase a civil penalty.

While comments submitted in response to the September 28, 1987 Policy Statement were generally favorable to the wording of section V.F, the Commission has reconsidered this policy because it implies that an enforcement action would not normally be reopened to increase a sanction even if such action was warranted. For example, reopening may be warranted to increase a sanction such as civil penalty on the basis of new information if the reason NRC did not have the information initially was because the licensee misled the NRC by providing false information or withholding the information from the NRC. In such a case, any prejudice to the licensee is the result of its own action. Reopening would be justified under the terms of the current enforcement policy to impose the appropriate sanction. Not to do so would reward a licensee's failure to cooperate with the NRC, which of course cannot be tolerated.

It should be noted that the issue here is reconsidering the existence of the original violation or the circumstances and severity of the original violation. If the new information supports a different violation, then reopening is not the issue because a new and different enforcement action can be taken.

Whether or not to reopen a completed enforcement action requires the exercise of sound discretion and judgment. It is difficult in the absence of a specific case to establish what action if any should be taken as a result of new information. Considerations in making a determination to reopen a closed case might include: Whether the licensee knew or should have known of the information at the time the original action was closed, whether the doctrine of *res judicata* applies, the opportunities available to learn of the information earlier and the reason for NRC not obtaining it earlier, the significance of the new information, the extent of the charge to the enforcement action warranted by the new information, the resources necessary to reopen the case, the need for an increased sanction to provide additional deterence for the impacted licensee and other similar licensees, whether the licensee acquiesced to the original enforcement action, whether remedial action is needed to abate the effect of the original violation, whether the original violation in fact occurred, and whether the licensee would be severely or unjustly prejudiced by a reopening decision (apart from receiving a more severe sanction).

Recognizing that this is an issue which arises infrequently and that there are many considerations relevant to a reopening decision on the basis of new information, the Commission has determined to modify Section V.F. of the Enforcement Policy to emphasize that the decision to reopen a case is to be made on a case-by-case basis.

List of Subjects in 10 CFR Part 2

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Penalty, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is adopting the following modification to its statement of Enforcement Policy in Appendix C to 10 CFR Part 2.

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

1. The authority citation for Part 2 continues to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87–615, 76 Stat. 409 (U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552. Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 933, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871). Sections 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2233, 2239). Section 2.105 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Sections 2.200–2.206 also issued under secs.

186, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846). Sections 2.600–2.606 also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853 as amended (42 U.S.C. 4332). Sections 2.700a, 2.719 also issued under 5 U.S.C. 554. Sections 2.754, 2.760, 2.770 also issued under 5 U.S.C. 557. Section 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552. Sections 2.800 and 2.808 also issued under 5 U.S.C. 553. Section 2.809 also issued under 5 U.S.C. 553 and sec. 29, Pub. L. 85–256, 71 Stat. 579, as amended (42 U.S.C. 2039). Subpart K also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134, Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Appendix A also issued under sec. 6, Pub. L. 91–560, 84 Stat. 1473 (42 U.S.C. 2135). Appendix B also issued under sec. 10, Pub. L. 99–240, 99 Stat. 1842 (42 U.S.C. 2021b et seq.).

2. Section V.F. of Appendix C is revised to read as follows:

Appendix C—General Statement of Policy and Procedure for NRC Enforcement Actions

* * * * *

V. Enforcement Actions * * *

F. Reopening Closed Enforcement Actions

If significant new information is received or obtained by NRC which indicates that an enforcement sanction was incorrectly applied, consideration may be given, dependent on the circumstances, to reopening a closed enforcement action to increase or decrease the severity of a sanction or to correct the record. Reopening decisions will be made on a case-by-case basis, are expected to occur rarely, and require the specific approval of the Deputy Executive Director for Regional Operations.

10 CFR Part 50

Final Commission Policy Statement on Maintenance of Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Final policy statement.

SUMMARY: The Commission believes safety can be enhanced by improving the effectiveness of maintenance programs throughout the nuclear industry. The Commission is proceeding with rulemaking consistent with this belief. This Policy Statement is being issued to provide guidance to the industry while the rulemaking proceeds.

EFFECTIVE DATE: This Final Policy Statement is effective March 23, 1988.

FOR FURTHER INFORMATION CONTACT: Jack W. Roe, Director, Division of Licensee Performance and Quality Evaluation, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–1004.

Policy

Background

The Commission has a program to continually evaluate the operational performance of nuclear power plants. Analysis of operational events has shown that, in some cases, nuclear power plant equipment is not being maintained at a level which ensures, with a high degree of reliability, that the equipment will perform its intended function when required. A limited NRC examination of nuclear power plant maintenance programs has found a wide variation in the effectiveness of these programs. Inadequate maintenance at some plants has been a significant contributor to plant reliability problems and, hence, is of safety concern. The Commission believes safety can be enhanced by improving the effectiveness of maintenance programs throughout the nuclear industry. The Commission is proceeding with rulemaking consistent with this belief. This Policy Statement is being issued to provide guidance to the industry while the rulemaking proceeds.

Policy Statement

It is the objective of the Commission that all components, systems and structures of nuclear power plants be maintained so that plant equipment will perform its intended function when required. To accomplish this objective, each licensee should develop and implement a maintenance program which provides for the periodic evaluation, and prompt repair of plant components, systems, and structures to ensure their availability.

Definition of Maintenance

The Commission defines maintenance as the aggregate of those functions required to preserve or restore safety, reliability, and availability of plant structures, systems, and components. Maintenance includes not only activities traditionally associated with identifying and correcting actual or potential degraded conditions, i.e., repair, surveillance, diagnostic examinations, and preventive measures; but extends to all supporting functions for the conduct of these activities. These activities and functions are listed below under "Activities Which Form the Basis of a Maintenance Program."

Maintenance Programs

Each commercial nuclear power plant should develop and implement a well-defined and effective program to assure that maintenance activities are conducted to preserve or restore the availability, performance and reliability of plant structures, systems, and components. The program should clearly define the components and activities included, as well as the management systems used to control those activities. Further, the program should include feedback of specific results to ensure corrective actions, provisions for overall program evaluation, and the identification of possible component or system design problems.

Activities Which Form the Basis of a Maintenance Program

An adequate program should consider:

- Technology in the areas of
  —Corrective maintenance,
  —Preventive maintenance,
  —Predictive maintenance,
  —Surveillance;
- Engineering support and plant modifications;
- Quality assurance and quality control;
- Equipment history and trending;
- Maintenance records;
- Management of parts, tools, and facilities;
- Procedures;
- Post-maintenance testing and return-to-service activities;
- Measures of overall program effectiveness;
- Maintenance management and organization in the areas of
  —Planning,
  —Scheduling,
  —Staffing,
  —Shift coverage,
  —Resource allocation;
- Control of contracted maintenance services;
- Radiological exposure control (ALARA);
- Personnel qualification and training;
- Internal communications between the maintenance organization and plant operations and support groups;
- Communications between plant and corporate management and the maintenance organization.

Maintenance recommendations or requirements of individual vendors should receive appropriate attention in the development of the maintenance program.

Future Commission Action

The Commission intends this Policy Statement to provide guidance to the industry in improving maintenance programs for their power reactor facilities. The Commission will continue to enforce existing requirements including those that address maintenance practices and will take whatever action that may be necessary to protect health and safety.

The Commission expects to publish a Notice of Proposed Rulemaking in the near future that will establish basic requirements for plant maintenance programs. We believe that the contents and bounds of the proposed rule will fall within the general framework described in this Policy Statement.

Consideration will also be given to industry-wide efforts that already have been initiated. We encourage interested parties to provide their views on this important subject to the Commission, even at this early stage of the rulemaking process. Any notice of proposed rulemaking that is published will provide, of course, a period for public comment on its contents.

Dated at Washington, DC, this 17th day of March, 1988.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 88–6334 Filed 3–22–88; 8:45 am]

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket Number 86–ANE–21; Amdt. 39–5869]

Airworthiness Directives; General Electric (GE) CT7–5A, –5A1, and –5A2 Turbopropeller Engines as Installed in Saab-Fairchild SF340A Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires the installation of a second overspeed protection system on certain GE CT7–5A series turbopropeller engines as installed in Saab-Fairchild SF340A aircraft. This AD also supersedes AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986). This AD is needed to prevent engine power turbine (PT) overspeed and resulting uncontained failure caused by reaction of the fuel control to an erroneous PT speed signal during ground operation with the bottoming governor (BG) enabled.

DATES: *Effective*—May 9, 1988.

Compliance Schedule—As prescribed in the body of the AD.

Incorporation by Reference—Approved by the Director of the Federal Register as of May 9, 1988.

ADDRESSES: The applicable service bulletins (SB's) may be obtained from Dowty Rotol Limited, Cheltenham Road East, Gloucester, England GL2 9QH; General Electric Company, 1000 Western Avenue, Lynn, Massachusetts 01910; and Saab-Scania AB, S–581 88, Linkoping, Sweden.

A copy of each SB is contained in Rules Docket Number 86–ANE–21, in the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Barbara Garian, Engine Certification Branch, ANE–141, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7086.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include a new AD requiring the installation of a second overspeed protection system on certain GE CT7–5A series turbopropeller engines as installed in Saab-Fairchild SF340A aircraft was published in the **Federal Register** on October 16, 1987, (52 FR 38458).

The proposal was prompted by an engine PT overspeed and resulting uncontained failure caused by reaction of the fuel control to an erroneous PT speed signal during ground operation with the BG enabled.

Since this condition is likely to exist or develop on other engines of the same type design, a new AD is being issued that requires installation of a second overspeed protection system on GE CT7–5A series turbopropeller engines as installed in Saab-Fairchild SF340A aircraft. This AD also requires incorporation of engine BG deactivation switches in the power lever quadrant to prevent an adverse yaw condition in the aircraft that could occur due to a mismatched aircraft power condition resulting from an uncommanded power increase of one engine. This would also prevent the crew from misinterpreting the uncommanded power increase of one engine as a failure of the other engine. This AD supersedes AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986).

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received. Accordingly, the proposal is adopted without change.

AD 86–10–51, Amendment 39–5473 (51 FR 44439), issued November 18, 1986, requires that the engine BG be disabled when the aircraft power lever is positioned in the beta range (below flight idle). The AD was needed to prevent PT overspeed and resulting uncontained failure caused by reaction of the fuel control to an erroneous PT speed signal during ground operation with the BG enabled.

AD 86–10–51 provides interim instructions to prevent PT overspeed and uncontained failure. Since these instructions require special aircraft and engine operating procedures which increase crew workload and invalidate the constant torque on takeoff function, the FAA has determined that a second overspeed protection system with an improved level of safety precludes the need for these interim instructions and returns the aircraft and engine to pre-AD 86–10–51 operation.

Conclusion

The FAA has determined that this regulation affects 107 aircraft all of which are in compliance with this AD. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is minimal; and (4) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Engines, Air transporation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD) which supersedes AD 86–10–51, Amendment 39–5473 (51 FR 44439; December 9, 1986):

General Electric: Applies to General Electric (GE) CT7–5A, –5A1, and –5A2 turbopropeller engines as installed in Saab-Fairchild SF340A aircraft.

Compliance is required as indicated, unless already accomplished.

To prevent power turbine (PT) overspeed resulting in an uncontained failure or adverse aircraft yaw due to reaction of the fuel control to an erroneous PT speed signal during ground operation with the bottoming governor (BG) enabled, accomplish the following no later than May 16, 1988:

(a) Remove propeller overspeed governor (OSG), Dowty Rotol (DR) Part Number (P/N) 661001001, and replace with OSG, DR P/N 661001002, in accordance with procedures contained in DR Service Bulletin (SB) SF340–61–11, dated October 8, 1986.

(b) Install cable, GE P/N 6068T47P01, between the propeller OSG and the hydromechanical unit in accordance with GE CT7 Turboprop SB 74–09, dated October 10, 1986.

(c) Install engine BG deactivation switches, Mod Kit Saab SF340–76–018–01, in the power lever quadrant in accordance with procedures contained in Saab SB SF340–76–018, dated October 24, 1986.

(d) Upon accomplishment of paragraphs (a) through (c) above:

(1) Remove from the SF340A Aircraft Flight Manual (AFM) the BG disabling procedures required by AD 86–10–51, paragraphs (a)(1) and (a)(2).

(2) Discontinue operating in accordance with the procedures listed in AD 86–10–51, paragraph (b).

Note: Subsequent to compliance with this AD, aircraft operation shall be conducted in accordance with the latest AFM revision.

(e) Aircraft may be ferried in accordance with the provisions of Federal Aviation Regulations (FAR) 21.197 and 21.199 to a base where the AD can be accomplished.

(f) Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

(g) Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance time specified in this AD.

Dowty Rotol SB SF340–61–11, dated October 8, 1986; General Electric CT7 Turboprop SB 74–09, dated October 10, 1986; and Saab SB SF340–76–018, dated October 24, 1986, identified and described in this document are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552 (a)(1). All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Dowty Rotol Limited, Cheltenham Road East, Gloucester, England GL2 9HQ; General Electric Company, 1000 Western Avenue, Lynn, Massachusetts 01910; and Saab-Scania AB, S–581 88, Linkoping, Sweden.

This document may also be examined at the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, Rules Docket Number 86–ANE–21, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

This amendment supersedes Amendment 39–5473 (51 FR 44439; December 9, 1986), AD 86–10–51.

This amendment becomes effective on May 9, 1988.

Issued in Burlington, Massachusetts, on February 26, 1988.

Lawrence C. Sullivan,

Acting Director, New England Region.

[FR Doc. 88–6251 Filed 3–22–88; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 88–ANE–01; Amdt. 39–5865]

Airworthiness Directive; Glasflugel H301 Libelle, H301B Libelle, Standard Libelle (Standard Libelle 201), Standard Libelle 201B, Standard Libelle 203, Kestrel, 604, and BS–1 Model Gliders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to Glasflugel Libelle, Kestrel, 604, and BS–1 model gliders which requires inspection and replacement of specified rudder cables. This action was prompted by the findings of certain sleeves not meeting specifications which could result in a reduction of cable strength. This condition, if not corrected, could result in the loss of rudder control.

DATES: *Effective*—March 23, 1988.

Compliance Schedule—As prescribed in the body of the AD.

Incorporation by Reference—Approved by the Director of the Federal Register as of March 23, 1988.

ADDRESSES: The Technical Note referenced in this amendment may be obtained from Hansjorg Streifeneder Glasfiaser Flugzeug Service GmbH, Hofener Weg, 7431, Grabenstetten, Federal Republic of Germany.

A copy of the Technical Note is contained in the Rules Docket, Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined weekdays, except federal holidays, between 8:00 a.m. and 4:30 p.m..

FOR FURTHER INFORMATION CONTACT: Munroe Dearing, Brussels Aircraft Certification Office, AEU–100, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, 15 Rue de la Loi B–1040 Brussels, Belgium; telephone 513.38.30, extension 2710, or John J. Maher, New York Aircraft Certification Office, ANE–172, Aircraft Certification Division, Federal Aviation Administration, New England Region, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; Telephone (516) 791–6221.

SUPPLEMENTARY INFORMATION: Hansjorg Streifeneder has determined that on hemp core rudder cables, sleeve installations have not been according to specification, causing a reduction in cable strength which, if not corrected, could result in the loss of rudder control. The manufacturer made this determination from the results of inspections required by German AD 71–10 (FAA AD 71–16–06). The manufacturer has issued Technical Note (TN) No. 201–26, 301–33, 401–20, and 501–4, dated March 15, 1987, which specified inspection and replacement of those cables with a different cable and sleeve installation and also calls for continuation of German AD71–10. The Luftahrt-Bundesamt (LBA), who has responsibility to maintain the continuing airworthiness of these gliders in the Federal Republic of Germany, has issued an AD requiring compliance with the provisions of Hansjorg Streifeneder TN No. 201–26, 301–33, 401–20, and 501–4, on gliders operated under the Federal Republic of Germany registration. The FAA relies upon the certification of the LBA, combined with FAA review of pertinent documentation, in finding compliance of the design of these gliders with the applicable United States airworthiness requirements, and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of Hansjorg Streifender TN No. 201–26, 301–33, 401–20, and 501–4, and the issuance of LBA AD No. 87–83 Glasflugel on Glaflugel Models H301 Libelle, H301B Libelle, Standard Libelle (Standard Libelle 201), Standard Libelle

201B, Standard Libelle 203, Kestrel, 604, and BS–1 model gliders. Based on the foregoing, the FAA has determined that the condition addressed by Hansjorg Streifeneder TN No. 201–26, 301–33, 401–20, and 501–4, is an unsafe condition that may exist on other products of the same type design certificated for operation in the United States. Therefore, an AD is being issued to require initial and repetitive inspections and replacement of hemp core rudder cables with a different cable and sleeve installation on Glasflugel Models H301 Libelle, H301B Libelle, Standard Libelle (Standard Libelle 201), Standard Libelle 201B, Standard Libelle 203, Kestrel, 604, and BS–1 model gliders. The compliance requirements of existing AD, 71–16–06, remain in effect for those cables not addressed by the compliance requirements of this AD.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical, and good cause exists for making this amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by Reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

Glasflugel: Applies to Models H301 Libelle, H301B Libelle, Standard Libelle (Standard Libelle 201), Standard Libelle 201B, Standard Libelle 303, Kestrel, 604, and BS–1 model gliders certificated in any category equipped with DIN specification 655, 6×7 rudder cables with a diameter of 2.5 mm (0.098 in.) having a hemp core.

Compliance is required as indicated, unless already accomplished.

To prevent failures in the ruddar control system, accomplish the following:

(a) Within the next 25 hours' time in service after the effective date of this AD, unless accomplished within the previous 75 hours' time in service, and thereafter at intervals not to exceed 100 hours' time in service after the last inspection; visually inspect the rudder cables for wear, fraying, corrosion, twisting or other damage.

(b) If damaged cables are found during the inspection required by Paragraph (a) of this AD, before further flight, replace the damaged cables with the cables specified in paragraph (c).

(c) Prior to April 8, 1988, replace any rudder cable not replaced in accordance with paragraph (b) of this AD with a 7×7, ³⁄₃₂ inch cable; manufactured in accordance with MIL–W–83420D or MIL–W–1511A. Thereafter, cables are to be replaced each 500 hours time service. Use only Nicopress sleeves, No. 28–2–G, for cable connections in accordance with Actions 2 of Hansjorg Streifeneder Technical Note No. 201–26, 301–33, 401–20, and 501–4, dated March 15, 1987.

Note: With Nicopress sleeves, No. 28–2–G, use tool No. 51–G–887 (one compression required) or tool No. 64–CGMP (G-groove to be used, one compression required) or tool No. 32VC: VG ("VG"—groove to be used, two overlapping compressions required).

(d) Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Brussels Aircraft Certification Office, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 15 Rue de la Loi B–1040 Brussels, Belgium; or the Manager, New York Aircraft Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581.

(e) Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Brussels Aircraft Certification Office, or the Manager, New York Aircraft Certification Office, may adjust the compliance time specified in this AD.

Hansjorg Streifeneder Technical Note No. 201–26, 301–33, 401–20, and 501–4, dated March 15, 1987, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Hansjorg Streifeneder Glasfaser-Flugzeug-Service GmbH, Hofener Weg, D–7431 Grabenstetten, Federal Republic of Germany.

These documents also may be examined at the Rules Docket, Office of the Regional Counsel, Room 311, Federal Aviation Administration, Attn: Rules Docket No. 86–ANE–01, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday except Federal holidays.

This amendment becomes effective March 23, 1988.

Issued in Burlington, Massachusetts, on February 23, 1988.

Jack A. Sain,

Acting Director, New England Region.

BILLING CODE 4910–13–M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Parts 193 and 561

[OPP–300179A; FRL 3353–9]

Revocation of Food Additive Regulations for Certain Pesticide Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule revokes human food additive regulations in 21 CFR Part 193 and animal feed additive regulations in 21 CFR Part 561 related to certain pesticide chemicals. EPA is taking this action to remove obsolete and expired residue limitations resulting from use of the specific pesticide under the authorization of an experimental use permit.

EFFECTIVE DATE: Effective on March 23, 1988.

ADDRESS: Written objections, identified by the document control number, [OPP–300179A], may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Room 3708, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: Patricia Critchlow, Registration Division (TS–767C), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Room 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703)–557–1806.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of February 17, 1988 (53 FR 4643), which proposed the revocation of certain food additive regulations, established by EPA in 21 CFR Parts 193 and 561 for pesticide residues in processed food commodities, resulting from use of the pesticides under experimental use permits (EUP's). Because the food additive regulations and their related EUP's expired before 1986, the food additive regulations should be deleted from 21 CFR Parts 193 and 561.

No public comments were received in response to this notice of proposed rulemaking.

Therefore, based on the information considered by the Agency and discussed in the February 17, 1988 proposal, EPA is hereby amending the regulations discussed in this rule by revoking the section in its entirety or removing the applicable paragraph containing the expired tolerances, as follows:

In Part 193

§ 193.70 (2-Chloroethyl)trimethylammonium chloride
§ 193.85 Chlorpyrifos
§ 193.100 2,4-D
§ 193.145 3,5-Dimethyl-4-(methylthio) phenyl methylcarbamate
§ 193.215 Fenthion
§ 193.219 Fluridone
§ 193.235 Glyphosate
§ 193.284 Methanearsonic acid
§ 193.301 2-1(1-Methylethoxy)phenol methylcarbamate
§ 193.400 Simazine
§ 193.415 Tebuthiuron

In Part 561

§ 561.20 Acephate
§ 561.55 Butachlor
§ 561.90 (2-Chloroethyl)trimethylammonium chloride
§ 561.98 Chlorpyrfios
§ 561.175 3,5-Dimethyl-4-(methylthio) phenyl methylcarbamate
§ 561.195 Amitraz
§ 561.231 *O*-Ethyl *S,S*-diphenyl phosphorodithioate
§ 561.237 Fenthion
§ 561.253 Glyphosate
§ 561.265 Linuron
§ 561.280 Methanearsonic acid
§ 561.281 2-(1-Methylethoxy)phenol methylcarbamate
§ 561.320 Procyazine
§ 561.330 Propargite
§ 561.371 Tebuthiuron
§ 561.380 Thiabendazole
§ 561.395 Tricyclazole.

Any person adversely affected by this regulation revoking the specified food additive regulations may, within 30 days after the date of publication of the document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Since this regulatory action is intended only to remove obsolete and unnecessary information from the Code of Federal Regulations, it has been determined that this rule is not subject to a review under Executive Order 12291. Likewise, this rule does not require an impact analysis under the Regulatory Flexibility Act.

List of Subjects in 21 CFR Parts 193 and 561

Food additives, Animal feeds, Pesticides and pests, Recordkeeping and reporting requirements.

Dated: March 21, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 21 CFR Parts 193 and 561 are amended as follows:

PART 193—[AMENDED]

1. In Part 193:

a. The authority citation for Part 193 continues to read as follows:

Authority: 21 U.S.C. 348.

§§ 193.70, 193.145, 193.215, 193.219, 193.284, 193.301, 193.415 [Removed]

b. By removing §§ 193.70, 193.145, 193.215, 193.219, 193.284, 193.301, and 193.415

§ 193.235 [Amended]

c. By removing and reserving paragraph (b) in § 193.235.

§ 193.85 [Amended]

d. By removing paragraph (c) in § 193.85.

e. By revising § 193.100 to read as follows:

§ 193.100 2,4-D.

(a) Tolerances are established for residues of the herbicide 2,4–D (2,4-dichlorophenoxyacetic acid) as follows:

(1) 5 ppm in sugarcane molasses, resulting from application of the herbicide to sugarcane fields.

(2) 2 ppm in the milled fractions (except flour) derived from barley, oats, rye, and wheat to be ingested as food or to be converted to food. Such residues may be present therein only as a result of application to the growing crop of the herbicides identified in 40 CFR 180.142.

(3) 0.1 ppm (negligible residue) in potable water. Such residues may be present therein only:

(i) As a result of the application of the dimethylamine salt of 2,4–D to irrigation ditch banks in the Western United States in programs of the Bureau of Reclamation; cooperating water user organizations; the Bureau of Sport Fisheries, U.S. Department of the Interior; Agricultural Research Service, U.S. Department of Agriculture; and the Corps of Engineers, U.S. Department of Defense.

(ii) As a result of the application of the dimethylamine salt of 2,4–D for water hyacinth control in ponds, lakes, reservoirs, marshes, bayous, drainage ditches, canals, rivers, and streams that are quiescent or slow moving, in programs of the Corps of Engineers or other Federal, State, or local public agencies.

(iii) As a result of application of its dimethylamine salt or its butoxyethanol ester for Eurasian watermilfoil control in programs conducted by the Tennessee Valley Authority in dams and reservoirs of the TVA system.

(b) [Reserved]

f. By revising § 193.400 to read as follows:

§ 193.400 Simazine.

(a) Tolerances are established for residues of the herbicide simazine (2-chloro-4,6-bis(ethylamino)-*s*-triazine) or simazine and its metabolities 2-amino-4-chloro-6-ethylamino-*s*-triazine and 2,4-diamino-6-chloro-*s*-triazine as follows:

(1) 1 ppm for residues of simazine in sugarcane byproducts (molasses and sirup), resulting from application of the herbicide to the growing crop sugarcane.

(2) 0.01 ppm for combined residues of simazine and its metabolities (2-amino-4-chloro-6-ethylamino-*s*-triazine and 2,4-diamino-6-chloro-*s*-triazine) in potable

water when present therein as a result of application of the herbicide to growing aquatic weeds.

(b) [Reserved]

PART 561—[AMENDED]

1. In Part 561:

a. The authority citation for Part 561 continues to read as follows:

Authority: 21 U.S.C. 348

§§ 561.55, 561.90, 561.175, 561.195, 561.231, 561.237, 561.265, 561.281, 561.320, 561.371, and 561.395 [Removed]

b. By removing §§ 561.55, 561.90, 561.175, 561.195, 561.231, 561.237, 561.265, 561.281, 561.320, 561.371, and 561.395

§§ 561.253 and 561.380 [Amended]

c. By removing and reserving paragraph (b) in §§ 561.253 and 561.380.

§§ 561.20, 561.98, and 561.280 [Amended]

d. By removing paragraphs (b), (c), and (d) and reserving paragraph (b) in §§ 561.20, 561.98, and 561.280.

e. By revising § 561.330 to read as follows:

§ 561.330 Propargite.

(a) Tolerances are established for residues of the insecticide propargite (2-(*p-tert*-butylphenoxy)cyclohexyl 2-propynyl sulfite) in the following processed feeds, when present therein as a result of the application of propargite to growing crops:

Feeds	Parts per million
Apple pomace, dried	80
Citrus pulp, dried	40
Grape pomace, dried	40

(b) [Reserved]

[FR Doc. 88-6381 Filed 3-22-88; 8:45 am]

BILLING CODE [illegible]

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 0

[Order No. 1260–88]

Designation of Federalism Official

AGENCY: Office of the Attorney General, Department of Justice.

ACTION: Final rule.

SUMMARY: This order amends the regulations of the Department of Justice to designate the Assistant Attorney General of the Office of Legal Counsel as the official responsible for ensuring implementation of Executive Order 12612, entitled "Federalism". The change is being added to the Code of Federal Regulations in order to reflect accurately the agency's internal management structure.

EFFECTIVE DATE: March 14, 1988.

FOR FURTHER INFORMATION CONTACT: Paul Colborn, Senior Counsel, Office of Legal Counsel (202–633–2048).

SUPPLEMENTARY INFORMATION: This order is being issued in order to comply with Executive Order No. 12612 and is a matter of internal Department management. It does not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). It is not a major rule within the meaning of Executive Order 12291.

List of Subjects in 28 CFR Part 0

Authority delegations (Government agencies).

By virtue of the authority vested in me by 28 U.S.C. 509, 510, 533 and 5 U.S.C. 301, Part 0 of Title 28 of the Code of Federal Regulations is amended as follows.

PART 0—[AMENDED]

1. The authority citation for Part 0 continues to read as follows:

Authority: 5 U.S.C. 301, 2303; 8 U.S.C. 1103, 1427(g); 15 U.S.C. 644(k); 18 U.S.C. 2254, 4001, 4041, 4042, 4044, 4082, 4201 *et seq.*, 6003(b); 21 U.S.C. 871, 881(d), 904; 22 U.S.C. 263a, 1621–1645o, 1622 note; 28 U.S.C. 509, 510, 515, 524, 542, 543, 552, 552a, 569; 31 U.S.C. 1108, 3801 *et seq.*; 50 U.S.C. App. 2001–2017p; Pub. L. 91–513, sec. 501; EO 11919; EO 11267; EO 11300.

2. Section 0.25 is amended by redesignating paragraph (j) as (k) and adding a new paragraph (j) to read as follows:

§ 0.25 [Amended]

* * * * *

(j) Taking actions to ensure implementation of Executive Order 12612 (entitled "Federalism"), including determining which Department policies have sufficient federalism implications to warrant preparation of a Federalism Assessment, reviewing Assessments for adequacy, and executing certifications for the Assessments.

* * * * *

Date: March 14, 1988.

Edwin Meese III,

Attorney General.

BILLING CODE 4410-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 291

[DNA Instruction 5400.7B]

Defense Nuclear Agency (DNA) Freedom of Information Act Program

AGENCY: Defense Nuclear Agency.

ACTION: Final rule.

SUMMARY: DNA operates its Freedom of Information Act Program in accordance with DoD Directive 5400.7 and DoD 5400.7–R which provide the policies and procedures for the Department of Defense and the DoD Components. This rule implements the internal procedures for obtaining information from DNA under the provisions of the Freedom of Information Act. It also revises 32 CFR Part 291.

EFFECTIVE DATE: This rule is effective April 22, 1988.

FOR FURTHER INFORMATION CONTACT: Nell M.S. Hayes, Public Affairs Office, Defense Nuclear Agency, Washington, DC 20301–1000, telephone (703) 325–7095.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 291

Freedom of information.

Accordingly, 32 CFR Part 291 is revised as follows:

PART 291—DEFENSE NUCLEAR AGENCY (DNA) FREEDOM OF INFORMATION ACT PROGRAM

Sec.
291.1 Purpose.
291.2 Applicability.
291.3 Definitions.
291.4 Policy.
291.5 Responsibilities.
291.6 Procedures.
291.7 Administrative instruction.
291.8 Exemptions.
Appendix A—Freedom of Information Action (DNA Form 524)
Appendix B—Record of Freedom of Information (FOI) Processing Cost (DD Form 2086)

Authority: 5 U.S.C. 552.

§ 291.1 Purpose.

To establish policies and procedures for the DNA Freedom of Information Act (FOIA) program. This part implements the provisions of DoD 5400.7–R[1].

---

MI

Freedom of Information Act Program, dated June 1987.

§ 291.2 Applicability.

This part applies to Headquarters, Defense Nuclear Agency (HQ, DNA), Field Command, Defense Nuclear Agency (FCDNA), and the Armed Forces Radiobiology Research Institute (AFRRI).

§ 291.3 Definitions.

FOIA Request. A written request for DNA records made by a member of the public who invokes the FOIA (5 U.S.C. 552) in accordance with DoD Directive 5400.7.[2]

Record. (a) The products of data compilation, regardless of physical form or characteristics, made or received by DNA in connection with the transaction of public business and preserved by DNA components primarily as evidence of the organization, policies, functions, decisions, or procedures of the DoD component.

(b) The following are not included within the definition of the word "record":

(1) Library and museum material made, acquired and preserved solely for reference or exhibition.

(2) Objects or articles, such as structures, furniture, paintings, sculpture, three-dimensional models, vehicles and equipment, whatever their historical value, or value as evidence.

(3) Commercially exploitable resources, including but not limited to:

(i) Maps, charts, map compilation manuscripts, map research materials and data if not created or used as primary sources of information about organizations, policies, functions, decisions, or procedures of DNA.

(ii) Computer software and related software documentation if not created or used as primary sources of information about organizations, policies, functions, decisions, or procedures of DNA. (This does not include the underlying data which is processed and produced by such software and which may in some instances be stored with the software.)

(4) Unaltered publications and processed documents, such as regulations or instructions, manuals, maps, charts, and related geophysical materials, that are available to the public through an established distribution system with or without charges.

(5) Anything that is not a tangible or documentary record, such as an individual's memory or oral communication.

(6) Personal records of an individual not subject to agency creation or retention requirements, created and maintained primarily for the convenience of an agency employee, and not distributed to other agency employees for their official use.

(7) Information stored within a computer for which there is no existing computer program or printout.

(c) A record must exist and be in the possession of and controlled by DNA at the time of the request to be considered subject to this part. There is no obligation to create or compile a record to satisfy a FOIA request. DNA personnel, however, may compile a new record when doing so would result in a more useful response to the requester, or be less burdensome to the agency than providing existing records as long as the requester does not object.

(1) *Initial Denial Authority (IDA).* The Deputy Director (DDIR), DNA, has the authority to withhold records requested under the FOIA for one or more of the nine categories (set forth in § 291.8) of records exempt from mandatory disclosure.

(2) *Appellate Authority.* The Director, DNA.

§ 291.4 Policy.

(a) It is DNA policy to fully and completely respond to public requests for information concerning its operations and activities, consistent with national security objectives.

(b) A request for a record under the FOIA may be denied only upon determining that:

(1) The record is subject to one or more of the nine exemptions set forth in § 291.8 and a significant and legitimate government purpose is served by withholding.

(2) The record cannot be located because it was not sufficiently described to enable DNA personnel to locate the record with a reasonable amount of effort.

(3) The requester has failed to comply with the procedural requirements imposed by the FOIA.

§ 291.5 Responsibilities.

(a) The Director, DNA, as appellate authority, is responsible for reviewing and making the final decision on FOIA appeals.

(b) The DDIR, as IDA, is responsible for reviewing all initial denials to FOIA requests and has sole responsibility for withholding that information.

(c) The DNA FOIA Officer, who is also the Public Affairs Officer, manages and implements the DNA FOIA program. In this regard, the Public Affairs Officer, serves as the FOIA point-of-contact and liaison between DNA and the Office of the Assistant Secretary of Defense (Public Affairs) (OASD(PA)), Directorate for Freedom of Information and Security Review (DFOI/SR). The Public Affairs Officer is responsible for:

(1) Advising OASD(PA), DFOI/SR, of any DNA denial of a request for records or appeals that may affect another DoD component.

(2) Ensuring publication of this part in the **Federal Register.**

(3) Ensuring that the Command Services Directorate publishes in the **Federal Register** a notice of where, how and by what authority DNA performs its functions.

(4) Ensuring that the publications officer, Assistant Director for Logistics and Engineering (CSLE), publishes an index of DNA instructions in the **Federal Register.**

(5) Coordinating all FOIA actions, except routine, interim replies indicating initial receipt of a FOIA request through the appropriate DNA offices and the DNA General Counsel (GC).

(6) Forwarding all fees collected under the FOIA to the HQ, DNA Comptroller for further processing.

(7) Coordinating action on FOIA requests that involve other government organizations (e.g., when DNA is not the original classifier for a classified document) with those organizations.

(8) Ensuring FOIA briefings are presented annually for DNA personnel.

(9) Submitting an annual report to OASD(PA), DFOI/SR, in accordance with the requirements of DoD Directive 5400.11 [3].

(d) The Commander, FCDNA, is responsible for determining, based on current directives and instructions, what information in FCDNA custody may be released to FOIA requesters. (This responsibility may be delegated.) The Director, AFRRI, will forward/refer requests for information to the PAO.

(1) The Commander, FCDNA, is responsible for designating a representative to process FOIA requests. The Commander has the authority to release documents in response to the FOIA. When FCDNA releases information under the FOIA, it will forward a copy of the request, the response and the DD 2086 to HQ, DNA, ATTN: PAO (FOIA). FCDNA will not deny requests for information under the FOIA; instead, it will forward to PAO a recommendation and justification for denying the FOIA request.

---

[2] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, Attn: Code 1052, Philadelphia, PA 19120.

[3] See footnote 2 to § 291.3.

(2) The Director, AFRRI, is responsible for designating a representative to process FOIA requests and to forward them to HQ, DNA, for final response.

(e) The DNA GC shall coordinate on all DNA FOIA responses except routine interim letters which acknowledge receipt of the FOIA request. That office shall also ensure uniformity in the legal position and interpretation by DNA of the FOIA, and coordinate with the DoD GC as necessary.

(f) The HQ, DNA, Comptroller will ensure that fees collected under the FOIA are forwarded to the Treasury of the United States.

(g) HQ, DNA, Assistant Director for Intelligence and Security, Classification Management Division (ISCM) will conduct security reviews of classified documents requested under the FOIA. ISCM will determine whether the document—

(1) Contains information that meets requirements for withholding under Exemption 1 (Executive Order 12356),

(2) Has information that meets requirements for withholding under Exemption 3, to include Restricted Data and Formerly Restricted Data, 42 U.S.C. 2162 or

(3) Has information that may be declassified or sanitized.

ISCM is also responsible for sanitizing DNA classified information from documents requested under the FOIA (see § 291.6(b)(4)). In addition, ISCM is responsible for advising the Assistant Director for Technical Information (CSTI) to notify the appropriate authorities when information has been reclassified as a result of a DNA FOIA review.

(h) HQ, DNA CSLE will, upon request, ensure that photocopies are made of 50-page or larger documents being processed under the FOIA. (Copies are required only when documents are not available from other sources.)

(i) CSTI, Technical Library Division (TITL) will, upon notification from PAO that a document has been cleared for public release under the FOIA, retain the marked up document in its files, annotate the FOIA case number in the computerized data base and ensure that the document is made available to the public through the National Technical Information Service (NTIS).

(j) Commander, FCDNA; Director, AFRRI; and HQ, DNA, directors and chiefs of staff elements will ensure that personnel are familiar with the procedures and contents of this part prior to acting on FOIA requests. They will also make sure that FOIA actions forwarded to their offices for processing are closely monitored to ensure accountability and that their input to PAO is provided in a timely manner and in accordance with this part (see § 291.7(b)(2)). If the office(s) cannot meet the FOIA suspense, they must request an extension. In addition, they will ensure that, upon request by PAO, appropriate technical personnel sanitize information such as unclassified technical data that is determined to be exempt from disclosure under the FOIA. (See § 291.7(b)(5)).

§ 291.6 Procedures.

(a) If HQ, DNA personnel receive a FOIA request that has not been logged and processed through PAO, they will immediately *handcarry* the request to PAO. TDNM and AFRRI personnel will forward all FOIA requests to HQ, DNA, ATTN: PAO. FCDNA will adhere to paragraph 6d and FCDNA Supplement to DNA Instruction 5400.7A.[4]

(b) When a FOIA request is received by PAO, HQ, DNA, the following procedures apply:

(1) The request will be date stamped, reviewed to determine if it meets the requirements of 5 U.S.C. 552, logged in, assigned an action number, suspensed, and attached to a FOIA cover sheet (Appendix A) with instructions for forwarding to the appropriate personnel. A copy of DD Form 2086 (Appendix B) will also be attached to the FOIA request.

(2) A copy of the request will be *handcarried* by PAO to the designated HQ, DNA, action office(s) or forwarded to AFRRI or FCDNA as appropriate. The office or component providing input for the FOIA request must keep track of the request and meet the PAO suspense. The HQ DNA input, or negative response if there are no records available, will be *handcarried* to PAO. AFRRI will send the recommended response in daily distribution. FCDNA will telefax the proposed response in addition to mailing the original. All FOIA actions must include a completed DD Form 2086 (Appendix B). Each office acting on FOIA requests will indicate on the form the search, review/excise and coordination time spent processing the FOIA action, and provide the number of pages copied.

(3) The DNA PAO will prepare the response to the requester and coordinate it with the offices that provided input, the GC, and if appropriate, ISCM, the IDA, and the Director, DNA. The PAO will maintain files of all FOIA actions per DNA Instruction 5015.4B.[5]

(4) *FOIAs involving classified information:* When ISCM receives a classified document from PAO for processing under the FOIA, it will conduct a FOIA, it will conduct a security review to determine if the document may be sanitized or declassified. Most DNA documents requested under the FOIA are queued on a first-come, first-served basis and shall be reviewed in that order. When ISCM determines that part or all of the information in a classified document may be sanitized or declassified, ISCM will ensure that the appropriate copies are ordered from the Defense Technical Information Center (DTIC). The DTIC copy will be marked up during review. Cases not placed in queue will be suspensed by PAO. They may include documents with less than 10 pages or documents under suspense from other organizations which require a DNA review. All DNA documents reviewed by ISCM will be marked with a special pen that does not permit photocopying of the classified portions.

(i) When Field Command Security Division (FCSS) receives a classified document for processing under the FOIA, it will conduct a security review to determine if the document may be sanitized or declassified. When FCSS determines that part or all of the information in a classified document may be sanitized or declassified, FCSS will make a copy which will be marked up during review. Upon completion of its review, FCSS will provide the marked up document and a sanitized version of the document to PAO.

(ii) When ISCM/FCSS completes its review, ISOM/FCSS will forward the master copy to the appropriate technical office(s) for review. That office will determine whether the information is releasable and provide its response to ISCM/FCSS. If the office recommends that part or all of the information be withheld, then it must forward a detailed response providing the appropriate exemption(s) and justification for withholding. ISCM will forward the results of both reviews to PAO for further processing prior to sanitization of any unclassified information.

(iii) If either ISCM/FCSS or the DNA office reviewing the action recommends additional review by another agency, they will provide the full name and address of that agency with a technical point-of-contact, if known. PAO will forward the action to that organization for further review. When PAO receives that organization's review determination, it will forward the results to ISCM. After all reviews are

---

[4] See §291.6 for information on how to obtain copies.

[5] See footnote 4 to §291.6(a).

BEST COPY AVAILABLE

completed, ISCM/FCSS will sanitize the document and handcarry (FCSS will forward) the sanitized as well as the marked up copy to PAO for final processing.

(iv) Upon PAO request, the technical office(s) will sanitize the unclassified information that is being withheld. Sanitization will be done on a photocopy of the document or on a document that has been obtained from DTIC.

(5) *FOIAs involving unclassified information:* The appropriate technical office(s) will review unclassified documents for release under the FOIA. If the office(s) determines that part or all of the document should be withheld, it must provide PAO a written recommendation with the appropriate exemption(s) and detailed reasons for withholding the information.

§291.7 Administrative instruction.

(a) FOIA requesters shall clearly mark their requests as such, both on the envelope and in the body of the letter. Identification of the record desired is the responsibility of the FOIA requester. The requester must provide a description of the desired record that enables DNA to locate it with a reasonable amount of effort. The Act does not authorize "fishing expeditions". FOIA requests should be sent to the following address: Defense Nuclear Agency, Attention: PAO (FOIA), Washington, DC 20305–1000. Requester failure to comply with this section shall not be sole grounds for denial of requested information.

(b) FOIA appeals must be clearly marked as such, both on the envelope and in the body of the letter. Persons appealing DNA denial letters should include a copy of the denial letter, the case number, a statement of the relief sought and the grounds upon which it is brought. Appeals should be sent to the following address: Director, Defense Nuclear Agency, Washington, DC 20305–1000.

(c) The time limitations for responding to legitimate FOIA requests are:

(1) Determinations to release, deny or transfer a record shall be made and the decision reported to the requester within 10 working days after the request is received in PAO.

(2) If additional time is needed to respond to a request, the requester will be notified within the 10-day period. In the event of a backlog of FOIA requests, or unusual circumstances, an interim letter will indicate that requests will be answered in turn.

(3) If a request for a record is denied and the requester appeals the decision of the IDA, the requester must file the appeal so that it reaches DNA no later than 45 calendar days after the date of the initial denial letter. A final determination on the appeal normally shall be made within 20 working days after receipt. If additional time is needed due to unusual circumstances, the final decision may be delayed for the number of working days (not to exceed 10), that were not utilized as additional time for responding to the initial request. If an appeal is denied, the Director, DNA, will notify the requester of the right to Judicial review of the decision.

(d) If DNA denies the requested document in whole or in part, the response must include detailed rationale for withholding information and the specific exemption that applies so the requester can make a decision concerning appeal. When the initial denial is based in whole or in part on a security classification, the explanation should include a summary of the applicable criteria for classification, as well as an explanation, to the extent reasonably feasible, of how those criteria apply to the particular record in question. Denial letters must also include the name and title of the IDA, and cite the name and address of the Director, DNA, as the appellate authority.

(e) All final responses will address the status of fees collectable under the FOIA. Fees less than $15 will be waived.

(f) A formal reading room for the public, as defined in DoD 5400.7–R, does not exist at DNA (HQ, FCDNA or AFRRI) because of security requirements for the building. However, the PAO will arrange for a suitable location and escort, if required, for members of the public to review DNA documents released under the FOIA. In addition, documents released under the FOIA are sent to the NTIS.

§ 291.8 Exemptions.

(a) *General.* (1) Records that meet the exemption criteria listed in paragraph (b) of this section may be withheld from public disclosure and need not be published in the Federal Register, made available in a library reading room, or provided in response to a FOIA request.

(2) An exempted record, other than those being withheld pursuant to Exemptions 1, 3 or 6, shall be made available upon the request of any individual when, in the judgment of DNA or higher authority, no jeopardy to the government would be served by release. If DNA determines that a record requested under the FOIA meets the Exemption 4 withholding criteria set forth in the following, DNA shall not ordinarily exercise its discretionary power to release, absent circumstances in which a compelling public interest will be served by release of that record.

(b) *Exemptions.* The following types of records may be withheld in whole or in part from public disclosure unless otherwise prescribed by law:

(1) *Number 1.* Those properly and currently classified in the interest of national defense or foreign policy, as specifically authorized under the criteria established by executive order and implemented by issuances, such as DoD 5200.1–R [6] and DNA Instruction 5200.1C [7]. Although material is not classified at the time of the FOIA request, a classification review may be undertaken to determine whether the information should be classified.

(2) *Number 2.* Those containing or constituting rules, regulations, orders, manuals, directives, and instructions relating to the internal personnel rules or practices of DNA if their release to the public would substantially hinder the effective performance of a significant function of DNA and they do not impose requirements directly on the general public. Examples include:

(i) Those operating rules, guidelines and manuals for DNA investigators, inspectors, auditors, or examiners that must remain privileged in order for DNA to fulfill a legal requirement.

(ii) Personnel and other administration matters, such as examination questions and answers used in training courses or in the determination of the qualifications of candidates for employment, entrance on duty, advancement, or promotion.

(iii) Lists of DNA personnel names and duty addresses (civilian and military) created primarily for internal, trivial, housekeeping purposes for which there is no legitimate public interest or benefit. This exemption is appropriate when it would impose an administrative burden to process the request, and the requester is not seeking the information for the benefit of the general public.

(3) *Number 3.* Those containing matters that a statute specifically exempts from disclosure by terms that permit no discretion on the issue, or in accordance with criteria established by that statute for withholding or referring to particular types of matters to be withheld. Examples of statutes are:

(i) National Security Agency Information Exemption, Pub. L. 86–36, section 6.

(ii) Patent Secrecy, 35 U.S.C. 181–188. Any records containing information relating to inventions that are the subject of patent applications on which Patent Secrecy Orders have been issued.

(iii) Restricted Data and Formerly Restricted Data, 42 U.S.C. 2162.

(iv) Communication Intelligence, 18 U.S.C. 798.

(v) Authority to Withhold from Public Disclosure Certain Technical Data, 10 U.S.C. 140c.

(vi) Confidentiality of Medical Quality Records: Qualified Immunity Participants, 10 U.S.C. 1102.

(4) *Number 4.* Those containing trade secrets or commercial or financial information that DNA receives from a person or organization outside the government with the understanding that the information or record will be retained on a privileged or confidential basis in accordance with the customary handling of such records. Records within the exemption must contain trade secrets, or commercial or financial records, the disclosure of which is likely to cause substantial harm to the competitive position of the source providing the information; impair the government's ability to obtain necessary information in the future; or impair some other legitimate government interest. Examples include records that contain:

(i) Commercial or financial information received in confidence in connection with loans, bids, contracts, or proposals, as well as other information received in confidence or privileged, such as trade secrets, inventions, discoveries, or other proprietary data.

(ii) Statistical data and commercial or financial information concerning contract performance, income, profits, losses, and expenditures, if offered and received in confidence from a contractor or potential contractor.

(iii) Personal statements given in the course of inspections, investigations, or audits, when such statements are received in confidence.

(iv) Financial data provided if confidence by private employers in connection with locality were surveys that are used in fix and adjust pay schedules applicable to the prevailing wage rate of employees within DNA.

(v) Scientific and manufacturing processes or developments concerning technical or scientific data or other information submitted with an application for a research grant, or with a report while research is in progress.

(vi) Technical or scientific data developed by a contractor or subcontractor exclusively at private expense, and technical or scientific data developed in part with federal funds and in part at private expense, wherein the contractor or subcontractor has retained legitimate proprietary interests in such data in accordance with Title 10, U.S.C. 2320–2321. Technical data developed exclusively with federal funds may be withheld under Exemption 3 if it meets the criteria of Title 10, U.S.C. 140c.

(5) *Number 5.* Except as provided in paragraphs (b)(5) (ii) through (v) of this section, internal advice, recommendations, and subjective evaluations, as contrasted with factual matters that are reflected in records pertaining to the decision making process of any agency, whether within or among agencies (as defined in 5 U.S.C. 552 or within or among DoD components).

(i) Examples include:

(A) The nonfactual portions of staff papers, to include after-action reports and situation reports containing staff evaluations, advice opinions or suggestions.

(B) Advice, suggestions, or evaluations prepared on behalf of the DNA by individual consultants or by boards, committees, councils, groups, panels, conferences, commissions, task forces, or other similar groups that are formed for the purpose of obtaining advice and recommendations.

(C) Those nonfactual portions of evaluations by DNA component personnel of contractors and their products.

(D) Information of a speculative, tentative, or evaluative nature or such matters as proposed plans to procure, lease or otherwise acquire and dispose of materials, real estate, facilities or functions, when such information would provide undue or unfair competitive advantage to private personal interests or would impede legitimate government functions.

(E) Trade secret or other confidential research development, or commercial information owned by the government, where premature release is likely to affect the government's negotiating position or other commercial interests.

(F) Records that are exchanged among DNA personnel as part of the preparation for anticipated administrative proceedings by DNA, or litigation before any federal, state, or military court, as well as records that qualify for the attorney-client privilege.

(G) Those portions of official reports of inspection, reports of the Inspector General, audits, investigations, or surveys pertaining to safety, security, or the internal management, administration, or operation of DNA when these records have traditionally been treated by the courts as privileged against disclosure in litigation.

(ii) If any such intra or interagency record or reasonably segregable portion of such record hypothetically would be made available routinely through the "discovery process" in the course of litigation with the agency, i.e., the process by which litigants obtain information from each other that is relevant to the issues in trial or hearing, then it should not be withheld from the general public even though discovery has not been sought in actual litigation. If, however, the information hypothetically would only be made available through the discovery process by special order of the court based on the particular needs of a litigant, balanced against the interests of the agency in maintaining its confidentiality, then the record or document need not be made available under this part.

(iii) Intra or interagency memoranda or letters that are factual, or those reasonably segregable portions that are factual, are routinely made available through "discovery," and shall be made available to a requester, unless the factual material is otherwise exempt from release, inextricably intertwined with the exempt information, so fragmented as to be uninformative, or so redundant of information already available to the requester as to provide no new substantive information.

(iv) A direction or order from a superior to a subordinate, though contained in an internal communication, generally cannot be withheld from a requester if it constitutes policy guidance or a decision, as distinguished from a discussion of preliminary matters or a request for information or advice that would compromise the decision-making process.

(v) An internal communication concerning a decision that subsequently has been made a matter of public record must be made available to a requester when the rationale for the decision is expressly adopted or incorporated by reference in the record containing the decision.

(6) *Number 6.* Information in personnel and medical files, as well as similar personal information in other files, that, if disclosed to the requester would result in a clearly unwarranted invasion of personal privacy.

(i) Examples of other files containing personal information similar to that contained in personnel and medical files include:

(A) Those compiled to evaluate or adjudicate the suitability of candidates for civilian employment or membership in the Armed Forces, and the eligibility of individuals (civilian, military, or contractor employees) for security clearances, or for access to particularly sensitive classified information.

---

[6] See footnote 1 to § 291.1.

[7] See footnote 4 to § 291.6(a).

(B) Files containing reports, records, and other material pertaining to personnel matters in which administrative action, including disciplinary action, may be taken.

(ii) In determining whether the release of information would result in a "clearly unwarranted invasion of personal privacy," consideration shall be given to the stated or ascertained purpose of the request. When determining whether a release is "clearly unwarranted," the public interest in satisfying this purpose must be balanced against the sensitivity of the privacy interest being threatened. (See § 291.8(b)(2)). This exemption shall not be exercised in an attempt to protect the privacy of a deceased person, but it may be used to protect the privacy of the deceased person's family.

(iii) Individuals' personnel, medical, or similar file may be withheld from them or their designated legal representative only to the extent consistent with DoD Directive 5400.11.

(iv) A clearly unwarranted invasion of the privacy of the persons identified in a personnel, medical or similar record may constitute a basis for deleting those reasonably segregable portions of that record, even when providing it to the subject of the record.

(7) *Number 7.* Records or information compiled for law enforcement purposes; i.e., civil, criminal, or military law, including the implementation of executive orders or regulations issued pursuant to law.

(i) This exemption applies, however, only to the extent that production of such law enforcement records or information could result in the following:

(A) Could reasonably be expected to interfere with enforcement proceedings.

(B) Would deprive a person of the right to a fair trial or to an impartial adjudication.

(C) Could reasonably be expected to constitute an unwarranted invasion of personal privacy of a living person, including surviving family members of an individual identified in such a record.

(D) Could reasonably be expected to disclose the identity of a confidential source including a source within DNA, a state, local or foreign agency or authority, or any private institution which furnishes the information on a confidential basis.

(E) Could disclose confidential information furnished from a confidential source and obtained by a criminal agency conducting a lawful national security intelligence investigation.

(F) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law.

(G) Could reasonably be expected to endanger the life, or the physical safety of any individual.

(ii) Examples include:

(A) Statements of witnesses and other material developed during the course of the investigation and all materials prepared in connection with related government litigation or adjudicative proceedings.

(B) The identity of firms or individuals being investigated for alleged irregularities involving contracting with DNA when no indictment has been obtained nor any civil action filed against them by the United States.

(C) Information obtained in confidence, expressed or implied, in the course of a criminal investigation by a criminal law enforcement agency or office within DNA, or a lawful national security intelligence investigation conducted by an authorized agency or office within DNA. National security intelligence investigations include background security investigations and those investigations conducted for the purpose of obtaining affirmative or counterintelligence information.

(iii) The right of individual litigants to investigate records currently available by law (such as the Jencks Act, 18 U.S.C. 3500) is not diminished.

(iv) When the subject of an investigative record is the requestor of the record, it may be withheld only as authorized by DoD Directive 5400.11.

(8) *Number 8.* Those contained in or related to examination, operation or condition reports prepared by, on behalf of, or for the use of any agency responsible for the regulation or supervision of financial institutions.

(9) *Number 9.* Those containing geological and geophysical information and data (including maps) concerning wells.

BILLING CODE 3810-01-M

VETERANS ADMINISTRATION

38 CFR Part 1

Freedom of Information Act; Exemptions From Public Access to Agency Records

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: The Veterans Administration (VA) is updating its regulations so that they conform to the statutory language changes made by the Freedom of Information Reform Act of 1986 (Pub. L. 99-570), and incorporate the statutory language of 5 U.S.C. 552 (c)(1) and (c)(2) which were added by that Act. The effect of this regulation is simply to make 38 CFR 1.554 consistent with the statutory language.

EFFECTIVE DATE: October 27, 1986.

FOR FURTHER INFORMATION CONTACT: Steven McPherson, Paperwork Management and Regulations Service (733), Office of Information Management and Statistics, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3648.

SUPPLEMENTARY INFORMATION: On November 13, 1987, the VA published on pages 43625-43626 of the **Federal Register** a notice of proposed rulemaking. Interested people were given 30 days to offer comments, recommendations or suggestions. No comments were received. Therefore, the proposed regulations are adopted as final.

The Freedom of Information Act (FOIA) permits records to be withheld under any of nine exemptions. One of these exemptions allows withholding of records compiled for law enforcement purposes. 38 CFR 1.554(a)(7) implements the law enforcement exemption within the VA. The Freedom of Information Reform Act of 1986 revised the language of the law enforcement exemption. For example, exemption (b)(7) of the FOIA statute originally read "investigatory records compiled for law enforcement purposes." The revised statutory wording deletes the qualifying word "investigatory" and adds "or information." Since VA's regulation uses the same wording as the statute, it is necessary to amend the regulation to conform to the revised wording of the statute.

In addition, a new paragraph is added to 38 CFR 1.554 to also incorporate verbatim the statutory language of 5 U.S.C. 552 (c)(1) and (c)(2). This new statutory language authorizes agencies to treat certain law enforcement records and information as not subject to the Freedom of Information Act in certain limited circumstances.

The Administrator hereby certifies that this final regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612. Therefore, pursuant to 5 U.S.C. 605(b), this final regulation is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604. The reason for this certification is that this final regulation simply repeats, and makes VA regulations consistent with, the language of Pub. L. 99-570; it imposes no new administrative or paperwork burdens. It will have no significant direct impact on small entities (i.e., small businesses, small private and non-profit organizations, and small governmental jurisdictions).

The VA has determined that this final regulation is non-major in accordance with Executive Order 12291, entitled Federal Regulation. This final regulation will not have a $100 million annual impact on the economy; nor will it have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 38 CFR Part 1

Administrative practice and procedure, Claims, Employment, Government employees, Freedom of Information Act, Privacy, Government property.

Approved: March 1, 1988.

Thomas K. Turnage,

Administrator.

PART 1—[AMENDED]

In 38 CFR Part 1, *General,* § 1.554 is amended by revising paragraph (a)(7), adding paragraph (c), and adding citations at the end of paragraphs (a)(7) and (c) to read as follows:

§ 1.554 Exemptions from public access to agency records.

(a) * * *

(7) Records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information;

(i) Could reasonably be expected to interfere with enforcement proceedings;

(ii) Would deprive a person of a right to a fair trial or an impartial adjudication;

(iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;

(iv) Could reasonably be expected to disclose the identity of a confidential source, including a State, local or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source;

(v) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or

(vi) Could reasonably be expected to endanger the life or physical safety of any individual.

(Authority: 5 U.S.C. 552(b)(7))

* * * * *

(c)(1) Whenever a request is made which involves access to records described in paragraph (a)(7)(i) of this section and

(i) The investigation or proceeding involves a possible violation of criminal law, and

(ii) There is reason to believe that

(A) The subject of the investigation or proceeding is not aware of its pendency, and

(B) Disclosure of the existence of the records could reasonably be expected to interfere with enforcement proceedings, the Agency may, during only such time as that circumstance continues, treat the records as not subject to the requirements of this section.

(2) Whenever informant records maintained by a criminal law enforcement agency under an informant's name or personal identifier are requested by a third party according to the informant's name or personal identifier, the Agency may treat the records as not subject to the requirements of this section unless the informant's status as an informant has been officially confirmed.

(Authority: 5 U.S.C. 552(c)(1) and (c)(2))

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 33

[OSWER-FRL-3353-4]

Small Purchase Procurement Procedures; Deviation

AGENCY: Environmental Protection Agency.

ACTION: Deviation to rule.

SUMMARY: The Environmental Protection Agency (EPA) is issuing a class deviation from the provisions of 40 CFR 33.305, 33.310, and 33.250(a) of its Procurement Under Assistance Agreements regulation (40 CFR Part 33). This deviation applies to recipients of financial assistance under EPA's Technical Assistance Grant (TAG) program (Catalog of Federal Domestic Assistance Number 66.807). This deviation allows these recipients to use small purchase procurement procedures if the aggregate amount of any one procurement transaction does not exceed $25,000. Without the deviation, small purchases are limited to those costing $10,000 or less.

EFFECTIVE DATE: March 8, 1988.

40 CFR Part 180

[PP 9E2249/R941; FRL-3353-1]

Pesticide Tolerance for Pentachloronitrobenzene

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the fungicide pentachloronitrobenzene and its metabolites in or on the raw agricultural commodities collards, kale, and mustard greens. The Interregional Research Project No. 4 IR-4) petitioned for this tolerance.

EFFECTIVE DATE: March 23, 1988.

ADDRESS: Written objections, identified by the document control number, [PP 9E2249/R941], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Room 3708, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS-767C), Registration Division (TS-767C), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Room 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2310.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the **Federal Register** of January 20, 1988 (53 FR 1495), in which it was announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 9E2249 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the Agricultural Experiment Station of Georgia.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the residues of the fungicide pentachloronitrobenzene (PCNB) and its metabolites pentachloroaniline (PCA) and methylpentachlorophenyl sulfide (MPCPS) in or on the raw agricultural commodities collards, kale, and mustard greens at 0.1 part per million (ppm). The petition was later amended to propose residues of the fungicide at 0.2 ppm. The petitioner proposed that this use of PCNB and its metabolites on collards, kale, and mustard greens be limited to Georgia based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 11, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.291 is amended by designating the existing text as paragraph (a) and adding new paragraph (b), to read as follows:

§ 180.291 Pentachloronitrobenzene; tolerances for residues.

* * * * *

(b) Tolerances with regional registration (refer to §180.1 (n)) are established for the combined residues of the fungicides pentachloronitrobenzene (PCNB) and its metabolites pentachloroaniline (PCA) and methyl pentachlorophenyl sulfide (MPCPS) in or on the following raw agricultural commodities:

Commodities	Parts per million
Collards	0.2
Kale	0.2
Mustard greens	0.2

40 CFR Part 228

Ocean Dumping; Proposed Site Designation for San Juan, PR

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA today designates a dredged material disposal site located offshore of San Juan Harbor, Puerto Rico for the disposal of dredged material removed from San Juan Harbor and vicinity. This action is necessary to provide an acceptable ocean dumping site for the current and future disposal of this material. This site designation is for an indefinite period of time, but the site is subject to continuing monitoring to insure that unacceptable adverse environmental impacts do not occur.

EFFECTIVE DATE: This designation shall become effective on April 22, 1988.

ADDRESSES: Mario Del Vicario, Chief, Marine and Wetlands Protection Branch, EPA Region II, 26 Federal Plaza, New York, NY 10278.

The file supporting this designation is available for public inspection at the following locations:

EPA Public Information Reference Unit (PIRU) Room 2904 (rear) 401 M Street Southwest, Washington, DC 20460;
EPA Region II Library, Room 402, 26 Federal Plaza, New York, NY 10278;
EPA Region II, Caribbean Field Office, Office 2A, Podiatry Center Building, 1413 Fernandez Juncos Avenue, Santurce, Puerto Rico 00907.

FOR FURTHER INFORMATION CONTACT: Mario Del Vicario, 212-264-5170.

SUPPLEMENTARY INFORMATION:

A. Background

Section 102(c) of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, 33 U.S.C. 1401 *et seq.* ("the Act"), gives the Administrator of EPA the authority to designate sites where ocean dumping may be permitted. On October 1, 1986, the Administrator delegated the authority to designate ocean dumping sites to the Regional Administrator of the Region in which the site is located. This site designation is being made pursuant to that authority.

The EPA Ocean Dumping Regulations (40 CFR Chapter I, Subchapter H, § 228.4) state that ocean dumping sites will be designated by promulgation in this Part 228. A list of "Approved Interim and Final Ocean Dumping Sites" was published on January 11, 1977 (42 FR 2461 *et seq.*) and was extended on August 19, 1985 (50 FR 33338). That list established the San Juan site as an interim site and extended its period of use until July 31, 1988, or until final rulemaking is completed, whichever is sooner. This site designation is being published as final rulemaking in accordance with § 228.4(e) of the Ocean Dumping Regulations, which permits the designation of ocean disposal sites for dredged material.

B. EIS Development

Section 102(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.* ("NEPA") requires that Federal agencies prepare an environmental impact statement (EIS) on proposals for major Federal actions significantly affecting the quality of the human environment. The object of NEPA is to build into the Agency decision-making process careful consideration of all environmental aspects of proposed actions. While NEPA does not apply to EPA activities of this type, EPA has voluntarily committed to prepare EISs in connection with ocean dumping site designations such as this (39 FR 16186, May 7, 1974).

The EPA prepared a final EIS entitled "Environmental Impact Statement for the San Juan Harbor, Puerto Rico Dredged Material Site Designation." On August 13, 1982, a notice of availability of the drafts EIS for public review and comment was published in the **Federal Register** (47 FR 35335). The public comment period on this draft EIS closed September 27, 1982. On February 4, 1983, a notice of availabilty of the final EIS for public review and comment was published in the **Federal Register** (48 FR 5308). The public record on the final EIS closed March 7, 1983. Anyone desiring a copy of the EIS may obtain one from the address given above.

The final EIS includes the Agency's assessment of the comments received during the comment period on the draft EIS. Comments correcting facts were incorporated into the text and the changes were noted in the final EIS. Specific comments which could not be appropriately treated as text modifications were addressed point by point. Both comments and responses are found in Appendix D of the final EIS.

Primary commenters on the draft EIS were the U.S. Army Corps of Engineers and the Commonwealth of Puerto Rico's Environmental Quality Board and Department of Natural Resources. The Corps of Engineers noted that the draft referred only to maintenance dredging from existing projects. EPA corrected this oversight in the final EIS. The proposed rule would allow disposal of dredged material from new projects as well as existing ones. Comments received from the Environmental Quality Board and the Department of Natural Resources noted that the endangered West Indian manatee has been sighted off the northeastern coast of Puerto Rico. This observation was included in the final EIS. However, no manatees have recently been seen at the site and their passage through the site, if this were to occur, would be short and infrequent. The Department of Natural Resources expressed concern that dumping at the site would introduce toxic wastes into a commercial fishery area inshore of the dump site. Previous monitoring surveys, together with current data, indicate that as a result of the prevailing coastal current system, migrating pollutants are distributed in an east-west and offshore direction away from inshore fishery areas. In addition, elutriate studies using harbor sediments indicate that trace metal contaminant concentrations, after initial dilution, do not exceed EPA chronic marine Water Quality Criteria (WQC). Therefore, it is unlikely that the dredged material disposal activities in conjunction with the coastal patterns would adversely impact inshore commercial fishing areas.

One comment was received on the final EIS. The Corps of Engineers recommended that the interim site be designated for continuing use. This rule reflects acceptance of this comment.

Dredged material from new projects may be dumped at this site upon completion of an appropriate case-by-case evaluation of the impact of such material on the site. This analysis must demonstrate that the impact would not be unacceptable. EPA plans to monitor ambient water quality trends at the site and in adjacent areas to ensure that unacceptable levels of toxic constituents are not transported outside of the site. Additional monitoring of impacts would be required if dredging volumes or characteristics of the dredged materials change significantly to assure that adverse effects on the ecosystem do not develop. Should monitoring surveys indicate that transport outside of the site is occurring, appropriate measures to modify or withdraw site designation are available to the Agency.

Based upon the information reported in the EIS, EPA today designates the existing San Juan Harbor site for continuing use for the ocean disposal of dredged material where applicants have demonstrated compliance with EPA's ocean dumping criteria.

The National Marine Fisheries Service and the U.S. Fish and Wildlife Service have concurred with EPA's conclusion that the designation of this dredged material disposal site will not affect the endangered species under their jurisdiction.

The action discussed in the EIS is the designation for continuing use of an ocean disposal site for dredged material located in the Atlantic Ocean in the vicinity of San Juan Harbor. The EIS discusses the need for the action and examines ocean disposal site alternatives to the proposed action. The purpose of the designation is to provide an environmentally acceptable location for the ocean disposal of materials dredged from the Port of San Juan and nearby coastal areas. The appropriateness of ocean disposal is determined on a case-by-case basis as part of the process of issuing permits for ocean disposal.

The EIS presents the information needed to evaluate the suitability of ocean disposal areas for final designation and is based on one of a series of disposal site environmental studies. The environmental studies and final designation process are being conducted in accordance with the requirements of the Act, the Ocean Dumping Regulations, and other applicable Federal environmental legislation.

C. Site Designation.

The site is a rectangle located approximately 2.2 nautical miles north-northwest of the entrance to San Juan Harbor, with the following coordinates:

18d 30' 10"N, 66d 09' 31"W;
18d 30' 10"N, 66d 08' 29"W;
18d 31' 10"N, 66d 08' 29"W;
18d 31' 10"N, 66d 09' 31"W.

The site occupies an area of approximately one square nautical mile, and water depths within this area range from 200 to 400 meters. Disposal operations at the site began in 1974.

All of the dredged material disposed at the designated site will be from dredging operations in the Port of San Juan, Puerto Rico and coastal areas within 20 miles of the Port entrance. The total amount of dredged material dumped at the site since 1974 has been approximately 4.3 million cubic yards. Maximum quantities of dredged material to be disposed at this site are to be determined by both EPA and the Corps of Engineers. If at any time disposal operations at the site cause unacceptable adverse impacts, further use of the site will be restricted or terminated.

D. Regulatory Requirements

General criteria are used in the selection and approval of ocean disposal sites for continuing use. Sites are selected so as to minimize interference with other marine activities, to keep any temporary perturbations from the dumping from causing impacts outside the disposal site, and to permit effective monitoring to detect any adverse impacts at an early stage. Where feasible, locations off the Continental Shelf are chosen. If at any time disposal operations at an interim site cause unacceptable adverse impacts, further use of the site will be terminated as soon as suitable alternative disposal sites can be designated. These general criteria are given in § 228.5 of the EPA Ocean Dumping Regulations, and § 228.6 lists 11 specific factors used in evaluating a proposed disposal site to assure that the general criteria are met.

The disposal site's location has been chosen to minimize the interference of disposal activities with other activities in the marine environment. The site is not located in major shipping lanes. While there is potential for oil and gas exploration in the area, no serious conflict with such activities is expected. Coordination with future leasing activities should effectively avoid potential conflicts [§ 228.5(a)]. Temporary perturbations in water quality from dredged material disposal can be expected to return to ambient levels before reaching any beach, shoreline or known geographical limited fishery or shellfishery [§ 228.5(b)]. Based upon disposal site evaluation studies presented in the EIS, the designated site satisfies the criteria for site selection set forth in §§ 228.5–228.6 [§ 228.5(c)]. The disposal site has been limited in size in order to localize, identify and control any immediate adverse impacts and to facilitate the implementation of an effective monitoring and surveillance program to prevent adverse long range impacts [§ 228.5(d)]. The location of the site satisfies the statutory preference for sites located off the Continental Shelf, where feasible [§ 228.5(e)]. EPA established the 11 specific factors [§ 228.6] to constitute an environmental assessment of the impact of disposal at the site. The criteria are used to make comparisons between the alternative sites and are the basis for final site selection. The characteristics of the existing site are are viewed below in terms of these 11 factors.

1. Geographical Position, Depth of Water, Bottom Topography and Distance From Coast [40 CFR 228.6(a)(1).]

The rectangular site is approximately one square nautical mile in size. Its corner coordinates are given above. Water depth ranges from 200 to 400 meters with an average of 292 meters. The center of the site is 2.2 nautical miles from the Isle de Cabras. The bottom drops off steeply to the north. The Insular Slope in this area to the north is characterized by numerous submarine ridges and swales. The bottom sediments within the area of the site average 48 percent silt and 45 percent clay with the balance being sand and gravel.

2. Location in Relation to Breeding, Spawning, Nursery, Feeding, or Passage Areas of Living Resources in Adult or Juvenile Phases [40 CFR 228.6(a)(2).]

The site does not encompass any known unique breeding, spawning, nursery or passage areas of nekton, marine mammals or birds. The open water of the site may be feeding grounds for some wide ranging pelagic fish such as tuna, jacks, and mackerel. Deep waters at the site are feeding grounds for various snappers (blackfin, silk, and vermillion), but the site is not unique in this regard.

3. Location in Relation to Beaches and Other Amenity Areas [40 CFR 228.6(a)(3).]

The site is centered approximately 2.2 nautical miles due north of San Juan. Palo Seco and Punta Salinas, on the coast immediately west of San Juan, are both approximately 2.5 nautical miles from the center of the site. Both are developed beaches which serve metropolitan San Juan.

El Morro, one of the two fortifications in the San Juan National Historical Site, attracts thousands of visitors every year. It is located on a prominence on the western tip of Isle San Juan overlooking the Atlantic Ocean. Disposal activities at the site are 2.5 nautical miles to the north in the Atlantic Ocean and can be seen from the fortification.

4. Types and Quantities of Waste Proposed to be Disposed of, and Proposed Methods of Release, Including Methods of Packing the Waste, if any [40 CFR 228.6(a)(4).]

Only dredged material consisting of sands, silts, and clays will be disposed of at the site. All dredged material must satisfy EPA criteria before any permits for ocean dumping are issued. None of the material will be packaged in any way.

The Corps of Engineers will continue to perform dredging using Corps-owned hopper dredges. Additional dredging will also be performed by private contractors using hopper, dragline, clamshell, and dipper dredges.

The total amount of dredged material dumped at the site since 1974 has been 4.3 million cubic yards. Maintenance dredging encompassed 1.5 million cubic yards, and dredged material from harbor improvements encompassed 2.8 million cubic yards. Dumping occurs several times a year.

A deepening project of San Juan Harbor has been proposed by the Corps of Engineers. The proposal under consideration consists of a plan for deepening, widening, and possibly realigning and extending the channels, deepening the turning basins, and easing the channel connecting angles within the authorized existing project. If the deepening project is implemented, the volume of dredged material is estimated to be 12,795,000 cubic yards of soft material and rock. Maintenance dredging would be scheduled every two years, and would involve an increase of approximately 185,000 cubic yards per year.

5. Feasibility of Surveillance and Monitoring [40 CFR 228.6(a)(5).]

Surveillance of disposal operations at the proposed site could be achieved by helicopter or shiprider.

Periodic monitoring by EPA, the Corps of Engineers, and permittees will continue for as long as the site is used. Additional monitoring will be required if dredging volumes and/or characteristics of the dredged material change significantly to assure that adverse impacts do not develop. Periodic reports of the monitoring operations will be made available to interested persons upon request. If evidence of significant adverse environmental effects is found, EPA will take appropriate steps to limit or terminate dumping at the site.

6. Dispersal, Horizontal Transport and Vertical Mixing Characteristics of the Area, Including Prevailing Current Direction and Velocity, if any [40 CFR 228.6(a)(6).]

Dredged material characteristically exhibit dispersion of fine material and subsequent elevated levels of suspended sediment and turbidity when they are disposed. The material dredged from San Juan Harbor is primarily silty clay which would increase turbidity during all phases of disposal.

The current regime off the north coast of Puerto Rico is composed of tidal and non-tidal components. Semidiurnal tidal currents rotate in a clockwise direction, whereas wind-driven non-tidal currents are predominantly along shore in a westerly direction. The resulting net surface currents at the site indicate a general westward drift with frequent reversals and a mean speed of 0.6 km/hr. Generally, subsurface currents off the north coast are along shore but weaker then surface currents.

There is no known upwelling of subsurface water at the site. A well-mixed layer of surface water extends to approximately 20 meters in May and to 75–100 meters in January. Below 100 meters, a permanent thermocline exists and inhibits the mixing of surface and bottom waters.

The frequent reversal of currents at the site indicates that elevated levels of suspended sediments associated with dumping would be dispersed parallel to the coast, but not in a specific direction. Surface turbidity would be dispersed rapidly in the mixed layer. Elevated levels of suspended sediments in mid and bottom waters will remain below the thermocline and will also be dispersed in a westerly direction parallel to the coast until the particles settle to the bottom.

At depths averaging 292 meters, the strength of bottom currents is unknown, but sediment information indicates that the area is a depositional environment since the sea floor is relatively undisturbed. Therefore, horizontal movement of dredged material on the sea floor caused by either surface wave action or bottom current is not expected.

7. Existence and Effects of Current and Previous Discharges and Dumping in the Area Including Cumulative Effects) [40 CFR 228.6(a)(7).]

Chemical and biological data suggest that previous dumping has created only minor modifications at the site. Oil and grease levels are higher in site sediments; however, levels of other trace contaminants show no consistent trends. Benthic infaunal communities at the interim site show low abundances and diversities similar to the surrounding area. The benthic community is typical of that found in muddy bottom sediments throughout the area (i.e. dominated by small-bodied invertebrate deposit feeders).

8. Interference with Shipping, Fishing, Recreation, Mineral Extraction, Desalinization, Fish and Shellfish Culture, Areas Scientific Importance and Other Legitimate Uses of the Ocean. [40 CFR 228.7(a)(8).]

Heavy shipping and cruise ship traffic passes through or in the vicinity of the site. However, past disposal activities have not interfered with the ship traffic.

A modest commercial fishery operates out of San Juan, but most fishing activity is concentrated in the shallow waters, inshore of the site. However, commercial fishing in this area is hampered by rough seas and strong winds throughout most of the year.

The Bureau of Land Management does not plan to lease any part of the north coast for oil or gas extraction. No other mineral extraction occurs at or near the site.

Disposal at the site would not interfere with the other activities listed above.

9. The Existing Water Quality and Ecology of the Site as Determined by Available Data, Trend Assessment, or Baseline Surveys. [40 CFR 228.6(a)(9).]

Environmental surveys of the site were conducted in 1980 by an EPA contractor and in 1984 by EPA. Both of these studies revealed water quality and thermohaline structure to other areas of the tropical Atlantic.

Benthic infaunal populations at the site and surrounding regions of similar depth are extremely low in density and dominated by polychaete and sipunculid worms.

Fish fauna at the site are expected to be sparse and composed of wide-ranging pelagic fish, such as tuna, jacks, and mackerel. Deep waters at the site may be inhabited by various species having wide depth ranges (spiny dogish, snappers, conger eels, and batfishes) and species representative of the abyssal slope such as grenadiers.

10. Potential for the Development or Recruitment of Nuisance Species in the Disposal Site [40 CFR 228.6(a)(10).]

Survey work at the site has not indicated the development or recruitment of any nuisance species.

There are no components in the dredged material which would attact or recruit nuisance species to the site.

11. Existence at or in Close Proximity to the Site of any significant Natural or Cultural Feature of Historical Importance. [40 CFR 228.6(a)(11).]

El Morro, one of two fortifications within the San Juan National Historic Site, is located on a prominence on the western tip of Isle San Juan and overlooks the Atlantic Ocean. Disposal activities at the site are 2.5 nautical miles north in the Atlantic Ocean and can be seen from the fortification.

E. Response to Comments

On September 24, 1987 EPA proposed designation of this site in the **Federal Register** [52 FR 185]. The proposed rulemaking contained information regarding the site and the circumstances surrounding the request to dispose of dredged material. The Comment period on this proposed rulemaking closed on November 9, 1987. EPA received no responses to this request for comments.

F. Action

The EIS concludes that the site may appropriately be designated for continuing use. The site is compatible with the general criteria and specific factors used for site evaluation.

The designation of the San Juan Dredged Material Disposal Site as an EPA approved Ocean Dumping Site is being published as final rulemaking. Management of this site will be delegated to the Regional Administrator of EPA Region II.

It should be emphasized that, if an ocean dumping site is designated, such a site designation does not constitute or imply EPA's approval of actual disposal of material at the site. Before ocean dumping of dredged material at the site may commence, the Corps of Engineers must evaluate permit applications according to EPA's ocean dumping criteria. If a Federal project is involved, the Corps must also evaluate the proposed dumping in accordance with those criteria. In either case, EPA has the authority to review the applications and to disapprove of the dumping, if it determines that environmental concerns under the Act have not been satisfied.

G. Regulatory Assessments

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. EPA has determined that this action will not have a significant impact on small entities since the designation will only have the effect of providing a disposal option for dredged material. Consequently, this rule does not necessitate preparation of a Regulatory Flexibility Analysis.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action will not result in an annual effect on the economy of $100 million or more or cause any of the other effects which would result in its being classified by the Executive Order as a "major" rule. Consequently, this rule does not necessitate preparation of a Regulatory Impact Analysis.

This final rule does not contain any information collection requirements subject to Office of Management and Budget review under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 40 CFR Part 228

Water Pollution Control.

Dated: March 14, 1988.

Christopher J. Daggett,

Regional Administrator for Region II.

In consideration of the foregoing, Subchapter H of Chapter 1 of Title 40 is amended as set forth below.

PART 228—[AMENDED]

1. The authority citation for Part 228 continues to read as follows:

Authority: 33 U.S.C. Secs. 1412 and 1418.

2. Section 228.12 is amended by removing and reserving paragraph (a)(1)(ii)(B), and by adding paragraph (b)(54) to read as follows:

§ 228.12 Delegation of Management Authority for Interim Ocean Dumping Sites.

* * * * *

(b) * * *

(54) San Juan Harbor, PR Dredged Material Site—Region II

Location: 18d 30′10″ N°, 66d 09′31″ W°; 18d 30′10″ N°, 66d 08′29″ W°; 18d 31′10″ N°, 66d 08′29″ W°; 18d 31′10″ N°, 66d 09′31″ W°.

Size: 0.98 square nautical miles.

Depth: Ranges from 200–400 meters.

Primary Use: Dredged material.

Period of Use: Continuing use.

Restriction: Disposal shall be limited to dredge material from the Port of San Juan, Puerto Rico, and coastal areas within 20 miles of said port entrance.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[PR Docket No. 87–1, FCC No. 88–86]

Private Land Mobile Radio Services, Assignment of Frequencies

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted a *Report and Order* that modifies the co-channel assignments standards for 800 MHz trunked Specialized Mobile Radio (SMR) systems located in the Seattle, Washington area. This action will increase the minimum co-channel separation requirement from 70 to 105 miles for these systems that are located on certain, specified mountaintops around Seattle. The new requirements will provide increased interference protection in the Seattle area for co-channel 800 MHz SMRs.

EFFECTIVE DATE: May 2, 1988.

FOR FURTHER INFORMATION CONTACT: Michael Lewis, Rules Branch, Land Mobile and Microwave Division, Private Radio Bureau, (202) 634–2443.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, PR Docket 87–1, adopted February 29, 1988, and released March 18, 1988.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Report and Order

1. This proceeding was initiated to address an interference situation first brought to our attention by a group known as the Western Washington Cooperative Interference Committee (WWCIC). This group reported that the 70 mile co-channel separation requirement for 800 MHz trunked SMR systems was insufficient to prevent interference in Seattle because the terrain of this area does not conform with the model used to develop the 70 mile standard. After this report was confirmed by the Commission's Field Operations Bureau, we proposed to increase the minimum separation requirement to 105 miles.

2. In response to the *Notice*, commenters urged the Commission to find a solution which balances the needs of providing increased interference protection without severely limiting frequency reuse in the area. The commenters noted that the problem is largely caused by transmitters located at high elevations and urged that we focus our attention on this aspect of the problem. The Commission agreed with the commenters on this point and, therefore, chose to apply the increased separations only to certain, specified mountains instead of applying an across-the-board increase.

3. The Commission declined, however, to adopt the commenters' proposal that the new requirements should also be applied to non-SMR trunked systems and conventional systems that have exclusive use of a frequency. The Commission stated that there are regulatory and operational differences between trunked SMRs and these other systems, particularly the presence of frequency coordinators, that warrants different assignment standards. Finally, the Commission grandfathered any existing systems except those with authorizations that were conditioned on the outcome of this proceeding and stated that the new requirements will apply to future 900 MHz systems in the Canadian border area when an agreement is reached with the Canadian government on the use of this spectrum in the Seattle area.

Regulatory Flexibility Act Final Analysis

4. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 604, a final regulatory flexibility analysis has been prepared. It is available for public viewing as part of the full text of this decision, which may be obtained from the Commission or its copy contractor.

5. The Secretary shall cause a copy of this *Report and order*, including the Final Regulatory Flexibility Analysis, to be sent to the Chief Counsel for Advocacy of Small Business Administration, in accordance with section 603(a) of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.*), (1981).

Paperwork Reduction Act Statement

6. The action summarized herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or recordkeeping, labeling, disclosure, or record retention requirements; and will not increase or decrease burden hours imposed on the public.

Ordering Clauses

7. Accordingly, it is ordered that, pursuant to authority contained under section 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r), Part 90 of the Commission's Rules is amended effective May 2, 1988.

It is further ordered that this proceeding is terminated.

List of Subjects in 47 CFR Part 90

Radio, Private land mobile radio services.

Amendatory Text

47 CFR Part 90 is amended as follows:

PART 90—[AMENDED]

8. The authority citation for Part 90 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303 unless otherwise noted.

9. 47 CFR 90.362 is amended by adding new paragraph (c)(3) to read as follows:

§ 90.362 Selection and assignment of frequencies.

* * * * *

(c) * * *

(3) Trunked systems located in the State of Washington at the following locations shall be separated from co-channel systems by a minimum of 168 km (105 miles). Locations within one mile of the geographical coordinates listed in the table will be considered to be at that site.

Site name	North latitude	West longitude
Mont Constitution	48-40-46	122-50-24
Lyman Mountain	48-35-42	122-09-35
Cultus Mountain	48-25-31	122-08-54
Gunsite Ridge	48-03-23	121-51-37
Gold Mountain	47-32-52	122-46-52
Buck Mountain	47-47-06	122-59-30
Cougar Mountain	47-32-40	122-06-30
Squak Mountain	47-30-15	122-03-30
Tiger Mountain	47-30-14	121-58-28
Devils Mountain	48-21-53	122-16-02
McDonald Mountain	47-20-12	122-51-26
Maynard Hill	48-00-59	122-55-31
North Mountain	47-19-06	123-20-44
Green Mountain	47-33-41	122-48-27
Capitol Peak	46-58-22	123-08-17
Rattlesnake Mountain	47-28-10	121-49-13
Three Sisters Mountain	47-07-20	121-53-30
Grass Mountain	47-12-15	121-47-38
Spar Pole Hill	47-02-52	122-08-35

10. 47 CFR 90.615 is revised to read as follows:

§ 90.615 Frequencies available for conventional systems in the 806–809.750/851–854.750 MHz bands.

Channels 1–150 are available to eligible applicants in all services only for conventional system use. The frequencies are available in areas farther than 110 km. (68.4 miles) from the U.S./Mexico border, and farther than 140 km. (87.0 miles) from the U.S.-Canadian border.

11. 47 CFR 90.621 is amended by adding new paragraph (b)(3), and by revising paragraph (c) to read as follows:

§ 90.621 Selection and assignment of frequencies.

* * * * *

(b) * * *

(3) SMR trunked systems located in the State of Washington at the following locations shall be separated from co-channel systems by a minimum of 168 km (105 miles). Locations within one mile of the geographical coordinates listed in the table will be considered to be at that site.

Site name	North latitude	West longitude
Mount Constitution	48-40-46	122-50-24
Lyman Mountain	48-35-42	122-09-35
Cultus Mountain	48-25-31	122-08-54
Gunsite Ridge	48-03-23	121-51-37
Gold Mountain	47-32-52	122-46-52
Buck Mountain	47-47-06	122-59-30
Cougar Mountain	47-32-40	122-06-30
Squak Mountain	47-30-15	122-03-30
Tiger Mountain	47-30-14	121-58-28
Devils Mountain	48-21-53	122-16-02
McDonald Mountain	47-20-12	122-51-26
Maynard Hill	48-00-59	122-55-31
North Mountain	47-19-06	123-20-44
Green Mountain	47-33-41	122-48-27
Capitol Peak	46-58-22	123-08-17
Rattlesnake Mountain	47-28-10	121-49-13
Three Sisters Mountain	47-07-20	121-53-30
Grass Mountain	47-12-15	121-47-38
Spar Pole Hill	47-02-52	122-08-35

(c) Trunked systems authorized on frequencies in the Public Safety, Industrial/Land Transportation, and Business categories will be protected solely on the basis of predicted contours. Coordinators will attempt to provide a 40 dBu contour and to limit co-channel interference levels to 30 dBu over an applicant's requested service area. This would result in a mileage separation of 70 miles for typical system parameters. Applicants should be aware that in some areas, *e.g.*, Seattle, Los Angeles, and northern California, separations greater than 70 miles may be appropriate. Separations will be less than 70 miles where the requested service areas, terrain, or other factors warrant reduction. In the event that the separation is less than 70 miles, the coordinator must indicate that the protection criteria have been preserved or that the affected licensees have agreed in writing to the proposed

---

system. Only co-channel interference between base station operations will be taken into consideration. Adjacent channel and other types of possible interference will not be taken into account.

BILLING CODE 6712-01-M

Proposed Rules

Federal Register
Vol. 53, No. 56
Wednesday, March 23, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 925 and 944

Grapes Grown in a Designated Area of Southeastern California and Table Grapes Imported Into the United States; Proposed Change in Minimum Size Requirements for Perlette Grapes

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would increase the minimum berry size for California Perlette grapes and imported Perlette grapes from 9/16 to 10/16 of an inch starting with the 1989 crop season. This action is intended to provide fresh markets with Perlette grapes of desirable size and promote consumer acceptance of these grapes.

DATE: Comments must be received by April 22, 1988.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments should be sent to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085–S, Washington, DC 20090–6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the date and page number of this issue of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone: (202) 447–5331.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 925 (7 CFR Part 925), regulating the handling of grapes grown in a designated area of southeastern California. This order is authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposal on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of California desert grapes subject to regulation under this marketing order, and approximately 85 desert grape producers. Also, there are approximately 50 grape importers subject to the requirements of the table grape import regulation. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California desert grapes and importers of table grapes may be classified as small entities.

The California Desert Grape Administrative Committee's 1987 Annual Report indicated that table grape shipments for 22 pound boxes had totals in the past three seasons of 7,364,853 in 1987, 8,189,994 in 1986, and 7,441,364 in 1985. The decrease in last year's production was due to inclement weather conditions. Bearing acreage of 18,815 in 1987 was 722 acres more than the 18,093 acres reported in 1986. Available forecasts indicate that table grape supplies should be comparable to those in recent seasons.

Table grape producers are improving their cultural practices to remain competitive and to meet the expectations of the consumer. Table grapes compete with over 250 other items in supermarket produce sections. Since table grapes are usually an impulse item, purchases are based on eye appeal.

Total shipments in 1987 of 22 pound boxes of Perlette grapes were 2,693,356 or approximately 36 percent of the total shipments for all varieties.

Based on prices provided by the Federal-State Market News Service and the committee's handling cost figures, it is estimated that the on-vine value of California Perlette grapes approximated $23.1 million in 1987. This represents about 45.4 percent of the total value of all varieties of grapes grown in the production area.

Perlette grapes were the dominant variety shipped out of the production area during the last crop year. The "production area" is Imperial County, California, and part of Riverside County and San Diego County, California.

The proposed rule would change the handling regulation specified at 7 CFR in § 925.304 (50 FR 18851, May 3, 1985; 50 FR 32161, August 8, 1985; 51 FR 12501, April 11, 1986; 51 FR 13209, April 18, 1986; 51 FR 16285, May 2, 1986; 52 FR 8865, March 20, 1987; 52 FR 20382, June 1, 1987; 52 FR 24443, July 1, 1987) to increase the minimum berry size for California Perlette grapes regulated under the marketing order from 9/16 to 10/16 of an inch in diameter.

Changes would be made in §§ 925.304(a) and 944.503(a)(1) to increase the size of California desert grape shipments and table grape imports by increasing the minimum berry size for the Perlette grape variety. This proposal is being issued pursuant to § 925.52 of the order.

Members of the committee believe that increasing the minimum berry size for Perlettes would better meet the demands of the consumer. The larger berries of this variety would tend to produce a more attractive and uniform pack. Requiring handlers to ship only larger size grapes, which are more desirable in the marketplace, would be expected to foster increased consumption and have a positive impact on the industry. Furthermore, the committee believes the proposed increase in the minimum berry size requirement would help consumers identify and distinguish the green-colored, round Perlette grape from other grape varities of similar color.

Quality assurance is very important to the California desert grape industry. Providing the public with acceptable quality fruit which is appealing to the consumer on a consistent basis is necessary to maintain buyer confidence in the marketplace. To the extent that this action increases the quality of Perlette grapes in the marketplace, it would also be of benefit to both California desert grape producers and handlers. This action would not adversely affect marketable supplies of grapes.

This action, if approved, would not become effective until the 1989 crop season. This would afford producers the time necessary to change their cultural practices in order to meet the increased minimum berry size requirement.

Based on the above, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Section 8e of the Act (7 U.S.C. 608e–1) provides that whenever specified commodities, including table grapes, are regulated under a Federal marketing order, imports of that commodity are prohibited unless they meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. Because this proposal would increase the minimum berry size for California Perlette grapes under M.O. 925, this change would be applicable to imported Perlette grapes during the period (April 20 to August 15 each year) that the domestic handling requirements are in effect.

Chile and Mexico are the two main sources of Perlette grape imports to the United States. Imports of Perlette grapes from Chile would be unaffected by this rule because harvesting and shipping of this variety are completed in January, and the domestic handling regulations do not become effective until April 20.

However, the Mexican grape shipping season runs concurrently with that for California desert grapes which are regulated under Marketing Order 925.

During 1987, U.S. imports of Mexican grapes totaled 2,597,926 lugs. Of this total, 28 percent represented grapes of the Perlette variety.

While this proposal would increase the minimum berry size for domestic and imported Perlette grapes for the 1989 crop year, exemptions from requirements under the domestic handling regulation would remain unchanged for shipments of the Emperor, Almeria, Calmeria, and Ribier grape varieties. These varieties are exempt from handling requirements because they are not grown in the production area. Imports of these varieties also are exempt from import regulation requirements (§ 944.503, Table Grape Import Regulation 4; 51 FR 12501, April 11, 1986; 51 FR 13209, April 18, 1986; 52 FR 8865, March 20, 1987).

Organically grown grapes are exempt from the berry size requirements, and the handling of grapes for processing (raisins, crushing, and other by-products) is exempt from size, quality, and container requirements. These exemptions are specified in § 925.304(c) and (d).

A 30-day comment period is provided to allow interested persons sufficient time to respond to this proposal. All written comments timely received in response to this request for comments will be considered before a final determination is made on this matter.

List of Subjects

7 CFR Part 925

Marketing agreements and orders, Grapes, California.

7 CFR Part 944

Fruits, Import regulations, Grapes.

For the reasons set forth in the preamble, it is proposed that 7 CFR Parts 925 and 944 be amended as follows:

1. The authority citation for 7 CFR Parts 925 and 944 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 925—GRAPES GROWN IN A DESIGNATED AREA OF SOUTHEASTERN CALIFORNIA

2. Section 925.304 is amended by revising paragraph (a) to read as follows:

§ 925.304 California Desert Grape Regulation 6.

* * * * *

(a) *Grade, size, and maturity.* Such grapes shall meet the minimum grade and size requirements specified in § 51.884 for U.S. No. 1 Table, as set forth in the United States Standards for Grades of Table Grapes (European or Vinifera Type, 7 CFR 51.880 through 51.912), except that (1) grapes of the Perlette variety shall meet the minimum berry size requirement of ten-sixteenths of an inch, and that (2) grapes of the Flame Seedless variety shall meet the minimum berry size requirement of ten-sixteenths of an inch and shall be considered mature if the juice contains not less than 15 percent soluble solids and the soluble solids are equal to or in excess of 20 parts to every part acid contained in the juice in accordance with applicable sampling and testing procedures specified in sections 1436.3, 1436.5, 1436.6, 1436.7, 1436.12, and 1436.17 of Article 25 of the California Administrative Code (Title 3).

* * * * *

PART 944—FRUITS, IMPORT REGULATIONS

3. Section 944.503 is amended by revising paragraph (a)(1) to read as follows:

§ 944.503 Table Grape Import Regulation 4.

(a)(1) Pursuant to section 8e of the Act and Part 944—Fruits, Import Regulations, the importation into the United States of any variety of vinifera species table grapes, except Emperor, Calmeria, Almeria, and Ribier varieties, is prohibited unless such grapes meet the minimum grade and size requirements specified in § 51.884 for U.S. No. 1 Table grade, as set forth in the United States Standards for Grades of Table Grapes (European or Vinifera Type, 7 CFR 51.880 through 51.912), except that (1) grapes of the Perlette variety shall meet the minimum berry size requirement of ten-sixteenths of an inch, and that (2) grapes of the Flame Seedless variety shall meet the minimum berry size requirement of ten-sixteenths of an inch and shall be considered mature if the juice contains not less than 15 percent soluble solids and the soluble solids are equal to or in excess of 20 parts to every part acid contained in the juice in accordance with applicable sampling and testing procedures specified in sections 1436.3, 1436.5, 1436.6, 1436.7, 1436.12, and 1436.17 of Article 25 of the California Administrative Code (Title 3).

* * * * *

Dated: March 18, 1988.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 88-6346 Filed 3–22–88; 8:45 am]

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 16

[Order No. 1261–88]

Revision of Department of Justice Business Information; FOIA Regulation Implementing Executive Order 12600

AGENCY: Department of Justice.

ACTION: Proposed rule.

SUMMARY: This notice sets forth a proposed revision of a procedural regulation of the Department of Justice, 28 CFR 16.7, setting forth the procedures to be followed in notifying submitters of business information that such information has been requested under the Freedom of Information Act (FOIA), 5 U.S.C. 552. It is proposed that this provision be amended to bring it into conformity with the provisions of Executive Order 12600, 52 FR 23781 (1987). Additionally, this proposed revision modifies the language of the provision for purposes of clarity.

DATE: Comments must be received on or before April 22, 1988.

ADDRESS: Comments should be directed to: Richard L. Huff or Daniel J. Metcalfe, Co-Directors, Office of Information and Privacy, United States Department of Justice, Room 7238, Washington, DC 20530.

FOR FURTHER INFORMATION CONTACT: Richard L. Huff or Daniel J. Metcalfe, Co-Directors, Office of Information and Privacy, United States Department of Justice, Room 7238, Washington, DC 20530; ((202) 633-3642).

SUPPLEMENTARY INFORMATION: The major substantive change made in this proposed revision is the elimination of one of the exceptions to the provision's notice requirement. Currently, under § 16.7(g), notice need not be given if "[t]he component is a criminal law enforcement agency that acquired the information in the course of a lawful investigation of a possible violation of criminal law." The elimination of this exception is necessary to bring the provision into conformity with Executive Order 12600. Additionally, the notice provision of § 16.7(c) is proposed to be simplified, in redesignated paragraph (d), in a manner consistent with both Executive Order 12600 and the existing ten-year designation-effectiveness provision carried over into new paragraph (e). Finally, the clarifying language modifications that are proposed, which are entirely procedural in nature and conform to the provisions of Executive Order 12600, include a specific definition subsection and a separate subsection on submitter designation of information.

This proposed rule does not constitute a "major rule" within the meaning of Executive Order No. 12291 (Improving Government Regulations). The requirements of the Regulatory Flexibility Act, 5 U.S.C. 605(b), do not apply.

List of Subjects in 28 CFR Part 16

Freedom of information.

Accordingly, under the authority vested in me by 28 U.S.C. 509 and 510, and 5 U.S.C. 301 and 552, Part 16 of Chapter I of Title 28 of the Code of Federal Regulations is proposed to be amended as follows:

PART 16—[AMENDED]

1. The authority citation for Part 16 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g), 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510, 534; 31 U.S.C. 9701.

2. Section 16.7 is revised to read as follows:

§ 16.7 Business information.

(a) *In general.* Business information provided to the Department of Justice by a submitter shall not be disclosed pursuant to a Freedom of Information Act request except in accordance with this section.

(b) *Definitions.* The following definitions are to be used in reference to this section:

"Business information" means commercial or financial information provided to the Department by a submitter that arguably is protected from disclosure under Exemption 4 of the Freedom of Information Act, 5 U.S.C. 552(b)(4).

"Submitter" means any person or entity who provides business information, directly or indirectly, to the Department. The term includes, but is not limited to, corporations, state governments and foreign governments.

(c) *Notice to submitters.* A component shall provide a submitter with prompt written notice of a Freedom of Information Act request or administrative appeal encompassing its business information wherever required under paragraph (d) of this section, except as is provided for in paragraph (i) of this section, in order to afford the submitter an opportunity to object to disclosure pursuant to paragraph (f) of this section. Such written notice shall either describe the exact nature of the business information requested or provide copies of the records or portions thereof containing the business information. The requester also shall be notified that notice and an opportunity to object are being provided to a submitter.

(d) *When notice is required.* Notice shall be given to a submitter whenever:

(1) The information has been designated in good faith by the submitter as information deemed protected from disclosure under Exemption 4, or

(2) The component has reason to believe that the information may be protected from disclosure under Exemption 4.

(e) *Designation of business information.* Submitters of business information shall use good-faith efforts to designate, by appropriate markings, either at the time of submission or at a reasonable time thereafter, those portions of their submissions which they deem to be protected from disclosure under Exemption 4. Such designations shall be deemed to have expired ten years after the date of the submission unless the submitter requests, and provides reasonable justification for, a designation period of greater duration.

(f) *Opportunity to object to disclosure.* Through the notice described in paragraph (c) of this section, a component shall afford a submitter a reasonable period of time within which to provide the component with a detailed written statement of any objection to disclosure. Such statement shall specify all grounds for withholding any of the information under any exemption of the Freedom of Information Act and, in the case of Exemption 4, shall demonstrate why the information is contended to be a trade secret or commercial or financial information that is privileged or confidential. Whenever possible, the submitter's claim of confidentiality should be supported by a statement or certification by an officer or authorized representative of the submitter. Information provided by a submitter pursuant to this paragraph may itself be subject to disclosure under the FOIA.

(g) *Notice of intent to disclose.* A component shall consider carefully a submitter's objections and specific grounds for nondisclosure prior to determining whether to disclose business information. Whenever a component decides to disclose business information over the objection of a submitter, the component shall forward to the submitter a written notice which shall include:

(1) A statement of the reasons for which the submitter's disclosure objections were not sustained;

(2) A description of the business information to be disclosed; and

(3) A specified disclosure date.

Such notice of intent to disclose shall be forwarded to the submitter a reasonable number of days prior to the specified disclosure date and the requester shall be notified likewise.

(h) *Notice of FOIA Lawsuit.* Whenever a requester brings suit seeking to compel disclosure of business information, the component shall promptly notify the submitter.

(i) *Exceptions to notice requirements.* The notice requirements of paragraph (c) of this section shall not apply if:

(1) The component determines that the information should not be disclosed;

(2) The information lawfully has been published or has been officially made available to the public;

(3) Disclosure of the information is required by law (other than 5 U.S.C. 552); or

(4) The designation made by the submitter in accordance with paragraph (e) of this section appears obviously frivolous; except that, in such case, the component shall provide the submitter with written notice of any final administrative decision to disclose business information within a reasonable number of days prior to a specified disclosure date.

Dated: March 14, 1988.

Edwin Meese III,

Attorney General.

[FR Doc. 88–6240 Filed 3–22–88; 8:45 am]

BILLING CODE 4410-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 785 and 823

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Prime Farmland

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of reopening of public comment period.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) of the United States Department of the Interior (DOI), in cooperation with the USDA, Soil Conservation Service (SCS), previously has published a proposed rule which would amend certain portions of its rules applicable to prime farmland. Among other actions, the proposed rules would have amended the existing water body exemption in consideration of the U.S. District Court's decision in *In Re: Permanent Surface Mining Regulation Litigation II*, No. 79–1144 (D.D.C., October 1, 1984) Mem. Op. at 14–24.

OSMRE is now reopening the comment period on the issue of allowing the creation of a water body within a permit area containing prime farmland.

DATES: The comment period on the water body issue of the proposed rule is reopened until April 22, 1988.

ADDRESSES: Written comments may be mailed to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131-L, 1951 Constitution Avenue, NW., Washington, DC 20240; or hand-delivered to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dermot M. Winters, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: 202–343–1928 (Commercial or FTS).

SUPPLEMENTARY INFORMATION:

I. Background
II. Discussion of Water Body Issue
III. Specific Comments Requested

I. Background

The Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act), 30 U.S.C. 1201 *et seq.*, contains special permitting and performance standards governing mining on prime farmland as defined in section 701(20) of the Act. Permit application information and approval requirements are contained in sections 507(b)(16), 508(a)(2)(C), 508(a) (5) and 510(d) of the Act.

Section 507(b)(16) of the Act requires that permit applications include a soil survey for those lands in the application which a reconnaissance inspection suggests may be prime farmland. Section 508(a)(2)(C) of the Act requires that permit applications contain a statement of the productivity of the land prior to mining including the appropriate classification as prime farmland, as well as the average yield of food, fiber, forage or wood products from such lands obtained under high levels of management. Section 508(a)(5) of the Act requires a plan for soil reconstruction, replacement, and stablization pursuant to the prime farmland performance standards of section 515(b)(7) of the Act. Moreover, section 510(d)(1) of the Act provides that the regulatory authority shall grant a permit to mine on prime farmland only after consultation with the Secretary of Agriculture, and if the regulatory authority finds in writing that the operator has the technological capability to restore such mined area, within a reasonable time, to equivalent or higher levels of yield as nonmined prime farmland in the surrounding area under equivalent levels of management and can meet the soil reconstruction standards in section 515(b)(7).

Statutory performance standards for prime farmland are found in sections 515(b)(7) and (b)(20) of the Act. Section 515(b)(7) sets forth minimum requirements for soil removal, storage, replacement, and reconstruction. Section 515(b)(20) establishes when the period of responsibility for successful revegetation begins and provides an exception to vegetative cover requirements when the regulatory authority makes a written finding approving a long-term, intensive, agricultural postmining land use. In addition, section 519(c)(2) states that performance bonds shall not be released until soil productivity for prime farmland has returned to equivalent levels of yield as unmined land of the same soil type in the surrounding area under equivalent management practices as determined from the soil survey. Rules implementing prime farmland permitting, bonding and performance provisions are found at 30 CFR 785.17, 800.40 and 823.

On March 25, 1987 (52 FR 9644), OSMRE issued a proposed rulemaking which included an exemption for water bodies created on permit areas containing prime farmland. In that notice, OSMRE solicited public comments and made provisions to hold public hearings upon request. During the 70-day comment period, comments were received from industry, government agencies, and citizen/environmental groups. No public meetings or hearings were requested, and non were held.

II. Discussion of Water Body Issue

OSMRE stated in 1979 that "last cut" lakes were acceptable as an alternative post-mining land use on prime farmland (44 FR 15087). However, a specific exemption from the Part 823 performance standards for prime farmland was first added to the rules in 1983 (48 FR 21446). In *In re: Permanent II*, the National Wildlife Federation challenged the 1983 exemption at § 823.11(b), which set forth an exclusion from the prime farmland performance standards for water bodies that had been approved by the regulatory authority as an alternative postmining land use. The district court struck down the exemption and held that it provided a broad and impermissible variance from the postmining use of prime farmland. *In re: Permanent II,* No. 79–1144, pp. 19–21.

On January 29, 1988 the U.S. Court of Appeals, D.C. Circuit, upheld that decision by the U.S. District Court for the District of Columbia on the issue of the construction of water impoundments on Prime Farmland. The Appeals Court's decision comes at a time when the Office of Surface Mining Reclamation and Enforcement (OSMRE) is in the process of preparing a final rule. To ensure that the final rule will be responsive both to the Court decisions and to comments received on the proposed rule, OSMRE is making a careful examination of certain issues involving the restoration of prime farmland and related to the creation of water bodies on permit areas containing prime farmland.

Section 785.17(e)(1), as proposed on March 25, 1987 (52 FR 9644) provided an exemption from the prime farmland standards for water bodies where the total acreage of prime farmland is not decreased in the permit area. Under that proposed rule and subject to the approval of the regulatory authority, an operator would be able to install a water body on an area that prior to mining contained prime farmland soil as long as the prime farmland soils obtained from the excavation of the water body were handled in a manner consistent with Part 823 and the same prime farmland soils were utilized to reconstruct an equal amount of prime farmland on areas which were not prime farmland areas prior to mining. under that proposal §§ 785.17(e)(1) and 823.11(b) would work in tandem to authorize such relocation of prime farmland. OSMRE viewed proposed § 785.17(e)(1) as consistent with the prime farmland provisions of the Act which are meant to maintain the number of prime farmland acres at premining levels as well as maintain the soil productive capacity of those lands.

The district court's decision overturning the exemption for last-cut impoundments on prime farmland was affirmed by the D.C. Court of Appeals, which noted that § 823.11(b) "condones reclaiming land that had been prime farmland prior to mining by constructing a permanent water impoundment * * *." The court then states, "Beyond question, Congress did not intend to allow any mined prime farmland to be left altogether unreclaimed," and SMCRA section 515(b)(7) requires "that *all* prime farmland reclamation *shall* 'as a minimum,' be conducted pursuant to the statutorily enumerated requirements" for reclamation. The court then noted that section 515(b)(7) "plainly supports the district court's conclusion that a general exception for water impoundments authorizes impermissible post-mining uses of prime farmland." Lastly, the appeals court noted that "[t]he district court * * * most plausibly comprehended Congress to have ordered that permanent water impoundments unconnected to prime farmland use not be constructed on prime farmland." *NWF* v. *Hodel,* No. 84–5743 at 46–51. (D.C. Cir., January 29, 1988)

OSMRE no longer believes that an exemption to the prime farmland rules is necessary to allow operators to create water bodies within permit areas containing prime farmland so long as the aggregate premining prime farmland acreage within the permit area is retained. Upon further examination OSMRE believes that with normal permitted relocation of reclaimed soils on sites which are not 100 percent prime farmland, a site on which non-prime farmland soil would otherwise be relocated may be used to create a water body under existing requirements and practices. The shifting of prime farmland soils from a pre-mining location to a post-reclamation location is currently authorized and can properly be considered part of normal practice in restoring prime farmland pursuant to Part 823. This position is not new. Since 1979, OSMRE has authorized the relocation of prime farmland soils within the permit area. OSMRE stated in a brief filed with the Federal District Court that "The Secretary's regulations provide that small or odd-shaped plots (of prime farmland) can be consolidated and relocated in meeting the reclamation standards of the Act. The only limitations on soil placement pertain to restoration of the soil to insure its productive capacity. There is no requirement, however, that the reconstructed prime farmland soil be placed in the same location as before mining. Therefore, so long as the aggregate amount of prime farmland that is restored equals the amount that existed before mining, the Secretary's reconstruction requirements will be satisfied." *In Re: Permanent Surface Mining Regulation Litigation,* No. 79–1144 (D.D.C. 1979), Memorandum in support of cross-motion for summary judgment filed December 21, 1979, at pp. 100–101. As a specific example, with the encouragement of OSMRE and the SCS, small odd-shaped parcels of prime farmland have been consolidated and relocated in the State of North Dakota, to the benefit of both the mine operator and the landowner/farmer. Documentation of this practice has been placed in the administrative record.

Furthermore, the normal process of mining and reclamation for a typical surface mine in the midwest will relocate prime farmland soils three to four spoil ridges from the original location in situations not requiring soil storage. The mine operator ordinarily will replace the prime farmland soils as close to the original prime farmland location as practicable, to avoid unnecessary costs for transporting soils. When shifting of prime farmland soil location is part of a complete mining and reclamation plan, relocation of prime farmland soil will be kept to a minimum, will be reviewed and concurred in by the USDA, Soil Conservation Services (SCS), and must still meet the prime farmland soil reconstruction and bond release standards.

Viewed in the context of typical soil reclamation practices and applicable restrictions on locations, acreage, and productivity, the placement of prime farmland soils to accommodate the creation of water bodies can be properly considered as being no different than any other normal and routine relocation of prime farmland soils within a permit area during the reclamation and restoration process. Consequently, no exemption need be created to allow this practice so long as the pre-mining prime farmland acreage in the permit area is not decreased, any water body created is located on the post-reclamation non-prime farmland portion of the permit area, and all resulting prime farmland meets the soil reconstruction and productivity standards of Part 823. The ultimate effect of such relocation is that certain non-prime farmland soils will be replaced by the impoundment, and the post-mining prime farmland acreage is maintained and relocated within the permit area in a manner and to a degree which has been approved by regulatory authorities in the past.

Because OSMRE referred in the March 25, 1987 proposed rule to such a change in land use as a proposed "exemption" where the total acreage of prime farmland is not decreased in the permit area, OSMRE now wishes to make clear that no exemption from the prime farmland criteria will be provided in these rules. As stated above, existing rules already allow relocation of prime farmland soils within the permit area. Where non-prime farmland areas are found on permit areas, these areas may be subjected to land use changes, including the creation of water bodies, provided the requirements of 30 CFR 779.22, 780.23, 783.22, 784.15, 816.133, and

817.133 are met. Thus, no prime farmland would be left unreclaimed and no prime farmland would be converted to impoundments. OSMRE believes that this approach fully addresses the concerns expressed by the district court and appeals court in *In re: Permanent II* and *NWF* v. *Hodel* (1988).

Therefore, the rules proposed would no longer treat the creation of water bodies as an "exemption" to the Part 823 rules, but would clarify existing practices. Instead of revising section 785(e)(1), as proposed on March 25, 1987, a new § 785.17(e)(5) would be added to read as follows:

"Where the permit area contains less than 100 percent prime farmland acreage, the aggregate total prime farmland acreage before and after mining shall not be decreased."

In addition, paragraph (b) of § 823.11 had been proposed to read as follows:

(b) The requirements of §§ 823.14 and 823.15 shall not apply to impoundments authorized under § 785.17(e)(1) of this chapter.

Because the construction of water bodies in permit areas containing less than 100 percent prime farmland would no longer be viewed as an exemption from the Part 823 requirements, proposed paragraph (b) is unnecessary and, therefore, is eliminated from the changes proposed for § 823.11.

Although the proposed rule language has been revised to reflect OSMRE's altered rationale for allowing the creation of water bodies within permit areas containing less than 100 percent prime farmland, the end result in terms of on the ground effect has not changed from the March 25, 1987 proposal. This proposal continues to require prime farmland soils removed for water bodies to be separately removed, segregated and stockpiled, but not replaced within the impoundment. These prime farmland soils are to be reconstructed in the same way other prime farmlands are reconstructed within the permit area and with the review and concurrence of the USDA, Soil Conservation Service. OSMRE does not intend to allow the disturbance of prime farmland areas which would not otherwise be disturbed by mining operations in order to create prime farmland.

III. Specific Comments Requested

OSMRE is interested in the views of regulatory authorities, SCS State Conservationists, surface mine operators, and any other interested persons on the circumstances under which impoundments may be created within permit areas containing prime farmland. Of special interest to OSMRE are the experiences of the regulatory authorities, SCS State Conservationists, and surface coal mine operators in relocating prime farmland soils within permit areas.

OSMRE is interested in determining with greater specificity (1) how SCS-approved restoration has proceeded in those situations where permit areas contained less than 100 percent prime farmland prior to mining, (2) the extent to which prime farmland soils have been shifted within the permit area from pre-mining to different post-reclamation locations during the typical process of prime farmland restoration, and (3) the extent to which the creation of water bodies has been allowed by regulatory authorities on post-reclamation non-prime farmland portions of permit areas which contained prime farmland soils prior to mining. OSMRE also solicits comments on other reasons for relocating prime farmland soils.

All comment responses should be sent to the OSMRE Administrative Record at the location specified above under "**ADDRESSES.**"

Date: March 18, 1988.

Jed D. Christensen,

Director, Office of Surface Mining Reclamation and Enforcement.

BILLING CODE 4310-05-M

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 838

Air Force Systems Command Contractor Performance Assessment

AGENCY: Department of the Air Force, DOD.

ACTION: Proposed rule.

SUMMARY: This proposed part sets policy, assigns responsibilities, and provides implementing procedures for systematically assessing contractor performance on current contracts. The Contractor Performance Assessment Reporting System (CPARS) will assess contractor performance on current AFSC contracts for use in future contract award decisions. These assessments will be prepared by AFSC program directors and forwarded to the contractor for review and comment. This part is limited in scope to predominantly advance development, full-scale development, or production efforts. Research, exploratory development, service, and operations and maintenance efforts are not included.

DATE: Comments must be submitted on or before April 22, 1988.

ADDRESS: HQ AFSC/PKCP, ANDREWS AFB, DC 20334–5000.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Wright, telephone (301) 981–4022.

SUPPLEMENTARY INFORMATION: The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

A list of contractors in CPAR data base and a copy of AFSC Form 125 can be obtained from Ms. Susan Wright at the address shown above.

List of subjects in 32 CFR Part 838

Government contracts.

Therefore, it is proposed to amend 32 CFR, Chapter C, by adding Part 838 to read as follows:

PART 838—AIR FORCE SYSTEMS COMMAND CONTRACTOR PERFORMANCE ASSESSMENT

Subpart A—Air Force Systems Command Policies

Sec.
838.1 Purpose of Contractor Performance Assessment Reporting System (CPARS).
838.2 Applicability and scope.

Subpart B—Responsibilities Assigned

838.3 HQ AFSC responsibilities.
838.4 Field activity responsibilities.

Subpart C—CPAR Procedures

838.5 Frequency of performance assessment reporting.
838.6 CPAR processing.
838.7 CPAR focal point.
838.8 AFSC Source Selection Offerors Report.
838.9 CPAR markings and protection.
838.10 Instructions for completing AFSC Form 125, Contractor Performance Assessment Report (CPAR).

Authority: 10 U.S.C. 2305(a)(3).

Note: Part 807 of this chapter states Air Force procedures for issuing publications and forms to private citizens, organizations and commercial activities.

Subpart A—Air Force Systems Command Policies

§ 838.1 Purpose of Contractor Performance Assessment Reporting System (CPARS).

(a) This part establishes policies and procedures for implementing the CPARS. The sole purpose of CPARS is to provide programmatic input into a command-wide performance data base for use in AFSC source selections (reference AFR 70–15, AFSC Supplement 1). Performance assessments will be used to aid in awarding contracts to contractors that consistently produce quality products conforming to our specifications within the established contract schedule and cost. AFSC Form 125, Contractor Performance Assessment Report (CPAR) can effectively be used as a means to communicate contractor strengths and weaknesses to source selection officials. CPARs will not be used for any other purpose than outlined in this paragraph. Specific guidance concerning the protection of CPAR data is provided in § 838.9.

(b) CPARs assess a contractor's positive and negative performance on a given contract during a specified period of time. Each assessment must be based on objective facts and be supportable by program and contract management data, such as cost performance reports, technical interchange meetings, financial solvency assessments, production management reviews, contractor operations reviews, functional performance evaluations and earned contract incentives. Subjective visibility into the causes or ramifications of the assessed performance should be provided; however, speculation, assertion, or conjecture should not be included.

§ 838.2 Applicability and scope.

(a) This part applies to Air Force Systems Command (AFSC) Armament Division, Aeronautical Systems Division, Air Force Contract Management Division, Ballistic Missile Office, Electronic Systems Division, and Space Division. CPARs are limited to predominantly advance development, full-scale development (FSD), or production efforts. Research, exploratory development, service, and operations and maintenance efforts are not included. CPARs must be completed on all contracts over $5 million (face value, excluding unexercised options) with any division or subsidiary of the contractor. When a single contract instrument requires segregation of costs for combining FSD and production efforts or containing multiple productions lots, individual CPARs may be completed for each segment of work.

(b) AFSC field activities may establish local procedures supplementing this part to broaden the application of CPARs to additional contract efforts and contractors for their own use. Submit such procedures to AFSC Vice Commander (AFSC/CV) for approval prior to implementation.

Subpart B—Responsibilities Assigned

§ 838.3 HQ AFSC responsibilities.

(a) HQ AFSC/SD is responsible for ensuring that the overall management and control of the Contractor Performance Assessment System is consistent with this part. Formulating and updating this part is a joint responsibility between HQ AFSC/SD and HQ AFSC/PK.

(b) HQ AFSC/PK is responsible for updating the list of contractors.

§ 838.4 Field activity responsibilities.

The commander or vice commander of each of the applicable field activities:

(a) Establishes procedures to implement this part locally. (Submit one copy of local supplements to HQ AFSC/PK).

(b) Establishes a focal point for the CPAR reports. This focal point is responsible for the collection, control, storage, and distribution of CPARs prepared at the field activity.

(c) Ensures timely completion of CPARs by program managers or directors.

(d) Ensures timely review of CPARs by local reviewing officials.

(e) Ensures submission of AFSC Source Selection Offerors Report (§ 838.8).

Subpart C—CPAR Procedures

§ 838.5 Frequency of performance assessment reporting.

(a) For new contracts, an initial CPAR will be completed between 180 days and 365 days after contract award. For contracts in existence when this system is initiated, the CPAR will be completed no later than 90 days after the effective date of this part (Note: allow 180 days to transpire for new contracts). The initial CPAR will assess current performance; however, prior significant events may be highlighted.

(b) As a minimum, intermediate CPARs will be completed annually. More frequent reporting is required when the program director is aware of a change in performance that would significantly alter the current assessment of the contractor or just prior to a change in program director(s). Generally, no more than two reports a year should be prepared. To improve the efficiency in preparing the CPARs, it is recommended to complete them in parallel with other reviews (for example, Program Assessment Reviews, Command Assessment Reviews, award fee determinations, major program events, or program milestones).

(c) Final CPARs will be completed upon contract termination or within six months following the delivery of the final major end item on contract.

§ 838.6 CPAR processing.

Each AFSC Form 125, Contractor Performance Assessment Report (CPAR) is completed, reviewed, coordinated, and approved within the government. Contractor organizations will be given an opportunity to review and comment upon the program director assessment. Instructions for completing AFSC Form 125 are in § 838.10. The CPAR review and approval process is outlined below:

(a) The project manager or engineer responsible for the contract being reviewed prepares the initial documentation and assessment in coordination with the project team. This assessment should be based on multifunctional input. Support contractors, such as System Engineering and Technical Assistance (SE/TA) or Federal Contract Research Center (FCRC) contractors, may provide input as a project team member but are not allowed access to completed forms unless specifically authorized in support of a source selection. The project manager or engineer must ensure that all documentation so prepared is marked "For Official Use Only/Source Selection Sensitive."

(b) The program director responsible for the overall program reviews and signs the CPAR at item 14. Program director narrative remarks are limited to the space in item 13 on the CPAR plus one additional single-spaced typewritten page.

(c) The program director will retain a copy of the initial CPAR assessments and transmit the original to his or her counterpart within the contractor's organization. Face-to-face meetings with contractor management to discuss initial CPAR ratings are encouraged. The transmittal letter must provide the following guidance to the contractor.

(1) Protect the draft CPAR as a source selection sensitive document.

(2) Strictly control access to the draft CPAR within the contractor organization.

(3) Do not release the draft CPAR to persons or entities outside contractor control or use the draft CPAR data for input to advertising, preaward surveys, production readiness reviews, or other reviews.

(4) Responses are optional, but if provided, they are due within 30 days of receipt and are limited to the space provided on the CPAR plus one additional single-spaced typewritten page. Contractor comments received after the 30 day response period will be returned to the contractor without action.

(5) Focus comments on the objective portion of the program director's narrative and provide views on causes and ramifications of the assessed performance.

(d) After receipt of contractor comments, the program director may revise his or her initial assessment based on data provided by the contractor. Revised assessments must be captured on a new CPAR form marked in item 3 "Revision to CPAR for period (insert period covered by report)" to be attached to the original. Complete items 1 through 4 and indicate revised ratings in items 11 or 12. Explain the reasons for the changes made in the space provided in item 13.

(e) After receipt of contractor comments or 30 days, whichever occurs first, the program director will obtain the review and signature of a product division reviewing official in accordance with local procedures.

(f) After completion of the CPAR, it will be submitted by the program director to the CPAR focal point for input into the Command-wide data base. No copies of the final CPAR will remain on file at the program office. Working papers associated with CPAR evaluations must be protected as "For Official Use Only/Source Selection Sensitive."

§ 838.7 CPAR focal point.

Each local activity CPAR focal point will keep the original CPAR forms and all attachments in separate files for each corporation. Each corporate file will contain separate files for divisions and subsidiaries, as appropriate. Each CPAR will be retained for 5 years, unless the program manager or director requests a longer retention period. For example, a long development program may necessitate longer retention to reflect contractor performance on the entire program. Distribution of CPARs throughout the command in support of an AFSC source selection will be made from one field activity CPAR focal point to another. Source selection team members must contact their local CPAR focal point for CPARs.

§ 838.8 AFSC Source Selection Offerors Report.

In order to keep the CPAR data base current and reflecting the contractors that AFSC evaluates during source selection, an annual listing of offerors is required. The listing must:

(a) Reflect offerors on predominately advance development, full-scale development, production source selections over $5 million (face value, excluding options) that were completed during the previous fiscal year.

(b) State the contractor's name (including division) and address. State parent corporation, if applicable. State number of times contractor submitted proposals.

(c) Separately identify additional contractors recommended for inclusion to the Command CPAR data base along with a brief justification.

(d) Be submitted to HQ AFSC/PKC annually by October 31.

§ 838.9 CPAR markings and protection.

All CPAR forms and attachments will be marked "For official Use Only/Source Selection Sensitive." CPARs have the unique characteristic of always being pre-decisional in nature. They will always be source selection sensitive because they will constantly be used to support ongoing source selection. This pre-decisional nature of the CPAR is a basis for requiring that the CPAR data base be protected from unauthorized disclosure to personnel or entities outside the source selection process. It must be noted, however, that CPARs may also contain information which is proprietary to the contractor which is the subject of the report. Information contained on the CPAR such as trade secrets and confidential commercial or financial data, obtained from the contractor in confidence, must be protected from unauthorized disclosure. Additionally, CPARs may contain valuable government generated commercial information which will be used in the award of valuable government contracts. Such commercially valuable, government generated information must be protected from unauthorized disclosure. Based on the confidential nature of the CPARs, the following guidance applies to protection both internal and external to the government.

(a) *Internal government protection.* The CPARs must be treated as source selection sensitive at all times. The flow of CPARs throughout AFSC in support of source selections will be controlled by the CPAR focal points and transmitted from one CPAR focal point to another (reference AFR 70–15, AFSC Supplement 1). Outside of use in an instant source selection, information contained on the CPARs must be protected in the same manner as information contained in completed source selection files (see AFR 70–15 paragraph 4–3f). Information contained on the CPAR may not be used to support preaward surveys, debarment proceedings or any other internal government reviews.

(b) *External government protection.* Disclosure of CPAR data to contractors or others outside the government is not authorized. An exception to this rule is for the contractor who is the subject of the CPAR. In this situation, access to review the completed form will be granted by the CPAR focal point if the contractor personnel requesting access has a letter signed by their corporate chief executive officer (CEO) authorizing disclosure to that individual. This individual is not authorized to make or retain copies of the final form. Such limited and controlled access by the contractor's representative will not inhibit candid agency decision making. This access is needed to ensure the accuracy of changes made to the CPAR after the contractor's initial review. (Note: During the source selection discussion process, the contractor will be notified of relevant past performance data, derived from a CPAR or other sources, that requires clarification or could lead to a negative rating. See AFR 70–15, AFSC Supplement 1.) Freedom of Information Act requests for a CPAR must be processed in accordance with Part 806.

§ 838.10 Instructions for completing AFSC Form 125, Contractor Performance Assessment Report (CPAR).

(a) *Item 1:* State the name and address of the division or subsidiary of the contractor performing the contract. Identify the parent corporation (no address required).

(b) *Items 2–4:* Initial, intermediate or final report. Period covered by report. Contract Number.

(c) *Item 5:* State current contract period of performance including any authorized extensions, such as options that have been exercised.

(d) *Item 6:* Location of contract performance.

(e) *Item 7:* Current face value of contract. For incentive contracts, state target value.

(f) *Item 8:* Identify the basis of award: Competitive, Follow-on to Competition, or Noncompetitive.

(g) *Item 9:* For mixed contract types, check the predominate contract type and identify the other contract type in the "Mixed" category.

(h) *Item 10:* State the program title and provide a short description of contract requirement and phase of acquisition. The description must identify key technologies, components, and subsystems in sufficient detail in order to assist the source selection team members who will screen the CPARs to determine efforts that are relevant to their source selection.

(i) *Item 11:* Evaluation Areas.

BEST COPY AVAILABLE

(1) *Introduction.* In preparing the CPAR, the program director should strive for consistency between the ratings used for the areas of evaluation on this form and the similar areas used for the Program Assessment Review (PAR) and Command Assessment Review (CAR) system. The major difference is the CPAR assesses a contractor's performance on an individual contract while the PAR and CAR system assesses the overall program. Each area assessment should be based on objective data that will be provided in the narrative section of the form (item 13). Subjective visibility into the causes, severity, or ramifications of the assessed performance should be provided. Facts to support specific areas of evaluation should be obtained from government specialists familiar with the contractor's performance on the contract under review. (For example, from engineering, contracting, contract administration, manufacturing, quality, and logistics). The amount of risk inherent in the effort should be recognized as a significant factor and taken into account when assessing the contractor's performance. For example, if a contractor met an extremely tight schedule, a blue (exceptional) assessment may be given in recognition of the inherent schedule risk. The CPAR is designed to assess prime contractor performance. However, in those evaluation areas where subcontractor actions have significantly influenced the prime contractor's performance in a negative or positive way, highlight the subcontractor actions in the narrative section of the form (item 13).

(2) *Evaluation colors*—(i) *Blue—Exceptional.* Indicates the contractor's performance within the area of evaluation clearly exceeds contractual requirements. The area of evaluation contains few minor problems for which corrective actions appear highly effective. In the cost performance area, blue indicates a positive cost variance. (Note: This rating is not found in PAR/CAR assessments and has been added since recognition of exceptional ability is important in the source selection process.

(ii) *Green—Satisfactory.* Indicates the contractor's performance within the area of evaluation meets contractual requirements. The area of evaluation contains some minor problems for which the corrective actions appear satisfactory. In the cost performance area, green indicates a negative cost variance greater than zero but less than or equal to 5 percent.

(iii) *Yellow—Marginal.* Indicates the contractor's performance within the area of evaluation meets contractual requirements. The area of evaluation contains a serious problem for which corrective actions have not yet been identified, appear marginally effective, or have not been fully implemented. In the cost performance area, yellow indicates a negative cost variance greater than 5 percent but less than or equal to 15 percent.

(iv) *Red—Unsatisfactory.* Indicates the contractor is in danger of not being able to satisfy contractual requirements and recovery is not likely in a timely manner. The area of evaluation contains serious problems for which the corrective actions appear ineffective. In the cost performance area, red indicates a negative variance greater than 15 percent.

(v) *Arrows.* Upward or downward arrows may be used to indicate an improvement or worsening trend insufficient to change the assessment status.

(vi) *NA.* Areas not applicable to a particular contract.

(3) *Evaluation areas*—(i) *Item 11A: Product/System Performance.* (This item must be separately scored). Evaluate the extent to which the contractor is meeting overall product or system performance as measured against the contract requirements, including but not limited to the statement of work, specifications, CDRLs, and significant special contract clauses.

(A) *Item 11A–1: Engineering Design/Support.* Evaluate the contractor's engineering design capability and engineering resource support. Consider the amount and quality of engineering resources devoted to supporting the contract effort.

(B) *Item 11A–2: Software Development.* Evaluate the extent to which the contractor is meeting the software development, modification, or maintenance contract requirements or a government approved Software Development Plan. Consider the amount and quality of software development resources devoted to support the contract effort.

(C) *Item 11A–3: Subcontract Management.* Evaluate the contractor's effort devoted to managing subcontracts.

(ii) *Item 11B: Schedule*—(A) Evaluate contractor adherence to the contract schedule. For other than a satisfactory assessment, specifically identify in item 13 the major milestones, deliverable items, or significant data items which contribute to the schedule evaluation. The short narrative explanation in item 13 should address significance of item(s), discuss causes, and evaluate effectiveness of contractor corrective actions.

(B) When Cost Performance Reports (CPR) or Cost/ Schedule Status Reports (C/SSR) data is available and the schedule variance exceeds 15 percent (positive or negative), briefly discuss the significance of this condition to the contract effort in item 13. Calculations: Cumulative schedule variance in dollars is defined as budgeted cost of work performed (BCWP) minus budgeted cost of work scheduled (BCWS). Percent schedule variance is defined as ((BCWP—BCWS)/BCWS) x 100.

(iii) *Item 11C: Product Assurance.* Product Assurance is the collection of disciplines needed to design, test, and manufacture systems or equipment meeting specified requirements and suitable for intended use. The product assurance assessment evaluates adequacy of contractor organization, resources planning and design, manufacturing and test actions to meet system or equipment reliability, maintainability cost, and quality requirements with minimum risk.

(iv) *Item 11D: Test and Evaluation.* Evaluate the adequacy of the contractor's performance in planning, supporting, conducting, and assessing both the inhouse and independent test and evaluation programs.

(v) *Item 11E: Contract Performance.* (Only score the subitems below).

(A) *Item 11E–1: Cost Performance*—(*1*) When CPR or C/SSR data is available, evaluate current cost variance if the contract is greater than 10 percent complete. When the evaluation is not green, put the current percent variance and government estimate at completion in item 12 and give a short, factual narrative explanation of causes and contractor proposed solutions in item 13. Calculations: Percent complete is obtained by dividing cumulative BCWP by contract budget base (CBB) (less management reserve) and multiplying by 100. CBB is the sum of negotiated cost plus estimated cost of authorized undefinitized work. Compute current cost variance percentage by dividing cumulative cost variance to date (column 11 of the CPR, Column 6 of the C/SSR) by cumulative BCWP and multiplying by 100. Compute completion cost variance percentage by dividing government's estimate at completion by CBB and multiplying by 100. The CBB should be the current budget base against which the contractor is performing (including formally established overtarget baselines (OTB)).

(*2*) Overtarget Baselines. If an OTB has been established since the last

CPAR, a brief description of the nature and magnitude of the baseline adjustment should be made in item 13. Subsequent CPARs should evaluate cost performance in terms of the revised baseline and reference the CPAR which described the baseline adjustment. For example, "The contract baseline was formally adjusted on (insert date). See CPAR for the period (insert period covered by CPAR) for an explanation."

(*3*) When CPR data or C/SSR data is not available, evaluate contractor cost management. Is the contractor experiencing cost growth? Underrun? For other than a satisfactory assessment, give a short, factual narrative explanation of causes and the contractor's proposed solutions in item 13.

(B) *Item 11E–2. Management Responsiveness.* Evaluate the adequacy of the contractor's responsiveness, including the timeliness and quality of cost and technical proposals and willingness to negotiate fair and reasonable prices, and terms and conditions.

(vi) *Item 11F: ILS Program.* Evaluate the adequacy of the contractor's performance in accomplishing Integrated Logistics Support (ILS) program tasks and in performing Logistics Support Analysis (LSA) activities. The ten ILS element groupings are: Maintenance planning; manpower requirements and personnel; supply support; support equipment; technical data; training equipment and support; computer resources support; facilities, packaging, handling, and transportation; and design interface.

(vii) *Item 11G: Other.* Specify any additional evaluation areas that are unique to the subject contract. If the contract contains an award fee, mark this evaluation area "Award Fee" and list all the award fee percentages earned during the evaluation period in the "N/A" block.

(j) *Item 12: Variances.*

(1) *Cost Variance.* Identify the cumulative cost variance to date (percent) and the government's estimate at completion (percent). See item 11E–1 for further instructions on calculation of cost variance.

(2) *Schedule Variance.* Identify the cumulative schedule variance (percent). See item 11B for further instructions on calculation of schedule variance.

(k) *Item 13: Program Director's Narrative.* A short, factual narrative statement is required to support assessments of blue, green with arrows, yellow, and red. Cross-reference the comments in item 13 to rated evaluation areas in item 11. Each narrative statement in support of the area assessment should contain objective data. For example, an exceptional contracts assessment could cite the current underrun dollar value and estimate at completion. In the case of incentive contracts, the government and contractor savings based on the share ratio could be cited. A marginal engineering design/support assessment could, for example, be supported by information concerning personnel changes. Key engineers familiar with the effort may have been replaced by less experienced engineers. Sources of data include AFOTEC operational, test and evaluation results; technical interchange meetings; production readiness reviews; earned contract incentives; or award fee evaluations.

(l) *Item 14: Program Director Signature block.*

(m) *Item 15: Contractor Comments (Contractor's option).* Reference paragraph § 638.6(c) for guidance on transmitting the CPAR to the contractor for review and comment.

(n) *Item 16: Contractor Representative signature block.*

(o) *Item 17: Review by Product Division Reviewing Official.* Reviewing official(s), at an appropriate management level, will be designated by local procedures. Reviewing official comments are optional.

(p) *Item 18:* Product Division Reviewing Official signature block.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[CC Docket 86-10]

Common Carrier Services; WATS-Related and Other Amendments of the Access Charge Rules

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule; correction.

SUMMARY: On March 7, 1988 the Commission published a Supplemental Notice of Proposed Rule Making (53 FR 7214 (1988)) in this proceeding concerning the Provision of Access for 800 Service. Inadvertently, the dates by which to file comments and reply comments were missing.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC. 20554.

FOR FURTHER INFORMATION CONTACT: Gary Phillips, Policy and Program Planning Division, Common Carrier Bureau (202) 632–4047.

In FR Doc. 88–4819 published in the **Federal Register** of March 7, 1988, a "**DATES**" caption is added to the preamble on page 7214, second column, between the captions "**SUMMARY**" and "**ADDRESSES**" to read as follows:

DATES: The correct date for filing comments is April 4, 1988 and reply comments may be filed not later than May 3, 1988.

Federal Communications Commission.

H. Walker Feaster, III,

Acting Secretary.

---

47 CFR Part 73

[MM Docket No. 88-74, RM-6063]

Radio Broadcasting Services; Sheridan, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Ainsley Communications Corp., requesting the substitution of Channel 275C2 for Channel 272A at Sheridan, Arkansas, and modification of its license for Station KQLV(FM), accordingly, to provide that community with its first wide coverage area FM service.

DATES: Comments must be filed on or before April 25, 1988, and reply comments on or before May 10, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: James R. Bayes, Merilyn M. Strailman and Edward A. Yorkgitis, Jr., Esqs., Wiley, Rein & Fielding, 1776 K Street NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 88–74, adopted February 5, 1988, and released March 3, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Finding on Petition and Initiation of Status Review

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition finding and status review.

SUMMARY: The Service announces a 90-day finding on a petition to reclassify the chimpanzee from threatened to endangered. Status reviews are initiated both for the chimpanzee and the pygmy chimpanzee.

DATES: The finding announced herein was made on February 4, 1988. Comments and information may be submitted until July 21, 1988.

ADDRESSES: Comments, information, and questions should be submitted to the Chief, Office of Scientific Authority, Mail Stop: 527, Matomic Building, U.S. Fish and Wildlife Service, Washington, DC 20240. The petition, finding, supporting data, and comments will be available for public inspection, by appointment, from 8:00 a.m. to 4:00 p.m., Monday through Friday, in Room 537, 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dr. Charles W. Dane at the above address (202–653–5948 or FTS 653–5948).

SUPPLEMENTARY INFORMATION: Section 4(b)(3) of the Endangered Species Act, as amended in 1982, requires that within 90 days of a petition to list, delist, or reclassify a species, or to revise a critical habitat designation, a finding be made on whether the petition presents substantial information indicating that the action may be warranted, and that such a finding be promptly published in the **Federal Register**. If the finding is positive, section 4(b)(3) also requires prompt commencement of a review of the status of the involved species. The Service now announces a 90-day finding on a recently received petition.

The petition was submitted jointly by the Humane Society of the United States, the World Wildlife Fund, and the Jane Goodall Institute. It is dated November 4, 1987, and was received by the Service on that same date. It requests that the classification of the chimpanzee (*Pan troglodytes*) on the List of Endangered and Threatened Wildlife be changed from threatened to endangered. The petition indicates that the status of the chimpanzee has deteriorated substantially since the species was originally classified as threatened in 1976. Problems are said to include massive habitat destruction, fragmentation of populations and associated vulnerability to disease, excessive hunting and capture by people, and lack of effective national and international controls. International trade in chimpanzee infants for the biomedical market is also considered to have a significant impact on the species in the wild.

The Service has examined the petition and has found it to present substantial information indicating that the requested action may be warranted. Therefore, a review of the status of the chimpanzee is initiated herewith. The Service also initiates a status review of the pygmy chimpanzee (*Pan paniscus*). The latter species is a close relative of the chimpanzee, also occurs in the tropical forests of Africa, and may be subject to the same kinds of problems. Although both species were covered by a 5-year notice of review issued in the **Federal Register** of July 7, 1987 (52 FR 25522–25528), the comment period for that review has expired. New comments and information from all interested parties are now invited and should be submitted to the address given above.

A decision to reclassify the chimpanzee and/or the pygmy chimpanzee as endangered would remove the applicability of the special rule for primates (50 CFR 17.40(c)) to these chimpanzee species. Therefore, the Service would be interested in comments as to what, if any, effect the removal of present trade exemptions might indirectly have on the wild populations of these chimpanzees. If the reclassification were warranted but removal of special rule might inpact the wild population, the Service would consider alternative procedures to alleviate restrictions adversely affecting the wild populations.

The Service will consider the comments received, along with all other

available data, in making a finding, required by section 4(b)(3) within 12 months after receipt of a petition presenting substantial information, as to whether the requested action is warranted, not warranted, or warranted but precluded by other listing activity.

Author: Ron Nowak, Office of Scientific Authority, U.S. Fish and Wildlife Service, Washington, DC 20240 (202–653–5948 or FTS 653–5948).

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

March 18, 1988.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) title of the information collection; (3) form number(s), if applicable; (4) how often the information is requested; (5) who will be required or asked to report; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to provide the information; (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Soil Conservation Service

Garrison Creek Watershed, Oklahoma; Deauthorization of Federal Funding

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of intent to deauthorize Federal funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83–566, and the Soil Conservation Service Guidelines (7 CFR Part 622), the Soil Conservation Service gives notice of the intent to deauthorize Federal funding for the Garrison Creek Watershed project, Sequoyah County, Oklahoma.

FOR FURTHER INFORMATION CONTACT: C. Budd Fountain, State Conservationist, Soil Conservation Service, Agricultural Center Building, Stillwater, Oklahoma 74074, telephone (405) 624–4360.

SUPPLEMENTARY INFORMATION: A determination has been made by C. Budd Fountain that the proposed works of improvement for the Garrison Creek project will not be installed. The sponsoring local organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from C. Budd Fountain, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed deauthorization will be taken until 60 days after the date of this publication in the **Federal Register**.

C. Budd Fountain,

State Conservationist.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committee (CAC) of the American Economic Association (AEA), the CAC of the American Marketing Association (AMA), the CAC of the American Statistical Association (ASA), and the CAC on Population Statistics; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463 as amended by Pub. L. 94–409), we are giving notice of a joint meeting followed by separate and jointly held (described below) meetings of the CAC of the AEA, CAC of the AMA, CAC of the ASA, and CAC on Population Statistics. The joint meeting will convene on April 14, 1988 at the Ramada Hotel, 6400 Oxon Hill Road, Oxon Hill, Maryland 20745.

The CAC of the AEA is composed of nine members appointed by the President of the AEA. It advises the Director, Bureau of the Census, on technical matters, accuracy levels, and conceptual problems concerning economic surveys and censuses; reviews major aspects of the Census Bureau's programs; and advises on the role of analysis within the Census Bureau.

The CAC of the AMA is composed of nine members appointed by the President of the AMA. It advises the Director, Bureau of the Census, regarding the statistics that will help in marketing the Nation's products and services and on ways to make the statistics the most useful to users.

The CAC of the ASA is composed of 12 members appointed by the President of the ASA. It advises the Director, Bureau of the Census, on the Census Bureau's programs as a whole and on their various parts, considers priority issues in the planning of censuses and surveys, examines guiding principles, advises on questions of policy and procedures, and responds to Census Bureau requests for opinions concerning its operations.

The CAC on Population Statistics is composed of four members appointed by the Secretary of Commerce and five members appointed by the President of the Population Association of America from the membership of that Association. The CAC on Population Statistics advises the Director, Bureau of the Census, on current programs and on plans for the decennial census of population.

The agenda for the April 14 combined meeting that will begin at 1:15 p.m. and end at 2:30 p.m. is: (1) Introductory remarks by the Director, Bureau of the Census; (2) 1990 decennial update; (3) 1987 Economic and Agricultural Censuses update; and (4) twenty-first century census planning.

The agendas for the four committees in their separate and jointly held meetings that will begin at 2:30 p.m. and adjourn at 5:30 p.m. on April 14 are as follows:

The CAC of the AEA: (1) Survey of Income and Program Participation (joint with CAC of the AMA), (2) Characteristics of Business Owners Survey (joint with CAC of the AMA), and (3) Census Bureau response to recommendations and activities of special interest to the CAC of the AEA.

The CAC of the AMA: (1) Survey of Income and Program Participation (joint with CAC of the AEA), (2) Characteristics of Business Owners Survey (joint with CAC of the AEA), (3) Census Bureau response to recommendations and activities of special interest to the CAC of the AMA, and (4) 1990 census promotion.

The CAC of the ASA: (1) 1990 sampling issues (joint with CAC on Population Statistics), (2) disclosure avoidance procedures (joint with CAC on Population Statistics), and (3) Census Bureau response to recommendations and activities of special interest to the CAC of the ASA.

The CAC on Populaiton Statistics: (1) 1990 sampling issues (joint with CAC of the ASA), (2) disclosure avoidance procedures (joint with CAC of the ASA), and (3) Census Bureau response to recommendations and activities of special interest to the CAC on Population Statistics.

The agendas for the April 15 meetings that will begin at 8:45 a.m. and adjourn at 1 p.m. are:

The CAC of the AEA: (1) Investment surveys at Census: future directions, (2) international price indexes (BLS), (3) development and discussion of recommendations, and (4) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for the next meeting, and (c) comments by outside observers.

The CAC of the AMA: (1) Data dissemination in machine-readable form, (2) promotional aspects of TIGER, (3) development and discussion of recommendations, and (4) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for the next meeting, and (c) comments by outside observers.

The CAC of the ASA: (1) 1990 Research, Evaluation, Experimental Program and projects (joint with CAC on Population Statistics), (2) development and discussion of recommendations, and (3) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for the next meeting, and (c) comments by outside observers.

The CAC on Population Statistics: (1) 1990 Research, Evaluation, and Experimental Program and projects (joint with CAC of the ASA), (2) development and discussion of recommendations, and (3) closing session including (a) continued committee and staff discussions, (b) plans and suggested agenda for the next meeting, and (c) comments by outside observers.

All meetings are open to the public, and a brief period is set aside on April 15 for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Census Bureau Committee Liaison Officer at least 3 days before the meeting.

Persons wishing additional information concerning these meetings or who wish to submit written statements may contact the Committee Liaison Officer, Mrs. Phyllis Van Tassel, Room 2428, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, DC 20233). Telephone: (301) 763-5410.

Date: March 17, 1988.

C.L. Kincannon,

Deputy Director, Bureau of Census.

BILLING CODE 3510-DS-M

International Trade Administration

[A-588-802]

Initiation of Antidumping Duty Investigation; 3.5" Microdisks and Coated Media Thereof From Japan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating an antidumping duty investigation to determine whether imports of 3.5" microdisks and coated media thereof from Japan are being, or are likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of this product materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before April 11, 1988. If that determination is affirmative, we will make a preliminary determination on or before August 4, 1988.

EFFECTIVE DATE: March 23, 1988.

FOR FURTHER INFORMATION CONTACT: John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-3965.

SUPPLEMENTARY INFORMATION:

The Petition

On February 26, 1988, we received a petition in proper form filed by Verbatim Corporation on behalf of the domestic 3.5" microdisk industry. In compliance with the filing requirements of 19 CFR 353.36, petitioner alleges that imports of 3.5" microdisks and coated media thereof from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

United States Price and Foreign Market Value

United States price was based on published prices for sales to independent distributors in the United States. Petitioner deducted, where appropriate, discounts, free goods, other price-reducing benefits received by each distributor, U.S. inland freight, U.S. Customs brokerage, U.S. tariff, and ocean freight and insurance. Since ESP sales are involved, petitioner also made adjustments for sales commissions and indirect selling expenses.

Petitioner based foreign market value on the prices paid by the first arm's-length purchasers of 3.5" microdisks in the Japanese domestic market adjusted for home market indirect selling expenses, Japanese inland freight and warehousing, packing, and differences in circumstances of sale.

Based upon a comparison of United States price and foreign market value, petitioner alleges dumping margins of between 36.5 percent and 68.1 percent.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping duty investigation, and whether it contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on 3.5" microdisks and coated media thereof from Japan and found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether imports of 3.5" microdisks and coated media thereof from Japan are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination by August 4, 1988.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System (HS). In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed HS schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs officers have reference copies and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

The products covered by this investigation are 3.5" microdisks and coated media thereof from Japan currently provided for under TSUSA item number 724.4570 and currently classifiable under HS item number 8523.20.0000.

A 3.5" microdisk is a tested or untested magnetically coated polyester disk with a steel hub encased in a hard plastic jacket. 3.5" microdisks are used to record and store encoded digital computer information for access by a 3.5" floppy disk drive. They include single-sided, double-sided or high density formats.

Coated media is the flexible recording material used in the finished microdisk. Media consists of a polyester base film to which a coating of magnetically charged particles is bonded. It is intended for use specifically in a 3.5" floppy disk drive.

Coated media produced in Japan and finished into 3.5" microdisks in another country prior to importation into the United States from the other country is tentatively included in the scope of the investigation. In the course of this proceeding we will determine whether to continue to include these indirect imports in the scope of this investigation.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will allow the ITC access to all privileged and business proprietary information in our files, provided it confirms in writing that it will not disclose such information either publicly or under administrative protective order without written consent of the Acting Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by April 11, 1988 whether there is a reasonable indication that imports of 3.5" microdisks and coated media thereof from Japan materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will terminate; otherwise, it will proceed according to the statutory and regulatory procedures.

This notice is published pursuant to section 732(c)(2) of the Act.

March 17, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

[C-351-037]

Certain Cotton Yarn Products From Brazil; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on certain cotton yarn products from Brazil for the period May 18, 1984 through December 31, 1985. The Department has preliminary determined the net subsidy to be zero or *de minimis* for five firms and 2.56 percent *ad valorem* for all other firms in 1984. For 1985, the Department has preliminarily determined the net subsidy to be 14.53 percent *ad valorem* for all firms. We invite interested parties to comment on these preliminary result.

EFFECTIVE DATE: March 23, 1988.

FOR FURTHER INFORMATION CONTACT: Philip Pia or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On April 18, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 15250) the final results of its last administrative review of the countervailing duty order on certain cotton yarn products from Brazil (42 FR 14089; March 15, 1977). On March 28, 1986, the petitioner, the American Yarn Spinners Association, requested in accordance with 19 CFR 355.10 that we conduct an administrative review of the order. We published the initiation on April 18, 1986 (51 FR 13273). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of Brazilian yarn, carded but not combed, wholly of cotton. Such merchandise is currently classifiable under items 301.01 through 301.98, inclusive, and it item 302.—with statistical suffixes 20, 22, and 24 of the Tariff Schedules of the United States. These products are currently classified under HS item numbers 5205.11.10, 5205.11.20, 5205.12.10, 5205.12.20, 5205.13.10, 5205.13.20, 5205.14.10, 5205.14.20, 5205.15.10, 5205.15.20, 5205.31.00, 5205.32.00, 5205.33.00, 5205.34.00, 5206.35.00. We invite comments from all interested parties on these HS classififications.

The review covers the period May 18, 1984 through December 31, 1985 and 20 programs.

Analysis of Programs

(1) CACEX Export Financing

Under this program, the Department of Foreign Commerce ("CACEX") of the Banco do Brasil provides short-term working capital financing to exporters at preferential rates. The loans have a duration of up to one year. During the period of review, producers of certain cotton yarn products could obtain CACEX financing based on the value of their previous year's exports. The maximum amount of CACEX financing that could be obtained in Brazil was 20 percent of the value of the previous year's exports.

Resolution 674, which became effective on January 22, 1981, set a maximum interest rate of 40 percent and required two interest payments, one 180 days after the loan was granted and the other at muturity. On June 11, 1983, the maximum interest rate for Resolution 674 loans was changed to 60 percent. Resolution 882, which became effective on January 2, 1984, required the full interest payment at maturity. It also set the maximum interest rate at monetary correction (calculated by the change in the value of readjustable treasury bonds ("ORTN")) plus 3 percentage points.

On August 21, 1984, Resolution 950 superseded Resolution 882 and changed the short-term export financing program substantially. Resolution 950, which was made effective retroactively to January 2, 1984 (the effective date of Resolution 882), made working capital financing available through commercial banks at prevailing market rates, with interest due at maturity. It authorized the Banco do Brasil to pay the lending institution an "equalization fee," or rebate, of up to 10 percentage points over the commercial interest rate, which the lending institution could pass on to the borrowers. On May 2, 1985, Resolution 1009 increased the equalization fee to 15 percentage points.

To find the interest differential for Resolution 882 loans, we compared two effective interest rates. The nominal interest rates on Resolution 882, 950, and 1009 loans are the same as the effective rates because there are no other charges, and the full amount of interest is paid at maturity. For our benchmark, we took the national average rate for thirty-day discounts of accounts receivable, as reported in *Analise/Business Trends*. This rate includes the 1.5 percent tax on financial transactions ("IOF"), from which preferential loans are exempt. We then compounded this rate to find the effective annual commercial benchmark.

Since the interest charged on CACEX export financing under Resolutions 950 and 1009 is now at prevailing market rates, this program would not be countervailable absent the equalization fee and the exemption from the IOF. Therefore, the interest differential for those loans is equal to the equalization fee plus the 1.5 percent IOF.

We consider the benefit from loans to occur when the borrower makes the interest payments. For Resolution 674, 882, 950, and 1009 loans on which interest was paid during the period of review, we multiplied the interest differential by the loan principal. We allocated the result over each firm's total exports and then weight-averaged each company's benefit by its share of total exports of this merchandise to the United States (excluding exports from firms with zero or *de minimis* aggregate benefits). On this basis, we preliminarily determine the benefit from this program to be 1.30 percent *ad valorem* in 1984 and 3.36 percent *ad valorem* in 1985.

(2) Income Tax Exemption for Export Earnings

Under this program, exporters of certain cotton yarn products are eligible for an exemption from income tax on the portion of their profits attributable to exports. The Brazilian government calculates the tax-exempt fraction of profit as the ratio of export revenue to total revenue. Six firms used this program in 1984, and seven firms used it in 1985.

The nominal corporate tax rate in Brazil is 35 percent. However, Brazilian tax law permits companies to reduce their income taxes by investing up to 26 percent of their tax liability in specified companies and funds. This tax credit effectively reduces the nominal 35 percent corporate tax rate. The firms under review invested in the specified companies and funds.

We calculated the effective tax rates by dividing each company's net tax liability by its taxable profit. We calculated the benefit by multiplying the amount of tax-exempt profit by the company's effective corporate tax rate and allocating the result over its total exports. We then weight-averaged each company's benefit by its share of total exports of the merchandise to the United States (excluding exports from firms with zero or *de minimis* aggregate benefits). On this basis, we preliminarily determine the benefit from this program to be 1.17 percent *ad valorem* in 1984 and 1.48 percent *ad valorem* in 1985.

(3) The IPI Export Credit Premium

Exporters of certain cotton yarn products are eligible for the maximum IPI export credit premium. Under this program, the Brazilian government pays exporters in cash a percentage of the f.o.b. price of the exported merchandise. The payment is made through the bank involved in the export transaction.

Effective June 26, 1981, the Brazilian government imposed an export tax to offset the benefit of the IPI premium on exports to the United States. In the final results of our last administrative review (49 FR 15250), we determined that the Brazilian government did not collect the export tax in a timely manner, and we considered this lag in collection to confer a benefit. However, for this review, we have found that the Brazilian government collected the export tax on time. Further, on May 1, 1985, the Brazilian government eliminated the IPI export credit premium for exporters of certain cotton yarn products. For these reasons, we preliminarily determine that exporters of this merchandise received no benefits from this program during the period of review.

Although we preliminary determine that the export tax completely offsets the IPI rebate in this case, we are reconsidering whether these export taxes meet the criteria set forth in section 771(6)(C) of the Tariff Act. We are concerned that these export taxes do not serve the larger purpose of the countervailing duty law, which is to encourage governments to cease subsidizing. Furthermore, such export taxes might not completely offset the subsidy, especially if the money collected from the tax could be refunneled into the same industries in different forms. We may seek further clarification of this program.

(4) CIC–CREGE 14–11 Financing

Under its CIC–CREGE 14–11 circular, the Banco do Brasil provides preferential financing to exporters on the condition that they maintain on deposit a minimum level of foreign exchange. Exporters of certain cotton yarn products participated in this program during the period of review.

There is no maximum interest rate for this program. Interest payments are normally made quarterly or semiannually, with the full principal to be repaid at maturity. We calculated the benefit based on the interest payment date in a manner similar to that used for CACEX export financing, using the same benchmark rate. We allocated the result over each firm's total exports and then weight-averaged each company's benefit by its share of total exports of the merchandise to the United States (excluding exports from firms with zero or *de minimis* aggregate benefits). We preliminarily determine the benefit from this program to be 0.01 percent *ad valorem* in 1984 and 0.03 percent *ad valorem* in 1985.

(5) BEFIEX

The Commission for the Granting of Fiscal Benefits to Special Export Program ("BEFIEX") allows Brazilian exporters, in exchange for export commitments, to take advantage of several types of benefits, such as import duty reductions, an increased IPI export credit premium, and tax exemptions or tax credits. We verified that one firm received import duty reductions during the review period.

To calculate the benefit, we divided the amount of import duty reductions received in each year of the review period by that firm's total sales in the corresponding year of the review period. We then weight-averaged the company's benefit by its share of total exports of the merchandise to the United States (excluding exports from firms with zero or *de minimis* aggregate benefits). On this basis, we preliminarily determine the benefit to be 0.06 percent *ad valorem* in 1984 and 0.12 percent *ad valorem* in 1985.

(6) Price Equalization Program

Under the Price Equalization Program ("the PEP"), which was operated from April 1985 to February 1986, the Companhia de Financiamento da Producao ("CFP"), a government agency, provided a specific quantity of raw cotton to textile exporters at a price that was significantly lower than both the internal market price and the world market price. The Government of Brazil claims that the purpose of this program was to eliminate, in the aggregate, the difference between the world market price and the higher internal market price of raw cotton for textile exporters. The Government of Brazil devised a formula to determine the quantity of raw cotton the exporter was able to purchase at this low price. It claims that the amount paid for this quantity, when combined with the amount paid for cotton purchased at the internal market price, equaled approximately what the exporter would have paid if all of his raw cotton (used for export) were purchased at the world market price.

We preliminarily determine this program to be countervailable because the CFP provided the cotton yarn exporters with a specific quantity of raw cotton on terms more favorable than those commercially available to the exporters. Under item (d) of the Illustrative List of Export Subsidies annexed to the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade ("the Subsidies Code"), the delivery of goods by governments or their agencies for use in the production of exported goods constitutes an export subsidy when provided on terms more favorable than those commercially available on world markets to their exporters.

If Brazilian exporters of cotton yarn had actually imported raw cotton in commercial quantities during the review period, we could have considered such imports as the commercially available alternative to domestic raw cotton (in which case the PEP might have been consistent with item (d)). However, because of import restrictions imposed by the Government of Brazil, cotton yarn exporters did not import raw cotton during the period of review.

Therefore, although the net effect of the PEP may have been to provide raw cotton used in export production at world market prices, we do not consider the PEP to be consistent with item (d) because purchasing raw cotton at world market prices was not a "commercially available" alternative to Brazilian cotton yarn exporters. Without access to, and actual use of, imported raw cotton, the commercially available alternative to purchasing raw cotton under the PEP was purchasing raw cotton on the internal market. Cotton yarn exporters purchased most of their raw cotton on the internal market, and we have used the internal market price as the benchmark for measuring the benefit from cotton yarn purchased under the PEP.

To calculate the benefit, we multiplied the amount of cotton purchased by each firm at the PEP price by the average internal market price between April and December 1985. The benefit is the difference between this amount and the amount paid for raw cotton under the PEP. We allocated the benefit over each firm's total exports for 1985 and then weight-averaged each company's benefit by its share of total exports of the merchandise to the United States. On this basis, we preliminarily determine the benefit from this program to be 9.53 percent *ad valorem* in 1985.

Since the PEP was eliminated in February 1986, we preliminarily determine, for purposes of cash deposits of estimated countervailing duties, that there is no current benefit from this program.

(7) FST Financing

During the period of review, three producers of cotton yarn made interest payments on loans obtained under a program called FST financing. The term of the loans was less than one year, and the interest rates were below our commercial benchmark rates. The Government of Brazil claims that these loans are commercial working capital loans and that they are available to all industrial enterprises. However, the Government of Brazil did not produce any documentation showing that these loans are provided to more than the cotton yarn industry. Therefore, based on the best information available, we preliminarily determine that this program is provided to a specific industry. Since the interest rates on the FST loans are below our commercial benchmark rate, we also preliminarily determine that these loans are provided on terms inconsistent with commercial considerations.

We calculated the benefit based on the interest payment date, using the same benchmark rate as we used for CACEX export financing. We allocated the benefit over each firm's total sales and then weight-averaged each company's benefit by its share of total exports of the merchandise to the United States (excluding exports from firms with zero or *de minimis* aggregate benefits). On this basis, we preliminarily determine the benefit from this program to be 0.03 percent *ad valorem* in 1984 and 0.01 percent *ad valorem* in 1985.

(8) Other Programs

We examined the following programs and preliminarily find that exporters of cotton yarn did not use them during the review period:

a. Incentives for trading companies ("Resolution 883");
b. Accelerated depreciation for Brazilian-made capital goods;
c. Tax reductions on export production equipment ("CIEX");
d. Export financing under Resolution 68 ("FINEX");
e. Duty-free treatment and tax exemption on equipment used in export production ("CDI");
f. Export financing under the Fundo Nacional de Participadoes ("FUNPAR");
g. Exemption from state-administered value-added taxes ("ICM") on domestic sales;
h. Export promotion financing ("PROEX");
i. Benefits from import substitution ("PROSIM");
j. Financing for the storage of merchandise destined for export ("Resolution 330");
k. Green-Yellow drawback;
l. Cotton auctions; and
m. Federal stock (EGF) loans.

Upstream Subsidy Allegations

In letters of June 11, 1986 and November 26, 1986, the petitioner, the American Yarn Spinners Association ("AYSA"), alleged that the following Brazilian subsidy programs provide upstream benefits to Brazilian cotton yarn exporters:

(1) CACEX export financing;
(2) Income tax exemptions for export earnings;
(3) BEFIEX;
(4) CIC-CREGE 14–11 financing;
(5) Incentives for trading companies (Resolution 883);
(6) FINEX export financing;
(7) PROEX financing;
(8) Financing for merchandise destined for export (Resolution 330);
(9) Tax reductions on equipment used in export production ("CIEX");
(10) Export financing under the Fundo Nacional de Paricipadoes ("FINPAR");
(11) Benefits from import substitution ("PROSIM");
(12) Gold draft of exportation;
(13) Fundo de Democratizacao do Capital das Empresas;
(14) Partially indexed long-term loans;
(15) Exemption of IPI and customs duties on imported equipment ("CDI");
(16) Accelerated depreciation for Brazilian-made capital equipment;
(17) Green-Yellow drawback;
(18) Cotton auctions; and
(19) Price Equalization Program.

Of these, programs (1) through (9) are export subsidy programs, which cannot form the basis of an upstream subsidy (see section 771A(a) of the Tariff Act). For programs (10) through (16), AYSA did not provide any information that gives us reasonable grounds to believe or suspect that an upstream subsidy is being paid or bestowed to the cotton yarn exporters, as required by section 701(c) of the Tariff Act.

AYSA did provide specific information on the Green-Yellow drawback program and two new programs, cotton auctions and the Price Equalization Program. We sent a supplemental questionnaire to the Brazilian government regarding these programs. At verification we found that the Green-Yellow drawback allows trading companies to qualify for export incentives. It is therefore not a potential domestic subsidy program. Of the two cotton auction programs, we found that one was designed only for raw cotton exporters, and the other for exporters and domestic producers of textile products. Because the first auction program cannot be used by cotton growers who sell their product in the domestic market, it cannot provide an upstream subsidy to cotton yarn exporters. The second auction program is not available to producers of raw cotton, the major input into cotton yarn. Upstream subsidies deal only with *inputs* (such as raw cotton) into the exported product. Any potential benefit from the second auction program would be direct, rather than upstream, and we verified that cotton yarn exporters did not use the second auction program. Finally, the benefit to the cotton yarn producers from the Price Equalization Program is direct, as opposed to upstream. *See* also, section on Price Equalization Program.

For these reasons, we preliminarily determine that none of these 19 programs provided an upstream subsidy to cotton yarn exporters during the period of review.

Companies With Zero Benefits

We preliminarily determine that the following firms received zero or *de minimis* benefits during the review period:

For 1984:

(1) Unitika do Brazil Industria Textil Ltda;

(2) Cia. Industrial e Agricola Boyes;

(3) Lanficio Amparo Ltda;

(4) Fiacao Amparo S.A; and

(5) Brasital S.A. Para a Industria E.O. Comercio.

Preliminary Results of Review

As a result of our review, we preliminarily determine the net subsidy to be zero or *de minimis* for five firms and 2.56 percent *ad valorem* for all other firms in 1984, and 14.53 percent *ad valorem* for all firms in 1985.

The Department intends to instruct the Customs Service not to assess countervailing duties on shipments of Brazilian carded cotton yarn from the five firms with zero or *de minimis* benefits in 1984, and to assess countervailing duties of 2.56 percent of the f.o.b. invoice price on shipments from all other firms entered, or withdrawn from warehouse, for consumption on or after May 18, 1984 and exported on or before December 31, 1984. The Department also intends to instruct the Customs Service to assess countervailing duties of 14.53 percent of the f.o.b. invoice price on shipments from all firms exported on or after January 1, 1985 and on or before December 31, 1985.

The elimination of the Price Equalization Program in February 1986 decreases the total estimated duty deposit rate to 5.00 percent *de ad valorem.* Therefore, the Department intends to instruct the Customs Service to collect 5.00 percent of the f.o.b. invoice price on shipments from all firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. This deposit requirements shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 8 days after the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675 (a)(1)) and § 355.10 of the Commerce Regulations (50 FR 32556, August 13, 1985).

Gilbert B. Kaplan,

Acting Assistant Secretary Import Administration.

Date: March 17, 1987.

BILLING CODE 3510-DS-M

Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee; Open Meeting

A meeting of the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee will be held on March 30, 1988 at 9:30 a.m., Herbert C. Hoover Building, Room 1414, 14th Street and Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls available to computer peripherals and related test equipment or technology.

Agenda

1. Introduction of Members and Visitors.
2. Introduction of Invited Guests.
3. Presentation of Papers or Comments by the Public.
4. Preparation of a Definition for CAD/CAM Workstations.
5. Development of Unique Parameters for CAD/CAM Workstations.
6. Discussion of Graphic Display Parameters.

This meeting is called on short notice because COCOM has just scheduled a review of the CAD/CAM issue for early April and the Department of Commerce needs input from industry.

The meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting and can be directed to: Ruth D. Fitts, Technical Support Staff, Office of Technology & Policy Analysis, Room 4066, 14th & Constitution Avenue, NW., Washington, DC 20230.

For further information on copies of the minutes call Ruth D. Fitts, 202-377-4959.

Date: March 18, 1988.

Betty A. Ferrell,

Acting Director, Technical Support Staff, Office of Technology and Policy Analysis.

BILLING CODE 3510-DT-M

[Docket No. 712567266]

Trade Opportunities Program; Electronic Dissemination

AGENCY: International Trade Administration, U.S. and Foreign Commercial Service, Export Promotion Services, Commerce.

ACTION: Notice.

SUMMARY: As part of the Department's *Export Now* program, the U.S. and Foreign Commercial Service (US&FCS), U.S. Department of Commerce, is improving the Trade Opportunities Program (TOP) by changing the manner in which TOP leads are distributed to

the U.S. business community. TOP leads identify export and investment opportunities for qualified U.S. suppliers. In general, trade leads include: Location of opportunity; SIC code of product or service; details of the opportunity and brief background data; type of opportunity; contact information; and bid deadline. Trade leads gathered overseas are valuable tools for U.S. exporters if they are received in sufficient time to prepare quality responses. The US&FCS therefore is making TOP leads available electronically to persons, firms, and organizations via the Department's Economic Bulletin Board.

US&FCS will add the full text of daily trade leads to the Economic Bulletin Board each work day at noon eastern time. Fifteen days of historical TOP leads will be available on line at all times. Private sector publishers, trade associations, and other multiplier groups are encouraged to download the complete file, add value, and redistribute the information in printed or electronic form.

Subscriptions to the TOP leads through the Economic Bulletin Board can be made by mail or by calling the National Technical Information Service (NTIS), 5285 Port Royal Rd. Springfield, Virginia 22161, phone: (703) 487-4630. A one-year subscription costs $25 plus connect time. Connect time ranges from $3-$6 per hour depending on the time of call. Users outside the Washington, DC area will incur long-distance telephone charges in addition to the above fees. These will be levied by and paid to the subscriber's long distance telephone company.

The new electronic distribution system compounded by the redistribution efforts of multiplier organizations substantially increases the number of U.S. businesses that will have access to Commerce generated trade leads. The timeliness of the trade leads is also greatly improved, as US&FCS now makes time-sensitive trade leads accessible electronically within one business day after receipt from overseas posts.

Due to declining subscriptions, Commerce-published daily TOP Notice and weekly TOP Bulletin hard copy subscription services have been discontinued. In their place, US&FCS has increased the public's access to TOP leads through a variety of public and private venues. Organizations and individuals without communication capabilities have access to TOP information within 2-3 days through commercial and public newspapers and newsletters. Organizations and individuals with communications capabilities have almost immediate access to TOP leads through a variety of commercial and public databases.

Private sector distribution of TOP leads in both printed and electronic form will serve former subscribers to these publications better by providing daily leads at a comparable or lower cost.

DATE: March 23, 1988.

ADDRESS: Questions may be addressed to Office of Commercial Information Management, Export Promotion Services, U.S. and Foreign Commercial Service, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Mary C. King at the address given above, telephone (202) 377-4203. To subscribe to TOP leads, call NTIS at (703) 487-4630.

SUPPLEMENTARY INFORMATION:

The dissemination of trade leads to the public is necessary for ITA to properly perform its trade promotion functions. ITA has the authority to disseminate trade information pursuant to 15 U.S.C. 175. Electronic dissemination via the existing Economic Bulletin Board is the quickest and most cost effective means to get this information to the public.

ITA has determined that this action is not a major rule within the meaning of section 1(b) of Executive Order 12291. Therefore a Regulatory Impact Analysis has not nor will be prepared. Because a notice of proposed rulemaking and an opportunity for public comment is not required for this agency action relating to practice and procedure under the Administrative Procedure Act (5 U.S.C. 553) or any other statute, no initial or final Regulatory Flexibility Analysis has to be or will be prepared. This notice does not contain a collection of information for purposes of the Paperwork Reduction Act (44 U.S.C. 3501).

Alexander H. Good,

Director General, U.S. and Foreign Commercial Service.

[FR Doc. 88-6306 Filed 3-22-88; 8:45 am]

BILLING CODE 3510-FP-M

National Oceanic and Atmospheric Administration

Listing of Endangered and Threatened Species and Designating Critical Habitat; Petition for the Designation of Critical Habitat for the Right Whale

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of receipt of a petition.

SUMMARY: NMFS has received a petition from GreenWorld to designate critical habitat for the right whale (*Eubalaena glacialis*) in two areas along the Atlantic coast.

FOR FURTHER INFORMATION: Robert C. Ziobro, Protected Species Management Division, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, (202/673-5348).

SUPPLEMENTARY INFORMATION: On January 4, 1988, NMFS received a petition from GreenWorld requesting that areas along the outer arm of Cape Cod and areas off the southern Georgia/northern Florida coast be designated as critical habitat for the western Atlantic population of the Right whale. The Service is reviewing the petition and will make a determination in accordance with the provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) and the Administrative Procedures Act (5 U.S.C. 553(e)).

Dated: March 18, 1988.

Nancy Foster,

Director, Office of Protected Resources, and Habitat Programs, National Marine Fisheries Service.

Endangered Species; Application for Permit: Harold M. Brundage, III (P298B)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531-1544), and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217-222).

1. *Applicant:* Mr. Harold M. Brundage III, President, Environmental Research and Consulting, Inc., 320 Bancroft Road, Kennett Square, Pennsylvania 19348
2. *Type of permit:* Scientific research
3. *Name and number of marine mammals:* Shortnose sturgeon (*Acipenser brevirostrum*), 500/year
4. *Type of take:* The applicant is requesting authorization to harass while collecting data and attaching a Carlin dangler tag to 500 animals per year. Of the preceding, 50 animals per year will be radio tagged. The applicant will also collect egg and larvae samples.

VOL 53
ISS 56

BILLING CODE 3510-22-M

Marine Mammals; Application for Permit: California Department of Fish and Game (P191D)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1544), and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–222).

1. *Applicant:* California Department of Fish and Game, 1416 Ninth Street, Sacramento, California 95814.

2. *Type of Permit:* Scientific Research

3. *Name of Marine Mammals:*

California sea lion (*Zalophus californianus*)
Pacific harbor seal (*Phoca vitulina richardii*)
Northern elephant seal (*Mirounga angustirostris*)
Harbor porpoise (*Phocoena phocoena*)
Steller sea lion (*Eumetopias jubatus*)
Gray whale (*Eschrichtius robustus*)
Short-finned pilot whale (*Globicephala macrorhynchus*)
Northern fur seal (*Callorhinus ursinus*)
Killer whale (*Orcinus orca*)
Dall's porpoise (*Phocoenoides dalli*)
Bottlenose dophins (*Tursiops sp.*)
Risso's dophin (*Grampus griseus*)
Minke whale (*Balaenoptera acutorostrata*)
Humpback whale (*Megaptera novaeangliae*)
Common dolphin (*Delphinus delphis*)
Pacific white-sided dolphin (*Lagenorhynchus obliquidens*)

4. *Type of take:* An unspecified number of ceteceans and pinnipeds may be incidentally harassed during the course of serial and ground surveys.

5. *Location of Activity:* California.

6. *Period of Activity:* 5 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Import Limits for Certain Wool Textile Products Produced or Manufactured in the Republic of Singapore

March 18, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 24, 1988. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535-6736. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of wool textile products in Categories 438 and 440 which are in excess of the designated limits.

Background

A directive dated December 24, 1987 (52 FR 49188) established a limit for Group II, including limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Singapore and exported during the twelve-month period which began on January 1, 1988 and extends through December 31, 1988.

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 31, and June 5, 1986, as amended, between the Governments of the United States and Singapore estabishes designated consultation levels for wool textile products in Categories 438 and 440, produced or manufactured in

Singapore and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988. In addition, Categories 438 and 440 should be included in the previously established Group II limit for 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

March 18, 1988.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 24, 1987 from the Chairman, Committee for the Implementation of Textile Agreements, which established restraint limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Singapore and exported during the agreement year which began on January 1, 1988 and extends through December 31, 1988.

Effective on March 24, 1988, the directive of December 24, 1987 is amended to include the following limits for Categories 438 and 440 for the period January 1, 1988 through December 31, 1988:

Category	12-mo limit [1]
438	10,000 dozen
440	6,250 dozen

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

Textile products in Categories 438 and 440 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

Charges will be made to the limits established in this directive for Categories 438 and 440 as data become available.

Also effective on March 24, 1988, Categories 438 and 440 shall be included as sublevels of Group II. Group II shall consist of Categories 200–229, 300/301, 313–330, 332, 333/633, 336, 345, 349, 350, 351/651, 352/652, 353/354/653/654, 359–369, 400–434, 436, 438, 440–444, 445/446, 447, 448, 459–469, 600–603, 606, 607, 611–630, 632, 636, 637, 642–644, 649, 650, 659–S [1] 659–V [2], 659–O [3] and 665–670, as a group. The limit established for Group II in the December 24, 1987 directive remains unchanged.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

March 14, 1988.

The USAF Scientific Advisory Board AD Hoc Committee on Hypersonic Test Facilities will meet on 12–14 April 1988, from 8:00 a.m. to 5:00 p.m., at Wright-Patterson AFB, OH.

The purpose of this meeting is to review the status of technology programs and laboratory research efforts dealing with hypersonic technologies and/or their test requirements. This meeting will involve discussions of classified defense matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697-4648.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10a(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (AS).

Dates of Meeting: 13 thru 15 April 1988.

Time: 0900–1700 hours each day.

Place: BDM International, Arlington, VA 22209.

Agenda: The Army Science Board 1988 Summer Study on Technology Insertion in Army Systems will meet for a series of briefings. On 13 April the Process Panel will be briefed by Project Managers of selected Army programs. On 15 April the committee will be breiefed by selected Army agencies. On 14 April the technology panel will be briefed by technical directors of selected AMC MACOMs. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed are so inextricably interwined so as to preclude opening any portion of the meeting. Contact the Army Science Board Administrative Officer, Sally Warner, for further information at (202) 695-3039 or 695-7046.

Sally A. Warner

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 11–12 April 1988.

Times of Meeting: 0800–1700 hours daily.

Place: ITT Defense Technology Corporation, Washington, DC.

Agenda: The Army Science Board Ad Hoc Subgroup for Tactical Applications of Directed Energy Weapons (DEW) will meet to be briefed by TRADOC and Navy on technological developments and potential applications of directed energy. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5,

BILLING CODE 3710-08-M

Department of the Navy

Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Latin America Task Force will meet April 27–28, 1988 from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to gain a broad overview and insight of Latin America related to U.S. security and naval interests. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552(c)(1) of Title 5, United States Code.

For further information concerning this meeting, contact Ann Lynn Cline, Special Assistant to the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 601, Alexandria, Virginia 22302–0268. Phone (703) 756–1205.

Date: March 18, 1988.

W.R. Babington, Jr.,

Commander, JAGC, U.S. Navy Federal Register Liaison Officer.

[FR Doc. 88–6309 Filed 3–22–88; 8:45 am]

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee will meet on April 21–22, 1988. The meeting will be held at the Naval Strike Warfare Center, Fallon, Nevada. The meeting will commence at 7:45 a.m. and terminate at 4:30 p.m. on April 21; and commence at 7:30 a.m. and terminate at 1:30 p.m. on April 22, 1988. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide briefings and tours for the committee members on fleet aviation tactical developments. The agenda will include technical briefings, tours and discussions addressing aviation tactical development in support of fleet battle group operations, advanced flight training, and planning, programming and budgeting requirements and priorities for R&D, procurement and training related to strike warfare. These briefings, tours and discussions will contain classified information that is specifically authorized under criteria established by Executive Order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive Order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of Title 5, United States Code.

For further information concerning this meeting contact: Commander L. W. Snyder, U.S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217–5000, Telephone Number: (202) 696–4870.

Date: March 18, 1988.

W. R. Babington, Jr.,

Commander, JAGC, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

[CFDA No.: 84.042]

Notice Inviting Applications for New Awards Under the Student Support Services Program for Fiscal Year 1988

Purpose: Awards grants to institutions of higher education for projects that provide support services to low-income, first-generation or physically handicapped college students to enhance their academic skills, increase their retention and graduation rates, and as appropriate, facilitate entrance into four-year colleges or graduate and professional programs.

Deadline for Transmittal of Applications: May 6, 1988.

Applications Available: May 30, 1988.

Available Funds: $5,000,000.

The estimated range, average size, and number of awards stated in this Notice assumes fiscal year 1988 funds availability at about $5,000,000 for new awards.

Estimated Range of Awards: $70,000–$150,000.

Estimated Average Size of Awards: $110,000.

Estimated Number of Awards: 45.

Project Period: 24 months.

Supplementary Information: The Secretary strongly encourages an applicant to include measurable objectives in its plan of operation and evaluation plan. Specifically, an applicant is encouraged to use clear, specific and measurable objectives in its plan of operation, and use methods of evaluation which are objective and produce data that are quantifiable.

Applicable Regulations: (a) The Student Support Services Regulations, 34 CFR Part 646, as modified on July 24, 1987 (52 FR 27905) and (b) the Education Department General Administrative Regulations, 34 CFR Parts 75 and 77.

For Applications or Information Contact: Jowava M. Leggett, Chief, Special Services Branch, Division of Student Services, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3060, Regional Office Building 3, Washington, DC 20202.

Telephone: (202) 732–4804.

Program Authority: 20 U.S.C. 1070d, 1070d–1b.

Dated: March 14, 1988.

C. Ronald Kimberling,

Assistant Secretary for Postsecondary Education.

[FR Doc. 88–6367 Filed 3–22–88; 8:45 am]

BILLING CODE 4000-01-M

Advisory Committee on Student Financial Assistance; Meeting

AGENCY: Education Department.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Committtee on Student Financial Assistance. This notice also describes the functions of the committee. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: April 7, 1988 beginning at 9:00 a.m. and ending 5:00 p.m.; and April 8, 1988 beginning at 9:00 a.m. and ending at 5:00 p.m.

ADDRESS: Wyndham Bristol Hotel, 2430 Pennsylvania Avenue NW., Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Brian K. Fitzgerald, Staff Director, Advisory Committee on Student Financial Assistance, Room 4600, ROB3, 400 Maryland Avenue SW., Washington, DC 20202, (202) 732–3955.

SUPPLEMENTARY INFORMATION: The Advisory Committee on Student Financial Assistance is established under section 491 of the Higher Education Act of 1965 as amended by Pub. L. 100–50 (20 U.S.C. 1098). The Advisory Committee is established to provide advice and counsel to the Congress and the Secretary of Education on student financial aid matters, including providing technical expertise with regard to systems of need analysis and application forms and making recommendations that will result in the maintenance of access to postsecondary education for low- and middle-income students.

The proposed agenda includes:

Need Analysis Issues
Delivery System Issues
Committee Research Agenda
and
Committee Organization and Administration

Records are kept of all Committee proceedings, and are available for public inspection at the Office of the Advisory Committee on Student Financial Assistance, Room 4600, 7th and D Streets SW., Washington, DC from the hours of 9:00 a.m. to 5:00 p.m., weekdays, except Federal holidays.

Dated: March 18, 1988.

Kenneth D. Whitehead,

Assistant Secretary for Postsecondary Education.

DEPARTMENT OF ENERGY

Office of General Counsel

Inventions Available for License

The Department of Energy hereby announces a number of inventions available for license, in accordance with 35 U.S.C. 207–209, in order to achieve expeditious commercialization of results of federally funded research and development. For further information concerning licensing of the inventions, please contact Robert J. Marchick, Office of the Assistant General Counsel for Patents, Department of Energy, 1000 Independence Avenue SE., Washington, DC 20585.

Copies of specifications of the listed U.S. patent applications may be obtained, for a modest fee, from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161.

Issued in Washington, DC, on March 17, 1988.

Eric J. Fygi,

Acting General Counsel.

PATENT APPLICATIONS

Serial No.	Title of invention
634,001	Method and Apparatus for Laser/Plasma Chemical Processing of Substrates.
685,081	Apparatus for Inspecting Fuel Elements.
688,675	Reactor Power Compensating System.
702,766	PLS101 Plasmid Vector.
704,113	System for Exchange of Hydrogen Between Liquid and Solid Phases.
707,359	Protective Interior Wall and Attaching Means for a Fusion Reactor Vacuum Vessel.
707,775	Process for Removing Mercury from Aqueous Solutions.
707,939	Negative Ion Beam Source with Low Temperature Transverse Divergence Optical System.
708,477	Fast Counting Electronics for Neutron, Coincidence Counting.
708,618	Method for the Recovery of Silver from Silver Zeolite.
708,624	Preparation of 1,1'-Dinitro-3,3'-AZO-1,2,4-Triazole.
708,625	Biomedical Silver-109M Isotope Generator.
710,880	Control for Stabilizing the Alignment Position of the Rotor of the Synchronous Motor.
710,881	Process for Preparing Fine Grain Titanium Carbide Power.
712,056	Interlockin Egg-Crate Type Grid Assembly.
713,165	Nuclear Fuel Pin Scanner.
713,352	Electron-Beam-Induced Information Storage in Hydrogenated Amorphous Silicon Devices.
716,059	Liquid Cooled Fiber Thermal Radiation Receiver.
716,060	Electrically Conductive Resinous Bond and Method of Manufacture.
716,397	Method for Fabricating Multi-Strand, Superconducting Cable.
719,653	Process for Making Structure for a MCFC.
719,654	Mixture for Producing Fracture-Resistant, Fiber-Reinforced Ceramic Material by Microwave Heating.
720,326	Atmospheric Pressure Helium Afterglow Discharge Detector for Gas Chromatography.
720,446	Optical Fiber Inspection System.
721,339	Pulsed Helium Ionization Detection System.
721,352	Radiation Detector Spectrum Simulator.
722,674	Transformer Current Sensor for Superconducting Magnetic Coils.
724,431	Low Temperature Aqueous Desulfurization of Coal.
725,562	Fixture for Supporting and Aligning a Sample to be Analyzed in an X-ray Diffraction Apparatus.
725,564	Process for Measuring Degradation of Sulfur Hexafluoride in High Voltage Systems.
725,565	Valve and Dash-Pot Assembly.
728,356	Coal-Water Mixture Fuel Burner.
728,369	Beryllium-7 Labeled Carbon Particles and Method of Making.
728,367	System for Conversion between the Boundary Representation Model and a Constructive Solid Geometry Model of an object.
728,970	Method and Apparatus for Analyzing the Internal Chemistry and Compositional Variations of Materials and Devices.
728,976	Remotely Readable Fiber Optic Compass.
728,977	Process for Producing Chalcogenide Semiconductors.
729,022	Method and Apparatus for Measuring Solar Radiation in a Vegetative Canopy.
730,529	Method for Encryption and Transmission of Digital Keying Data.
735,228	Removal of Arsenic, Vanadium, and/or Nickel Compounds from Petroliferous Liquids.
736,021	Implantable Apparatus for Localized Heating of Tissue.
736,033	Optically Pulsed Electron Accelerator.
736,154	Hydrodesulfurization Catalyst by Chevrel Phase Compounds.

PATENT APPLICATIONS—Continued

Serial No.	Title of invention
736,164	Piezoelectric Shear Wave Resonator and Method of Making Same.
736,168	Serially Connected Solid Oxide Fuel Cells Having Monolithic Cores.
736,575	Steel Refining with an Electrochemical Cell.
736,576	Method of Removing and Detoxifying a Phosphorus-Based Substance.
736,806	Ambient-Pressure Organic Superconductor.

BILLING CODE 6450-01-M

Intent To Grant Exclusive Patent License; Summit Technology Inc.

Notice is hereby given of an intent to grant to Summit Technology Inc. of Watertown, Massachusetts, an exclusive license to practice in the United States the invention described in U.S. Patent No. 4,686,979, entitled "Excimer Laser Phototherapy for the Dissolution of Abnormal Growth." The patent is owned by the United States of America, as represented by the Department of Energy (DOE).

The proposed exclusive license will be subject to a license and other rights retained by the U.S. Government, and will be subject to a negotiated royalty provision. DOE intends to grant the license, upon a final determination in accordance with 35 U.S.C. 209(c), unless within 60 days of this notice the Assistant General Counsel for Patents, Department of Energy, Washington, DC 20585, receives in writing any of the following, together with support documents:

(i) A statement from any person setting forth reasons why it would not be in the best interests of the United States to grant the proposed license; or

(ii) An application for a nonexclusive license to the invention in the United States, in which applicant states that he has already brought the invention to practical application or is likely to bring the invention to practical application expeditiously.

The Department will review all written responses to this notice, and will grant the license if, after expiration of the 60-day notice period, and after consideration of written responses to this notice, a determination is made, in accordance with 35 U.S.C. 209(c), that the license grant is in the public interest.

Issued in Washington, DC, on March 17, 1988.

Eric J. Fygi,

Acting General Counsel.

[FR Doc. 88-6330 Filed 3-22-88; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 87-71-NG]

Pepperell Power Associates; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on December 14, 1987, of an application filed by Pepperell Power Associates (PPA) for authorization to import from TransCanada Pipelines Limited (TransCanada), up to a daily contract quantity of 9,795 Mcf of Canadian natural gas over a 15-year term beginning on or before January 1991. The gas would be imported to fuel a new combined cycle cogeneration facility to be constructed by the applicant in Pepperell, Massachusetts. At the request of the ERA, PPA, on February 9, 1988, filed additional information to support its application for import authority.

The application, as supplemented, is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than April 22, 1988.

FOR FURTHER INFORMATION:

Edward J. Peters, Jr., Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-8162.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue SW., (202) 586-6667.

SUPPLEMENTARY INFORMATION: PPA furnished with its application a copy of a long-term gas sales and purchase precedent agreement dated November 25, 1987, between TransCanada and PPA. Under the terms of the agreement, TransCanada will supply the applicant a total contract quantity of 53,627,625 Mcf of natural gas over a 15-year term beginning on or before January 1991. TransCanada agrees to deliver a maximum annual quantity of 3,575,175 Mcf of natural gas to the border point of delivery.

In its supplemental filing, PPA advised that although its precedent gas purchase agreement states that the imported gas will be delivered by TransCanada to the interconnection of TransCanada's facilities with those of Tennessee Gas Pipeline Company (Tennessee) at the Canadian/United States border near Niagara Falls, Ontario, PPA may elect Champlain Gas Pipeline Company (Champlain) as its domestic transporter. If Champlain becomes the transporter, TransCanada would deliver the gas to its point of interconnection with Champlain at Highgate Springs, Vermont. Champlain would transport

the natural gas to a metering station at the project site owned by Colonial Gas Company (Colonial), the local distribution company.

Construction of the cogeneration facilities is scheduled to be completed in the fourth quarter of 1989 at which time the initial delivery of natural gas for test purposes would take place. It is estimated that the facility would begin taking the daily contract quantity on or before January 1991. The facility will be designed to produce about 38 megawatts of electricity that Commonwealth Electric Company has agreed to buy, and a yearly average steam flow of about 41,000 pph to be sold to the James River Corporation for product processing and heating. The cogeneration facility will be located at the James River Corporation plant site in Pepperell.

The purchase contract establishes a two-part border price for the gas. The demand component will be $26.46 Mcf per month or $.87 per Mcf at 100 percent load factor. The commodity component for each month shall be the greater of $1.20 per MMBtu or an amount determined by the following formula that factors in the cost of No. 6 residual fuel oil: commodity charge ($1.20 × AFC divided by $18.05 + TC—ERCA). AFC is the greater of $18.05 or the average of the highest and lowest prices for No. 6 residual 2.2 percent sulphur fuel oil as reported in the *Journal of Commerce* under the heading, "N.Y. Harbor Cargo Prices—Fuel Oil" for all Wednesdays during the immediately preceding month. TC is a transportation credit equal to half the amount, if any, that PPA's domestic transportation costs per MMBtu at 85 percent load factor is less than $1.00; and ERCA represents an Exchange Rate Commodity Adjustment per MMBtu. That factor converts to Canadian dollars the demand charge rate for total heating value of gas delivered each month which under the contract is expressed in U.S. dollars. The ERCA may be a negative amount.

Under other terms of the purchase agreement PPA assumes a take-or-pay obligation that requires PPA to purchase no less than 50 percent of the annual contract quantity (ACQ) for the contract year. If minimum volumes are not taken in any year, PPA shall purchase from TransCanada in the next year 50 percent of the ACQ plus a quantity of gas equal to the difference between the ACQ and the quantity actually taken in the preceding year. If PPA does take less than 50 percent of the ACQ during the year for any reason other than unscheduled outages at its facility, TransCanada may renegotiate for a reduction in the daily contract quantity of 9,759 Mcf per day.

PPA states its estimated dollar cost of transportation per Mcf of its natural gas under offers it has received from Champlain and Tennessee are as follows:

	Champlain	Tennessee
TransCanada (includes commodity charge)	2.29	2.22
U.S. Transportation	.62	.97
Colonial (local)	.14	.09
Total	$3.05	$3.28

PPA asserts that its gas purchase agreement for an imported supply represents the best overall supply arrangement it could secure to meet its needs on a long-term, firm supply basis. PPA states that after an extensive search for a domestic supply, it could not find a long-term supplier offering an economical price for natural gas that was tied to the price of No. 6 fuel oil which, along with a competitive gas price, PPA considers to be a critical factor in the economic viability of its new cogeneration project sited at a plant now served by a boiler facility capable of burning No. 6 fuel oil. Since the natural gas pricing formula tracks the price of the fuel oil, PPA contends its supply arrangement is and will remain competitive for its needs over the term of the contract.

With respect to the security of its supply source for the term of its contract, PPA points out that its supplier, TransCanada, has approximately 2,700 gas purchase contracts with some 700 producers in the Province of Alberta covering 6,700 gas pools and 18,600 gas wells which provide about 26.4 Tcf of gas reserves to TransCanada over an estimated 24 year reserve life.

PPA asserts that its proposed import will have no adverse environmental impacts. According to the application, no environmental impacts will result from construction of its cogeneration facility at an existing industrial site. However, PPA states that the domestic transportation of its gas whether through the Tennessee system or the Champlain system would require either company to construct additional facilities. On January 15, 1988, Tennessee filed with the Federal Energy Regulatory Commission (FERC) in Docket No. CP88-173 for permission to build the facilities it would need to deliver PPA gas to Colonial's system. Similarly, on the same date, Champlain filed with the FERC in Docket No. CP88-169 for permission to build the added new facilities needed to accommodate the transportation of PPA's natural gas to Colonial. If Tennessee becomes PPA's transporter, Colonial will need to upgrade a portion of its system for which it will be required to seek a project authorization from the Massachusetts Energy Siting Council and possibly from the city of Pepperell. No Colonial system upgrade would be needed if Champlain becomes the transporter.

PPA furnished with its amended application a copy of a letter from the Director, Electric Power Division, Department of Public Utilities, the Commonwealth of Massachusetts addressed to the Commonwealth Electric Company approving its contract with PPA to purchase the electricity generated by its proposed cogenetration facility. PPA also furnished a copy of its certificate from the Secretary of Environmental Affairs of the Commonwealth of Massachusetts stating that the Pepperell Power Corporation cogeneration project does not require the preparation of an Environmental Impact Report under its Environmental Policy Act because of its location and levels of NOX emission as described for the facility.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). To the extent there are any issues that are unique to cogeneration facilities, the ERA may consider these in making a public interest determination.

Parties that may oppose this application should comment in their responses on the issues of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make

BEST COPY AVAILABLE

the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 586-9478. They must be filed no later than 4:30 p.m. e.d.t., April 22, 1988.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of PPA's application and additional information filed on February 9, 1988, are available for inspection and copying in the Natural Gas Division Docket Room, GA-076 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 16, 1988.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP77-8-008, et al.]

Columbia Gulf Transmission Company et al.; Natural Gas Certificate Filings

March 17, 1988.

Take notice that the following filings have been made with the Commission:

1. Columbia Gulf Transmission Company

[Docket No. CP77-8-008]

Take notice that on March 1, 1988, Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP77-8-008, a petition to amend the order issued May 6, 1977, in Docket No. CP77-8, as amended, pursuant to section 7(c) of the Natural Gas Act so as to authorize a reduction in the contract demand (CD) it presently transports for Northern Natural Gas Company, Division of Enron (Northern), all as more fully set forth in the petition which is on file with the Commission and opened to public inspection.

Columbia Gulf states that pursuant to the order issued in Docket No. CP77-8, on May 6, 1977, as amended, it is authorized, among other things, to transport a CD of 130,000 Mcf of natural gas per day for Northern, including Northern's volumes purchased in West Cameron Blocks 606, 668, 637 and 630, which is made available to Northern from a point in Vermilion Block 245, offshore Louisiana, to the terminus of the Blue Water Pipeline System near Egan, Louisiana. Columbia Gulf avers that it performs such transportation service pursuant to the terms of a transportation agreement with Northern dated September 3, 1976, as amended.

Columbia Gulf asserts that in recent years Northern's gas deliverability in the subject blocks has rapidly decreased, and Columbia Gulf is willing to reduce the CD volumes.

Columbia Gulf further states that it requests authorization to reduce the presently authorized CD volumes from 130,000 Mcf of natural gas per day to 35,000 Dt of natural gas per day, pursuant to an amendment to the agreement dated January 12, 1980.

Comment date: April 7, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. South Georgia Natural Gas Company

[Docket No. CP88-282-000]

Take notice that on March 9, 1988, South Georgia Natural Gas Company (South Georgia), P.O. Box 1279, Thomasville, Georgia 31792, filed in Docket No. CP88-282-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing South Georgia to increase the Maximum Daily Quantities (MDQ) to three of its existing customers by a total of 590 Mcf per day (Mcf/d), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

South Georgia states that it is authorized to sell gas for resale to the Americus Utility Commission (Americus), to the City of Thomasville, Georgia (Thomasville) and to the City of Tifton, Georgia (Tifton) pursuant to Service Agreements dated November 1, 1973, October 23, 1984 and September 21, 1984 at an MDQ of 3,535 Mcf/d, 3,535 Mcf/d and 2,626 Mcf/d, respectively. South Georgia states that on February 29, 1988, Southern Natural Gas Company (Southern) received authorization in Docket No. CP70-7-056, to reduce the Contract Demand of one of Southern's customers and to reallocate that reduction among those of its other customers who elected to participate in the reallocation. South Georgia states that it sent letters to its customers asking them to determine if they wanted any of the Contract Demand that South Georgia could obtain from Southern's reallocation. Americus, Thomasville and Tifton stated that they would like to increase their MDQ by 265 Mcf, 300 Mcf and 25 Mcf, respectively. South Georgia states that the February 29th order in Docket No. CP70-7-056 authorized Southern to distribute to South Georgia the additional 590 Mcf/d in its Contract Demand. It is stated that no new facilities are required to effect the increases in MDQ requested herein.

Comment date: April 7, 1988, in accordance with Standard Paragraph F at the end of this notice.

3. Williston Basin Interstate Pipeline Company

[Docket No. CP83-254-007 and Docket No. CP83-335-000]

Take notice that on February 26, 1988, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck,

North Dakota 58501 filed a request for an extension of the certificate authority granted on May 25, 1984, in Montana-Dakota Utilities Co., 27 FERC ¶61,312 (1984), to permit continued natural gas storage and transportation service on behalf of its producer-suppliers, pursuant to its Rate Schedules S-2 and T-3 for a period ending the earlier of May 24, 1989, or the acceptance of "alternative transportation authority," all as more fully set forth in the application, which is on file with the Commission and open for public inspection. Williston Basin states that except for extending the duration of the services under Rate Schedules S-2 and T-3 for those producer suppliers whose four year term is or has expired, all other terms and conditions of the rate schedules and the underlying certificate are to remain in place.

Comment date: April 7, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. Arkla Energy Resources, a Division of Arkla, Inc.

[Docket No. CP88-284-000]

Take notice that on March 1, 1988, Arkla Energy Resources, a Division of Arkla, Inc. (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP88-284-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate three sales taps and related jurisdictional facilities, to establish a new delivery point for an existing customer, and to perform transportation and delivery services associated therewith on behalf of Arkansas Louisiana Gas Company (ALG), Arkla's distribution division, for resale to consumers in Texas, Louisiana, and Kansas, under the certificates issued in Docket Nos. CP82-384-000 and CP82-384-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

It is explained that AER proposes to construct and operate a 2-inch sales tap and related facilities on its Line AM-129 in Bowie County, Texas, to deliver gas to ALG for service to the Texarkana Waste Water Treatment Plant, a commercial customer. It is stated that the plant would use approximately 15,000 Mcf of natural gas per year and 55 Mcf on a peak day.

It is also explained that AER proposes to establish a new town border station (T.B. #3) and related facilities on its Line CM-14 in Bowie County, Texas, to enable ALG to serve present and future consumers in Wake Village, Texas. AER estimate that the consumers served through the Wake Village T.B. #3 would use approximately 41,300 Mcf of natural gas per year and 300 Mcf on a peak day.

In addition, it is explained that AER proposes to construct and operate a 2-inch sales tap and related facilities on its Line FM-8 in Webster Parish, Louisiana, to deliver gas to ALG for service to International Technology Corporation (ITC), an industrial customer. It is estimated that ITC would consume approximately 132,000 Mcf of natural gas per year and 806 Mcf on a peak day.

Finally, AER explains that it proposes to construct and operate a ¾-inch sales tap and related facilities on its Line 6 in Reno County, Kansas, to deliver gas to Mr. Bill Wiese, a commercial customer. It is estimated that Mr. Wiese would use approximately 400 Mcf of natural gas per year and 10 Mcf on a peak day for irrigation purposes during certain periods of the year.

Comment date: May 2, 1988, in accordance with Standard Paragraph G at the end of this notice.

5. Mountain Fuel Resources, Inc.

[Docket No. CP88-284-000]

Take notice that on March 10, 1988, Mountain Fuel Resources, Inc., (MFR) 79 South State Street, Salt Lake City, Utah, 84111, filed in Docket No. CP88-284-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval authorizing the abandonment by MFR of certain mainline compressor facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

MFR proposes to abandon (1) two reciprocating compressor units (each rated at 660-horsepower) located on MFR's Main Line No. 68, at its Piceance Creek Compressor Station in Rio Blanco County, Colorado, (Piceance Creek) and (2) one reciprocating compressor (245-horsepower) located on MFR's Main Line No. 68 at its Northwest Exchange Compressor Station in Rio Blanco County, Colorado, (Northwest Exchange). MFR states that since it acquired the Piceance Creek compressors, free-flow pipeline capacity has proven sufficient to handle deliveries from fields upstream of these compressors. Moreover, MFR asserts, the needs to use the Northwest Exchange compressor to compress gas received from Northwest Pipeline Corporation (Northwest) has not persisted since Northwest's line pressure has consistently been higher than the pressure in MFR's Main Line No. 68. MFR explains that, as a consequences, operation of the Piceance Creek and Northwest Exchange compressors is not required, and that there is no prospect for their future use at their current locations. MFR proposes to abandon the compressors in place until such time as MFR chooses to utilize the compressors at another location on its system or perhaps to sell them.

MFR staes that the proposed abandonment would have no impact upon MFR's customers. Further, MFR reiterates that the receipt of gas from Northwest at the Northwest Exchange point would not be affected by the abandonment of the Northwest Exchange compressor.

Comment date: April 7, 1988, in accordance with Standard Paragraph F at the end of this notice.

6. Pacific Gas Transmission Company

[Docket No. CP88-276-000]

Take notice that on March 7, 1988, Pacific Gas Transmission Company (PGT), 160 Spear Street, San Francisco, California 94105-1570, filed in Docket No. CP88-276-000 an application pursuant to Section 7(c) of the Natural gas Act for a certificate of public convenience and necessity authorizing PGT to transport on an interruptible basis up to 31.13 MMcf per day of natural gas for Salmon Resources Ltd. (Salmon) and increase in the capacity of it's Spokane City Tap located near Starr Road, Spokane, Washington, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

PGT asserts that the proposal constitutes a refiling for transportation volumes of gas which were part of an application filed in Docket No. CP87-21-000, but for which authority was not granted based upon omission of material information (see order issued December 15, 1987, at 41 FERC ¶ 61,266). PGT alleges that this proposal is a remedial document to correct deficiencies in the prior application.

It is stated that the proposed transportation would be accomplished by delivery of Canadian gas to PGT at Kingsgate, British Columbia of up to 31.13 MMcf per day for the account of Salmon and the redelivery of such natural gas to Salmon at a point of interconnection between the pipeline systems of PGT and The Washington Water Power Company (WWPC) at Starr Road near Spokane, Washington. It is further stated that the capacity of the existing Spokane City Tap would be increased from 30 MMcf per day to 60

MMcf per day to facilitate the proposed deliveries. It is alleged that the interruptible transportation service would be accomplished through the utilization of existing capacity on PGT's system. The term of the agreement would be for a primary term of ninety days, not to exceed one year.

It is asserted that the proposed delivery of natural gas for Salmon's account to the Starr Road delivery point is meant to satisfy the requirement of several customers who are represented by Development Associates, Inc. (DA). DA, acting as agent on behalf of various end-users and a local distribution company (WWPC), has contracted on their behalf for the purchase of Canadian gas to be transported by PGT. PGT states that it has provided specific information (*i.e.*, identities/volumes to be delivered) with regard to such customers. PGT asserts that it has provided copies of contract and/or letters of intent evidencing the underlying purchase transactions which form the basis for the application.

PGT proposes to provide the interruptible transportation service pursuant to its IT-1 Rate Schedule, which it is stated, accords with the transportation rate conditions imposed by the Commission for similar transportation in Docket No. CP87-21-000 (see 41 FERC ¶ 61,019). The cost of increasing the capacity of the delivery facilities is estimated to be $165,300. PGT state the cost of constructing such facilities would be financed by a capital contribution from DA.

Comment date: April 7, 1988, in accordance with Standard Paragraph F at the end of this notice.

7. Northern Natural Gas Company Division of Enron Corporation

[Docket No. CP88-274-000]

Take notice that on March 4, 1988, Northern Natural Gas Company, Division of Enron Corporation, (Northern), 2223 Dodge Street, Omaha, Nebraska, 68102, filed in Docket No. CP88-274-000 a request pursuant to §§ 157.205 and 284.223 of the Regulations under the Natural Gas Act for authorization to provide a transportation service on behalf of Windward Energy and Marketing Company (Windward Energy), a broker of natural gas, under the certificate issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request with the Commission and open to public inspection.

Northern states that it proposes to transport natural gas for Windward Energy from seven receipt points located in Oklahoma, Texas and Iowa to six points of delivery in Texas, Kansas and Iowa. Northern further states that the maximum daily and annual quantities that it would transport for Windward Energy would be 75 billion Btu equivalent and 27.375 trillion Btu equivalent, respectively. It is stated that construction of facilities would not be required to provide the proposed service.

Comment date: May 2, 1988, in accordance with Standard Paragraph G at the end of this notice.

Transcontinental Gas Pipe Line Corporation

[Docket No. CP88-273-000]

Take notice that on March 3, 1988, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP88-273-000 an application pursuant to section 7 of the Natural Gas Act for permission and approval to abandon a natural gas service rendered under an expired service agreement with CNG Transmission Corporation (CNG), and for a certificate of public convenience and necessity authorizing Transco's performance of a sale and/or transportation service for CNG all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that it presently renders natural gas service to CNG under a service agreement which provides for the sale for resale of 10 million Mcf of natural gas each contract year, and that the service remain in effect until December 31, 1979, and from year to year thereafter unless terminated by either party. Transco further indicates that Transco and CNG have agreed to the termination of this service, that this service has now expired, and that Transco and CNG have agreed to substitute for such service, the service proposed in Transco's application.

Transco states that under the proposed service agreement it will provide firm annual sales and/or transportation service for CNG up to the dekatherm equivalent of 10 million Mcf for an initial term of ten years, commencing April 1, 1988. During the summer period of April 1 through October 31, Transco indicates that it would deliver or tender for delivery a maximum daily quantity up to the dekatherm equivalent of 41,310 Mcf per day, up to a maximum total summer period quantity up to the dekatherm equivalent of 8,840,000 Mcf. During the winter period, November 1 through March 31, Transco proposes to deliver or tender for delivery a maximum daily quantity up to the dekatherm equivalent of 10,000 Mcf, up to a maximum total winter period dekatherm-equivalent quantity of 1,160,000 Mcf. Transco indicates that subject to the requirements of its other firm service obligations, service to CNG would be tendered on a daily basis and any quantity or capacity tendered for delivery would be credited against the maximum quantity for each period and the annual quantity. It is stated that the proposed agreement also provides that by mutual agreement, additional quantities above the maximum daily delivery quantity could be sold and/or transported and that any such deliveries would be credited against the maximum quantity for the period and the annual quantity.

Transco states that under the proposed agreement, on or before March 1 of each year, CNG would nominate the specific levels of transportation and/or sales service, equal in total to the annual quantity, desired for the next contract year; provided, however, CNG would be responsible for any necessary arrangements (including the construction of any facilities) for the transportation quantities to enter Transco's system. Transco advises that CNG's ability to nominate points of receipt for transportation service in Transco's production area upstream of Compressor Station No. 65 would be subject to available capacity and any other applicable procedures and regulations pertaining to changes in points of receipt on Transco's system. Therefore, Transco proposes to transport to Station No. 65 quantities nominated for transportation service which are located at receipt points upstream of Station No. 65 on an interruptible basis consistent with the general terms and provisions affecting the curtailment of service as specified in Transco's tariff and generally applicable operating conditions. Transco indicates that under the instant proposal, no additional facilities would be required to render the proposed service.

Transco indicates that the demand rate for sales service under the proposed agreement would be the applicable Rate Schedule CD D2 demand rate in effect from time to time. It is further stated that the proposed reservation rate for transportation would be determined in the same manner as sales service, excluding production area costs reflected in the Rate Schedule CD D2 demand rate. Transco states that the commodity rate per dekatherm equivalent of sales would be the same as the applicable Rate Schedule CD commodity rate. It is indicated that the transportation commodity rate per dekatherm equivalent of gas transported downstream of Station No. 65 would be the non-gas cost component of the applicable Rate Schedule CD commodity rate, exclusive of production area costs, the Deferred Adjustment, the DCA Unit Adjustment and, if applicable, the GRI Adjustment. However, Transco states that the ACA charge in effect from time to time would be added to the sales and transportation commodity rates. For the interruptible transportation service upsteam of Station No. 65, Transco proposes to charge initially the currently effective maximum rate applicable to its Part 284 transactions as set forth in Transco's FERC GAS Tariff, Second Revised Volume No. 1.

Comment date: April 7, 1988, in accordance with Standard Paragraph F at the end of this notice.

9. PennEast Gas Services Company, Texas Eastern Transmission Corporation

[Docket No. CP87-4-001]

Take notice that on March 9, 1988, PennEast Gas Service Company (PennEast) and Texas Eastern Transmission Corporation (Texas Eastern), jointly referred to as Applicants, Post Office Box 2521, Houston, Texas 77252, filed in Docket No. CP87-4-001 an amendment to PennEast's application filed on October 2, 1986 in Docket No. CP87-4-000, pursuant to section 7(c) of the Natural Gas Act, to reflect a modification of the ownership structure of certain proposed facilities for which Commission authorization to construct and operate is requested and relocation of the site for the proposed 3,500 horsepower (HP) compressor station, and to include Texas Eastern as a party applicant requesting authorization to render a compression and metering service to PennEast, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicants state that, in the original application, PennEast requested authorization to provide jurisdictional sales and transportation of gas on a firm basis for a primary term of 20 years to five local distribution companies located in New York and New Jersey pursuant to proposed Rate Schedules SS-1 and T-1 in two phases, Phase I commencing November 15, 1987, of up to 100,000 dt equivalent per day and Phase II commencing November 15, 1988 until termination, of up to 245,000 dt equivalent per day. Further, Applicants state that PennEast proposed to construct and operate facilities, including a 3,500 HP compressor station near mile post 36.25 on Texas Eastern's existing Line No. 24, under Phase I and Phase II. It is indicated that PennEast also sought a Blanket Certificate pursuant to § 284.221 of the Commission's Regulations.

Applicants indicated that, on November 2, 1987, PennEast filed a Notice of Partial Withdrawal of Application, withdrawing its request for Phase II facilities. It is submitted that the request for Phase II facilities authorization is now requested in Docket No. CP87-92-002.

Applicants state that, in the original application, PennEast agreed to reimburse certain costs incurred by Texas Eastern for the upgrade compression facilities at Shermans Dale and Bernville Compressor Stations. Applicants further state that PennEast included these costs in its rate base for the purpose of calculating the PennEast rates. Applicants indicate that a review of the Tax Reform Act of 1986 indicates that certain tax penalties would occur as a result of the ownership arrangement proposed in the original docket. Applicants submit that, under the Tax Reform Act, the contribution proposed to be made by PennEast to Texas Eastern would be treated as taxable income to Texas Eastern, and the resulting additional Federal income tax would impose an additional cost burden on the project. Applicants request a restructuring of the ownership arrangement in order to provide for outright ownership interest by PennEast in the following facilities in the respective percentages pursuant to the Gas Compression and Metering Agreement filed in Exhibit M of the amended application herein:

	PennEast (percentage)
20.01 miles of 36-inch pipeline loop, various counties in Pennsylvania	100
Belleville Compressor Station—3,500 HP (Previously located at Centre Hall)	100
Upgrade compression at Texas Eastern's Shermans Dale and Bernville Compressor Stations—8,600 HP each	81.2

It is indicated that, in the original application, PennEast sought authorization to construct and operate a 3,500 HP compressor station (designated Centre Hall) at mile post 36.25 on Texas Eastern's Line No. 24. As a result of delays encountered in securing siting authorization, PennEast proposes and requests authorization to locate the 3,500 HP compressor facility (now designated Belleville Compressor Station) at mile post 18.50 on Texas Eastern's Line No. 24 in Union Township, Mifflin County Pennsylvania. PennEast indicates that the estimated cost as shown in Exhibit K of the original application would remain unchanged.

It is indicated that Texas Eastern would, on behalf of PennEast, operate the above facilities pursuant to the terms of a Gas Compression and Metering Agreement between PennEast and Texas Eastern. It is further indicated that Texas Eastern would charge PennEast for the incremental operation and maintenance expenses incurred by Texas Eastern. Applicants state that the incremental operating and maintenance expense to be charged PennEast by Texas Eastern are attached in Exhibit P, Schedule 8 of the amended application. Applicants submit that the total PennEast cost of service and initial rates remain unchanged from the Exhibit P filed in the supplement dated September 23, 1987. Texas Eastern requests that the charge shown in Exhibit P, Schedule 8, Line 42, be accepted as initial rates for such compression and metering service.

Applicants also submit a revised Exhibit P which reflects modification to PennEast's proposed FERC Gas Tariff. Applicants indicate that these modifications have been made to reflect current Commission policy on open-access tariff provisions and minor modifications in the tariff to resolve issues raised by the Commission Staff in data requests to PennEast.

Comment date: April 7, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

10. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP88-275-000]

Take notice that on March 4, 1988, Northern Natural Gas Company, Division of Enron Corp. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-275-000, a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a transportation service on behalf of Enron Gas Marketing, Inc. (Enron), a marketer of natural gas, under its blanket certificate issued in Docket No. CP86-435-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the commission and open to public inspection.

Northern states pursuant to a Gas Transportation Agreement dated February 25, 1988, Northern would transport up to 200,000 MMBtu of gas per day for Enron from 114 points of receipt in states of Oklahoma, Kansas, Texas, New Mexico, Iowa, South Dakota, Minnesota and North Dakota to twelve points of delivery in Texas, Kansas, Wisconsin, Iowa, Illinois and North Dakota. Northern further states that construction of facilities would not be required to provide the proposed service.

Comment date: May 2, 1988, in accordance with Standard Paragraph G at the end of the notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6324 Filed 3-22-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. QF86-185-002, et al.]

Malacha Hydro Limited Partnership, et al.; Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

March 17, 1988.

Take notice that the following filings have been made with the Commission.

1. Malacha Hydro Limited Partnership

[Docket No. QF86-185-002]

On March 7, 1988, Malacha Hydro Limited Partnership (Applicant), c/o Constellation Development, Inc., 250 West Pratt Street, Baltimore, Maryland 21201-2423 submitted for filing an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The instant application for recertification of the hydroelectric facility as a qualifying small power production facility requests changes in the facility's ownership and changes in the name and address of the Applicant as identified above. Qualifying status of the facility as a qualifying small power production facility was previously granted to Malacha Power Project, Inc., c/o Mr. John J. Vestal, P.O. Box 250, Fall River Mills, California 96028, on January 8, 1986, and December 22, 1987 (Docket No. QF86-185-000, 34 FERC ¶62, 070 (1986), and Docket No. QF86-185-001, 41 FERC ¶61,350 (1987), respectively). The facility also had a hydroelectric license issued on December 2, 1986 (Project No. 8296-001, 37 FERC ¶62,172 (1986)). Ownership of the facility was previously held by the General Electric Credit Corporation and/or by other financial institutions with Malacha Power Project, Inc. being the operator lessee of the facility. The instant application for recertification of the facility requests change in the facility's ownership to a limited partnership, consisting of Malacha Power Project, Inc. and CD Malacha I, Inc., a wholly-owned subsidiary of the Baltimore Gas and Electric Company, an electric utility. Applicant states that CD Malacha I, Inc. will not under the limited partnership agreement be entitled to more than a 50 percent ownership interest in the facility. All other aspects of the facility remain unchanged. The facility is exempt from the requirements of section 8, subsection (j) of the Electric Consumers Protection Act of 1986 (ECPA) since the application for license was accepted for filing prior to the enactment of ECPA.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

Rockwell International Corporation—Energy Technology Engineering Center

[Docket No. QF84-194-005]

On March 1, 1988, Rockwell International Corporation (Applicant) of P.O. Box 1449, Canoga Park, California 91304 submitted for filing a new application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The bottoming-cycle cogeneration facility will be located at the U. S. Department of Energy's Energy Technology Engineering Center (ETEC) on Woolsey Canyon Road, in Santa Susana, Ventura County, California. The ETEC is a government-owned, contractor-operated laboratory dedicated to the development of emerging energy technologies. The ETEC is currently operated by the Rockwell International Corporation. The facility will consist of a condensing steam turbine generator. The primary energy source of the facility will be reject heat in the form of steam produced during the testing of steam generators (boilers). The net electric power production

capacity of the facility will be 26.9 megawatts. The facility was previously denied certification as a qualifying bottoming-cycle cogeneration facility on May 25, 1984 (Docket No. QF84-194-000, 27 FERC ¶62,190 (1984)). The facility was certified as a qualifying small power production facility on June 18, 1985 (Docket No. QF84-194-002, 31 FERC ¶62,357 (1985)).

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6271 Filed 3-22-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI88-305-000]

Cabot Gas Processing Corp.; Application for Amendment of a Certificate and for Blanket Certificate Authority

March 18, 1988.

Take notice that on February 12, 1988, Cabot Gas Processing Corporation (Cabot Processing) of 550 WestLake Park Blvd., Suite 170, Houston, Texas 77079, filed an application for amendment of a certificate of public convenience and necessity and for blanket certificate authority with pregranted abandonment pursuant to section 7 of the Natural Gas Act, 15 U.S.C. 717(f) and Part 157 of the Commission's Regulations, 18 CFR Part 157, to make sales of natural gas in interstate commerce, all as more fully set forth in said application which is on file with the Federal Energy Regulatory Commission and open to public inspection.

Cabot Processing states that it is involved in the ongoing reorganization of Cabot Corporation (Cabot) and that Cabot Processing has been and is to be conveyed certain gas processing contracts by Cabot pertaining to sales made at the Walton Plant, Winkler County, Texas, and the Estes Plant, Ward County, Texas. Cabot Processing seeks authorization to continue certain residue sales made by Cabot to El Paso Natural Gas Company from the Walton Plant under Cabot's certificate in Docket No. CI73-767. Cabot Processing also requests redesignation of Cabot's related Rate Schedule No. 107. By assignment dated and effective February 2, 1988, Cabot assigned its interest in the related gas purchase agreement to Cabot Processing.

Cabot Processing also seeks blanket certificate authority to make sales in interstate commerce of other gas from the aforementioned processing plants. Cabot Processing states prior certificated sales to Transwestern Pipeline Corporation from the Walton and Estes Plants have been duly abandoned (*see Kerr-McGee Corp., et al.,* Docket No. G-12235-003, *et al.*); and, subsequently, the Commission granted blanket certificate authority to Cabot for sales from the Walton Plant of residue gas for which abandonment authorization had been obtained (*see Cities Services Oil and Gas Corporation, et al.,* Docket No. CI87-223-000, *et al.*). Cabot Processing seeks authorization to succeed to this blanket certificate issued to Cabot. Cabot Processing also seeks blanket certificate authority for other gas from the Walton and Estes Plans that have been or may be abandoned. Cabot Processing seeks such blanket authorization for the remaining life of the reserves.

Any person desiring to be heard or to make any protest with reference to said application should, on or before April 4, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI87-533-000, CI69-491-001 and CI69-491-002]

Mesa Operating Limited Partnership (Successor to Pioneer Production Corporation) and Amoco Production Co.; Applications

March 18, 1988.

Take notice that on February 2, 1988, Amoco Production Company (Amoco) and Mesa Operating Limited Partnership (Mesa) as operator and as working interest owner on behalf of itself and all other working interest owners (except Amoco)[1] (Applicants) filed as part of a Stipulation and Agreement in Settlement of Proceedings in Docket No. CI87-533-000, *et al.*, applications to abandon their sales of gas to United Gas Pipe Line Company (United) from the Jennings Townsite Field, Jefferson Davis Parish, Louisiana. Amoco requests in Docket No. CI69-491 that its FERC Gas Rate Schedule No. 522 be canceled because Amoco assigned certain interests in the Jennings Townsite Field to Riceland Petroleum Company by assignment executed July 19, 1985, and because Amoco states that the balance of the acreage is either nonproductive of gas-well gas or all such gas-well is depleted. Amoco states that such interests are dedicated to an October 7, 1968, contract with United which is on file with the Commission as Amoco's FERC Gas Rate Schedule No. 522. The primary term of this contract expires on May 1, 1988. Mesa states that the wells have stopped producing commercial quantities of gas-well gas and that the primary term of the subject contract with United dated April 28, 1976, expires on May 1, 1988. Mesa states that such contract is on file with the Commission as Mesa Operating Limited Partnership FERC Gas Rate Schedule No. 262 authorized in Docket No. CI76-603 and Terra Resources, Inc. FERC Gas Rate Schedule No. 49 authorized in Docket No. CI76-670. Mesa states that TXO Production Corp. requests abandonment of its sales of gas-well gas which it made to United under the terms of the April 28, 1976, contract after TXO Production Corp. acquired certain interests in the Jennings Townsite Field. Mesa states that Santa Fe Minerals, Inc., successor to C.F. Braun & Co., and FPCO Oil & Gas Co., successor to Petro-Lewis Corporation, request abandonment of their sales of gas to United under the terms of the April 28, 1976, contract.

---

[1] Terra Resources, Inc., TXO Production Corp. (as successor to a portion of the sale made by Terra Resources), Santa Fe Minerals, Inc. (formerly C.F. Braun), and FPCO Oil & Gas Co. (formerly Petro-Lewis Corporation).

VOL
53
ISS
56
MR
23
988
MI

Commission records show that Petro-Lewis Corporation was issued a small producer certification in Docket No. CS72-304 and that Santa Fe Braun Inc. was issued a small producer certificate in Docket No. CS71-1006.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter that 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said applications should on or before March 25, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceedings herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6326 Filed 3-22-88; 8:45 am]

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180768; FRL-3352-9]

Receipt of Applications for Specific Exemptions To Use Clofentezine; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received specific exemption requests from the Ohio and Pennsylvania Departments of Agriculture and the Virginia Department of Agriculture and Consumer Services (hereafter referred to individually by State or collectively as "Applicants") for use of the unregistered active ingredient clofentezine (3,6-bis(2-chlorophenyl)-1,2,4,5-tetrazine) to control European red mites on apples. In accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant these specific exemption requests.

DATE: Comments must be received on or before April 7, 1988.

ADDRESS: Three copies of written comments, bearing the identifying notation "OPP-180768" should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail:

Libby A. Pemberton, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Rm. 716A, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1806).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicants have requested the Administrator to issue specific exemptions to permit the use of the unregistered active ingredient, clofentezine, available as the pesticide product Apollo, manufactured by Nor-Am Chemical Company, to control European red mites on apples.

Information in accordance with 40 CFR Part 166 was submitted as part of these requests.

Pennsylvania and Virginia have requested authorization to make one complete or two "alternate row middle spray" applications with Apollo. A maximum of four ounces of formulated product (0.125 pound active ingredient) is proposed to be applied per acre by ground equipment as a dilute or concentrate spray. The time of treatment extends from "tight cluster" until 45 days before harvest.

Ohio has requested authorization to make one application using up to eight ounces of formulated product (0.25 pound active ingredient) per acre. Ground application is proposed. The times of treatment are from delayed dormant through petal fall as an early season control or before population levels exceed three mites per leaf as a summer mite control. No treatment would be allowed 45 days prior to harvest.

Pennsylvania proposes to treat a maximum of 27,532 acres of apples. A maximum of 860 gallons of product would be needed under the proposed exemption.

Ohio proposes to treat a maximum of 7,500 acres of apples throughout the state. A maximum of 470 gallons of Apollo will be needed.

Virginia proposes to treat a maximum of 18,000 acres of apples in Frederick, Nelson, Clarke, Rockingham, Shenandoah, Albemarle, Rappahannock, Franklin, Smyth, Carroll, Botetourt, Patrick, Bedford, Warren, Madison and Roanoke Counties. A maximum of 562.5 gallons of Apollo will be needed.

Applications would be made through July 1988.

The Applicants claim that European red mites have developed resistance to Plictran (cyhexatin) which historically has been used for control of mites. Similar resistance also exists to the related organo-tin acaricide, Vendex (fenbutatin-oxide). Dicofol has also been used in the past; however, resistance appears to have developed to this pesticide as well. Other acaricides such as formetanate hydrochloride, oxamyl and propargite are not effective, toxic to beneficials or otherwise not appropriate for mite control at various times.

The Applicants state that the result of not having an effective control of the European red mite would be decreased fruit size, loss of fruit set and reduced fruit quality. Virginia estimates that losses of up to $2.7 million in gross revenues for Virginia apple growers will result if Apollo is not available for use in 1988. Pennsylvania apple growers would experience an approximate $3.5 million loss in gross revenue without use of Apollo this year. Ohio estimates that losses of up to $1.9 million in gross revenues if Apollo is not available for use in the 1988 growing season.

This notice does not constitute a decision by EPA on the applications themselves. The regulations governing section 18 require that the Agency publish notice in the Federal Register and solicit public comment on applications involving an unregistered active ingredient. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

Dated: March 14, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 88-6295 Filed 3-22-88; 8:45 am]

BILLING CODE 6560-50-M

[OPP-30283A; FRL-3353-2]

Bob McBrayer; Approval of Pesticide Product Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of an application submitted by Bob McBrayer, to register the pesticide product Nematrol™, containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT:

By mail:

Lois Rossi, Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 227, TS-767C, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, Va 22202, (703-557-1900).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of December 30, 1987 (52 FR 49199), which announced that Bob McBrayer, 4350 E. Acampo St., Acampo, CA 85220, had submitted an application to register the pesticide product Nematrol™ containing the active ingredient ground sesame plant at 100 percent; an ingredient not included in any previously registered product.

The application was approved on February 17, 1988, as Nematrol™ for general use to control soil nematodes on terrestrial food and non-food products. The product was assigned EPA Registration No. 58246-1.

The Agency has considered all required data on the risks associated with the proposed use of ground sesame plant, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of ground sesame plant, when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects on the ennvironment.

More detailed information on this registration is contained in a Chemical Fact Sheet on ground sesame plant.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from Registration Division (TS-767C), Environmental Protection Agency, Registration Support and Emergency Response Branch, 401 M St., SW., Washington, DC 20460.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 236, CM#2, Arlington, VA 22202 (703-557-3262). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 401 M St., SW., Washington, DC 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136

Dated: March 14, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

[FR Doc. 88-6294 Filed 3-22-88; 8:45 am]

BILLING CODE 6560-50-M

[OPP-180767; FRL-3352-7]

Receipt of Application for an Emergency Exemption From Wisconsin to Use Metolachlor; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Wisconsin Department of Agriculture, Trade and Consumer Protection (hereafter referred to as "Applicant") to use the herbicide metolachlor (CAS 51218 45 2) to treat 1,500 acres of dry bulb onions for pre-emergent control of annual grasses.

EPA, in accordance with 40 CFR 166.24, is required to issue a notice of receipt and solicit public comment before making the decision whether to grant the exemption.

DATE: Comments should be received on or before April 7, 1988.

ADDRESS: Three copies of written comments, bearing the identification notation "OPP-180767," should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Jim Tompkins, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection

Agency, 401 M Street SW.,
Washington, DC 20460.

Office location and telephone number:
Rm. 716D, Crystal Mall 2, 1921
Jefferson Davis Highway, Arlington,
VA, (703–557–1806).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of metolachlor for preemergent control of annual grasses in dry bulb onions.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. According to the Applicant, metolachlor is used for control of annual grasses, yellow nutsedge, and certain broadleaf weeds in corn, peanuts, pod crops, potatoes, safflower, grain or forage sorghum, soybeans, tree nuts, stone fruits, and woody ornamentals.

The Applicant states, that other than early cultivation no alternative exists for preemergent control of annual grasses and certain broadleaf weeds in dry bulb onions grown on muck soil. Cultural practices and growth habitat of onions do not allow for season long mechanical cultivation. The Applicant states that the herbicides that are currently registered on dry bulb onions will not provide satisfactory control for the following reasons: Chlorpropham does not control several of the annual grasses that are a major problem in Wisconsin; dacthal is ineffective on Wisconsin's muck soils; bromoxynil has no activity on grasses; glyphosate is registered prior to crop emergence but does not continue to control weeds during the growing season; oxyflurofen is primarily a broadleaf herbicide and does provide control of grasses; Fluazifop-butyl is registered for post-emergent control on annual and perennial grasses in dry bulb onions.

The economic benefit of allowing this use of metolachlor, according to the Applicant, could most readily be attributed to reduce costs for mechanical cultivation and increased yields attributed to better weed control.

The Applicant proposes to make a single application of the product Dual 8E, EPA Reg. No. 100–597, with ground application equipment at a maximum rate of 4 pounds active ingredient per acre prior to crop emergence.

Specific exemptions were granted for this use of metolachlor on dry bulb onions to the Applicant in 1985, 1986, and 1987. According to the Applicant, a tolerance petition for metolachlor on dry bulb onions is an ongoing IR–4 project but several years of work remain before all data gaps are filled and a third party registration is sought.

This notice does not constitute a decision by EPA on this application. The regulations governing section 18 require publication of a notice in the **Federal Register** of receipt of an application for a specific exemption proposing use of a chemical for which an emergency exemption has been requested or granted for the use in any previous three years, and a complete application for the registration of that use and or a petition for tolerance for residues in or on the commodity has not been submitted to the Agency. The regulations also provide for the opportunity for public comment.

Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address given above.

The Agency will review and consider all comments received during the comment period in determining whether to issue this emergency exemption request.

Dated: March 11, 1988.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-36153; FRL-3351-2]

Standard Evaluation Procedures

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of the following draft Standard Evaluation Procedures (SEPs) for public comment prior to their publication: Inhalation Toxicity Testing; Metabolism (Qualitative nature of the Residue): Plants; Residues in Meat, Milk, Poultry and Eggs: Dermal Treatments; and Metabolism: Animals. The SEPs are a standard set of guidance documents on how the Hazard Evaluation Division in the Office of Pesticide Programs evaluates studies and scientific data to ensure consistency of scientific reviews of studies submitted by registrants in support of pesticide registrations. This will increase the efficiency of pesticide registration and other regulatory activities.

DATE: Comments, identified by the document control number [OPP–36153] should be received on or before May 23, 1988.

ADDRESS: Submit three copies of written comments, identified with the document control number [OPP–36153,] by mail to:

Information Service Section, Program
Management and Support Division
(TS–757C),Office of Pesticide
Programs, Environmental Protection
Agency, 401 M Street
SW.,Washington, DC 20460.

In person, deliver comments to: Room
236, CM#2, 1921 Jefferson Davis
Highway, Arlington, VA 22202.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in room 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Copies of these draft SEPs are also available at the following address.

FOR FURTHER INFORMATION CONTACT:

By Mail: Orville E. Paynter, Hazard
Evaluation Division (TS–769C), Office
of Pesticide Programs, Environmental
Protection Agency, 401 M Street SW.,
Washington, DC 20460.

Office location and telephone number:
Room #1121, CM#2, 1921 Jefferson
Davis Highway, Arlington, VA 22202,
(703) 557–7695.

SUPPLEMENTARY INFORMATION: The SEPs are a standard set of guidance documents on how HED evaluates studies and scientific data to ensure consistency of scientific reviews. Not only will the SEPs serve as valuable internal reference documents and training aids for new staff, these documents will also inform the public and regulated community of important considerations in the evaluation of test data for determining chemical hazards.

The SEPs ensure a comprehensive, consistent treatment of major scientific topics in our science reviews and provide interpretive policy guidance where appropriate, but are not so detailed that they inhibit creativity and independent thought. The SEPs also serve as training aids for new staff, and inform the public of the internal review process. Throughout the remainder of this and next fiscal year, HED will be writing additional SEPs on the scientific

disciplines of toxicology, chemistry, exposure assessment, and ecological effects. Thirty-six SEPs have been published thus far and are available from the National Technical Information Service, which is responsible for distribution of all SEPs after they have been finalized. Prior to publication, each of the SEPs must undergo extensive peer review including Division, Office, Intra-Agency, FIFRA Scientific Advisory Panel, and public comment; this announcement serves to solicit public comment on the draft documents.

Dated: March 11, 1988.

Anne L. Barton,

Acting Director, Hazard Evaluation Division, Office of Pesticide Programs.

[FR Doc. 88–5976 Filed 3–22–88; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-51702A; FRL-3352-8]

Certain Chemical; Premanufacture Notice; Extension of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is extending the review period for an additional 90 days for premanufacture notice (PMN) 88–410, under the authority of section 5(c) of the Toxic Substances Control Act (TSCA). The review period will now expire on June 12, 1988.

FOR FURTHER INFORMATION CONTACT: John Nagle, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, Room E–611, 401 M Street SW., Washington, DC 20460, (202–475–8994).

SUPPLEMENTARY INFORMATION: On December 17, 1987, EPA received PMN 88–a410 for a substance generically identified as a reaction product of an alkanolamine and a dicarboxylic acid. The submitter claimed the submitter identity, specific chemical identity, production volume, use information, process information, and other information to be confidential business information. Publishing of the required Notice of Receipt for the PMN in the **Federal Register** is pending. The original 90-day review period is scheduled to expire on March 15, 1988.

Based on its analysis, EPA finds that there is a possibility that the substance submitted for review in this PMN may be regulated under TSCA. The Agency requires an extension of the review period, as authorized by section 5(c) of TSCA, to investigate further potential risk, to examine its regulatory options, and to prepare the necessary documents, should regulatory action be required. Therefore, EPA has determined that good cause exists to extend the review period for an additional 90 days, to June 12, 1988.

The PMN is available for public inspection in Rm. NE–G004, at the EPA headquarters, address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Dated: March 14, 1988.

Charles L. Elkins,

Director, Office of Toxic Substances.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

March 14, 1988.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. 3507.

Copies of these submissions may be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street NW., Suite 140, Washington, DC 20037, or telephone (202) 857-3815. Persons wishing to comment on an information collection should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, telephone (202) 395–4814. Copies of these comments should also be sent to the Commission. For further information contact Terry Johnson, Federal Communications Commission, telephone (202) 632–7513.

OMB No.: 3060–0107.

Title: Application for Renewal of Radio Station License and/or Notification of Change to License Information.

Form No.: FCC 405–A.

Action: Extension.

Respondents: Individuals, State or local governments, Business (including small business), Non-profit institutions.

Frequency of Response: On occasion.

Estimated Annual Burden: 10,992 Responses; 1,836 Hours.

Needs and Uses: Used by applicants in the Private Land Mobile, Coast and Ground, and General Mobile Radio Services for renewal of existing authority. The data are used to determine eligibility for renewal issuance, and for enforcement.

OMB No.: 3060–0134.

Title: Application for Renewal of Radio Station License.

Form No.: FCC 574–R.

Action: Extension.

Respondents: Individuals, State or local governments, Business (including small business), Non-profit institutions.

Frequency of Response: On occasion.

Estimated Annual Burden: 65,265 Responses; 4,373 Hours.

Needs and Uses: Generated by FCC and mailed to licensees in the Private Land Mobile and General Mobile Radio Services. Used by applicants for renewal of existing authority. The data are used to determine eligibility for renewal issuance, and for enforcement.

BILLING CODE 6712-01-M

[MM Docket No. 88-86]

Applications for Consolidated Hearing; Great Lakes Broadcasting, Inc., et al.

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant, City and State	File No.	MM Docket No.
A. Great Lakes Broadcasting, Inc., Huron, OH.	BPH-870327KA	88-86
B. Susan B. Klaus, Huron, OH.	BPH-870327MC	
C. Huron Broadcasting Corporation, Huron, OH.	BPH-870327MH	
D. Huron Communications Company, Huron, OH.	BPH-8703310B	
E. Beverly Lynn Eckardt, Beatrice Eckardt-Ball, et al, d/b/a/ Radio Voice of Huron, Huron, OH.	BPH-8703310Y	
F. Thomas W. Roberts, Huron Ohio.	BPH-870331PF	
G. Lakeshore Community Radio, a General Partnership of TwoPegs Radio Partners and PrimeMedia Broadcasting, Inc., Huiron, OH.	BPH-870331PG	
H. NCB Enterprises, Inc. Huron, OH.	BPH-870410KC	
I. Firelands Broadcasting Corp., Huron, OH.	BPH-870415MO	

2. Pursuant to 47 U.S.C. 309(e), the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 F.R. 19347 (May 29, 1986). The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue Heading and Applicants

1. Comparative, A–I
2. Ultimate, A–I

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street NW., Washington, DC 20037. (Telephone (202) 857-3800).

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street

NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No. 224-200100

Title: Port of Los Angeles Lease Agreement.

Parties:

City of Los Angeles
Distribution and Auto Service, Inc. (DAS)

Synopsis: The proposed agreement provides DAS the lease and non-exclusive use of certain premises designated as Parcel No. 1 at the Port of Los Angeles.

Agreement No. 224-200022-001

Title: Port of Houston Terminal Agreement.

Parties:

Port of Houston Authority
Lykes Brothers Steamship Company, Inc.

Synopsis: The proposed agreement amendment deletes Transit Shed Number 31 from the terminal facility covered by the basic agreement.

Agreement No. 224-200101

Title: Georgia Ports Authority Terminal Agreement.

Parties:

Georgia Ports Authority (GPA)
Zim-American Israeli Shipping Co., Inc. (Zim)

Synopsis: The proposed agreement provides that GPA will provide terminal services to Zim for a consolidated rate based upon an agreed upon rate per container or per loaded twenty-foot equivalent unit.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: March 18, 1988.

BILLING CODE 6730-01-M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 217-011179

Title: CarAmerica/NYK Space Charter and Cooperative Working Agreement.

Parties:

CarAmerica
Nippon Yusen Kaisha ("NYK")

Synopsis: The proposed agreement would permit CarAmerica to charter space aboard vehicle carrier vessels owned or chartered by NYK in the trade between West Mediterrranean ports in Spain, France, Italy, Tunisia, Algeria, Morocco, and Malta, and Atlantic Coast ports in Spain, Portugal, and Morocco, including points in Europe served via such ports, and ports on the United States' Atlantic, Gulf and Pacific Coasts, including Puerto Rico, and the Great Lakes.

Agreement No.: 212-011180

Title: Neptuno/CSAV Service Agreement.

Parties:

Naviera Neptuno, S.A.
Compania Sud Americana de Vapores

Synopsis: The proposed agreement would permit the parties to establish a pooling arrangement in the trade between ports of the West Coast of South America, Panama, the Gulf of Mexico and the United States Atlantic Coast. The parties would be authorized to operate up to eight vessels of up to 25,000 DWT each in the trade for an initial period of one year. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: March. 18, 1988.

BILLING CODE 6730-01-M

[c.o. 1, Amdt. No. 12]

Organization and Functions of the Federal Maritime Commission

The following delegation of authority is made to the Director, Bureau of Domestic Regulation, by amending Commission Order 1, section 9.04, as revised, *Specific Authorities Delegated to the Director, Bureau of Domestic Regulation* to read as follows:

9.04 Authority to issue notices of intent to cancel inactive tariffs of carriers (in the foreign and domestic offshore trades) and marine terminal operators, after a diligent effort has been made to locate the carrier/marine terminal operator without success, or if the carrier/marine terminal operator has advised the Commission that it no longer offers a common carrier/marine terminal operator service but refuses to cancel its tariff upon written request; and to cancel such tariff if, within 30 days after publication, the carrier/marine terminal operator does not furnish reasons why such tariff should not be cancelled.

Edward J. Philbin,

Acting Chairman.

Dated: March 18, 1988.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

Departmental Grant Appeals Board; Hearing; State of California Disapproval

AGENCY: Family Support Administration, Department of Health and Human Services.

ACTION: Notice of Hearing.

SUMMARY: By designation of the Family Support Administration, a member of the Departmental Grant Appeals Board will hold a hearing pursuant to 45 CFR Part 213 concerning the Family Support Administration's disapproval of a State plan amendment submitted by the State of California.

DATE: May 10 and 11, 1988.

Place: San Francisco, California

Requests to Participate: Requests to participate as a party or as an amicus curiae must be submitted to the Departmental Grant Appeals Board in the form specified at 45 CFR 213.15 by April 7, 1988, (for a party) or before the commencement of the hearing (for an amicus curiae). A copy of a petition to participate as a party shold be served on each party of record at that time. The petition must explain how the issues to be considered at the hearing have caused them injury and how their interest is within the zone of interests to be protected by the governing Federal statute. 45 CFR 213.15(b)(1). In addition, the petition must concisely state (i) petitioner's interest in the proceeding, (ii) who will appear for petitioner, (iii) the issues on which petitioner wishes to participate, and (iv) whether petitioner intends to present witnesses. 45 CFR 213.15(b)(2). Any party may, within 5 days of receipt of such petition, file comments thereon; the presiding officer will subsequently issue a ruling on whether and on what basis participation will be permitted. A petition to participate as an amicus curiae shall conform to the requirements at 45 CFR 213.15(c).

FOR FURTHER INFORMATION CONTACT: Andrea M. Selzer, Staff Attorney, Departmental Grant Appeals Board, Department of Health and Human Services, Room 451-F, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, Telephone Number (202) 475-0012.

SUPPLEMENTARY INFORMATION: Notice of hearing is hereby given as set forth in the following letter, which has been sent to the California Department of Social Services.

Washington, DC, March 18, 1988

John Davidson, Supervisory Deputy Attorney General, Office of the Attorney General, 6000 State Building, 350 McAlister Street, San Francisco, California 94102

and

Kenneth Manoff, Attorney, Office of General Counsel, Family Support and Human Development Services Division, Room 411-D, HHH Building, 200 Independence Avenue, SW., Washington, DC 20201

Counsel: This letter is in response to the February 11, 1988 petition for review filed by the California Department of Social Services (State) requesting reconsideration of the Family Support Administration's (FSA) disapproval of California's State Plan Amendment (Transmittal No. 87-01) regarding the Emergency Assistance program under Title IV-A of the Social Security Act (section 406(e)).

On December 14, 1987, the Regional Administrator of the Family Support Administration notified the California Department of Social Services that it disapproved three provisions of the proposed plan amendment. The plan provisions disapproved:

(1) Authorize county social workers to routinely sign applications for emergency assistance without the authorization or request of the family on whose behalf assistance is applied for;

(2) Limit consideration of income and resources to a ten-day period for purposes of determining eligibility; and

(3) Do not state the standard of need and resource limit to be used in determining eligibility.

Pursuant to 45 CFR 213.21, I have designated Cecilia Sparks Ford, member, Departmental Grant Appeals Board, to preside at the hearing, which will be conducted under the procedures in 45 CFR Part 213. Pursuant to 45 CFR 201.4, a hearing has been scheduled to be held on May 10 and 11, 1988 in San Francisco, California. 45 CFR 213.13. The exact time and location for the hearing will be set after further consultation with the counsel. A verbatim transcript will be taken.

This proceeding under 45 CFR Part 213 is not intended to preclude or limit negotiations between FSA and the State; they may negotiate at any time in an effort to resolve the issues to be considered at the hearing.

The issues to be considered at the hearing include: WHETHER COUNTY SOCIAL WORKERS CAN SIGN APPLICATIONS FOR EMERGENCY ASSISTANCE?

1. Whether 45 CFR 234.120(f) and/or 45 CFR 206.10(a)(1) preclude a county social worker from signing an application for emergency assistance?

2. Whether the above regulations clearly contemplate that applications will be submitted by someone "outside the agency"?

3. Whether an approvable state plan can designate a county social worker as an applicant's authorized representative or as a party acting responsibly for the applicant in order to assure that each individual has the opportunity to apply (45 CFR 206. 10(a)(1))?

4. Whether a county social worker can be an authorized representative or responsible party by virtue of either section 306 of the California Welfare and Institutions Code or of the proposed state regulation to so designate the worker?

5. Whether the proposed plan amendment is approvable under 45 CFR 233.120(a)(5) as a more liberal procedure which furthers that regulation's requirement for "emergency assistance * * * forthwith"?

6. Whether the disapproval is inconsistent with a California plan provision, approved under Title IV-A, Aid to Families with Dependent Children, for application by a "representative of a public agency"?

7. Whether the proposed plan amendment is approvable, consistent with the requirements of 45 CFR 233.10(a)(1) (vi) and (vii)?

8. Whether the disapproval results in an arbitrary, unreasonable, or inequitable exclusion from assistance of a child whose parent(s) cannot or will not sign an application (45 CFR 233.10(a)(1) and 233.120(b)(1))?

WHETHER CONSIDERATION OF INCOME AND RESOURCES CAN BE LIMITED TO A TEN-DAY PERIOD IN DETERMINING ELIGIBILITY?

9. Whether eligibility for emergency assistance can be determined considering the applicant's income and resources over a ten-day period?

10. Whether an applicant's need must be determined on a monthly basis, as is done in the other assistance programs under the Social Security Act?

11. Whether the proposed ten-day period is approvable as a more liberal eligibility condition under 45 CFR 233.120(a)(1)?

12. Whether the proposed ten-day period is approvable as a proper implementation of 45 CFR 233.120(b)(1)(ii), which provides for emergency assistance if "[s]uch child is without resources immediately accessible to meet his needs"?

13. Whether it is clear that, by providing for "emergency assistance to needy families with children" (section 406(e)), Congress used the term "needy" as that term is used in other assistance programs and thus intended to reflect a concept of need as determined on a monthly basis.

14. Whether a requirement to consider income and resources on a monthly basis improperly restricts California's ability to implement an emergency assistance program under section 406(e)?

WHETHER AN APPROVED STATE PLAN MUST CONTAIN THE STANDARD OF NEED AND RESOURCE LIMIT?

15. Whether a state plan must itself state the standard of need against which to measure income and a dollar limit on resources in order to meet the requirement at 45 CFR 233.120(a)(1) that the state plan "[s]pecify the eligibility conditions imposed"?

16. Whether an approvable plan provision may use a standard of need/resource limit stated in a state statute or regulation?

FSA and the State are now parties in this matter. 45 CFR 213.15(a). However, a copy of this letter will appear as a Notice in the **Federal Register** and any other individual or group wishing to request recognition as a party will be entitled to file a petition pursuant to 45 CFR 213.15(b) with the Departmental Grant Appeals Board within 15 days after that Notice has been published. Any interested person or organization wishing to participate as amicus curiae may also file a petition with the Board, which shall conform to the requirements at 45 CFR 213.15(c). This petition should be filed before the hearing, in time to permit the presiding officer an adequate opportunity to consider and rule upon it.

Any further inquiries, submissions, or correspondence regarding this matter should be filed in an original and two copies with Ms. Ford at the Departmental Grant Appeals Board, Room 451-F, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201, where the record in this matter will be kept. Each submission must include a statement that a copy of the material has been sent to the other party, identifying when and to whom the copy was sent. For convenience please refer to Board Docket No. 88-42.

Wayne A. Stanton,

Administrator.

March 18, 1988.

Wayne A. Stanton,

Administrator, Family Support Administration.

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 88N-0040]

Sulfamethazine; Availability of NCTR Technical Report

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a technical report from its National Center for Toxicological Research (NCTR) on sulfamethazine entitled "Chronic Toxicity and Carcinogenesis Study of Sulfamethazine in B6C3F₁ Mice."

ADDRESS: Written requests for copies of the technical report to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857. (Send two self-addressed adhesive labels to assist the Branch in processing your request). The technical report is available for public examination in the Dockets Management Branch, from 9 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Max Crandall, Center for Veterinary Medicine (HFV-4), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3450.

SUPPLEMENTARY INFORMATION: FDA has received from NCTR and is making available a technical report of a chronic toxicity study conducted by NCTR in which mice were fed a diet containing sulfamethazine over a 24-month period. Sulfamethazine is an animal drug widely used in food-producing species. FDA's Center for Veterinary Medicine (CVM) is reviewing the report, and is performing a risk assessment. Interested parties may receive a copy of the NCTR technical report "Chronic Toxicity and Carcinogenesis Study of Sulfamethazine in B6C3F₁ Mice" by writing to the Dockets Management Branch (address above).

Dated: March 11, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 88-6205 Filed 3-22-88; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 81N-0391; DESI 6514]

Oral Prescription Drugs Offered for Relief of Symptoms of Cough, Cold, or Allergy; Drug Efficacy Study Implementation; Withdrawal of Approval of New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of the new drug application for Tussionex Tablets and Suspension ("Tussionex") containing hydrocodone and phenyltoloxamine. The basis of the withdrawal is that these combination drug products lack substantial evidence of effectiveness for their labeled indications. A reformulation of the suspension product has been approved as safe and effective.

EFFECTIVE DATE: April 22, 1988.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific product should be identified with the reference number DESI 6514 and directed to the Division of Drug Labeling Compliance (HFN-310), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John H. Hazard, Jr., Center for Drug Evaluation and Research (HFN-366), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8041.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of May 25, 1982 (47 FR 22606), the Director of the Bureau of Drugs (now the Center for Drug Evaluation and Research) evaluated fixed-combination drug products containing hydrocodone and phenyltoloxamine as lacking substantial evidence of effectiveness for their labeled indications. The Director also proposed to withdraw approval of the new drug application for these products and offered an opportunity for a hearing on the proposal.

In response, a hearing request was submitted for NDA 10-768, Tussionex Tablets and Suspension, each containing hydrocodone and phenyltoloxamine dihydrogen sulfate (both as cation exhange resin complexes of sulfonated polystyrene), held by Pennwalt Corp., Pharmaceutical Division, 753 Jefferson Rd., Rochester, NY 14623.

FDA subsequently approved a new drug application (NDA 19-111) submitted by Pennwalt for a reformulation of the suspension product (hydrocodone and chlorpheniramine). The firm has withdrawn its hearing request for the old formulations. Accordingly, the Director of the Center for Drug Evaluation and Research is withdrawing approval of the new drug application (NDA 10-768) for Tussionex Tablets and Suspension.

Any drug product that is identical, related, or similar to these products and is not the subject of an approved new drug application is covered by NDA 10-768 and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance at the address given above.

The Director of the Center for Drug Evaluation and Research, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053 as amended (21 U.S.C. 355)), and under the authority delegated to him (21 CFR 5.82), finds that, on the basis of new information before him with respect to these products, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that these products will have the effect they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling.

Therefore, pursuant to the foregoing findings, approval of NDA 10-768 and all its amendments and supplements is withdrawn effective April 22, 1988.

Shipment in interstate commerce of the above products or any identical, related, or similar product that is not the subject of an approved new drug application will then be unlawful.

Dated: March 17, 1988.

Carl C. Peck,

Director, Center for Drug Evaluation and Research.

Dickinson District Advisory Council; Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of meeting.

SUMMARY: The District Advisory Council for the Bureau of Land Management's Dickinson District will meet April 20, 1988, in Dickinson, North Dakota.

Major topics to be discussed at the council meeting include: (1) Status of the protest on the North Dakota RMP, (2) recent wild horse events, (3) Leasing Reform Act, (4) Fiscal Year 1987 summary, and (5) inclusion of appropriate material in the Dickinson District Advisory Council Charter regarding the Designated Federal Officer.

The Council is chartered by the Secretary of Interior to give citizen

advice to the Dickinson District Manager regarding planning and management of public lands and resources.

The meeting is open to the public, and members of the public will be given the opportunity to make statements before the Council. Persons wishing to submit a written statement to the Council should send it to the Dickinson District Manager.

Location, Date, and Time: April 20, 1988, from 8:30 a.m. to approximately 3:00 p.m. Mountain Standard Time, Conference Room, Bureau of Land Management, 202 East Villard, Dickinson, North Dakota.

FOR FURTHER INFORMATION CONTACT: William F. Krech, District Manager, P.O. Box 1229, Dickinson, North Dakota, 58602; Telephone (701) 225-9148.

William F. Krech,

District Manager.

Date: March 11, 1988.

BILLING CODE 4310-DN-M

[CO-070-08-4212-13; C-46594]

Exchange of Lands in Garfield and Grand Counties, CO

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of Exchange of Lands.

SUMMARY: Pursuant to sections 205, 206, 302(b) and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), the Bureau of Land Management, Glenwood Springs Resource Area, has identified parcels of public and private land as preliminarily suitable for exchange.

FOR FURTHER INFORMATION: Additional information concerning this proposed exchange, including the planning documents and environmental assessment, is available for review in the Glenwood Springs Resource Area Office at 50629 Highway 6 and 24, P.O. Box 1009, Glenwood Springs, Colorado 81602, or the Kremmling Resource Area Office, 116 Park Avenue, P.O. Box 68, Kremmling, Colorado 80459.

For a period of 45 days from the date of first publication of this notice, interested parties may submit comments to the District Manager, Grand Junction District, Bureau of Land Management, 764 Horizon Drive, Grand Junction, Colorado 81506. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this Notice of Realty Action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: The following-described lands have been determined to be preliminarily suitable for exchange under sections 205, 206, 302(b) and 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Selected Public Land—Grand County

Parcel 1—147.69 acres

T. 1 S., R. 78 W.,
  Sec. 17: Lots 1, 2, 4, 6, 8, 11, 12, 13, 14, 16, 17, 18, 20, and 21, NE¼NE¼, N½SE¼NE¼, SE¼SE¼NE¼, N½SW¼SE¼NE¼.

Offered Private Land—Garfield County

Parcel A—22.66 Acres

* T. 7 S., R. 87 W.,
  Sec. 32: Portion of Lots 9 and 17;
  Sec. 33: Portion of Lots 7 and 8.

Note. Asterisk (*) denotes metes and bounds description.

Any adjustments to selected public land to equalize values would be made in T. 1 S., R. 78 W., Sec. 17, NE¼NE¼.

These 147.69 acres of public land under the jurisdiction of the Bureau of Land Management have been identified as preliminarily suitable for exchange. The determination has been made in response to a Bureau-benefiting exchange proposal developed cooperatively between the Bureau and Shepard & Assoc.

In the proposal, 22.66 acres of offered private land with public values would be exchanged for 147.69 acres of public land which have been identified for disposal. The exchange proposal has been made to facilitate the consolidation of public land holdings. The consolidation would increase managerial efficiency and provide public access to natural resources on public lands being managed by the Bureau.

The values of the lands to be exchanged have been determined to be approximately equal. Upon completion of the final appraisal of the lands, the acreages will be adjusted or money will be used to equalize the exchange values.

Terms and Conditions

The following reservations would be made in patent issued for public land:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. A reservation to the United States of all mineral deposits of known value.

3. A reservation for all existing and valid land uses, including grazing leases, unless waived.

4. A reservation for public access on Grand County Road 34.

5. Reservations for roads and public utilities as shown on the Bureau's 1960 plat for the Williams Fork Small Tract Area on file in the Kremmling Resource Area office.

6. A reservation for 50′ irrigation ditch right-of-way C-0124151.

7. A reservation to the United States for power development purposes under section 24 of the Federal Power Act of June 10, 1920, as amended (16 U.S.C. 791a, 818).

The publication of the notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws and the mineral leasing laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be considered as filed and shall be returned to the applicant.

Richard M. Arcand,

Acting District Manager, Grand Junction District.

BILLING CODE 4310-JB-M

[NV-930-08-4212-11; N-46761]

Realty Action; Lease of Public Land for Recreation and Public Purposes; Lyon County, NV

The following described public land has been identified as suitable for classification for lease under the Recreation and Public Purposes Act as amended (43 U.S.C. 869, *et seq.*):

Mount Diablo Meridian, Nevada

T. 13 N., R. 25 E.,
  Sec. 6, W½W½ of Lot 3, Lot 4, Lot 5, W½W½SE¼NW¼.

Containing 68.63 acres.

A 5-year lease with option to renew for the subject 68.63 acres of public land to be used as an archery range will be offered to Lyon County. The land is not required for federal purposes. This lease is consistent with Bureau planning for this area and would be in the public interest.

The lease, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will be subject to:

1. Those rights for transmission line purposes granted to Sierra Pacific Power Company by Right-of-Way Grant NEV-010060.

Detailed information concerning this action is available for review at the Bureau of Land Management Carson City District Office.

MR
23
988
MI

Upon publication of this notice in the Federal Register, the above described land will be segregated from all forms of appropriation under the public land laws, including location under the general mining laws, but not the Recreation and Public Purposes Act, the mineral leasing laws, and material sales. The segregative effect will terminate as specified in an opening order to be published in the **Federal Register**.

For a period of 45 days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, 1535 Hot Springs Road, Suite 300, Carson City, Nevada 89706. Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification of the land described in this notice will become effective 60 days from the date of publication in the **Federal Register**.

James W. Elliott,

District Manager.

Date: March 11, 1988.

BILLING CODE 4310-HC-M

Minerals Management Service

Development Operations Coordination Document; Santa Fe International Corp.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Santa Fe International Corporation has submitted a DOCD describing the activities it proposes to conduct on Leases OCS-G 6200 and 6201, Blocks 166 and 167, High Island Area, offshore Texas. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Sabine Pass, Texas.

DATE: The subject DOCD was deemed submitted on March 14, 1988.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Mr. Michael D. Joseph; Minerals Management Service, Gulf of Mexico OCS Region Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: March 15, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

National Park Service

General Management Plan; Eugene O'Neill National Historic Site, CA; Intent To Prepare an Environmental Impact Statement

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act, Pub. L. 91-190, the National Park Service, Department of the Interior will prepare an Environmental Impact Statement (EIS) to assess the potential impacts of future development and management options in conjunction with the General Management Plan for the Eugene O'Neill National Historic Site, California.

Scoping for the plan has included extensive public review of a draft General Management Plan and Environmental Assessment which was circulated for public comment in May and June of 1982, meetings with agencies and organizations having an interest in the project, contact with Historic Site visitors, and interdisciplinary team meetings within the Park Service. The scoping indicates that the proposals being considered have the potential for significant impacts and would constitute a major Federal action significantly affecting the quality of the human environment. Therefore, preparation of an EIS in conjunction with the Plan is appropriate.

The General Management Plan and EIS will investigate alternatives ranging from protection, to a variety of development and management proposals designed to enhance visitor use and resource protection. Federal, state, and local agencies, and other individuals or organziations who may be interested in or affected by the future development and management of Eugene O'Neill National Historic Site, are further invited to participate in refining or identifying issues to be considered. Written comments and suggestions concerning preparation of the EIS should be sent to: Chief, Division of Planning, Grants, and Environmental Quality, Western Regional Office, National Park Service, P.O. Box 36063, San Francisco, CA. 94102, by May 6, 1988. Questions on this matter may be sent to the same address. Stanley T. Albright, Regional Director for the Western Region in San Francisco, California, is the responsible official.

Preparation of the Plan and EIS is expected to take about 8 months. The draft Plan and EIS should be available for public review in mid-summer 1988 with the final Plan and EIS and Record of Decision expected to be completed by the end of 1988.

Stanley T. Albright,

Regional Director, Western Region, National Park Service.

Date: March 15, 1988.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Voluntary Foreign Aid Advisory Committee; Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a meeting of the Advisory Committee on Voluntary Foreign Aid (ACVFA) on the theme: "Cost Effectiveness." This is the final discussion session in a four part series exploring various aspects of PVO Effectiveness delineating cases and strategies for enhancing PVOs' work as agents of development. The meeting will be one day: Wednesday, March 30 from 9:00 a.m. to 4:00 in the Loy Henderson Auditorium at the State Department. To enter the building use C Street (Diplomatic Entrance) between 21st and 23rd Streets, NW., Washington, DC.

The meeting is free and open to the public. However, notification by March 25, 1988 through Advisory Committee Headquarters is required by the Department of State for security reasons.

Theme: PVO Cost Effectiveness

Objectives: To examine PVO Cost Effectiveness from a comprehensive institutional point of view.

PVO Cost Effectiveness

March 30, 1988—9:00 a.m. to 3:45 p.m.,
Loy Henderson Auditorium
The Department of State, Washington, DC.

Purpose: To examine PVO Cost Effectiveness from a comprehensive institutional point of view.

Agenda

Wednesday, March 30, 1988

9:00 a.m.
  Opening Remarks
  Randal Teague, ACVFA Chairman
  Thomas McKay, A.I.D. Deputy Assistant Administrator
  Keynote Speaker
  Edward Bullard, Technoserve
  Panel Discussion: The Donor's Perspective Panel members:
  George Hill—AID/PPC
  Larry Salmen—The World Bank
12:30 p.m.
  Lunch
2:00 p.m.
  Panel Discussion: The U.S. PVO Perspective Panel members:
  John Palmer—Helen Keller International
  (additional speakers to be confirmed).
3:45 p.m.
  Adjournment of Public Session
  Randal Teague, ACVFA Chairman
4:00 p.m.
  Executive Wrap-up Session (Members & Staff only)

There will be A.I.D. representatives at the meeting. Any interested person may attend, request to appear before, or file statements with the Advisory Committee. Written statements should be filed prior to the meeting and should be available in twenty-five (25) copies.

Persons wishing to attend the meeting must call (703) 875-4407, or write, not later than March 25 to arrange entrance to the Department of State Building. The address is: The Advisory Committee on Voluntary Foreign Aid, Room 250, SA-8, Agency for International Development, Washington, DC 20523.

Date: March 15, 1988

Thomas A. McKay,

Deputy Assistant Administrator, Office of Private and Voluntary Cooperation, Bureau for Food, Peace and Voluntary Assistance.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-266]

Certain Reclosable Plastic Bags and Tubing; Commission Determination Not To Review Initial Determination and Schedule for Filing of Written Submissions on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of initial determination finding a violation of section 337 of the Tariff Act of 1930 and request for submission of written comments.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) finding a violation of section 337 of the Tariff Act of 1930 in the above-captioned investigation. The parties to the investigation are requested to file written submissions on the issues of remedy, the public interest, and bonding.

FOR FURTHER INFORMATION CONTACT: Paul R. Bardos, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-252-1102.

SUPPLEMENTARY INFORMATION: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 U.S.C. 1337a, and in § 210.53 of the Commission's Rules of Practice and Procedure (19 CFR 210.53).

On January 29, 1988, the presiding administrative law judge (ALJ) issued an ID finding a violation of section 337 in the alleged unauthorized importation and sale of certain reclosable plastic bags and tubing with the tendency to destroy or substantially injure industries, efficiently and economically operated, in the United States. No petitions for review or Government agency comments have been received.

Having examined the record, the Commission has concluded that the ID does not warrant review.

Since the Commission has found that a violation of section 337 has occurred, the Commission may issue (1) an order which could result in the exclusion of the subject articles from entry into the United States and/or (2) cease and desist orders which could result in one or more respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions which address the form of relief, if any, which should be ordered.

If the Commission concludes that relief is appropriate, it must also consider the effect of that relief upon (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the U.S. production of articles which are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submission concerning the effect, if any, that granting relief would have on the enumerated public interest factors.

If the Commission orders relief, the President has 60 days to approve or disapprove the Commission's action. During this period, the subject articles would be entitled to enter the United States under a bond in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving written submissions concerning the amount of the bond which should be imposed.

Written Submissions

The parties to the investigation and interested government agencies are requested to file written submissions on the issues of remedy, the public interest, and bonding. Complainant and the Commission investigative attorney are also requested to submit proposed remedial orders for the Commission's consideration. The written submissions on the issues of remedy, the public interest, and bonding must be filed no later than the close of business on Monday, March 28, 1988. Reply submissions on these issues must be filed no later than the close of business on Monday, April 4, 1988. Persons other than the parties and government agencies may file written submissions addressing the issues of remedy, the public interest, and bonding. Such submissions must be filed not later than the close of business on Monday, March 28, 1988. No further submissions will be permitted.

Commission Hearing

The Commission does not plan to hold a public hearing in connection with final disposition of this matter.

Additional Information

Persons filing written submissions must file the original document and 14 true copies thereof with the Office of the Secretary on or before the deadlines stated above. Any portion desiring to submit a document (or a person thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the investigation. All such request should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Documents containing confidential information approved by the Commission for confidential treatment will be treated accordingly. All nonconfidential submissions will be available for public inspection at the Secretary's Office.

Notice of this investigation was published in the **Federal Register** on April 29, 1987 (52 FR 15568).

Copies of the nonconfidential version of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.), in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–252–1000. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: March 16, 1988.

[FR Doc. 88–6342 Filed 3–22–88; 8:45 am]

BILLING CODE 7020-02-M

Natural Bristle Paint Brushes From the People's Republic of China; Request for Comments Concerning the Institution of a Section 751(b) Review Investigation

AGENCY: United States International Trade Commission .

ACTION: Request for comments regarding the institution of a section 751(b) review investigation concerning the Commission's affirmative determination in investigation No. 731–TA–244 (Final), Natural Bristle Paint Brushes from the People's Republic of China.

SUMMARY: The Commission invites comments from the public on whether changed circumstances exist sufficient to warrant the institution of an investigation pursuant to section 751(b) of the Tariff Act of 1930 (19 U.S.C. 1675(b)) to review the Commission's affirmative determination in investigation No. 731–TA–244 (Final), regarding natural bristle paint brushes from the People's Republic of China. The purpose of the proposed 751(b) review investigation, if instituted, would be to determine whether an industry in the United States would be materially injured, or would be threatened with material injury, or the establishment of an industry in the United States would be materially retarded, by reason of imports of natural bristle paint brushes from the People's Republic of China if the antidumping duty order regarding such merchandise were to be modified or revoked. Natural bristle paint brushes are provided for in item 750.65 of the Tariff Schedules of the United States.[1]

FOR FURTHER INFORMATION CONTACT: Jim McClure, (202–252–1191), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-Impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–252–1000.

SUPPLEMENTARY INFORMATION: On February 6, 1986, the Commission issued its determination in investigation No. 731–TA–244 (Final), Natural Bristle Paint Brushes from the People's Republic of China (51 FR. 4662). The Commission determined that an industry in the United States was threatened with material injury by reason of imports from the People's Republic of China of natural bristle paint brushes, except artists' brushes, which had been found by the Department of Commerce to be sold at less than fair value (LTFV). On February 14, 1986, the Department of Commerce issued an antidumping duty order, notice of which was published in the **Federal Register** (51 FR 5580).

On February 24, 1988, the Commission received a request, pursuant to section 751(b) of the Act, to review its affirmative determination in investigation No. 731–TA–244 (Final). This request was filed by counsel on behalf of A. Hirsh, Inc., an importer of natural bristle paint brushes from the People's Republic of China.

Written Comments Requested

Pursuant to § 207.45(b)(2) of the Commission's Rules of Practices and Procedure (19 CFR 207.45(b)(2)), the Commission requests comments concerning whether the following alleged changed circumstances are sufficient to warrant institution of a review investigation: The domestic industry is currently in strong condition and has not experienced the threatened material injury found by the Commission. Also, as a consequence of the imposition of the antidumping duty order, shipments of natural bristle paint brushes from the People's Republic of China have been brought to a virtual halt and have been replaced by other imports, not by domestic paint brushes. Thus the domestic industry is not vulnerable to injury and would not suffer material injury if the antidumping duty order with respect to the People's Republic of China were revoked.

Written submission:

In accordance with § 201.8 of the Commission's rules (19 CFR 201.8), the signed original and 14 copies of all written submission must be filed with the Secretary to the Commission, 500 E Street SW.. Washington, DC 20436. All comments must be filed no later than 30 days after the date of publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request business confidential treatment under § 201.6 of the Commission's rules (19 CFR 201.6). Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Each sheet must be clearly marked at the top "Confidential Business Data." The Commission will either accept the submission in confidence or return it. All nonconfidential written submission will be available for public inspection in the Office of the Secretary.

Copies of the request for review of the injury determination and any other documents in this matter are available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission; telephone 202–252–1000.

By order of the Commission.

Issued: March 15, 1988.

Kenneth R. Mason,

Secretary.

---

[1] The articles covered by the antidumpming duty order are provided for in item 9603.40.40 of the proposed Harmonized Tariff Schedule of the United States (USITC Pub. 2030).

DEPARTMENT OF JUSTICE

[Civil Action No. 86–3359]

Lodging of Consent Decree Pursuant to Clean Air Act; Central Illinois Public Service Co.

In accordance with Departmental policy, 28 CFR 50.57, notice is hereby given that a proposed consent decree in *United States v. Central Illinois Public Service Co.*, Civil Action No. 86–3359, was lodged with the United States District Court for the Central District of Illinois. The Complaint filed by the United States alleged violation of section 113 of the Clean Air Act for failure by defendant to comply with applicable provisions of the Illinois State Implementation Plan ("SIP"), relating to sulfur dioxide emissions, at defendant's Coffeen Generating Station.

The proposed Decree requires defendant to comply with the Clean Air Act by not exceeding the sulfur dioxide emission limitations of the SIP. In addition, defendant must install and operate a system to continuously monitor the sulfur dioxide emission levels of the plant, and also pay a civil penalty of $75,000.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Central Illinois Public Service Co.*, D.J. Reference No. 90–5–2–1–1044.

The proposed consent decree may be examined at the office of the United States Attorney, Central District of Illinois, U.S. Courthouse, 600 E. Monroe Street, Springfield, Illinois 62705, and at the Office of Regional Counsel, United States Environmental Protection Agency, Region V, 111 West Jackson Street, Chicago, Illinois 60604. Copies of the proposed consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue NW., Washington, DC. A copy of the proposed consent decree may be obtained in person from the above address or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, P.O. Box 7611, Washington, DC 20044. When requesting a copy, please enclose a check in the amount of $1.50 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

[Civil Action No. H86–295]

Lodging of Consent Order Pursuant to Clean Water Act; Inland Steel Co.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on March 9, 1988, a proposed Consent Order in *United States v. Inland Steel Company*, Civil Action No. H86–295, was lodged with the United States District Court for the Northern District of Indiana. The proposed Consent Order concerns laboratory practices at, and the discharge of wastewater from, Inland Steel Company's plant in East Chicago, Indiana, in compliance with the Clean Water Act and Inland's National Pollutant Discharge Elimination System permit issued thereunder.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Order. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Inland Steel Company*, D.J. reference # 90–5–1–1–2320.

The proposed Consent Order may be examined at the office of the United States Attorney, Northern District of Indiana, 507 State Street, Hammond, Indiana 46320, at the Region V office of the United States Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois, and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, 9th Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Order may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $2.00 payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

Advisory Council on Employee Welfare and Pension Benefit Plans; Work Group Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Work Group on Reporting and Disclosure of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 10:00 a.m., Monday, April 18, 1988, in Room N–5437B, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington, DC 20210.

This seven member work group was formed by the Advisory Council to study issues relating to the reporting and disclosure for employee welfare plans covered by ERISA.

The purpose of the April 18 meeting is to solicit comment from individuals and organizations on the cost and utility of reporting and disclosure requirements, of the Department of Labor and ERISA, with specific emphasis on the following forms:

1. Form 5500
2. Summary Plan Description
3. Summary Annual Report
4. Summary of Material Modification.

The work group will also take testimony and or submissions from employee representatives, employer representatives and other interested individuals and groups regarding the subject matter.

Individuals, or representatives of organizations, wishing to address the work group should submit written requests on or before April 12, 1988 to Charles W. Lee, Jr., Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N–5677, 200 Constitution Avenue, NW., Washington, DC 20210. Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before April 12, 1988.

BEST COPY AVAILABLE

Signed at Washington, DC, this 18th day of March, 1988.

David M. Walker,

CPA, Assistant Secretary for Pension and Welfare Benefits Administration.

[FR Doc. 88-6281 Filed 3-22-88; 8:45 am]

BILLING CODE 4510-29-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATE: Requests for copies must be received in writing on or before May 9, 1988. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESS: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifiying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. The Army and Air Force Exchange Service (N1-334-88-2). Records relating to miscellaneous personnel matters, such as testing, promotions and retirement.
2. Department of the Navy, Chief of Naval Operations, Naval Air Forces US Atlantic Fleet (N1-313-86-3). Routine administrative correspondence and housekeeping records of various units of the Naval Air Forces Atlantic Fleet for the period 1951-56.
3. Federal Deposit Insurance Corporation, Division of Liquidation, (N1-34-88-3). Records created by the now defunct Franklin National Bank that became the property of the FDIC as a result of liquidation proceedings in 1974.
4. Federal Deposit Insurance Corporation, Division of Liquidation, (N1-34-88-4). Records created by a closed bank that became the property of the FDIC as a result of liquidation proceedings.
5. Federal Energy Regulatory Commission, Office of Pipeline and Producer Regulation (N1-138-88-1). Well Determination Files.
6. Department of Health and Human Services (N1-102-88-1). Facilitative records relating to the activities of the Childrens' Bureau.
7. Department of Justice, Federal Bureau of Investigation, Records Management Division (N1-65-88-6). Documentation containing personal information of insufficient historical or other value to warrant archival retention. Expunction of the information has been requested by the individual to whom it relates.
8. Department of State, Bureau of Personnel (N1-59-88-15 and -16). Automated systems pertaining to routine personnel transactions.

Dated: March 15, 1988.

Don W. Wilson,

Archivist of the United States.

[FR Doc. 88-6286 Filed 3-22-88; 8:45 am]

BILLING CODE 7515-01-M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from February 29, 1988 through March 11, 1988. The last biweekly notice was published on March 9, 1988.

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the

facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resource Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 22, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of amendment request: February 9, 1988

Description of amendment request: The proposed changes to Technical Specification Table 3.22-2 will: (1) add one Halon storage cylinder in the Switchgear Room; (2) increase the number of smoke detectors in the Switchgear Room from 32 to 35; and 3) require 8 or 9 smoke detectors within the Screenwell Building to be in service. In addition, Table 3.22-2 will be revised to reflect new fire areas in the Primary Auxiliary Building and Screenwell Building that agree with the current Fire Hazards Analysis.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated 10 CFR 50.92(c). The licensee has determined and the NRC staff agrees that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed. The proposed changes will have no impact on the probability or consequences of an accident. The proposed changes will increase the required number of operable smoke detectors and Halon bottles for the Switchgear Room and increase the number of operable smoke detectors for the Screenwell Building. The proposed revisions to the Primary Auxiliary Building and Screenwell Building fire areas are an update to the current Fire Hazards Analysis. This will have no affect on any design basis accident. Thus, the addition to the operability requirements for smoke detectors and Halon bottles does not increase the probability or consequences of an accident.

2. Create the possibility of a new or different kind of accident from any previously evaluated. The hardware modifications in the Switchgear Room and Screenwell Building were implemented to upgrade the fire detection and suppression systems in those fire areas. These changes propose to increase the number of smoke detectors from 32 to 35 in the Switchgear Room, and increase the number of operable smoke detectors in the Screenwell Building from 2/3 to 8/9. Also, an additional Halon storage cylinder has been added to the seven (7) storage cylinders associated with the original system design. The modified Detection System/Halon Suppression System offers more detection coverage [thirty-five (35) detectors versus thirty-two (32) for the Switchgear Room, and 8/9 versus 2/3 operable detectors for the Screenwell Building] and provides additional Halon to extinguish postulated fires. These changes increase CYAPCO's capability to detect, control and extinguish fires. Administrative, testing, and inspection procedures were revised to maintain the modified detection and suppression systems.

In addition, the revisions to Table 3.22-2 will update the Technical Specifications to reflect new fire areas in the Primary Auxiliary Building and Screenwell Building. These revisions will agree with the current Fire Hazards Analysis.

The modifications do not affect safety systems or components and, therefore, do not affect any design basis accident. No other systems or components are affected by the change, thus, there can be no impact on the consequences of any design basis accident.

There are no failure modes introduced by the modifications that can be an initiating event for any design basis accident. The proposed changes have no impact on the probability of occurrence of any design basis accident. Since no safety systems are affected by the proposed changes, there can be no affect on the probability of failure of any safety system. Therefore, the proposed Technical Specification changes so not create the probability of an accident or malfunction of a new or different type than any evaluated previously in the safety analysis report.

3. Involve a significant reduction in a margin of safety. Since the proposed changes do not have any impact on any design basis accident, there can be no impact on any protective boundary. Since there is no impact on any protective boundary as a result of the proposed changes, there can be no impact on any safety limit. The proposed changes have no impact on the basis of any Technical Specification. The proposed changes maintain the basis of the Technical Specifications in assuring adequate smoke detection and fire suppression.

Accordingly, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Russel Library, 123 Broad Street, Middletown, Connecticut 06457.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of amendment request: February 25, 1988

Description of amendment request: The proposed changes renumber the manual high pressure safety injection (HPSI) throttle valves in Specification 3.6.B.2 to be consistent with the plant loop numbering scheme. The applicability statement for Specification 3.6.B.2 has also been changed from "Prior to startup from cold shutdown (MODE 5)" to "On startup prior to entering MODE 4" in order to be more concise and MODE specific. In addition, the Basis for Specification 3.6 has been clarified.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated 10 CFR 50.92(c). The licensee has determined and the NRC staff agrees that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the Safety Analysis Report is not increased since the proposed changes only renumber the valves and clarify the action statement.

2. Create the possibility of a new or different kind of accident from any previously evaluated. The possibility for an accident or malfunction of a different type than any evaluated previously in the Safety Analysis Report is not created since the normal operating conditions of the plant are unaffected. The change to the action statement clarifies that the core deluge valve and HPSI throttle valves are properly positioned and secured before they are required to be operable.

Since no physical plant changes are planned and since the ECCS performance will not be adversely affected, there is not adverse effect on plant response. There are not failure modes associated with the proposed changes which could represent a new unanalyzed accident. The proposed changes do not adversely impact the probability of any accident.

3. Involve a significant reduction in a margin of safety. The margin of safety, as defined in the basis for any technical specification is not reduced since the proposed changes do not diminish the ECCS accident mitigation capability and thereby do not impact the consequences to the protective boundaries.

Accordingly, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Russel Library, 123 Broad Street, Middletown, Connecticut 06457.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of amendment request: February 5, 1988

Description of amendment request: The proposed amendment would delete Specification 3.6.4.3, regarding the hydrogen purge system, from the Technical Specifications. This specification was originally included at the time of licensing, since the licensee expected to employ two portable hydrogen recombiners between Units 1 and 2. If such was indeed the case, there would not be redundancy of hydrogen recombining capability at either unit, and the hydrogen purge system would be required as backup, in accordance with the staff's position as documented in the Standard Westinghouse Technical Specifications. Since that time, the licensee has provided a fully dedicated second recombiner at Unit 1, and has similarly provided Unit 2 with two dedicated recombiners. Thus, there is now full redundancy at each unit, and Specification 3.6.4.3 may be deleted as the hydrogen purge system is no longer needed as backup.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The installed hydrogen recombiners provide the needed capacity and redundancy to handle the hydrogen generated after a LOCA. The elimination of the subject specification would eliminate one post-LOCA radioactivity release route (i.e., hydrogen purge), resulting in a reduced calculated LOCA dose. There is no associated hardware changes. An administrative control will be imposed by the licensee to isolate the hydrogen purge system. Thus, the proposed change would not have any effect on the probability of any accident, and would not increase (actually, it decreases) the consequences of previously analyzed accidents. Since there is no change in design, no modification of plant components or operating procedures, no new accidents can be created. Finally, since post-LOCA hydrogen concentration would be kept low by the fully redundant recombiner system, the proposed amendment would not reduce the margin of safety.

Therefore, the staff proposes to determine the amendment as involving no significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts, & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Duquesne Light Company, Docket No. 50-412, Beaver Valley Power Station, Unit No. 2, Shippingport, Pennsylvania

Date of amendment request: February 11, 1988

Description of amendment request: The proposed amendment would revise the steam generator water level low-low reactor trip setpoint and the steam generator water level low-low auxiliary feedwater actuation setpoint from greater than or equal to 15.5% narrow range level span to greater than or equal to 11.5% narrow range level span. This change removes a 4% environmental allowance that was added in to the steam generator low-low level setpoint calculation to account for radiation effects on the steam generator level transmitters.

The mitigation of the consequences of several postulated accidents (Chapter 15 of the Final Safety Analysis Report) depends on the above setpoints. However, none of these accidents would result in a radiation environment to the transmitters that would need to be accounted for by the 4% environmental allowance. This added value, therefore, is an unnecessary conservatism, does not contribute to added safety and is a potential contributor to unneeded reactor trips and auxiliary feedwater actuations.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards considera tion if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed amendment would eliminate an unnecessary conservatism. There is no hardware or operational procedure change, except resetting of the setpoints as stated above. There is no decrease in the capability of the reactor system to scram, or for engineered safety features to actuate should the needs arise. Thus, the answers to the first two questions are negative.

The proposed change would not affect the assumptions of any safety analysis in the Final Safety Analysis Report. No safety margin is relaxed, and the answer to the third question is also negative.

Therefore, the staff proposes to determine the amendment as involving no significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts, & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Duquesne Light Company, Docket Nos. 50-334 and 50-412, Beaver Valley Power Station, Unit Nos. 1 and 2, Shippingport, Pennsylvania

Date of amendment request: January 25, 1988

Description of amendment request: The amendments would incorporate the changes to Section 3.0 and 4.0 of the Beaver Valley Unit 1 and Unit 2 Technical Specifications, as recommended in NRC's Generic Letter 87-09. The NRC has determined that specifications 3.0.4, 4.0.3 and 4.0.4 may be modified to clarify the intent and resolve the following three problems associated with these requirements: (1) unnecessary restrictions on mode changes provided by specification 3.0.4; (2) unnecessary shutdowns caused by specification 4.0.3 when surveillance intervals are inadvertently exceeded; and (3) conflicts between specifications 4.0.3 and 4.0.4. Generic Letter 87-09 provides an in-depth discussion of the identified problems and the solutions recommended by the NRC. The licensee's proposed amendments follow those recommendations.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

As stated above, and as described in detail in Generic Letter 87-09, the current Technical Specifications are overly restrictive on mode changes and on requirements to shutdown. Such restrictions do not enhance safety but do pose problems for plant operation. Removal of these restrictions does not necessitate plant hardware changes, and does not relax all the other Technical Specifications that govern plant parameters and operation. Consequently, the answer to the first question is negative.

In the absence of hardware and operational procedure changes, the answer to the second question is also negative.

The proposed amendment would not necessitate revision of any analysis in the Final Safety Analysis Report. No margins of safety are relaxed. The answer to the third question is similarly negative.

The staff therefore proposes to determine that the amendments involve no significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts, & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Duquesne Light Company, Docket Nos. 50-334 and 50-412, Beaver Valley Power Station, Unit Nos. 1 and 2, Shippingport, Pennsylvania

Date of amendment request: February 5, 1988

Description of amendment request: The Technical Specifications for Beaver Valley Units 1 and 2 would be amended as follows:

(1) Surveillance requirement 4.2.1.2 currently does not specify the lower limit to which the ½T-minute penalty for the axial flux difference is to be applied. The licensee proposed to specify the lower limit as 15% of rated thermal power, thus, conforming Section 4.2.1.2 to 4.2.1.1, and correcting an internal discrepancy between the two sections.

(2) Page 3/4 3-16a (Unit 1 only) would be renumbered to 3/4 3-16, and the current page 3/4 3-16, a blank page, would be deleted. This is an editorial change.

(3) Section 4.4.5.5 would be modified to clearly say that a Special Report will be needed to document steam generator tube inspection results. This is an administrative change.

(4) Section 6.9.2 (Unit 1 only) will be revised by adding Steam Generator Tube Inservice Inspection Report to the list of Special Reports. This is an administrative change.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples (51 FR 7751). One of these, Example (i), involving no significant hazards considerations is "A purely administrative change to technical specifications." The requested changes all match this example. On such basis, the staff proposes to determine that the requested amendment involves no significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts, & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of amendments request: February 22, 1988

Description of amendments request: The proposed amendments would change the general limiting conditions for operation (LCO) Technical Specifications (TS) [TS 3.0] and the general surveillance requirements (SR) TS [TS 4.0]. The changes would be applicable to both St. Lucie units, and are in response to the Commission's Generic Letter 87-09 on this subject entitled "Sections 3.0 and 4.0 of the Standard Technical Specifications (STS) on the Applicability of Limiting Conditions for Operation and Surveillance Requirements." Some changes are also proposed for Unit 1 that are not associated with the Generic Letter. These changes upgrade the Unit 1 TS to the content of the standard TS.

Specifically, the Generic Letter suggested changing TS 3.0.4, TS 4.0.3, and TS 4.0.4. TS 3.0.4 deals with entry into an operational mode when the LCO's associated with a particular operational mode are not met. The present specification has caused confusion; the proposed specification of the Generic Letter will end this confusion. The licensee proposes the same TS 3.0.4 changes as suggested in the Generic Letter for both St. Lucie unit TS.

TS 4.0.3 deals with failure to perform a surveillance requirement. Failure to perform a surveillance requirement results in the licensee's failure to demonstrate that a structure, system, or component is operable. A licensee can, on occasion, miss a surveillance requirement and a literal interpretation of this TS would require plant shutdown. If the licensee immediately performs the surveillance to abort a shutdown, the plant could be put into jeopardy. Thus, the Generic Letter provides some flexibility to permit the licensee to perform the surveillance in a reasonable period of time. The flexibility in this case is a 24-hour grace period. The licensee proposes the same TS 4.0.3 changes as suggested in the Generic Letter for both St. Lucie unit TS.

TS 4.0.4 deals with entry into an operational mode and satisfaction of the surveillance requirements associated with the LCOs for a given mode. The present specification has also caused confusion; the proposed specification of the Generic Letter will end this confusion. The licensee proposes the same TS 4.0.4 changes as suggested in the Generic Letter for both St. Lucie unit TS.

The Generic Letter also recommended upgrading the bases statements associated with the general LCO and general SR requirements. The purpose of the upgrade was to end confusion and further delineate the background associated with a particular general

LCO and particular general SR. The licensee proposes the same changes to the bases statements as suggested in the Generic Letter for both St. Lucie unit TS.

The licensee also proposes upgrading a number of general LCO requirements to standard TS content. These changes would also make the Unit 1 TS identical to Unit 2 TS. Specifically, TS 3.0.1, 3.0.2, and 3.0.3 will be deleted and the standard TS/Unit 2 TS 3.0.1, 3.0.2, and 3.0.3 will be added.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three standards in the amendment application. In regard to the first standard, the licensee provided the following analysis.

> Operation of the facility in accordance with the proposed amendment[s] would not involve a significant increase in the probability or consequences of an accident previously evaluated.
>
> For the changes intended to achieve consistency with the recommendations of Generic Letter 87-09 "Sections 3.0 and 4.0 of the Standard Technical Specifications (STS) on the Applicability of Limiting Conditions for Operation and Surveillance Requirements," the staff has previously evaluated these changes in the generic letter and determined that the modifications will result in improved technical specifications.
>
> Specification 3.0.4 unduly restricts facility operation when conformance to the ACTION requirements provides an acceptable level of safety for continued operation. For an LCO that has ACTION requirements permitting continued operation for an unlimited period of time, entry into an operational mode or other specified condition of operation should be permitted in accordance with those ACTION requirements. This is consistent with the NRC's regulatory requirements for an LCO.
>
> It is overly conservative to assume that systems or components are inoperable when a surveillance requirement has not been performed. A 24-hour time limit has been included in Specification 4.0.3 allowing a delay of the required actions to permit the performance of the missed surveillance. The NRC has concluded that the 24-hour time limit would balance the risks associated with an allowance for completing the surveillance within this period against the risks associated with the potential for a plant upset and challenge to safety systems when the alternative is a shutdown to comply with ACTION requirements before the surveillance can be completed.
>
> The NRC has concluded that the potential for a plant upset and challenge to safety systems is heightened if surveillances are performed during a shutdown to comply with ACTION requirements. Specification 4.0.4 has been modified to note that its provisions shall not prevent passage through or to operational modes as required to comply with ACTION requirements.
>
> For the changes intended to achieve consistency with the Combustion Engineering - Standard Technical Specifications (CE-STS), the intent of the Specifications will not be changed nor will operating limitations of the Technical Specifications be changed.
>
> Therefore, the proposed changes will not significantly affect the probability or consequences of accidents previously analyzed.

In connection with the second standard:

> Use of the modified specifications would not create the possibility of a new or different kind of accident from any accident previously evaluated.
>
> The changes being proposed by FPL to achieve consistency with Generic Letter 87-09 and the CE-STS will not lead to material procedure changes or to physical modifications. Therefore, the proposed changes do not create the possibility of a new or different kind of accident [from any accident previously evaluated].

The licensee provided the following analysis for the third standard.

> Use of the modified specification would not involve a significant reduction in a margin of safety.
>
> For the changes intended to achieve consistency with the recommendations of Generic Letter 87-09 "Sections 3.0 and 4.0 of the Standard Technical Specifications (STS) on the Applicability of Limiting Conditions for Operation and Surveillance Requirements," the staff has previously evaluated these changes in the generic letter and determined that the modifications will result in improved Technical Specifications.
>
> Specification 3.0.4 unduly restricts facility operation when conformance to the ACTION requirements provides an acceptable level of safety for continued operation. The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based upon this review, the staff believes that the licensee has met the three standards. The licensee is proposing TS changes consistent with the Generic Letter TS. The licensee is also proposing TS changes for Unit 1 that are identical to the Unit 2 TS and the Standard TS.

Based upon the above discussion, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of amendments request: February 22, 1988

Description of amendments request: The proposed amendments would make a number of changes to the administrative controls section of the Technical Specifications (TS). The figures showing the onsite organizational structure and the offsite organizational structure would be deleted. General organizational requirements are proposed to be added to reflect the significant organizational features currently presented in the figures. The figures themselves would be located in a licensee-controlled document, the Topical Quality Assurance Report. A licensee cannot unilaterally change this report if the change reduces the commitments previously accepted by the Commission. The governing regulation in this matter is 10 CFR 50.54(a)(3). Therefore, the figures would remain a controlled document.

The title "Vice President - Nuclear Operations" and "Group Vice President - Nuclear Energy" are used in various locations of the administrative controls section of the TS. The amendments would delete these particular titles, and use the general title "senior corporate nuclear officer" in their place. This change would give the licensee more flexibility in making management changes.

Three title changes to the membership of the Company Nuclear Review Board (CNBR) would be made. Two of the three individuals occupying those positions on the CNBR would also change. There will be no changes in collective talents on the CNBR and the quality and scope of independent review will be maintained.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three standards in the amendment application. In regard to the first standard, the licensee provided the following analysis.

> Operation of the facility in accordance with the proposed amendment[s] would not involve a significant increase in the probability or consequences of an accident previously evaluated.
>
> The changes being proposed are administrative in nature and do not affect assumptions contained in plant safety analyses, the physical design and/or operation of the plant, nor do they affect Technical Specifications that preserve safety analysis assumptions. Therefore, the proposed changes do not affect the probability or consequences of accidents previously analyzed.

In connection to the second standard, the licensee stated the following.

> Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.
>
> The changes being proposed are administrative in nature and will not lead to material procedure changes or to physical modifications. Therefore, the proposed changes do not create the possibility of a new or different kind of accident [from any accident previously analyzed].

Lastly, the licensee provides the following analysis to address the third standard.

> Use of the modified specification would not involve a significant reduction in a margin of safety.
>
> The changes being proposed are administrative in nature and do not relate to or modify the safety margins defined in and maintained by, the Technical Specifications.
>
> Deletion of the figures displaying offsite and onsite organizational structures and other organizational changes will not decrease the effectiveness of the offsite and onsite organizations to manage the St. Lucie Plant. These organizations will continue to operate, manage and provide technical support to the St. Lucie Plant.
>
> The NRC will continue to be informed of organizational changes through other controlled mechanisms. The Topical Quality Assurance Report provides a detailed description of organization and responsibilities as well as detailed organizational charts. Changes to the Topical Quality Assurance Report are governed by 10 CFR 50.54(a)(3). Changes to the Topical Quality Assurance Report description that reduce commitments previously accepted by the NRC require NRC approval prior to implementation. FPL will continue to inform the NRC of organizational changes affecting St. Lucie Plant.
>
> Changes to the composition of the Company Nuclear Review Board (CNRB) reflect only title changes and are administrative in nature. There is no change in the collective talents on the CNRB and the scope of independent review conducted by the CNRB will be unchanged from the current high quality.
>
> Therefore, the proposed changes do not involve any [significant] reduction in a margin of safety.

The staff reviewed the licensee's no significant hazards consideration determination analysis. Based upon this review, the staff believes that the licensee has met the three standards.

The figures will remain as controlled documents. The two title changes to "senior corporate nuclear officer" will still require appropriate corporate oversight of all nuclear activities. The CNBR changes will not change the collective talents on the CNBR and the quality and scope of independent review will be maintained.

Based upon the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450.

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036.

NRC Project Director: Herbert N. Berkow

Florida Power and Light Company, Docket Nos. 50-250 and 50-251, Turkey Point Plant Units 3 and 4, Dade County, Florida

Date of amendments request: February 19, 1988

Description of amendments request: The proposed amendments would make a number of changes to the administrative controls section of the Technical Specifications (TS). The figures showing the onsite organizational structure (Figure 6.2-2) and the offsite organizational structure (Figure 6.2-1) would be deleted. General organizational requirements are proposed to be added to reflect the significant organizational features currently presented in the figures. The figures themselves would be located in a licensee-controlled document, the Topical Quality Assurance Report. A licensee cannot unilaterally change this report if the change reduces the commitments previously accepted by the Commission. The governing regulation in this matter is 10 CFR 50.54(a)(3). Therefore, the figures would remain a controlled document.

Current Figure 6.2-1 entitled "Plant Organization Chart" requires both the Operations Supervisor and the Operations Superintendent to hold Senior Operator Licenses (SROs). A TS is proposed to require the Operations Supervisor to hold an SRO; however, the licensee is requesting the deletion of that requirement for the Operations Superintendent. The licensee does not believe that both individuals need to hold current SRO licenses.

The title "Vice President - Nuclear Operations" and "Group Vice President - Nuclear Energy" are used in various locations of the administrative controls section of the TS. The amendments would delete these particular titles, and use the general title "senior corporate nuclear officer" in their place. This change would give the licensee more flexibility in making management changes.

Three title changes to the membership of the Company Nuclear Review Board (CNBR) would be made. In addition, the Chairman would not be specified. Instead, TS 6.5.2.2 would be modified to require only that the Chairman be a member of the CNRB and that he be specified in writing. There will be no changes in collective talents on the CNBR and the quality and scope of independent review will be maintained.

Finally, the amendments would change the written notification time period that the Plant Nuclear Safety Committee has to notify the CNBR when disagreements arise. The present time is "immediately"; the licensee is requesting 24 hours per the Westinghouse Standard Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazard considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed change in accordance with the standards of 10 CFR 50.92 and has determined that operation of Turkey Point Units 3 and 4 in accordance with the proposed amendment would not:

(1)&(2) Involve a significant increase in the probability or consequences of an accident previously evaluated, or create the possibility of a new or different kind of accident than previously evaluated. This change [is] administrative in nature, and does not involve a change in the operation, the physical configuration of the power plant, or affect the accident analysis.

(3) Involve a significant reduction in a margin of safety.

Deletion of Figures 6.2-1 and 6.2-2 and the other organization changes discussed above will not decrease the effectiveness of the onsite and offsite organization to manage the Turkey Point Plant or provide technical support to ensure continued safe operation.

The NRC will continue to be informed of organizational changes through other required controls. The Quality Assurance Program provides detailed descriptions of organization and responsibilities and detailed organization changes. Changes to the Quality Assurance Program description that reduce commitments previously accepted by the NRC require NRC approval prior to implementation. FPL will continue to inform the NRC of organization changes affecting its nuclear facilities.

The proposed change deleting the requirement that the Operations Superintendent hold an SRO is consistent with the requirements of TS 6.3.1. Plant supervisors are directly supervised by the Operations Supervisor who meets the qualifications of the "Operations Manager" in ANSI Standard N18.1 1971. Therefore, not including the SRO requirement for the Operations Superintendent will not impact safe plant operation.

The changes from "Vice President-Nuclear Operation," and/or 'Group Vice President-Nuclear Energy" to "senior corporate nuclear officer" and the changes relating to the CNRB are administrative and do not affect plant operation.

The increase in time allowed to provide written notification (TS 6.5.1.7.c) regarding disagreement between the PNSC and the Plant Manager-Nuclear is consistent with industry practice and allows time for a written report to be prepared. Since the Plant Manager is responsible for resolving such disagreements, and also for safe operation of the plant, no decrease in any margin [of] safety will result.

The staff agrees with the licensee's determination above, and therefore proposes to determine that the amendments do not involve a significant hazards consideration.

Local Public Document Room location: Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzer, P.C., 1615 L Street, NW., Washington, DC 20036.

NRC Project Director: Herbert N. Berkow

GPU Nuclear Corporation, et al, Docket No. 50-289, Three Mile Island Nuclear Station, Unit No. 1, Dauphin County, Pennsylvania

Date of amendment request: January 12, 1988 (TSCR No. 180)

Description of amendment request: The proposed amendment would revise Technical Specification 5.4.1 and the corresponding bases and surveillance requirements to allow receipt, storage and transfer of new (unirradiated) fuel assemblies containing as high as 4.3 weight percent U-235 enrichment. Presently, the maximum enrichment provided for is 3.5 weight percent.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

GPU Nuclear has provided an assessment of how the proposed amendment meets the standards of 10 CFR 50.92 in making a determination that an action involves no significant hazards consideration. The discussion of this determination is as follows:

(1) Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability of occurrence or consequences of an accident previously evaluated. There are no design basis events in TMI-1 FSAR Chapter 14 or elsewhere which are affected by this proposed amendment. Also, an analysis has been performed and has demonstrated that the NRC criticality requirements for the storage of new fuel would be met under both normal and abnormal conditions.

(2) Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated. The only event of concern with respect to storage of new fuel is criticality and as mentioned in item (1) above, an analysis has demonstrated that the proposed amendment would not result in any kind of criticality event.

(3) Operation of the facility in accordance with the proposed amendment would not involve a significant reduction in a margin of safety. The safety criteria contained in the Technical Specification Bases are not impacted by this proposed amendment.

The Commission has provided guidelines pertaining to the application of three (3) standards by listing specific examples in (51 FR 7744). The proposed amendment is considered to be in the same category as example (vi) of amendments that are considered not likely to involve significant hazards considerations in that the results of this proposed amendment is clearly within all acceptance criteria with respect to the Standard Review Plan. The staff agrees with this proposed amendment and proposes to determine that the amendment would involve no significant hazards consideration.

Local Public Document Room location: Government Publications

Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue Box 1601, Harrisburg, Pennsylvania 17105

Attorney for licensee: Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-424, Vogtle Electric Generating Plant, Unit 1, Burke County, Georgia

Date of amendment request: February 4, 1988

Description of amendment request: Technical Specification 4.7.1.2.1, "Auxiliary Feedwater System," requires verification at least once every 31 days that each motor driven auxiliary feedwater pump develops a discharge pressure of greater than or equal to 1605 psig at a flow of greater than or equal to 175 gpm. The proposed change revises the flow criterion to "greater than or equal to 150 gpm."

Basis for proposed no significant hazards consideration determination: The Commission has provided Standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

In regard to the proposed amendment, the licensee has determined the following:

1. The proposed change does not significantly increase the probability or consequences of an accident previously evaluated. The change does not involve any modification to the auxiliary feedwater pumps and has no effect on operation of the system. Since the auxiliary feedwater system will respond to a manual or automatic actuation and operate in the same manner as before the change, the probability and consequences of previously analyzed accidents would not be affected.

2. The proposed change does not create the the possibility of a new or different kind of accident than any accident previously evaluated. The change does not involve any physical alteration to the auxiliary feedwater system or to any other plant system or structure. The change does not affect the operation of any plant system. The change therefore does not create the possibility of a new failure mode or malfunction and a new or different kind of accident could not result.

3. The proposed change does not significantly reduce a margin of safety. The proposed change assures adequate flow for pump protection during surveillance testing. The proposed surveillance acceptance criterion is equivalent to the existing criterion in terms of demonstrating pump operability, since both criteria show operation on the pump's head vs. flow curve. The Vogtle In-Service Testing program requires that corrective action be taken if quarterly test data exhibit a significant adverse trend. Margins of safety are therefore not reduced.

The NRC staff has reviewed the licensee's determination and concurs with its findings.

Accordingly, the Commission proposes to determine that the proposed change involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 4th Street, Waynesboro, Georgia 30830.

Attorney for licensee: Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Chandler Building, Suite 1400, 127 Peachtree Street, N.E., Altanta, Georgia 30043.

NRC Project Director: Kahtan Jabbour, Acting

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: November 11, 1986 and November 6, 1987

Brief description of amendment: In accordance with the requirements of 10 CFR 73.55, the licensee submitted an amendment to the Physical Security Plan for the River Bend Station, Unit 1 to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.D of Facility Operating License No. NPF-47 to require compliance with the revised Plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on November 11, 1986, with additional information on November 6, 1987, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the Supplementary Materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendment is appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Attorney for licensee: Troy B. Conner, Jr., Esq., Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Jose A. Calvo

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: January 13, 1988

Description of amendment request: The proposed amendment will revise Technical Specification Table 3.6-2, Containment Isolation Valves, and Table 3.6-1, Containment Leakage Paths.

For the containment isolation valves listed in Table 3.6-2, Technical Specification 3.6.3 ensures that the containment atmosphere will be isolated from the outside environment in the event of a release of radioactive material to the containment atmosphere or pressurization of the containment, as required by 10 CFR Part 50 Appendix A, GDC 54 through GDC 57. Containment isolation within the time limits specified for isolation valves designed to close

automatically ensures that the release of radioactive material to the environment will be consistent with the LOCA analyses assumptions. The proposed change will add a new containment isolation valve to the automatic isolation section of Table 3.6-2, and move an existing valve from the manual isolation section of Table 3.6-2 to the automatic isolation section while changing its valve identification number.

Similarly, Table 3.6-1 of Technical Specification 3.6.1.2 lists the containment penetrations and valves subject to Type B and C leak rate testing. The proposed change will add a new containment isolation valve for Type C testing to the Table and change the valve identification number of an existing valve.

The Containment Atmosphere Release System (CARS), described in Section 6.2.5.2.3 of the FSAR, serves as a dual train backup to the Hydrogen Recombiner System for post-LOCA hydrogen control. Motor operated containment isolation valves inside containment (valves CAR 201A/B) are presently provided for each train of the CARS exhaust and included in the automatic isolation (CIAS) section of Technical Specification Table 3.6-2. Locked closed manual isolation valves outside containment (valves CAR 202A/B) are included for each exhaust train in the manual isolation valve section of Table 3.6-2.

To provide a means for intermittent containment pressure control, a station modification will be implemented during the upcoming second refueling outage to cross-connect the CARS train B exhaust with the RAB Normal Ventilation System. The tie-in occurs between the CARS outside containment isolation valve and the CARS exhaust fan. In the course of the modification a new inside containment air-operated and fail-closed isolation valve (CAR 200B) will be added in parallel with the existing CAR 201B motor-operated valve; the outside containment isolation valve (CAR 202B) will be changed from a manual valve to an air-operated and fail-closed valve.

Two design constraints are relevant to the proposed Technical specification change: (1) the containment pressure control line must be capable of isolation within 5 seconds following a containment isolation or high radiation signal (and valves must fail in the safe (closed) position), and (2) CARS train B must remain capable of performing its post-LOCA hydrogen removal function. Because air-operated valves are faster acting than motor-operated valves, the first constraint is met by adding the inside containment air-operated isolation valve, CAR 200B, and changing the outside containment isolation valve, CAR 202B, from a manual valve to an air-operator. The second constraint is met by retaining the motor-operated inside containment isolation valve, CAR 201B, so that post-LOCA credit for the instrument air system is not necessary to ensure that CARS train B can be unisolated when needed. In effect, CAR 201B is dedicated for hydrogen removal post-LOCA and CAR 200B is available for containment pressure control.

The proposed change, therefore, involves: (1) the addition of CAR 200B to Tables 3.6-1 and 3.6-2 as a new valve to automatically isolate on CIAS or high containment radiation, and 2) shifting CAR 202B from the manual isolation section of Table 3.6-2 to the automatic isolation section. Both valves must meet a five second closure criterion during testing. Because the actual valve for CAR 202B is being replaced, the valve-specific identification number used internally by Waterford 3 will also be change from 2HV-B192B to 2HV-F229B.

Basis for proposed no significant hazards consideration determination: The NRC staff proposes that the proposed changes do not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in the margin of safety. The basis for this proposed finding is given below.

(1) As a post-accident system, the CARS is not credited in the safety analyses for Waterford 3, but is assumed to function to maintain containment hydrogen concentration below 4%. The proposed change preserves this function. When controlling pressure, five second automatic isolation of the inside (CAR 200B) and outside (CAR 202B) containment isolation valves ensures that the large break LOCA analysis assumption remain bounding. The combination of automatic isolation and the small CARS pipe diameter (4 inches) limits the total volume released from containment to well below that assumed for other analyzed releases. Type C leak rate testing of the valves in question ensures that the total containment leakage volume will not exceed safety analysis assumptions at peak accident pressure. Therefore, the proposed change will not involve an increase in the probability or consequences of any accident previously evaluated.

(2) The proposed change adds a new inside containment automatic isolation valve in parallel with an existing system and changes the existing outside containment manual isolation valve to an automatic valve. The combination of automatic inside/outside containment isolation valves is a standard design implicitly analyzed and accepted over a wide range of systems and conditions. Therefore, the proposed change does not create the possibility of a new or different kind of accident.

(3) The CARs provides added assurance that a hydrogen burn or explosion would not occur following a LOCA. The proposed change will preserve the safety function of the CARS. Similarly, the five second closure criterion for the inside/outside containment isolation valves and appropriate leak rate testing preserves the assumptions of the limiting LOCA evaluation to ensure that off-site dose consequences are not increased. Therefore, the proposed change does not involve a reduction in safety margin.

The staff has reviewed the licensee's no significant hazards consideration analysis. Based on the review and above discussions the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room Location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

Attorney for licensee: Bruce W. Churchill, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N St., NW., Washington, DC 20037

NRC Project Director: Jose A. Calvo

Maine Yankee Atomic Power Company, Docket No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of application for amendment: March 1, 1988

Description of amendment request: The proposed amendment would modify the Technical Specifications to update Figure 5.2.-1 and Figure 5.2-2 in Technical Specification 5.2 "Organization" to reflect a successional change in the offsite corporate organization and associated changes in the functional reporting structure.

Basis for proposed no significant hazards consideration determination: The proposed changes to the Technical Specifications to reflect a successional change in the offsite corporate organization and associated changes in the functional reporting structure have been evaluated against the standards of 10 CFR 50.92 and have been determined to not involve a significant hazards consideration. These proposed changes do not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. This proposed change to the organizational charts in TS 5.2 are administrative in nature and have no effect on the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously evaluated. Since there are no changes in plant design or operation, inclusion of the proposed changes in the technical specifications would not create the possibility of a new or different kind of accident from any previously evaluated.

3. Involve a significant reduction in a margin of safety. For the reasons previously stated, adoption of the proposed change would not involve a significant reduction in safety margin for the plant.

Maine Yankee has concluded that the proposed changes to the Technical Specifications do not involve a significant hazards consideration as defined by 10 CFR 50.92. We have reviewed the licensee's analysis and have agreed with it. Accordingly, the Commission proposes to determine that this change does not involve a significant hazard.

Local Public Document Room location: Wiscasset Public Library, High Street, P.O. Box 267, Wiscasset, Maine 04578.

Attorney for licensee: J.A. Ritscher, Esq., Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02210.

NRC Project Director: Richard H. Wessman, Acting Director

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: April 16, 1987, November 3, 1987, and January 18, 1988

Brief description of amendment: In accordance with the requirements of 10 CFR 73.55, the licensee submitted an amendment to the Physical Security Plan for the Cooper Nuclear Station to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.C.3 of Facility Operating License No. NPF-46 to require compliance with the revised Plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on April 16, 1987, with additional information on November 3, 1987 and January 18, 1988, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the Supplementary Materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendment is appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Attorney for licensee: Mr. G.D. Watson, Nebraska Public Power District, Post Office Box 499, Columbus, Nebraska 68601.

NRC Project Director: Jose A. Calvo

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: September 29, 1987.

Description of amendment request: This amendment to the Technical Specifications will incorporate requirements for a halon system in the control room. This halon system is the fulfillment of a commitment made by the licensee and was documented by the staff in a safety evaluation report issued on November 6, 1985 in support of an exemption to 10 CFR 50, Appendix R.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c).

The licensee has determined and the NRC staff agrees that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed. Operation of the control room halon system is not assumed in any of the design basis accidents, since a fire is not assumed either as an initiating event or as a result of a design basis accident. Thus, adding a specification for operability of the new halon system or changing the required number of fire detectors has no impact on the design basis accidents.

2. Create the possibility of a new or different kind of accident from any previously analyzed. The new halon system may create the possibility of an inadvertent discharge of Halon 1301 due to failure of two smoke detectors or as a result of surveillance of the new halon system. However, even if this were to occur, the design halon concentration is well below toxic limits for halon concentration. Thus, this assures that inadvertent activation does not affect the ability of the control room operators to remain in the control room to take appropriate action for orderly plant shutdown. Hence, there is no significant impact on control room habitability, and this change does not represent a new unanalyzed accident.

3. Involve a significant reduction in a margin of safety. The operational and surveillance requirements of the new halon system represent more restrictive criteria. Hence, the margin of safety is increased.

Accordingly, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: December 18, 1987

Description of amendment request: The proposed amendment to the Technical Specifications will revise Section 3.7.A.3, "Primary Containment", and Basis 3.7.A.1 by removing the explicit permission to perform open reactor vessel criticality or low power physics testing.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). The licensee has determined and the NRC staff agrees that the proposed amendment will not:

1. Involve a significant increase in the probability of occurrence or consequences of an accident previously analyzed. The proposed change would in fact reduce the probability of an inadvertent criticality while the reactor vessel is open by removing permission to conduct reactivity tests with the reactor vessel head off..

2. Create the possibility of a new or different kind of accident from any previously analyzed. Making technical specifications more restrictive by discontinuing the performance of open vessel criticality and low power physics testing does not modify plant response to any transient or accident.

3. Involve a significant reduction in a margin of safety. The effects of these changes will not adversely impact plant protective boundaries. Also, the proposed basis revision represents additional conservatism, in that an inadvertent criticality due to criticality or l.p.p. testing will be prevented from occurring without containment integrity. Accordingly, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Accordingly, the staff has made a proposed determination that the application for amendment invloves no significant hazards consideration.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: February 8, 1988

Description of amendment request: The proposed amendment consists of a number of proposed changes to the Technical Specifications (Appendix A to Facility Operating License No. DPR-40) in Sections 2 and 5. The specification proposed changes are indicated below.

(1) The objective of Section 2.9.1 is changed to relate the criteria for regulatory compliance to annual radiation doses from effluents rather than to radionuclide concentrations in the effluents.

(a) Specification 2.9.1(1)a(i) is changed to correct a typographical error in the units for the concentrations of dissolved or entrained noble gases in liquid effluents.

(b) Specification 2.9.1(2)a(i) is changed to delete the word "instantaneous" in reference to radionuclide concentrations and to use the annual x/Q value for determination of nuclide concentrations.

(c) Specification 2.9.1(2)b the word "cumulative" is changed to "radiation" and the words "to each of the 16 cardinal sectors" are deleted in reference to quarterly calculations to ensure compliance with the annual dose design objectives of Specification 2.9.1 of the Basis.

(d) Section 2.9.1 of the Basis is changed to replace the word "concentration" with the words "annual dose" for consistency with the specification of this section.

(2) Specification 5.9.4a is changed to add a reference to 10 CFR 50.36a for the semi-annual reporting of radioactive effluents and deletes reference to Regulatory Guide 1.21, Revision 1, for the reporting format.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident from an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided a discussion regarding the above criteria which proposes to determine that the requested change does not involve a significant hazards consideration.

(1) Will the change involve a significant increase in the probability or consequences of an accident previously evaluated?

No. The subject changes do not involve a material alteration of equipment or a change in the method of monitoring routine radioactive gas releases. The proposed changes do not alter any inputs or methodologies utilized in safety analyses for the Fort Calhoun Station. The change in the requirements for report format has no impact on plant safety.

(2) Will the change create the possibility of new or different kind of accident from any accident previously evaluated?

No. The change involves no alteration of equipment, no change in gaseous release quantities and no change in release pathway. The change will simplify the gas releases for the operations staff and, therefore, reduce the possibility of human error. The proposed changes do not alter any inputs or methodologies utilized in safety analyses for the Fort Calhoun Station. The change in the requirements for report format has no impact on plant safety.

(3) Will the change involve a significant reduction in a margin of safety?

No. The annual exposure to a member of the public will not increase because the quantity of gas released annually will not increase. The proposed changes are expected to reduce the overall uncertainty in regulating radioactive gases during routine releases to unrestricted areas. The submittal meets the intent of NUREG-0472 for annual doses from gaseous effluents. The annual dose limits are the doses associated with the concentrations of 10 CFR Part 20, Appendix B, Table II, Column 1. These limits provide reasonable assurance that radioactive material discharged in gaseous effluents will not result in the exposure of a member of the public in an unrestricted area outside the site boundary to annual average concentrations exceeding the limits specified in Appendix B, Table II of 10 CFR Part 20. The specified release rate limits in accordance with NUREG-0472, restrict the corresponding gamma and beta dose rates above background to a member of the public at or beyond the site boundary, to less than or equal to 500 mRem/year to the total body and less than or equal to 3,000 mRem to the skin. These release rate limits also restrict the corresponding thyroid dose rate above background to a child via the inhalation pathway to less than or equal to 1500 mRem/year. The 10 CFR Part 50 annual exposure objectives are more restrictive than the 10 CFR Part 20 annual dose rates. The Fort Calhoun Station has never exceeded the more restrictive 10 CFR Part 50 annual exposure ojectives. Quarterly calculations will be done to track the status of the 10 CFR Part 50 annual exposure objective as per the Technical Specification 2.9.2B (1), (2), and (3).

If the quarterly dose calculation results exceed one-half the design objects, an investigation will be done, action will be taken to reduce the doses to the objectives and a special report will be submitted to the Commission in accordance with Technical

Specification 2.9.1(2)b. The proposed changes do not alter any inputs or methodologies utilized in safety analyses for the Fort Calhoun Station.

The proposed deletion of Regulatory Guide 1.21, Revision 1, from the Technical Specification and the addition of 10 CFR 50.36a does not involve a reduction in the margin of safety. The deletion of the Reg. Guide commitment will allow the report to reflect a comprehensive assessment of compliance to the Radiological Environmental Technical Specification.

The staff has reviewed the licensee's no significant hazards consideration determiniation and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed change to the Technical Specifications involves no significant hazards consideration.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102

Attorney for licensee: LeBoeuf, Lamb, Leiby and MacRae, 1333 New Hampshire Avenue, NW., Washington, DC 20036

NRC Project Director: Jose A. Calvo

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: February 19, 1988

Description of amendment request: The proposed amendment revises the thermal shock analysis in the Technical Specifications (Appendix A to Facility Operating License No. DPR-40). The specification proposed changes are in Section 2 and includes the change to the labels of the heatup and cooldown curves (Figures 2-1A and 2-1B) from 15.0 to 14.0 effective full power years (EFPY). Figure 2.3 is corrected to reflect the more conservative shift prediction equation associated with the limiting weld wire heat in the lower longitudinal weld seams. The predicted 40 year integrated flux was revised to be consistent with the fluence prediction equation used in this assessment and using the Draft Regulatory Guide 1.99 Revision 2 methodology Reference to 15.0 EFPY in the Basis Section is revised to 14.0 EFPY and the corresponding change from Cycle 16 to Cycle 15 is also made.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident from an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided a discussion regarding the above criteria which proposes to determine that the requested changes do not involve a significant hazards consideration because the proposed changes would not:

(1) Increase the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the safety analysis report. The proposed revision to the Technical Specification heatup and cooldown limit curves imposes more conservative limits on operation by revising the valid operating life of the existing curves from 15 EFPY to 14 EFPY. There has been no challenge to the reactor coolant system associated with using the previous curves since the Fort Calhoun Station has currently been operating for less than 10 EFPY. Therefore this amendment would not increase the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the safety analysis report.

(2) Create the possibility for an accident or malfunction of a different type than any evaluated previously in the safety analysis report. This amendment only revises the label defining the lifetime in EFPY of the Technical Specification heatup and cooldown limit curves. These curves are bounded by the existing Safety Analysis Report. There are no anticipated changes to the current operating practices. Therefore, the possibility of an accident or malfunction of a different type than any evaluated previously in the safety analysis report would not be created.

(3) Reduce the margin of safety as defined in the basis for any Technical Specification. The revised operating life for the existing curves was determined using a more conservative chemistry factor along with the shift prediction equation, including the appropriate 2 sigma margin, as presented in Regulatory Guide 1.99, Revision 2. Therefore, the margin of safety as defined in the basis for any Technical Specification is not reduced.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specifications involves no significant hazards consideration.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102

Attorney for licensee: LeBoeuf, Lamb, Leiby, and MacRae, 1333 New Hampshire Avenue, NW., Washington, DC 20036

NRC Project Director: Jose A. Calvo

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: December 15, 1987

Description of amendment request: The proposed amendment would revise the Susquehanna Steam Electric Station Units 1 and 2 Technical Specifications to revise Table 3.3.7.10-1, "Radioactive Liquid Effluent Monitoring Instrumentation."

There are two problems being addressed by this proposed change to the Technical Specifications:

1. Technical Specification Table 3.3.7.10-1, footnote *, currently requires that if any discharge valve interlock is in an off-normal condition or is not functioning, the monitor, including the sample pump, must be in operation. As a result, during periods when no releases are being made, the monitor and the sample pump may be required to operate for extended periods without liquid flow to pump. Operation in this mode could jeopardize the operability of the radiation monitoring system.

2. A modification to the Unit 1 and Unit 2 Cooling Tower Blowdown flow instrumentation is being installed during the Unit 2 Second Refueling and Inspection Outage. It revises the operation of the cooling tower blowdown low flow interlocks described in Technical Specification Table 3.3.7.10-1 such that their current description requires clarification.

For item 1 above, the footnoted information is rewritten to associate the blowdown flow interlocks with Instrument 3b (which has been renamed for clarity) instead of Instrument 1a, and revise Actions 100 and 102 to incorporate proper remedial requirements when effluent releases do not occur and discharge valve interlock malfunctions. These actions replace the inappropriate actions previously required via footnote *.

Specifically, the following changes are proposed under item 1.

Item 1a: Cooling tower blowdown low flow interlock should support instrument 3b instead of current interlock with sample pump and radiation monitor. The proposed change would force Action 102 instead of the current Action 100.

Item 1b: Removes a remedial action statement from footnote * to the appropriate locations in Actions 100 and 102.

Item 1c: Makes an editorial change renaming instrument 3b.

Item 1d: Deletes footnote * because the remedial action is being moved to Actions 100 and 102.

For item 2, the reference to "Unit 1 cooling tower blowdown low flow or Unit 2 cooling tower blowdown low flow", previously provided in footnote* is revised to read simply "cooling tower blowdown low flow" under new footnote **.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and concurs with the following basis and conclusions provided by the licensee in its December 15, 1987 submittal.

The proposed changes do not:

I. Involve a significant increase in the probability or consequences of an accident previously evaluated.

Item 1a: This change couples the blowdown flow interlocks with its associated flow instrumentation rather than with the radiation monitor. This allows Action 102 to be taken instead of Action 100 when the flow interlock is malfunctioning. Given the unmonitored release of liquid effluents as the event of concern, neither its probability nor its consequences will increase significantly because the interlocks on radiation will prevent any unacceptable release from occurring during operation under Action 102 - if any of these interlocks are inoperable, Action 100 must be in affect.

Item 1b: This change removes an inappropriate requirement (i.e., that the sample pump be operated under dry conditions), and replaces it with actions which will provide assurance that an inadvertent release will not occur (based on single failure criteria). This more positive action lessens the probability of an inadvertent release. Any adverse effect on the consequences of the event would have to result from the single failure criterion being violated; this is not considered credible.

Item 1c: This change involves renaming an instrument based on a plant-specific convention. Such an action is wholly editorial in nature and poses no impact on previous safety analyses.

Item 1d: .... This item is directly tied to Item 1b. I.e., it is only required because the operation of the sample pump and monitor is being replaced by the redundant isolation requirement. Therefore, the answer to Item 1b applies here as well.

Item 2: This change is the result of the correction of an overly conservative design deficiency. The requirement to monitor for 5000 gpm dilution flow has not changed, and although the change will describe a single interlock instead of two, monitors on blowdown flow from each unit still exist; their inputs are simply combined to remove unnecessary conservatism. This action will not result in an increase in the probability or consequences of any previous accident evaluation.

II. Create the possibility of a new or different kind of accident from any accident previously evaluated.

Item 1a: This change involves the use of a different action statement for an equipment malfunction. This action will allow effluent releases with this malfunction for a longer time, but will not cause any new events because no hardware changes or new operational actions result (see Item 1b for discussion of revision of operational actions in new actions 100 and 102).

Item 1b: For the cases where effluent releases are not occurring, an operational change is proposed in both Actions 100 and 102. The Actions are revised to ensure redundant isolation rather than continuous monitoring. The redundant isolation is being accomplished by existing valves, and therefore no new events are postulated. The lack of continuous monitoring does not create a new concern because of the redundant isolation; i.e., based on single failure criteria, the redundant valve precludes the need for continuous monitoring to prevent an inadvertent release.

Item 1c: This change involves renaming an instrument based on a plant-specific convention. Such an action is wholly editorial in nature and will not create any new concerns.

Item 1d: As discussed previously, this item is a direct result of the change in 1b; therefore the answer to 1b applies here.

Item 2: This change, which replaces unit specific flow interlocks with a common interlock, does not create any new failure modes because there is no interdependence between the two interlocks now. Therefore, two independent functions are being replaced by a single function with the same potential failure modes.

III. Involve a significant reduction in a margin of safety.

Item 1a: This change allows a less restrictive action to be taken if the flow instrumentation is inoperable. This does not result in a significant reduction in safety margin because:

a. As mentioned previously, evidence exists that Action 102 was intended to be associated with the flow instrumentation, and

b. The flow instrumentation is less important than the radiation instrumentation in guarding against an unacceptable release.

Item 1b: This change improves safety in the following ways:

a. it removes an action requirement from a footnote;

b. it deletes an action that could jeopardize equipment integrity; and

c. it ensures positive protection against an inadvertent release.

Item 1c: This change involves renaming an instrument based on a plant-specific convention. Such an action is wholly editorial in nature and has no impact on safety margin.

Item 1d: As discussed previously, this item is a direct result of the change in 1b; therefore the answer to 1b applies here.

Item 2: The current design of SSES is overly conservative in that it may require greater than the minimum dilution flow necessary to the requirements specified in the ODCM. The ODCM requirement of 5000 gpm ensures all necessary safety margin. This change will continue to provide this safety margin and therefore, no significant reduction is being proposed.

Based on the above considerations, the Commission proposes to determine that the proposed changes involve no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037

NRC Project Director: Walter R. Butler

Portland General Electric Company et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: February 4, 1988

Description of amendment request: The proposed amendment would revise Trojan Technical Specification (TS) Section 3/4.7.3, "Component Cooling Water System (CCW)," and associated bases, to be consistent with the "Split Train" mode of operation of the CCW System. It is proposed that one train solely serve safety-related cooling loads, and be isolated from the other train which will serve nonsafety-related nonseismic loads, as well as safety-related cooling loads. This amendment is proposed in order to assure the operability of the CCW system following a seismic event.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will not involve a significant hazards consideration if the proposed amendment does not: (i) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (ii) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) Involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed amendment against the standards of 10 CFR 50.92, and has determined the following:

1. The proposed changes do not significantly increase the probability or consequences of an accident previously evaluated.

The accident scenario of concern is a loss of all CCW due to a seismic-induced rupture of the non-seismic category I CCW piping. With the CCW flow paths in their original configuration, the probability of loss of all CCW would be higher than with the system in a split-train configuration. Isolating one train of CCW from the non-seismic category I flow path during Modes 1 through 4 provides greater assurance of CCW supply to safe shutdown loads following a seismic event.

Maintaining the spare CCW pump operable in Modes 1 through 4 assures that a CCW loop can be made available even if a single-failure is assumed to occur concurrent with a seismic event. This provides greater assurance of CCW availability than the current Technical Specification requirement.

During Modes 5 and 6, the proposed change will require that at least two CCW trains, or at least one CCW train and the spare CCW pump, be operable. This provision is an enhancement over the current provisions in the Technical Specifications and therefore will provide greater assurance of CCW restoration following a seismic event. Also, because the plant is in at least a cold shutdown condition during these modes and timely recovery actions can be expected, the consequences of a seismically induced failure are bounded by current FSAR accident analyses.

Since the proposed changes enhance the availability of CCW following a seismic event, the probability and consequences of an accident previously evaluated are not increased.

2. The proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated.

Operating the CCW System in a split-train configuration during Modes 1 through 4, as previously described, ensures that there will be a continuous supply of cooling water to safe shutdown equipment following a seismic event. In the event of an earthquake and single active failure, the spare CCW pump will be available to supply CCW to safe shutdown equipment.

A design basis accident (DBA) is not assumed to occur simultaneously with a seismic event that ruptures the non-seismic category I CCW piping. Therefore, at least one train of ESF equipment would be available to respond to accident demands assuming a single-failure in the other train with the CCW System aligned in a split-train configuration.

During Modes 5 and 6, the proposed change will require that at least two CCW trains, or at least one CCW train and the spare CCW pump, be operable. This provision is an enhancement over the current provisions in the Technical Specifications. Since this change provides greater assurance of CCW System restoration following any seismic-induced failures in the non-seismic category I portion of the system, an accident of a new or different kind from any previously evaluated will not be created.

The changes proposed provide greater assurance that CCW will be available to serve safe shutdown equipment than does operation in the original lineup. Therefore, the proposed changes will not result in the creation of an accident of a new or different kind than previously evaluated.

3. The proposed changes do not involve a significant reduction in a margin of safety.

Changing the operation of the CCW System to a split-train configuration during plant operating modes provides greater assurance that CCW will be available in the event of a seismically induced rupture in the non-seismic category I CCW piping than does operation in the original lineup. Providing additional controls on maintaining operability of the spare CCW pump also provides greater assurance of CCW System availability assuming a single-failure occurs concurrent with the seismic event. Therefore, no margins of safety are reduced.

The staff has reviewed the licensee's no significant hazards analysis and concurs with their conclusions. As such, the staff proposes to determine that the requested changes do not involve a significant hazards consideration.

Local Public Document Room location: Portland State University Library, 731 S.W. Harrison Street, Portland, Oregon 97207

Attorney for licensee: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRC Project Director: George W. Knighton

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: December 2, 1986 and September 4, 1987

Description of amendment request: In accordance with the requirements of 10 CFR 73.55, the licensees submitted an amendment to the Physical Security Plan for the Hope Creek Generating Station to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.E of Facility Operating License No. NPF-57 to require compliance with the revised Plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on December 2, 1986, and September 4, 1987, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the Supplementary Materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendments is appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Walter R. Butler

Rochester Gas and Electric Corporation, Docket No. 50-244, R.E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request: March 10, 1987 as supplemented by letter dated January 26, 1988

Description of amendment request: The proposed changes incorporate on-line reactor trip breaker testing into the Technical Specification.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

This change in Technical Specifications is in accordance with the Generic Letter 85-09 testing requirements of the reactor trip breakers within the plant. A possible consequence of this change is that over a period of time, additional plant trips may occur through actions taken during monthly testing of the reactor trip breakers. Occasional trips are considered within the normal operating conditions at a power plant.

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610

Attorney for licensee: Harry Voigt, LeBoeuf, Lamb, Leiby and McRae, Suite 1100, 1333 New Hampshire, NW. Washington, DC 20036

NRC Project Director: Richard H. Wessman, Director

Rochester Gas and Electric Corporation, Docket No. 50-244, R.E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request: January 19, 1988

Description of amendment request: The proposed amendment would change the expiration date for the R.E. Ginna Nuclear Power Plant Operating License, DPR-18, from April 25, 2006 to September 18, 2009. The Technical Specifications for the plant would not be affected. The current term of the Operating License is 40 years, commencing with the April 25, 1966 issuance of the Construction Permit. This represents an effective Operating License (OL) term of approximately 37 years and 7 months. Current NRC practice as stated in 10 CFR 50.51 is to issue an Operating License with a term of 40 years from date of OL issuance. This amendment proposes to extend the OL in accordance with current practice.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; (3) involve a significant reduction in a margin of safety.

The licensee's analyses contained in the January 19, 1988, letter states the following:

The proposed amendment to the Ginna operating license does not involve any changes in the design, operation or Technical Specifications of the facility, but instead, only requests a change to the expiration date of the current license. This extension is within the range permissible by the Commission's regulations, specifically 10 CFR 50.51. In addition, a finding of no significant hazards consideration is consistent with recent NRC actions on applications of this type. The proposed extension will have no significant impact on the safe operation of the plant or present an undue risk to the health and safety of the public.

The proposed license amendment to permit the 40-year operating life does not constitute a significant hazards consideration as defined in 10 CFR 50.92 for the following reasons:

The R.E. Ginna Nuclear Power Plant was designed and constructed primarily on the basis of 40 years of plant operation. For example, the reactor vessel was designed and fabricated for a 40-year life. A comprehensive vessel materials surveillance program is maintained in accordance with 10 CFR Part 50, Appendix H. Analyses were performed to demonstrate compliance with the NRC pressurized thermal shock screening criteria. All of the RT_{PTS} values remain below the NRC screening values for PTS using the projected fluence exposure through 32 EFPY. At the projected capacity factor of 80% this corresponds to the 40-year life of the plant. This information was contained in WCAP-11028 which was transmitted to the NRC on January 13, 1986 as an attachment to a letter from R. Kober of RG&E to G. Lear.

The analyses contained in the R.E. Ginna Nuclear Power Plant Final Safety Analysis Report were performed on the basis of not less than 40 years of expected plant life.

Analyses and information presented in the R.E. Ginna Nuclear Power Plant Environmental Report, in general, were not dependent on any specific period of plant operation.

Procedures and programs are in place to detect abnormal deterioration and aging of critical plant components. Examples include:

a. Plant pressure retaining vessels, piping, and support systems are inspected in accordance with Section XI of the ASME Boiler and Pressure Vessel Code and 10 CFR Part 50, Section 50.55a(g), except where specific written relief has been granted by the NRC pursuant to 10CFR50, Section 50.55a(g)(6)(i). Safety-related pumps and valves are included in a test program meeting the requirements of Section XI of the Code and the plant Technical Specifications.

b. Safety-related electrical equipment has been environmentally qualified in accordance with the requirements of 10 CFR Part 50, Section 50.49. Aging analyses establish required intervals for equipment replacement. No items would be affected by the extension.

c. A number of special inspections and investigations have been performed by the R.E. Ginna Nuclear Power Plant technical staff providing additional assurance that abnormal or unanticipated degradation will not occur in components required for safe and reliable plant operation. These inspections have included such items as pipe, valve, and fitting wall thickness measurements in steam, feedwater and condensate lines subject to erosion. As an example of this ongoing effort, a motor operated valve diagnostic program is being implemented at Ginna. This program is providing valuable data to insure continued reliability and performance of the motor operated valves. Additional inspections of this nature will be identified as part of the R.E. Ginna plant-specific PLEX Program.

The requested extension on the R.E. Ginna Nuclear Power Plant license will allow the plant to operate for the length of time contemplated during the design process. The station has programs and procedures in place to monitor the power plant to give reasonable assurance that equipment and systems will continue to meet their design parameters. The extension of the licensed operating period, therefore, will not significantly increase the probability or consequences of accidents that have been previously evaluated.

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards consideration is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

Attorney for licensee: Harry Voigt, Le Boeuf, Lamb, Leiby and McRae, Suite 1100, 1133 New Hampshire Avenue, NW., Washington, DC 20036.

NRC Project Director: Richard H. Wessman

Rochester Gas and Electric Corporation, Docket No. 50-244 R.E.Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request: February 8, 1988

Description of Amendment: To correct an inconsistency associated with the monitoring of the containment mini-purge releases, and to clarify actions following inoperability for 31 days of the monitoring instruments.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The proposed revisions clarify the tables associated with the monitoring of the containment purge releases and the action statements following the inoperability for 31 days of the monitoring instruments. The changes are administrative in nature because they do not change the physical aspects of the plant, equipment, or previously approved operations.

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

Attorney for licensee: Harry Voigt, Le Boeuf, Lamb, Leiby and McRae, Suite 1100, 1133 New Hampshire Avenue, NW., Washington, DC 20036.

NRC Project Director: Richard H. Wessman

South Carolina Electric and Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station Unit 1, Fairfield County, South Carolina

Dates of amendment request: December 12, 1986, October 14, 1987, November 13, 1987, and December 15, 1987

Description of amendment request: In accordance with the requirements of 10 CFR 73.55, the licensee has submitted a proposed amendment to the Physical Security Plan for the Virgil C. Summer Nuclear Station to reflect recent changes to that regulation. The proposed amendment would modify paragraph 2.E of Facility Operating License No. NPF-12 to require compliance with the revised plan.

Basis for proposed no significant hazards consideration determination: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on December 12, 1986, October 14, 1987, November 13, 1987, and December 15, 1987 to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

In the supplementary materials accompanying the amended regulations, the Commission indicated that it was amending its regulations "to provide a more safety conscious safeguards system while maintaining the current levels of protection" and that the "Commission believes that the clarification and refinement of requirements as reflected in these amendments is [sic] appropriate because they afford an increased assurance of plant safety."

The Commission has provided guidance concerning the application of the criteria for determining whether or not a no significant hazards consideration exists by providing certain examples of actions not likely to involve significant hazards considerations and examples of actions likely to involve significant hazards considerations (51 FR 7750). One of the examples of actions not likely to involve significant hazards considerations is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Fairfield County Library, Garden and Washington Street, Winnsboro, South Carolina 29180

Attorney for licensee: Randolph R. Mahan, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, South Carolina 29218

NRC Project Director: Elinor G. Adensam

South Carolina Electric and Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station Unit 1, Fairfield County, South Carolina

Date of amendment request: February 10, 1988

Description of amendment request: On February 10, 1988, an amendment was proposed to revise Section 6.0 of the Technical Specifications (TS). The purpose of the proposed revision is to establish a clear and independent access to senior management regarding matters of nuclear safety. Specifically Section 6.5.2, "NUCLEAR SAFETY REVIEW COMMITTEE", is proposed to be modified to indicate that the Executive Vice President, Operations now has an integral role in the NSRC. Under 6.5.2.2, "COMPOSITION", and 6.5.2.3, "ALTERNATES", it is now proposed that the Executive Vice President, Operations, in consultation with the Vice President, Nuclear Operations shall appoint the Chairman and the other members of the NSRC and their alternates. Presently these individuals are appointed by the Vice President, Nuclear Operations. Under 6.5.2.8, "AUDITS", the Executive Vice President, Operations is proposed to be added to the list of entities with the authority for determining any area of unit operation appropriate for an audit for which NSRC shall have cognizance. Under 6.5.2.9, "AUTHORITY", it is now proposed that the NSRC report to the Executive Vice President, Operations rather than to the Vice President, Nuclear Operations as in the present TS. It is also proposed under 6.6.2.10, "RECORDS", that the records of NSRC activities be forwarded to the Executive Vice President, Operations in addition to the Vice President, Nuclear Operations.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR Part 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined that the proposed amendment does not involve a significant hazards consideration as follows.

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated because the amendment affects administrative controls which do not affect the physical operation of the plant. Clear independent access to senior management will be further established in matters of nuclear safety.

2. The proposed amendment does not create the possibility of a new or different kind of accident than previously evaluated because the proposed change is administrative in nature and no physical alterations of plant configuration or changes to setpoints or operating parameters are proposed.

3. The proposed amendment does not involve a significant reduction in a margin of safety. The proposed amendment concerns changes to the management oversight of the Nuclear Safety Review Committee (NSRC) which will not reduce the margin of safety in any way. The level of NSRC member expertise in the designated areas, as specified in Section 6.5.2.1 of the Technical Specifications, will be maintained with the proposed amendment.

The NRC staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that these changes do not involve significant hazards considerations.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180

Attorney for licensee: Randolph R. Mahan, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, South Carolina 29218

NRC Project Director: Elinor G. Adensam

Southern California Edison Company, et al., Docket No. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: October 15, 1986

Description of amendment request: The proposed amendment would revise the control rod drop time from 2.7 seconds to 2.44 seconds to be consistent with the safety analysis for the facility.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91, the licensee has provided its analysis as to whether or not the proposed amendment involves a significant hazards consideration, as follows:

> The proposed change discussed above shall be deemed to constitute a significant hazards consideration if a positive finding is made in any of the following areas: (1) Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated? *Response:* No. This proposed change would revise the current technical specification acceptance criterion to conform with the design basis for the FSA accident analyses. The acceptance criterion for control rod drop time as used in the previously evaluated accident analyses in the FSA will not be impacted by this proposed change. Therefore, under no circumstances will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated. (2) Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated? *Response:* No. Measurement of control rod drop time provides a mechanism for detection of potential deterioration of function. This proposed change will not impact the ability or the method of performing this task. This change will incorporate the appropriate acceptance criterion into the Technical Specifications, and in doing so, will provide consistent acceptance criterion with the FSA accident analyses. As a result, under no circumstances will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated. (3) Will operation of the facility in accordance with this proposed change involve a significant reduction in a margin of safety? *Response:* No. The margin of safety for this Technical Specification is defined by the ability to insert negative reactivity into the reactor by control rod insertion in a timely manner. This change will reduce the maximum allowable time for control rod insertion in the technical specifications. In actuality, however, the proposed change will have no impact on the margin of safety since the reduced acceptance criterion will be consistent with the design basis for the FSA accident analyses. Based on this consideration, the proposed specification will

OL 53 SS 56 MR 23 988 MI

ensure the ability to insert negative reactivity into the reactor by control rod insertion in a timely manner. Therefore, it is concluded that under no circumstances will operation of the facility in accordance with this proposed change involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870) of amendments that are considered not likely to involve significant hazards considerations. This proposed change to the specifications is most similar to example (ii) related to a change that constitutes a more stringent surveillance requirement.

The NRC staff has reviewed this analysis and agrees that the criteria appear to be satisfied. The NRC staff therefore proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: General Library, University of California, P. O. Box 19557, Irvine, California 92713.

Attorney for licensee: Charles R. Kocher, Assistant General Counsel, and James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770

NRC Project Director: George W. Knighton

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment request: May 12, 1987 (Reference PCN-197)

Description of amendment request: The proposed change will revise Technical Specification 3.1.3.6, "Regulating CEA Insertion Limits," 3.1.3.7, "Part Length CEA Insertion Limits," and 3.10.2, "Group Height, Insertion and Power Distribution Limits," as well as Bases 3/4.1.3, "Movable Control Assemblies."

Technical Specification 3.1.3.6 currently provides restrictions on control element assembly (CEA) insertion limits to periods less than or equal to 14 effective full power days (EFPD) per calendar year. The proposed change would replace "calendar year" with "365 EFPD interval."

The part length CEA (PLCEA) insertion limits of Technical Specification 3.1.3.7 are intended to ensure that adverse power shapes and rapid local power changes which affect radial peaking factors and departure from nucleate boiling (DNB) considerations do not occur as a result of a part length CEA group covering the same axial segment of the fuel assemblies for an extended period of time during operation. However, the Specification does not clearly specify the allowable duration within the transient insertion limit nor does it clearly address operation within the long term steady state insertion limit. The long term steady state limit is based on the expected variation of the steady state radial peaking factors with burnup. It serves to limit the behavior of the radial peaking factors within acceptable bounds determined from analyses. The transient insertion limit aids in ensuring that the minimum shutdown margin is maintained and that the potential effects of a CEA ejection accident are limited to acceptable levels. Long term operation at the transient insertion limit is not permitted since such operation could have effects on the core power distribution which could invalidate assumptions used to determine the behavior of the radial peaking factors. The proposed change would restrict the part length CEA group insertion to the insertion limits of Figure 3.1-3 with insertion between the long term steady state insertion limit and the transient insertion limit restricted to intervals less than or equal to 7 EFPD per 30 EFPD interval and intervals less than or equal to 14 EFPD per 365 EFPD interval. The proposed would change also revise the actions to be taken if part length CEA groups are inserted beyond the transient limit or between the long term steady state insertion limit and the transient insertion limit for excessive periods of time. The applicability of Specification 3.1.3.7 has been revised frome Modes 1 and 2 to Mode 1 above 20% of rated power. In addition the proposed change to Specification 4.1.3.7 would revise the Surveillance Requirement so that part length CEA group position is determined every 12 hours to be within the transient insertion limit and the accumulated time for insertion beyond the long term steady state insertion limit but within the transient insertion limit is determined every 24 hours.

The proposed change would also revise Specification 3.10.7 to allow suspension of the insertion limits of Specification 3.1.3.7 during special physics tests.

The proposed change would revise the Bases to Specifications 3.1.3.6 and 3.1.3.7 to clarify the extreme limits of CEA travel (fully withdrawn and fully inserted CEA positions). The terms upper electrical limit and lower electrical limit are used to describe the fully withdrawn and fully inserted CEA positions. Furthermore, the CEA fully withdrawn position would be defined as greater than or equal to 145 inches.

Basis for proposed no significant hazards consideration determination: The NRC staff proposes to determine that the proposed amendment does not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed change maintains the required shutdown margins in the facility, thus avoiding any increase in the probability or consequences of an accident previously evaluated. The PLCEA insertion limits are included in the ground rules for the reload analyses for each cycle of operation. This change clarifies the Technical Specification for the plant operators to clearly describe the use of the insertion limits. Therefore, operation of the facility in accordance with this proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change would not alter operation of the facility or the manner in which it is operated. The purpose of the proposed change is to clarify the Technical Specifications. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Insertion limits remain unchanged, therefore, operation of the facility in accordance with this proposed change does not involve a significant reduction in a margin of safety.

Local Public Document Room location: General Library, University of California at Irvine, Irvine, California 92713.

Attorneys for licensee: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P. O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NRC Project Director: George W. Knighton

The Cleveland Electric Illuminating Company, Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, Toledo Edison Company, Docket No. 50-440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of amendment request: November 19, 1987

Description of amendment request: The proposed amendment would add a surveillance requirement to include verification of trip setpoints during weekly channel functional tests of the Intermediate Range Neutron Monitors (IRM's). It would also change the frequency for channel calibration of the control rod block function from semi-annual to once per refueling interval.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating licenese for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The licensees have stated that the IRM control rod block function is not relied upon in any of the accident or transient analyses of Final Safety Analysis Report Chapter 15. Therefore, changes related to the surveillance frequency for this instrumentation function would not affect any previously evaluated accident.

The licensees have also stated that the extension of the frequency of an existing surveillance requirement would not create the possibility of a new or different kind of accident from any previously evaluated. The staff agrees that the extension of frequency of a surveillance interval cannot, by itself, create the possibility of a new or different kind of accident from any previously evaluated. The addition of a new surveillance requirement to perform weekly trip setpoint checks matches example (ii) of previously published Commission guidance on actions not likely to involve a significant hazards consideration (51 FR 7751).

The licensee has also stated that the proposed amendment would not involve a significant reduction in a margin of safety. This is due to the fact that the safety-related IRM input for the reactor protection system (RPS) is on an approved 18-month calibration frequency and, therefore, extending the calibration frequency from 6 to 18 months for the rod block IRM input should not present a significant reduction in a margin of safety. The staff agrees that, while the acceptability of extending the calibration frequency for the IRM rod block function from 6 to 18 months is dependent on other considerations besides maintaining consistency with the calibration frequency of the RPS input from the same IRM, granting the proposed amendment would not significantly decrease a margin of safety due the peripheral safety significance of the IRM rod block function as compared to the IRM RPS input.

Therefore, the staff proposes to determine that the amendment involves no significant hazards considerations.

Local Public Document Room location: Perry Public Library, 3753 Main Street, Perry, Ohio 44081.

Attorney for licensee: Jay Silberg, Esq., Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Kenneth E. Perkins.

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of amendment requests: January 14, 1988 (TS 237)

Description of amendment requests: The proposed amendment involves two changes:

1. The first change is applicable to Browns Ferry Units 1 and 2 only. The proposed change corrects a footnote referenced in Table 3.2.B, Instrumentation that Initiates or Controls the Core and Containment Cooling Systems. The table entry is changed to reference note 18 instead of 14.

2. The second change applies to Browns Ferry Units 1, 2, and 3. The proposed change will delete the reference to footnote 4 in Table 4.2.K, Radioactive Gaseous Effluent Instrumentation Surveillance, for entry number 5.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated because they do not result in a change in the current plant configuration. Rather, they correct table entries in the Technical Specifications (TS) consistent with the present plant design and function of the instruments involved.

The proposed changes do not create the possibility of a new or different kind of accident than previously evaluated because they only correct typographical errors and make the technical specifications consistent with industry standards. The proposed amendment will not eliminate or modify any protective functions currently installed at the plant, nor will it permit any new operational conditions.

The proposed changes do not involve a significant reduction in a margin of safety because the changes are administrative in nature and only correct typographical errors and inconsistencies in the TS.

Based on our review of the proposed amendment the Commission proposes to determine that the proposed change to the Browns Ferry TS involves no significant hazards consideration.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

NRC Assistant Director: Gary G. Zech

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: June 17, 1985, and letters dated November 22, 1985 and March 20, 1986.

Description of amendment request: The proposed change would revise the Technical Specifications (TS) Action Statement concerning the Limiting Condition for Operation for the main steam line code safety valves. The revision would require the plant to go to Mode 4 (hot shutdown) within 12 hours following Mode 3 (hot standby) rather than to Mode 5 (cold shutdown) during valve inoperability. This change would correct an inconsistency between the

BEST COPY AVAILABLE

VOL 53 ISS 56 MR 23 1988 MI

Applicability requirement and the Action Statement. The safety valves are required to be operable in Modes 1, 2 and 3, and a transition to Mode 5 is required during valve inoperability. Since applicability is not required in Mode 4, the Action Statement should require the plant to go to Mode 4. This notice was previously published July 2, 1986 (51 FR 24264) and is being republished to correct the omission of the time change to reach Mode 4.

Basis for proposed no significant hazards consideration determination: The Commission had provided guidance concerning the application of the standards for determining no significant hazards considerations by providing certain examples (51 FR 7751). Example (i) of amendments not likely to involve significant hazards considerations is an administrative change to technical specifications, such as a change to achieve consistency throughout the TS's, or correction of an error. The proposed amendment meets administrative change standards since the revision corrects an inconsistency within the Limiting Condition for Operation. On this basis, the Commission proposes to determine that the proposed amendment does not involve a significant hazards consideration.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20036.

NRC Project Director: Kenneth E. Perkins.

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: January 4, 1988

Description of amendment request: The proposed amendment would revise the provisions in the Technical Specifications (TS's) relating to the Reactor Coolant System boron concentration requirement during refueling conditions as specified in TS Section 3.9.1. Specifically, the proposed amendment would: (1) delete a footnote that specifies that the reactor shall be maintained in Mode 6 whenever the reactor vessel head is unbolted or removed; and (2) delete the opening phrase, "With the reactor vessel head unbolted or removed," from Specification 3.9.1.

Basis for proposed no significant hazards consideration determination: The Commission has made a proposed determination that the proposed amendment would involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.59, this means that the operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed change against the above standards as required by 10 CFR 50.91(a). The Commission has reviewed the licensee's evaluation and agrees with it. The licensee concluded that:

A. The change does not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed change does not modify the basis for reactivity control nor does it change the requirement to maintain adequate shutdown margin. The proposed change merely clarifies that the boration requirement for the Reactor Coolant System is not applicable when the reactor does not contain any fuel.

B. The change does not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change does not affect any system, equipment, or procedure, and the requirement to maintain adequate shutdown control remains unchanged. When the reactor does not contain any fuel, there is no reactor core criticality concern, and, therefore, there is no need for boron concentration control in the Reactor Coolant System.

C. The change does not involve a significant reduction in a margin of safety because boron concentration control requirements are still effective when there is fuel in the reactor.

The Commission proposes to determine that the proposed amendment does not involve a significant hazards consideration.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Kenneth E Perkins.

Virginia Electric and Power Company, Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of amendment request: March 3, 1988

Description of amendment request: The proposed changes would modify the Limiting Condition for Operation (LCO) and the surveillance requirements of Technical Specification (TS) 3/4.7.14 as follows:

a. A new action statement "b" would be added which requires the establishment and demonstration of operability of the backup fire suppression system when the diesel-driven fire pump is inoperable for performance of the 18-month inspection. (TS 4.7.14.1.2.c).

b. Surveillance requirement 4.7.14.1.2.c would be changed by deleting the phrase "during shutdown," and adding a reference to the new action statement "b" as specified above.

c. A footnote would be added to surveillance requirements 4.7.14.1.1, 4.7.14.1.2, and 4.7.14.1.3 for Unit 2 which provides clarification that the fire suppression system is common to Unit 1 and therefore the surveillance need only be performed once per defined interval.

d. Correct a typographical error in action statement "a".

The fire suppression system for the North Anna Power Station includes two high pressure fire water pumps, one motor-driven and the other diesel engine-driven. This suppression system is shared by both units. Currently, TS 4.7.14.1.2.c requires that an inspection of the diesel engine be performed at least once per 18 months, during shutdown, in accordance with procedures prepared in conjunction with the engine manufacturer's recommendations. The proposed changes would continue to require an inspection at least once per 18 months, but would eliminate the restriction that the inspection be performed "during shutdown." Instead, the proposed changes would allow the 18-month inspection to be carried out with both units operating, but would require that a backup fire suppression water system be established and demonstrated operable within 24 hours of removing the diesel engine-driven fire pump from service for the purpose of performing this inspection. In the event that the diesel engine is not returned to operable status within 7 days, the proposed changes impose the requirement to submit a Special Report as called for by TS 3.7.14.1 Action "a".

The proposed changes are requested in order to eliminate the ambiguity of the "during shutdown" clause which is not specific as to whether one or both units must be shut down, and to allow flexibility with respect to the timing of the 18-month inspection while retaining the degree of fire suppression system redundancy appropriate for the operational status of the units. Although the 18-month inspection of the fire pump diesel engine will normally be performed during a unit outage, the flexibility afforded by the proposed changes would eliminate the need to (1) extend the surveillance interval beyond that allowed by the TS, or (2) shut down one or both units in the event of unforeseen changes to the outage schedules for both units.

To date, the licensee has interpreted the clause "during shutdown" to mean that only one unit is required to be shut down during the performance of the 18-month diesel engine inspection. This interpretation was based on the licensee's understanding that the purpose of the shutdown clause was to reduce the nuclear safety risk associated with a fire, while the diesel fire pump was unavailable, to the extent practical, given the NRC-approved fire suppression system design. That is, the increased risk associated with removing the diesel-driven fire pump from service for the purpose of performing a comprehensive inspection was balanced by the decrease in risk associated with having one unit in a shutdown condition. Furthermore, when the diesel-driven fire pump was removed from service for the purpose of performing the 18-month inspection, Action Statement "a" of TS 3.7.14.1 was applied. This Action Statement required that the inoperable equipment (in this case, the diesel-driven fire pump) be restored to operable status within 7 days or the licensee would be required to submit a Special Report to the NRC within the next 30 days outlining the plans and procedures to be used to provide the loss of redundancy in this system.

With the proposed changes, the increased risk associated with removing the diesel-driven fire pump from service to perform the 18-month inspection while both units are operating would be offset by requiring the restoration of the same degree of redundancy that exists when both the motor- and diesel-driven fire pumps are operable. This is accomplished by the proposed requirement to have the motor-driven fire pump and a backup fire suppression system (which includes pumps) operable. Also, a Special Report to the Commission would be required if the diesel-driven fire pump is not restored to operable status within 7 days. The proposed changes allow the diesel-driven fire pump to be removed from service for the 18-month surveillance only if the motor-driven fire pump is operable. With the diesel-driven pump removed from service for the 18-month inspection, Action Statement "c" of LCO 3.7.14.1 would apply in the event that the motor-driven fire pump became inoperable.

Footnotes are being added to the surveillance requirements for the Unit 2 Specifications 4.7.14.1.1, 4.7.14.1.2, and 4.7.14.1.3 to clarify that the surveillances need only to be performed once per interval to satisfy both units' surveillance requirements since the fire suppression system is common to both units. Presently, both units' specifications include the same requirements. Finally, a typo is being corrected in Action "a" of 3.7.14.1 for both units.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The proposed changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes will maintain the same balance-of-risk associated with removing the diesel-driven fire pump from service for the 18-month engine inspection that is maintained by the current TS 3/4.7.14. Accordingly, the probability of previously evaluated accidents will remain unchanged. Similarly, the consequences of previously evaluated accidents will remain unchanged since the proposed changes result in the same degree of fire suppression system capability as is currently required. Therefore, the proposed changes do not involve any increase in the probability or consequences of an accident previously evaluated.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes deal with the establishment of the degree of fire suppression system redundancy (and therefore capability) appropriate for the operating status of the units during those periods when the diesel-driven fire pump is removed from service for a specific inspection. The proposed changes do not add or delete equipment which could cause a fire or be used to mitigate the effects of a fire. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) Involve a significant reduction in a margin of safety.

The existing margin of safety is defined by the current requirement to have at least one unit shutdown and an operable electric motor-driven fire pump when performing the 18-month fire pump diesel engine inspection. The proposed changes would maintain this same margin of safety by requiring that both the motor-driven fire pump and a backup fire suppression system be operable whenever the 18-month diesel engine inspection is performed. Therefore, the proposed changes do not involve any reduction in a margin of safety.

Therefore, the proposed changes meet the criteria specified in 10 CFR 50.92(c) and, thus, the NRC staff proposes to determine that the proposed changes involve no significant hazards considerations, and that operation of the facility in accordance with the proposed changes would not involve a significant hazards consideration.

Local Public Document Room location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Herbert N. Berkow

Virginia Electric and Power Company, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of amendment requests: March 1, 1988

Description of amendment requests: The proposed amendments would modify Section 4.4, "Containment Tests" of the Surry Units 1 and 2 Technical Specifications to reflect the use of the Mass-Point method for calculating containment leakage rates which is described in ANSI/ANS-56.8-1981, "Containment System Leakage Testing Requirements." The Mass-Point method is considered to be superior to the other methods used for determining the containment leakage rates. Also, the Bases would be changed to reflect the use of the ANSI 56.8-1981 standard.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Virginia Electric and Power Company (the licensee) has evaluated the change request against the standards provided above and has determined that:

> (1) The proposed amendment [would] not involve an increase in the probability or consequences of an accident previously evaluated. The [Mass-Point] technique for calculation of the containment leakage rate is a newer, more accurate and NRC staff-endorsed method. It, or any other calculated method used to determine containment leakage rates during testing, is not considered to be an initiator of any accident previously evaluated.
>
> The [Mass-Point] technique is judged to be a superior method for calculating containment leakage rates, and thereby a better method of verifying that leakage from the containment is maintained within allowable limits. By employing a more reliable calculational technique, the assessment of containment integrity, through integrated leak rate testing, is enhanced. As such, the consequences of previously evaluated accidents are not negatively impacted.
>
> (2) The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed amendment provides for the use of a newer, more accurate technique for calculation of the leakage rate during a containment integrated leak rate test. No possibility of a new or different kind of accident is created since the technique used to calculate leak rates in itself is not considered to be an initiator of any accident, transient, incident, or event.
>
> (3) The proposed amendment does not involve a reduction in a margin of safety. The proposed change allows the use of the [Mass-Point] technique to calculate the leakage rate from the containment when performing a containment integrated leak rate test. The [Mass-Point] technique is a newer, more accurate method which has been endorsed by the NRC staff. By adopting this technique, [the licensee] will be able to make a more reliable determination of containment leakage during an integrated leak rate test. As such, the degree of confidence in containment integrity would be enhanced. Therefore, this proposed revision does not impact the margin of safety.

Based on the above evaluation, the licensee has determined that the proposed change involves no significant hazards considerations.

The NRC staff has made a preliminary review of the licensee's analyses of the proposed change and agrees with licensee's conclusion that the three standards in 10 CFR 50.92(c) are met. Therefore, the staff proposes to determine that the proposed amendments do not involve a significant hazards consideration.

Local Public Document Room location: Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Attorney for licensee: Mr. Michael W. Maupin, Hunton and Williams, Post Office Box 1535, Richmond, Virginia 23213.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Unit 1 and 2, Houston County, Alabama.

Date of applications of amendments: December 9, 1987

Description of amendments: The amendments change TS 6.9.1.9, Administrative Controls, to amend the Semiannual Radioactive Effluent Release Report requirements to allow the use of historical annual average meteorological data to determine the doses due to the routine release of radioactive gaseous effluents. This is an option that is provided for in NUREG-0133 and is consistent with the TS Bases and the Final Safety Analysis Report. An administrative correction to the spelling of the word "or" is also made in the same paragraph.

Date of issuance: March 8, 1988

Effective date: March 8, 1988

Amendment Nos.: 75 and 67

Facility Operating License Nos. NPF-2 and NPF-8. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49219) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 8, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303

Arizona Public Service Company, et al, Docket No. STN 50-528 Palo Verde Nuclear Generating Station, Unit 1, Maricopa County, Arizona

Date of application for amendment: December 4, 1987

Brief description of amendment: The amendment revises Technical Specification 3/4.5.1, "Safety Injection Tanks", and its associated Bases by (1) raising the lower limit of boron concentration, (2) changing the surveillance requirement for boron concentration, and (3) lowering the RCS pressure at which surveillance is performed for the isolation valve operator.

Date of issuance: March 4, 1988

Effective date: March 4, 1988

Amendment No.: 28

Facility Operating License No. NPF-41: Amendments change the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2306). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 4, 1988

Commonwealth Edison Company, Docket No. 50-373, LaSalle County Station, Unit 1, LaSalle County, Illinois

Date of application for amendment: August 25 and November 17, 1987

Brief description of amendment: The amendment revises the LaSalle County Station, Unit 1 Technical Specifications by changing the identification of the compartment in which the normal and emergency supply breakers for the shutdown cooling isolation valve are located.

Date of issuance: March 1, 1988

Effective date: Fifteen days following date of issuance.

Amendment No. 54

Facility Operating License No. NPF-11: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49220). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: Public Library of Illinois, Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois

Date of application for amendments: August 24, 1987

Brief description of amendments: These amendments involve administrative changes which clarify the conditions necessary to perform the Technical Specifications jet pump operability surveillance and correct typographical errors.

Date of issuance: March 4, 1988

Effective date: Fifteen days following date of issuance.

Amendment Nos.: 55 and 38

Facility Operating License Nos. NPF-11 and NPF-18: Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49220) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 4, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1., Oglesby, Illinois 61348.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: September 9, 1987

Brief description of amendment: The license amendment revises Technical Specification 5.4, "Containment," by deleting Section 5.4.B., "Penetrations," which references the design information concerning the containment penetrations and their associated bases. Specific design information concerning penetrations is currently discussed in Section 3.8 and 8.3 of the Haddam Neck Plant Updated Final Safety Analysis Report (UFSAR).

Date of Issuance: February 22, 1988

Effective date: February 22, 1988

Amendment No.: 99

Facility Operating License No. DPR-61. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1987 (52 FR 42360) The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated February 22, 1988.

Local Public Document Room location: Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: September 1, 1987.

Brief description of amendment: This amendment revised the Technical Specifications to permit movement of heavy loads into the cask laydown area of the spent fuel pool, consolidate Technical Specification requirements regarding heavy loads, and require compliance with the guidelines of NUREG-0612.

Date of issuance: March 1, 1988

Effective date: March 1, 1988

Amendment No.: 111

Provisional Operating License No. DPR-20. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 7, 1987 (52 FR 37544). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: November 13, 1987, as supplemented December 11, 1987 and January 15 and 20, 1988.

Brief description of amendments: The amendments modified the Technical Specifications to ensure that plant operation is consistent with the design and safety evaluation conclusions of the Unit 2 cycle 2 reload safety evaluation, and to reflect the addition of the Boron Dilution Mitigation System for Unit 2.

Date of issuance: February 16, 1988

Effective date: February 16, 1988

Amendment Nos. 39 and 31

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 30, 1987 (52 FR 49225) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 16, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: December 3, 1987

Brief description of amendments: The amendments modified the Technical Specifications to increase by 50% the allowed containment overall integrated leakage rate.

Date of issuance: February 29, 1988

Effective date: February 29, 1988

Amendment Nos.: 41 and 34

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2311) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 29, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Florida Power and Light Company, Docket No. 50-335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of applications of amendment: August 17, 1987 and November 16, 1987, as supplemented December 30, 1987

Brief description of amendment: The amendment upgraded the technical specifications dealing with the inservice inspection of ASME Code Class 1, 2, and 3 components and inservice testing of ASME Code Class 1, 2, and 3 pumps and valves.

Date of Issuance: March 7, 1988

Effective Date: March 7, 1988

Amendment No.: 90

Facility Operating License No. DPR-67: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 9, 1987 (52 FR 34005) and January 27, 1988 (53 FR 2312) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 7, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virgina Avenue, Ft. Pierce, Florida.

GPU Nuclear Corporation, Docket No. 50-219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of application for amendment: December 18, 1987

Brief description of amendment: The amendment revises Technical Specification 3.7.B to allow out of service time for the 125 VDC Motor Control Center "DC-2" to 7 days. The current Technical Specification requires that the plant be shut down within 30 hours if the 125 VDC Motor Control Center "DC-2" becomes unavailable.

Date of Issuance: March 7, 1988

Effective date: March 7, 1988

Amendment No.: 119

Provisional Operating License No. DPR-50. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2316) The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated March 7, 1988.

No significant hazards consideration comments received: No.

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit No. 2, Scriba, New York

Date of application for amendment: November 16, 1987

Brief description of amendment: The amendment revises the allowable value and the isolation trip setpoint for the reactor core isolation cooling (RCIC) high steam line flow. The changes are based on system testing during the startup test program.

Date of issuance: February 26, 1988

Effective date: February 26, 1988

Amendment No.: 2

Facility Operating License No. NPF-54: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 13, 1988 (53 FR 829). The Commission's related evaluation of the amendment is contained in a letter dated February 26, 1988.

Significant hazards consideration comments received: No

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Philadelphia Electric Company, Public Service Electric and Gas Company Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: February 12, 1987 as supplemented on October 20, 1987. The October 20, 1987 letter transmitted additional requested information and did not change the original application.

Brief description of amendments: The amendments revised the Technical Specifications with changes related to implementation of a Hydrogen Water Chemistry (HWC) program to improve reactor water chemistry and thus to reduce the potential for intergranular stress corrosion cracking.

Date of issuance: March 3, 1988

Effective date: March 3, 1988

Amendments Nos.: 129 and 132

Facility Operating License Nos. DPR-44 and DPR-56: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1987 (52 FR 42366) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 3, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: October 16, 1987 (TS 236)

Brief description of amendments: The proposed amendment would modify the Technical Specification (TS) of Browns Ferry Nuclear Plant Units 1, 2 and 3 to:

A. Require that primary containment isolation valves be operable whenever primary containment integrity is required to be maintained.

B. Permit a primary containment isolation valve(s) to be inoperable for up to four hours without placing a redundant valve in the isolated position provided that at least one isolation valve in the same line is operable.

C. Revise the definition 1.0.0.3, Primary Containment Integrity, to be consistent with Item B.

Date of issuance: February 29, 1988

Effective date: February 29, 1988, and shall be implemented within 60 days

Amendments Nos.: 145, 141, 116

Facility Operating Licenses Nos. DPR-33, DPR-52 and DPR-68: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2324) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 29, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Tennessee Valley Authority, Docket Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: May 15, 1987 (TS 229)

Brief description of amendments: The amendments delete the requirement to perform a partial closure test of the main steam isolation valves (MSIVs) denoted in Surveillance Requirement 4.7.D.1.c. Deletion of the test requirement allows the partial closure test to be performed quarterly, consistent with the requirement denoted in Table 4.1.A for the Reactor Protection System (RPS) scram on MSIV closure, rather than the twice per week test currently specified.

Date of issuance: March 1, 1988

Effective date March 1, 1988, and shall be implemented within 60 days

Amendments Nos.: 146, 142, 117

Facility Operating Licenses Nos. DPR-33, DPR-52 and DPR-68: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2324) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 1, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: April 3, 1987, as clarified January 22, 1987 (TS 228)

Brief description of amendments: The amendments clarify conflicts between notes in the Technical Specifications (TS) and make various administrative corrections. More specifically, the amendments change the TS as follows:

1. Section 3.5.M, Reporting Requirements, the bases for it, and its reference in the index have been deleted.
2. Note 7.d for Table 3.2.C has been revised.
3. Limiting Condition for Operation (LCO), 3.6.H.1, has been revised to reflect the correct Surveillance Instruction (SI) number for the safety-related snubber list.
4. Section 2.1.C has been revised to show the correct reference of specification 4.5.L for the Surveillance Requirement for Average Power Range Monitor (APRM) setpoints.
5. Table 4.2.A note (14) has been deleted.

Date of Issuance: March 3, 1988

Effective date: March 3, 1988, and shall be implemented within 60 days

Amendments Nos.: 147, 144 and 118

Facility Operating Licenses Nos. DPR-33, DPR-52 and DPR-68: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23107) The January 22, 1988, submittal provided clarifying information. This information made no substantive changes to the original application and did not change the staff's initial no significant hazards consideration determination. Therefore, renoticing was not warranted. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 3, 1988.

No significant hazards consideration comments received: No

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of application for amendment: January 20, 1988

Brief description of amendment: The amendment revised the TS's to permit an extension of the next due date for performing the tests and inspections required by Surveillance Requirement 4.8.1.1.1 b from March 1, 1988, to April 1, 1988.

Date of issuance: February 29, 1988

Effective date: February 29, 1988

Amendment No. 107

Facility Operating License No. NPF-3. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2303)

No significant hazards consideration comments received: No.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of application for amendment: March 27, 1987

Brief description of amendment: The amendment revised TS Section 3/4.3.1, Tables 3.3-1 and 4.3-1, to address Action and Surveillance Requirements relating to reactor trip breaker diverse trip devices.

Date of issuance: March 2, 1988

Effective date: March 2, 1988

Amendment No. 108

Facility Operating License No. NPF-3. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23108) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 2, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of application for amendment: January 22, 1986 (clarified by letters dated August 25, 1987, December 28, 1987, January 15, 1988 and February 17, 1988).

Brief description of amendment: This amendment revises the responsibilities and authority of the Station Review Board and adds a section to the Technical Specifications on Technical Review and Control. This amendment involves Technical Specification Sections 6.5.1.3, 6.5.1.6, 6.5.1.7, 6.5.3, 6.8.2, and 6.8.3. A portion of the amendment request has been denied by the Commission. A Notice of Denial is being published separately in the **Federal Register.**

Date of issuance: March 9, 1988

Effective date: March 9, 1988

Amendment No. 109

Facility Operating License No. NPF-3. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 2, 1986 (51 FR 24265) Since the date of the initial notice, the licensee has provided clarifying information, dated August 25, 1987, and December 28, 1987, January 15, 1988, and February 17, 1988, which does not warrant renoticing. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 9, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Wisconsin Public Service Corporation, Docket No. 50-305, Kewaunee Nuclear Power Plant, Kewaunee County, Wisconsin

Date of application for amendment: November 30, 1987, as supplemented January 29 and February 23, 1988

Brief description of amendment: The amendment added a license condition and modified the Kewaunee Technical Specifications to permit sleeving of defective steam generator tubes.

Date of issuance: March 1, 1988

Effective date: March 1, 1988

Amendment No.: 76

Facility Operating License No. NPF-30. Amendment revised the license and the Technical Specifications.

Date of initial notice in **Federal Register:** January 27, 1988 (53 FR 2305 at 2326). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of Wisconsin Library Learning Center, 2420 Nicolet Drive, Green Bay, Wisconsin 54301.

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of application for amendments: January 6, 1987, as supplemented by letters dated June 8 and October 16, 1987.

Brief description of amendments: The amendments consist of modifications to Technical Specification Tables 15.3.5-2 and 15.3.5-5 to eliminate ambiguity and to accurately reflect facility configuration.

Date of issuance: March 2, 1988

Effective date: March 2, 1988

Amendment Nos.: 112 and 115

Facility Operating License Nos. DPR-24 and DPR-27. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** April 22, 1987 (52 FR 13353). In a letter dated June 8, 1987, the licensee withdrew the proposed modification to the wording for the setpoints for Items 9, 10a and 10b of Table 15.3.5-1. The licensee's June 8, 1987 letter does not change the staff's proposed no significant hazards consideration determination noticed April 22, 1987, because withdrawal of the proposed modification results in no changes to Items 9, 10a, and 10b of Table 15.3.5-1. Additionally, in a letter dated October 16, 1987, the licensee proposed revising the wording for Item 10 of Table 15.3.5-5 to remove ambiguity. The licensee's October 16, 1987 letter does not change the staff's proposed no significant hazards consideration determination noticed April 22, 1987 because the proposed revised wording was solely submitted to remove inherent ambiguity. No technical changes to the previously noticed action were involved.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 2, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION

During the period since publication of the last biweekly notice, individual notices of issuance of amendments have been issued for the facilities as listed below. These notices were previously published as separate individual notices. They are repeated here because this biweekly notice lists all amendments that have been issued for which the Commission has made a final determination that an amendment involves no significant hazards consideration.

In this case, a prior Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing was issued, a hearing was requested, and the amendment was issued before any hearing because the Commission made a final determination that the amendment involves no significant hazards consideration.

Details are contained in the individual notice as cited.

Florida Power and Light Company, Docket No. 50-335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of application of amendment: June 12, 1987

Brief description of amendment: The amendment increased the spent fuel pool storage capacity from 728 fuel assemblies to 1706 fuel assemblies.

Date of Issuance: March 11, 1988

Effective Date: March 11, 1988

Amendment No.: 91

Facility Operating License No. DPR-67: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 31, 1987 (52 FR 32852)

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By April 22, 1988 , the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition

OL
53
ISS
56
MR
23
988
MI

should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Carolina Power & Light Company, Docket No. 50-261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Dates of application for amendment: February 24, February 26, and March 1, 1988.

Brief description of amendment: The amendment revised the Technical Specifications to permit the plant to be operated with only two safety injection pumps operable. Power level is limited to 1380 MWt.

Date of issuance: March 7, 1988

Effective date: March 7, 1988

Amendment No. 115

Facility Operating License No. DPR-23. The amendment revises the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: No. The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated March 7, 1988.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P.O. Box 1551, Raleigh, North Carolina 27602.

Local Public Document Room location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

NRC Project Director: Elinor G. Adensam

Indiana Michigan Power Company, Docket No. 50-316, D. C. Cook Nuclear Plant, Unit 2, Berrien County, Michigan

Date of application for amendment: January 11, 1988

Brief description of amendment: This amendment revises the Technical Specifications to allow a delay in the 18-month surveillances for the residual heat removal auto-closure interlock, steam generator snubbers and the Rod Position Indication System until the end of the next refueling outage currently scheduled to begin during the second quarter of 1988.

Date of Issuance: February 29, 1988

Effective date: February 29, 1988

Amendment No.: 99

Facility Operating License No. DPR-74: Amendment revises the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: Yes, in the **Federal Register**, February 17, 1988 (53 FR 4796)

Comments received: No. The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated February 29, 1988.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts, and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

Local Public Document Room location: Maude Preston Palenski Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

NRC Project Director: Martin J. Virgilio.

Dated at Rockville, Maryland, this 17th day of March, 1988.

For the Nuclear Regulatory Commission

Steven A. Varga,

[Doc. 88-6300 Filed 3-22-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-528, DD 88-02]

Arizona Public Service Co. et al.; Palo Verde Nuclear Generating Station, Unit 1; Issuance of Director's Decision

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has denied a Petition under 10 CFR 2.206 filed by Mr. Myron L. Scott, on behalf of the Coalition For Responsible Energy Education, and Mr. Jack Kauffman, on behalf of the Valley of the Sun Gray Panthers (Petitioners). The Petitioners asked the Nuclear Regulatory Commission (NRC) to provide relief by issuing an Order to Show Cause why a Notice of Violation (Severity Level III or higher) should not be issued and a Civil Penalty of not less than $100,000 ($50,000 escalated for repetitive nature of concerns) be assessed against the Arizona Public Service Company, et al. (Licensees) because of the Licensees' response to an event at the Palo Verde Nuclear Generating Station, Unit 1 and the number of licensee Event Report incidents at Palo Verde, Units 1 and 2.

The Petitioners' request has been denied for the reason fully described in the "Director's Decision Under 10 CFR 2.206," issued on this date, which is available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and in the Local Public Document Room for Palo Verde located at the Phoenix Public Library, Business, Science and Technology Department, 12 East McDowell Road, Phoenix, Arizona 85004.

Dated at Rockville, Maryland, this 14th day of March 1988.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 88–6301 Filed 3–22–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–354]

Public Service Electric & Gas Co. and Atlantic City Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 15 to Facility Operating License No. NPF–57, issued to Public Service Electric and Gas Company (the licensee), which revised the Technical Specifications for operation of the Hope Creek Generating Station (HCGS), located in Salem County, New Jersey. The amendment was effective as of the date of issuance.

The amendment modified the Technical Specifications to permit operation for Cycle 2 with the new fuel assemblies that were loaded during the first refueling outage. It also permitted use of extended load line operations and increased core flow operations.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing in connection with this action was published in the **Federal Register** on January 14, 1988 (53 FR 972). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has concluded that an environmental impact statement is not warranted because there will be no environmental impact attributable to the action beyond that which has been predicted and described in the Commission's Final Environmental Statement for the facility dated December 1984.

For further details with respect to the action see (1) the application for amendment dated December 14, 1987, (2) Amendment No. 15 to License No. NPF–57, and (3) the Commission's related Safety Evaluation and Environmental Assessement. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects I/II.

Dated at Rockville, Maryland, this 15th day of March 1988.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulator.

[FR Doc. 88–6302 Filed 3–22–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–346]

Toledo Edison Co. and The Cleveland Electric Illuminating Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–3, issued to the Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), for operation of the Davis-Besse Nuclear Power Station, Unit No. 1, located in Ottawa County, Ohio.

The proposed amendment would revise the provisions in the Davis-Besse Nuclear Power Station, Unit No. 1, Technical Specifications (TS's) relating to response times for the Main Steam Isolation Valves in TS section 3/4.3.2, Table 3.3–5, Safety Features System Response Times, and Table 3.3–13, Steam and Feedwater Rupture Control System Response Times; section 3/4.6.3, Table 3.6–2, Containment Isolation Valves; and section 3/4.7.1, Surveillance Requirement 4.7.1.5, Main Steam Isolation Valves. The proposed changes would ensure consistent closure response time requirements throughout the Appendix A TS's, would delete redundant response time requirements, and would clarify the meaning of the response time requirement.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 22, 1988, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Kenneth E. Perkins: (petitioner's name and telephone number); (date Petition was mailed); (plant name); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensees.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated July 27, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Dated at Rockville, Maryland, this 16th day of March, 1988.

For The Nuclear Regulatory Commission.

Albert W. De Agazio,

Project Manager, Project Directorate III-3, Division of Reactor Projects—III, IV, V & Special Projects.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25482; File No. SR-Amex-87-25]

Self-Regulatory Organization; Proposed Rule Change by American Stock Exchange, Inc.; Broad Market Index Option Contract Based on the International Market Index

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on October 2, 1987, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("Amex" or "Exchange") proposes to introduce a new broad market index option contract based on the International Market Index—a group of 50 foreign stocks and American Depositary Receipts (ADRs) traded on the Amex, the New York Stock Exchange ("NYSE") or through the National Association of Securities Dealers Automated Quotations ("NASDAQ") system.

The text of the proposed rule change is available at the Office of the Secretary, Amex, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

The Amex has developed a new broad market international stock index, called the International Market Index ("Index"), based exclusively on the equity stocks of fifty leading foreign issuers located in a number of the major industrialized nations in the non-communist world, but not including any U.S. or Canadian issues. All of the securities to be used in calculating the Index are registered with the Commission under the Securities Exchange Act of 1934 ("the Act"), or are exempt from such registration under SEC Rule 12g3-2 or section 12(f) of the Act, and are traded on the Amex or the NYSE or through NASDAQ. Most of the securities are traded in the form of ADRs in this country and the few which are not traded as ADRs have transfer facilities located in the U.S. The Amex is

proposing to trade standardized European-style options based on this new Index.

The Exchange has joined with the Coffee, Sugar and Cocoa Exchange, Inc. ("CSCE"), a commodity exchange regulated by the Commodity Futures Trading Commission, in developing the Index. It is intended that the Amex trade options and the CSCE trade futures on the newly developed Index.

The Index will be calculated and maintained by the Amex. In maintaining the Index, the Exchange reserves the right to substitute stocks or to increase the number of stocks included in the Index, based on changing international conditions or newly available foreign equity securities traded in United States domestic markets. In selecting securities to be included in the Index, the Exchange will be guided by a number of factors, such as market value of outstanding shares, trading activity in the U.S. markets and, in the case of NASDAQ-traded stocks, the number of market makers making markets in the component stocks.

The proposed Index will be capitalization-weighted. It will be calculated during normal U.S. trading hours using ADR or foreign share prices in U.S. markets and total shares outstanding in the world markets. In calculating the Index, last sale price for exchange-traded securities, and the arithmetic mean between the highest bid price and the lowest offer price for NASDAQ securities, will be used. The Index value will be calculated continuously and displayed in a manner similar to other stock index options published by the Exchange. The information will be disseminated to vendors through the OPRA System. A benchmark Index value of 200.00 has been established for the Index as of January 2, 1987. On December 31, 1987, the Index value was approximately 244. The index multiplier will be 100.

Specific corporate actions or events, such as additional stock issuances or repurchases, stock splits, or stock dividends, will require adjustment to the component weight of affected stocks in the Index. The Exchange will re-adjust component weights of the stocks in the Index in accordance with updated capitalizations in their domestic markets, applying offsetting divisor adjustments to the Index to eliminate discontinuities. The Exchange proposes to use information available to ADR agent banks for this purpose, together with information to be obtained on a regular basis from international news services.

There are several important trading and regulatory advantages to basing the Index exclusively on foreign shares traded in U.S. markets. First, the problem of real-time pricing of a foreign stock index during normal U.S. trading hours is overcome through a vehicle that can be priced continuously, based on trading in U.S. markets.

Second, for an index to be meaningful and useful to investors, the prices used in calculating the index must be stated in a common currency. By using only foreign securities that are traded in the U.S. in U.S. dollars, the need for currency conversions is eliminated.

Third, as noted above, each component stock is a registered security under section 12 of the Act (as a result of which the issuer is subject to the reporting requirements of section 13 of the Act), or is relying on an exemption from such registration pursuant to paragraph (d) of SEC Rule 12g3-2 (in which event the issuer must comply with the information supplying requirements of paragraph (b) of such Rule).

Finally, each of the component stocks can be freely purchased and sold by U.S. investors in the form of foreign shares or ADRs using standard U.S. procedures for clearance and settlement.

Eligibility Standards for Index Components. The Exchange has established minimum criteria for selecting stocks to be included in the Index. Further, if component stocks in the Index should fail to continue to meet these criteria, the Exchange will take steps to select suitable replacements. In maintaining the Index, the Exchange will make an effort to ensure country dispersion within Europe and the Pacific Basin, and industry dispersion across major manufacturing and non-manufacturing sectors.

The criteria for index stocks include the following: 1. Each component security shall be issued by a foreign issuer (non-U.S. and non-Canadian) but shall have an active U.S. market, being traded on either the Amex or the NYSE, or through the NASDAQ system. Each component security will also be registered under section 12 of the Act or be eligible for exemption from such registration as a result of compliance with the information supplying provisions of SEC Rule 12g3-2.

2. The minimum market value in U.S. dollars of the foreign security as measured by total world shares outstanding shall be $100 million.

3. If a NASDAQ security, the minimum number of market makers actively posting markets on the NASDAQ system shall be 8. Moreover, the spreads between the bid and offer prices quoted shall be reasonable in relation to the spreads for other securities traded through the NASDAQ system having similar trading characteristics and selling in the same general price range.

4. Minimum monthly trading volume in the U.S. market for each component stock shall be 5,000 shares (or ADRs).

The above statistical criteria are minimum guidelines only; it is anticipated that the vast majority of the stocks included in the Index will substantially exceed these levels.

Procedures for Settlement. The Index value for purposes of settling specific International Market Index options will be established by the Exchange on the business day prior to the expiration date of such options, normally the Friday preceding expiration Saturday in each month. Trading in expiring options will normally cease at the close of business on the preceding Thursday. Such Index value will be calculated on the basis of opening prices (as defined below) of the component stocks in the U.S. markets on such business day.

A. For foreign shares or ADRs listed and/or traded on U.S. stock exchanges, the opening price on the Exchange which is the primary market for the security will be used.

B. In the case of securities traded through the NASDAQ system, the Exchange will use the arithmetic mean between the highest bid and lowest offer price at 9:30 a.m. New York City time as quoted on the NASDAQ inside market. The Exchange believes that the uncertainty of identifying opening transaction prices in NASDAQ securities (both because of sequencing problems in reporting securities and lack of transaction reporting in other securities) makes use of the mean of the best bid/ask quote at a particular time a more efficient method of pricing for settlement purposes. In addition, one criterion for including securities traded in the OTC market in the Index is that there be at least eight market makers actively making markets in the security, helping ensure competitive market quotes. The Exchange therefore believes that the mean of the best bid/ask quote taken at 9:30 a.m. will be a better determination of the then current market price than the first reported trade of the day.

The Exchange has selected opening market prices rather than closing market prices for establishing the settlement value of the Index for two principal reasons. First, since the principal markets for the Index component stocks are foreign markets, the Exchange believes that settlement prices determined either during active trading in such foreign markets or as soon after the close of trading in those markets as possible, will provide more reliable price determinations for settlement purposes than if a substantial period of time has elapsed since the close of the foreign market.

The home market for most of the component issues is located either in Europe (where the closing of the markets generally occurs shortly before or shortly after the opening of trading in U.S. markets) or in the Far East (where the previous day's trading will have ceased only a few hours prior to the opening of the U.S. markets). In some cases, such as with the markets in the United Kingdom, trading will actually overlap the opening of the U.S. markets. Thus, by selecting the opening of the U.S. markets as the pivotal point for establishing the settlement value of the Index, the Exchange will be minimizing the period between lapse of trading in the home country and the time when such value is calculated.

The second reason for the use of opening prices is that the Exchange believes such procedure will make manipulation of the prices more difficult to accomplish. The more active and liquid the market, the more difficult it is to artificially influence prices. Since the home market in most of the component issues in the Index will normally be the most active, it is less likely to be susceptible to such artificial stimulus. It can also be expected that in most instances the opening prices in the U.S. markets will closely tract the prices in the home market, particularly if the home market is still trading or has only closed shortly prior to the commencement of trading in the U.S. Thus, the Exchange believes that the use of opening prices in the U.S. markets will provide an added measure of protection against attempts to artificially influence prices of component issues as a means of affecting the settlement value of the Index.

Exchange Rules Applicable to Stock Index Options. Amex Rules 900C through 980C will apply to option contracts based on the Index. The Index is deemed to be a Broad Stock Index Group under Rule 900C(b)(1). Options on the Index will be European-style (exercise at expiration only), and, under Rule 903C, the Exchange proposes to list the three near months and two additional cycle months of the March cycle. The position limits applicable to European style options on a broad stock index group are governed by Rule 904C(b). Under this provision, the Exchange proposes to establish a position limit of 15,000 contracts on the same side of the market.

Surveillance Procedures. The Exchange expects to apply its existing index options surveillance procedures to the new International Market Index option. It believes such procedures are adequate to enable the Exchange to fulfill its regulatory responsibilities.

In order to monitor corporate developments affecting shareholder interests, the Exchange will arrange with major ADR-sponsoring banks and various international financial news services to receive on a regular basis information concerning all of the issuers of the component securities.

(2) Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)5 in particular in that it is designed to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 13, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 17, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-25478; File No. SR-DTC-88-2]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change of the Depository Trust Co.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") notice is hereby given that on February 22, 1988, the Depository Trust Company ("DTC") filed with the Commission a proposed rule change to include medium-term notes [1] as eligible securities in DTC's Same-Day Funds Settlement ("SDFS") service. The proposal also provides that DTC's mandatory book-entry receipt procedure applies to transactions in eligible medium-term notes. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The SDFS service provides full depository and transaction settlement services for certain securities transactions settling in same-day funds.[2] Initially, only transactions involving municipal notes with a maturity of one year more or less were eligible for the SDFS Service. Recently, DTC expanded the SDFS service to include zero-coupon bonds backed by U.S. government securities [3] and variable rate demand obligations.[4] DTC states in its filing that it has not experienced, nor is it aware that SDFS participants and settling banks have experienced, any significant operational problems in using the SDFS service. Based upon initial performance and participant requests, DTC has decided to expand the service to include medium-term corporate notes.

DTC represents in its filing that it has acted to ensure accurate collateralization of medium-term corporate note transactions.[5] DTC will rely primarily on "haircuts" set by its bank lenders, which are obligated under a line of credit to lend DTC funds on SDFS securities. DTC has contracted with a third-party vendor of securities valuation information to obtain daily information on the value of medium-term notes. According to DTC, SDFS settlement prices as well as quotations from SDFS participants would be additional information sources for determining the value of these securities.

The proposal also clarifies that DTC's mandatory book-entry receipt procedure applies to transactions in medium-term corporate notes.[6] Under DTC's book-entry receipt procedure, DTC facilities cannot be used to reclaim a book-entry delivery for the reason that the delivery has been by book-entry, except where the parties to the trade have agreed to settle the trade by a physical delivery and the trade confirmation so specified. According to DTC, this procedure has encouraged DTC participants to accept book-entry delivery of SDFS-eligible securities.

DTC believes the proposed rule change is consistent with the requirements of the Act in that it promotes the prompt and accurate clearance and settlement of securities transactions that settle in same-day funds. Furthermore, DTC believes the proposal effects a change in the SDFS service that (1) does not adversely affect the safeguarding of securities or funds in DTC's custody or control and (2) does not significantly affect the respective rights or obligtions of DTC or persons using the SDFS Service.

The foregoing change has become effective, pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if is appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Reference should be made to File No. SR-DTC-88-2.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of the filing (SR-DTC-88-2) and of any subsequent amendments also will be available for inspection and copying at DTC's principal office.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 17, 1988.

BILLING CODE 8010-01-M

[Release No. 34-25475; File No. SR-DTC-88-01]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Depository Trust Co.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C 78s(b)(1), notice is hereby given that on February 10, 1987, The Depository Trust Company filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of Proposed Rule Change

The Depository Trust Company ("DTC") is filing herewith the changes in the fee schedule for major DTC services which are listed on the Annex hereto.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) The purpose of the proposed rule change, which will be effective for services provided after February 29, 1988, is to adjust the fees charged for various services to bring them closer to, or to, their respective estimated service costs for 1988.

Prior to 1985, DTC attempted to relate service fees to their respective service costs at intervals of several years. During these intervals, unit service costs could diverge substantially from current fees, necessitating large changes when service fees were realigned with their costs. To prevent such divergence after adopting major fee changes at its December 1985 meeting which moved toward cost-based fees, the DTC Board then adopted and announced a new procedure, as follows:

---

[1] Medium-term notes are corporate debt securities issued with maturities ranging from 9 months to 12 years.

[2] *See* Securities Exchange Act Release No. 24689 (July 9, 1987), 52 FR 26613, which approved the SDFS service on a temporary basis. In Securities Exchange Act Release No. 25308 (February 4, 1988), 53 FR 6900, the Commission extended temporary approval of the SDFS service to June 30, 1988.

[3] *See* Securities Exchange Act Release No. 25031 (October 15, 1987), 52 FR 38982.

[4] *See* Securities Exchange Act Release No. 25317 (February 5, 1988), 53 FR 4249.

[5] DTC requires collateralization of each SDFS service transaction. DTC tracks continuously the value of each Participant's collateral by obtaining market value data from bank lenders, third-party vendors of that information, its participants, and from settlement values of SDFS securities transactions. On each SDFS service transaction, DTC will "haircut" (or discount the value of) SDFS securities coming into a participant's account. A receiving participant must have sufficient collateral to cover the difference between the value paid for the SDFS securities and their discounted value.

[6] DTC's mandatory book-entry receipt procedure applies to all transactions currently eligible for the SDFS service

> In adopting new fees, the Board also declared its belief and intention that DTC should revise its basic fee schedule each year so that, through modest changes gradually over approximately five years, DTC service fees will be based on service cost in the absence of policy considerations which would justify limited exceptions. Large changes in service fees after intervals of several years would thereby be avoided.

The present fee schedule for DTC services, which became effective in early 1987, resulted from the first of those annual revisions. Continuing to follow the procedure enunciated above, the depository's Board recently completed a review of DTC's estimated service costs for 1988 and has adopted modest changes in a number of major service fees designed to move those fees closer to estimated 1988 service costs. *See Exhibit A.*

The proposed rule change is consistent with the requirements of the Securities and Exchange Act of 1934 and the rules and regulations thereunder applicable to DTC because the fees will more equitably be allocated among DTC Participants.

(B) Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

DTC informed Participants and other users of its services of the proposed rule change by a memorandum dated January 12, 1988 entitled "1988 Revisions of Major Service Fees". Because Participants have supported gradual moves toward cost-based fees in the past and because, overall, the subject fee changes are modest, a formal period for Participant comment was not considered necessary this year.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 13, 1988.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: March 16, 1988.

Jonathan G. Katz,
Secretary.

BILLING CODE 8010-01-M

1988 REVISED DTC SERVICE FEES

Service	Present Fee			Revised Fee		
A. Registered Securities						
I. Deposits						
. The fee for deposits of certificates in active issues is determined by the time of receipt by DTC: (1)						
Zone A - 4:00 PM to 8:00 PM (Prior PM)	$ 1.20	$1.35 includes certificate charge*	$1.63*	$ 1.50	$1.67 includes certificate charge*	$1.90*
Zone B - 7:30 AM to 10:00 AM	$ 2.00			$ 2.30		
Zone C - 10:00 AM to 11:00 AM	$ 4.20			$ 4.50		
Zone D - 11:00 AM to 12:00 Noon	$10.00			No Change		
Zone E - 12:00 Noon to 1:00 PM	$40.00			No Change		
. The fee for deposits of certificates in less-active issues** is determined by the time of receipt by DTC: (1)						
Zone A - 4:00 PM to 8:00 PM (Prior PM)	$ 1.90	$2.14 includes certificate charge*		$ 2.20	$2.36 includes certificate charge*	
Zone B - 7:30 AM to 10:00 AM	$ 2.70			$ 3.00		
Zone C - 10:00 AM to 11:00 AM	$ 4.90			$ 5.20		
Zone D - 11:00 AM to 12:00 Noon	$10.60			No Change		
Zone E - 12:00 Noon to 1:00 PM	$40.60			No Change		
. A certificate charge per deposit per group of 10 certificates beyond the first 10 certificates in addition to the Zone fee	$.30 per group of 10 certificates beyond the first 10 certificates			No Change		

All footnotes in this Annex are found on the last page.

1988 REVISED DTC SERVICE FEES

Service	Present Fee		Revised Fee
. A record date deposit surcharge for bond interest, cash and stock dividends and proxy	$ 4.00 per record date deposit		No Change
. Rejects For each deposit corrected or returned to a Participant because of error:			
From 0 to 5%	$20.00 per reject	$21.77*	No Change
Over 5%	$30.00 per reject		
II. Withdrawals-by-Transfer (WT's)			
. For each assignment in an active issue submitted on PTS, API or CCF	$ 1.30 per assignment		$1.65 per assignment
. For each separate paper assignment in an active issue	$ 3.00 per assignment		$3.35 per assignment
. For each assignment in an active issue concluding in direct mail	$ .80 per assignment(2)		$1.15 per assignment(2)
. For each assignment in a less-active issue** submitted on PTS, API or CCF	$ 3.10 per assignment		$3.45 per assignment
. For each separate paper assignment in a less-active issue**	$ 4.80 per assignment		$5.15 per assignment
. For each assignment in a less-active issue** concluding in direct mail	$ 2.60 per assignment(2)		$2.95 per assignment(2)

Notes to Annex

* Weighted rate based on current mix of transactions in this service.

** A less-active issue fee applies to certain issues each calendar quarter based on prior period of activity averaging 2 or fewer transactions on days when activity occurred.

*** In a deposit or withdrawal of more than 150 certificates, each group of 150 certificates is charged as a separate deposit or withdrawal.

**** This fee is shared equally by the broker and clearing agent for investment manager trades made by other than a trust department of direct and indirect depository Participants.

(1) All deposits shipped to DTC from outside the NYC area are regarded as Zone A deposits.

(2) An additional $1.35 charge is added to this fee for each assignment resulting in direct mail by DTC.

(3) A surcharge of $350.00 applies to issues with a put option feature to cover the costs associated with reviewing the official statement and establishing a data base through which put periods are monitored. Issues requiring consultation and special development efforts will be charged an additional surcharge of $500.00. The impact of these surcharges is not included in the weighted rates.

BILLING CODE 8010-01-C

[Release No. 34-25480; File No. SR-MSE-88-1]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Midwest Stock Exchange; Listing Fee Schedule in Respect to Stock Purchase Rights ("Poison Pills")

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on January 22, 1988, as modified by a letter dated March 16, 1988, the Midwest Stock Exchange, Incorporated ("MSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Midwest Stock Exchange, Incorporated proposes to amend its Listing Fee Schedule in respect to the listing of purchase rights as follows:

> Any company that lists a purchase right (commonly referred to as a "Poison Pill") will be allowed to apply to $5,000 original listing fees paid in that calendar year and under certain conditions for three (3) years thereafter, for purposes of determining the $7,500 maximum. To the extent a company derives no financial benefit in the year a Poison Pill is listed, then to that extent a carryover shall occur until the earlier to occur of either the realization of the full $5,000 credit or the passing of three (3) years. For the purposes hereof, such three (3) year period shall not include the year in which the Poison Pill is listed. This provision will apply to all Poison Pills listed on or after June 1, 1987.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

The Midwest Stock Exchange, Incorporated in an attempt to equitably allocate listing fees in respect to Poison Pills, is proposing a modification to its Listing Fee Schedule. The current listing fees are as follows:

1. Original listings are $5,000 regardless of the size of the issue to be listed. This is currently also the amount assessed for the listing of Poison Pills.
2. Additional listings are $.005 per share for the first 100,000 shares, $.0025 per share for the balance, with a $2,500 maximum charge per application and a $250 minimum charge per application, with an annual maximum of $7,500.

Under the current schedule, a company wishing to list two original issues, one Poison Pill and three additional listings of 1,000,000 shares each, would incur the following fees:

2 original listings at $5,000 each	$10,000
1 Poison Pill at $5,000	5,000
3 additional listings at $2,500 each	7,500
	$22,500

The proposed revision to the Listing Fee Schedule in request to Poison Pills would to some degree lessen the burden on companies who regularly list additional shares. The proposal would provide that any company that lists a Poison Pill, would be allowed to have the $5,000 original listing fee assessment added to all additional listing fees paid in a given calendar year, for purposes of determining the $7,500 maximum. The proposal would further provide that to the extent a company derives no financial benefit in the year a Poison Pill is listed, then to that extent a carryover shall occur until such time as the full $5,000 credit is attained within a three-year maximum carryover term. Under the proposal, the fees assessed in the above example would be as follows:

2 original listings	$10,000
1 Poison Pill	5,000
3 additional listings	7,500
	$22,500

($7,500 + $5,000 = $12,500 which exceeds the $7,500 maximum by $5,000)

	−(5,000)
	$17,500

In this example, the company realized the full economic benefit in the same year that the Poison Pill was listed. The following example will show the application of the proposed Fee Schedule where the economic benefit is realized over a three year period:

1987—Company A lists one original listing in 1987, one Poison Pill listing in 1987 and two one-million share additional listings. Under the proposed fee, the company would pay the following:

1 original listing	$5,000
1 Poison Pill listing	5,000
2 additional listings	5,000
	$15,000

($5,000 + $5,000 = $10,000 which exceeds the $7,500 maximum by $2,500)

	−(2,500)
	$12,500

Since a $2,500 benefit only was realized, Company A continues to have a $2,500 carryover for 1988.

1988—Company A lists one original listing in 1988 and one-million share additional listings.

Under the proposed fee the company would pay the following:

1 original listing	$5,000
1 Additional listings	2,500
	$7,500

No economic benefit was realized in 1988 since Company A did not exceed the $7,500 maximum for additional listings. Company A, however, continues to have a $2,500 carryover.

1989—Company A lists one original listing and four additional listings of one-million shares each in 1989. Under the proposed fee the company would pay the following:

1 original listing	$5,000
4 additional listings	10,000
	$15,000
$2,500 carryover from 1988 [1]	−(2,500)
	$12,500

[1] Company A was able to utilize the $2,500 carryover from 1987 and deduct it from its total outstanding listing because fees for the 1989 calendar year because its additional listing fees in 1989 ($10,000) exceeds the annual maximum additional listing fee of $7,500.

Under this example, Company A was able to realize the full economic benefit of the proposed revision within the three-year time period. This enabled Company A to receive the full $5,000 credit for the Poison Pill listing.

The original rule proposal would make the change effective as of June 1, 1987. The MSE has agreed to an effective date of January 1, 1988.[1]

The Exchange believes the proposed rule change is consistent with section 6(b)(4) of the Act in that it provides for the equitable allocation of dues, fees and other charges among Exchange members, issuers, and other persons using the Exchange's facilities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Midwest Stock Exchange, Incorporated does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Member, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Act

After careful review, the Commisison has decided that, effective January 1, 1988, the MSE's proposal to provide a $5,000 listing fee credit to companies who list stock purchase rights should be approved. In particular, the Commission believes that the proposal should, as the Exchange anticipates, lessen to some extent the financial burden experience by issuers who, in addition to listing poison pills, lists additional issues on a fairly frequent basis. In addition, the Exchange indicates that the statutory basis for the proposed rule change is section 6(b)(4) of the Act[2] in that the proposal will more equitably allocate purchase rights listing fees among companies who list such rights and additional share on the Exchange.

As noted above, originally the MSE would have made the rule change effective retroactive until June, 1987. The Commission, however, has decided, and the MSE has agreed, to make the change effective as of January 1, 1988. The foregoing rule change has become effective pursuant to section 19(b)(3)(A)(ii) of the Act and paragraph (e) of Rule 19b-4 thereunder. At any time within 60 days of March 16, 1988, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purpose of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW, Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the MSE. All submissions should refer to the file number in the caption above and should be submitted by April 13, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 17, 1988.

Billing Code 8010-01-M

[Release No. 34-25483; File No. SR-MSRB-88-1]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change of the Municipal Securities Rulemaking Board; Compensation and Expenses for Board Members and Election of Officers

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 15, 1988, the Municipal Securities Rulemaking Board ("Board") filed with the Securities and Exchange Commission a proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

A. The Municipal Securities Rulemaking Board (the "Board") is filing amendments to Board rules A-3 on compensation and expenses for Board members, and A-5 on the election of officers of the Board. The proposed rule change to rule A-3 codifies the Board's policy to pay a per diem to Board members when participating in additional designated activities of the Board. The proposed rule change to rule A-5 would delete the requirement that the Board elect its officers at the penultimate meeting of the Board and state that the officers will be elected at a meeting of the Board held prior to October 1 of each year.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Recently, the Board reviewed certain of its internal procedures. The proposed rule change relates to revised procedures regarding the payment of per diem to Board members and the timing of the election of Board officers.

Board rule A-3(f) contains provisions for the payment of a per diem and a travel allowance to Board members for those days in which the Board meets, and it contains provisions for the reimbursement for actual and necessary expenses incurred in connection with any other official business of the Board. It is the Board's policy to pay a per diem to Board members when participating in additional designated activities of the Board. These designated activities include attendance at committee meetings not held in conjunction with Board meetings and attendance at dealer meetings. Board members who participate in other official Board business are reimbursed for actual and necessary expenses. The proposed rule change codifies this policy.

Board rule A-5(b) contains procedures for the election of officers of the Board. Under the current rule A-5(b), officers of the Board are elected annually from among the Board members at the penultimate meeting of the Board held prior to October 1 of each year according to procedures adopted by the Board.

In the past, the penultimate meeting of the Board generally has been held in the summer and the last meeting of the Board has been held in September just prior to the expiration of the terms of the outgoing Board members. The Board recently revised its meeting schedule. As a result, the last Board meeting of the year will be held in the summer. The Board plans to elect new Board members at the last Board meeting of the year and the election of its officers would be held at the same time. The proposed rule change would delete the requirement that the Board elect its officers at the penultimate meeting of the Board and state that the officers will be elected at a meeting of the Board held prior to October 1 of each year.

(b) The Board has adopted the proposed rule change pursuant to section 15B(b)(2)(I) of the Securities Exchange Act of 1934, as amended (the "Act"). Section 15B(b)(2)(I) authorizes and directs the Board to adopt rules providing for the operation and administration of the Board.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change is concerned solely with the operation of the Board and does not affect the conduct of business by any broker, dealer, or municipal securities dealer. The Board therefore believes that the proposed rule change would not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Board neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 13, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 17, 1988.

BILLING CODE 8010-01-M

[Release No. 34-25477; File No. SR-NASD-88-5]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc.; Amendment to the Interpretation of the Board of Governors—Review of Corporate Financing, Article III, Section 1 of the Rules of Fair Practice to Require a Qualified Independent Underwriter When Offering Proceeds Are Directed to Underwriters

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 16, 1988, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Set forth below is the text of the proposed rule change to the Interpretation of the Board of Governors—Review of Corporate Financing, Article III, Section 1 ("Corporate Financing Interpretation") of the Rules of Fair Practice of the National Association of Securities Dealers, Inc. The new provision is proposed to follow the section titled "Venture Capital Restrictions" at page 2035 of the *NASD Manual*. New language follows:

Proceeds Directed to a Member

No member shall participate in a public offering of an issuer's securities where more than 10 percent of the net offering proceeds, not including underwriting compensation, are intended to be paid to members participating in the distribution of the offering or associated or affiliated persons of such members, or members of the immediate family of such persons, unless the price at which an equity issue or the yield at which a debt issue is to be distributed to the public is established at a price no higher or yield no lower than that recommended by a qualified independent underwriter as defined in section 2(k) of Schedule E to the By-Laws, who shall participate in the preparation of the registration statement and the prospectus, offering circular, or similar document and who shall exercise the usual standards of "due diligence" in respect thereto; provided, however, this paragraph shall not apply to (1) an offering of a class of equity securities for which a bona fide independent market as defined in section 2(b) of Schedule E to the By-Laws exists as of the date of the filing of the registration statement and as of the effective date thereof; (2) an offering of a class of securities rated Baa or better by Moody's rating service or Bbb or better by Standard & Poor's rating service or rated in a comparable category by another rating service acceptable to the Association; (3) an offering otherwise subject to the provisions of Schedule E to the By-Laws; (4) an offering of securities exempt from registration with the Securities and Exchange Commission under section 3(a)(4) of the Securities Act of 1933; (5) an offering of a real estate investment trust as defined in section 856 of the Internal Revenue Code; or (6) an offering of securities subject to Appendix F to Article III, section 34 of the Rules of Fair Practice unless the net proceeds of such offering are intended to be paid to the above persons for the purpose of repaying loans, advances or other types of financing utilized to acquire an interest in a pre-existing company. For purposes of this paragraph, the term "net offering proceeds" means the gross offering proceeds less all expenses of issuance and distribution and the term "immediate family" has the meaning set

forth in the Interpretation of the Board of Governors—"Free-Riding and Withholding", Article III, section 1 of the NASD Rules of Fair Practice.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries set forth in Sections (A), (B), and (C) below of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The NASD has been engaged in a case-by-case review of public debt offerings where a member firm which assists in structuring a leveraged buy-out transaction has provided a "bridge" loan to facilitate the leveraged buy-out transaction.[1] Subsequently, generally within less than six months, the newly formed entity will make a public offering of long-term high-yield debt securities for the purpose of repaying the member-lender, which also acts as managing or sole underwriter of the debt offering. The NASD and the SEC [2] reviewed the issues surrounding such offerings and have determined that when a portion of the proceeds of a public offering is directed to a member that is responsible for pricing and due diligence, the member is subject to a potential conflict of interest. Particularly in the area of due diligence, the NASD believes that the responsibility of the member to ensure disclosure of material facts adverse to the issuer may be influenced by the significant financial interest of the member in the offering and the incentive for the offering to be successful. In addition, the NASD is concerned regarding the potential conflict of interest faced by a member when establishing an appropriate offering price, since a successful distribution of the issuer's securities directly benefits the member.

The NASD has become concerned that a member may experience a similar conflict of interest where the proceeds of an offering are being directed to the member, or its associated or affiliated persons, in contexts other than that of a leveraged buy-out transaction. In certain cases, all or a substantial portion of the proceeds of an offering may be directed to the managing underwriter to repurchase securities of the issuer owned by the underwriter. In addition, a substantial portion of the proceeds of an offering may be applied to a joint venture with the member that underwrites the issuer's offering of securities. Finally, although leveraged buy-outs were initially structured with a "bridge loan" by a member, a number of transactions have occurred where the member has acquired equity or debt securities of the issuer, which are intended to be repurchased with the proceeds of a subsequent public offering of debt underwritten by the member.

Therefore, the NASD is proposing to amend the Corporate Financing Interpretation to require the participation of a qualified independent underwriter in public offerings in which 10% or more of the net proceeds of the offering will be directed to NASD members participating in the distribution of the offering, or to affiliated or associated persons of such members, or to members of the immediate family of such persons. The proposed rule change states that fees or commissions paid to members for underwriting services performed in connection with the distribution of the offering would not be included within the 10% calculation. Further, the 10% calculation would be based on "net offering proceeds," which is defined as gross offering proceeds less the issuer's and underwriter's expenses of issuance and distribution.

The term "immediate family" is defined by reference to the definition in the Interpretation of the Board of Governors—"Free-Riding and Withholding", Article III, Section 1 of the NASD Rules of Fair Practice ("Free-Riding Interpretation"). The same term is similarly defined in "Venture Capital Restrictions" provision contained in the Corporate Financing Interpretation. The NASD currently has pending at the SEC proposed amendments to Schedule E of the NASD By-Laws ("Schedule E"), which include amendments to the term "immediate family" at current subsection 2(f) thereof. See SR–NASD–87–21. When the SEC approves the pending amendments to Schedule E, the NASD proposes to amend the definition of "immediate family" in the "Venture Capital Restrictions" and in the new provision "Proceeds Directed to a Member" proposed herein to reference the definition of the term in Schedule E.

The proposed rule change would require that the qualified independent underwriter participate in the preparation of the offering document and exercise the usual standards of due diligence in the preparation of the offering document. Further, members would be prohibited from distributing the offering at a yield that is lower (in a debt offering) or at a price that is higher (in an equity offering) than the qualified independent underwriter would recommend.

To act as a qualified independent underwriter, an NASD member must meet the definition of that term contained in section 2(l) of Schedule E to the NASD By-Laws, which is the NASD's conflict-of-interest rule applicable to offerings by a member of its own securities or those of an affiliate.[3] Under the definition, a member must have been, and continue to be, actively engaged in the investment banking and securities business and the underwriting of public offerings for at least five years preceding the offering; must have had net income from operations in at least 3 of the 5 years preceding the offering; and must have had a majority of its board of directors (if a corporation) a majority of its general partners (if a partnership), or its proprietor (if a sole proprietorship) actively engaged in the investment banking or securities business for the 5-year period immediately preceding the offering. In addition, the member must not be an affiliate of the issuer and must have agreed to undertake the legal responsibilities and liabilities of an underwriter under section 11 of the Securities Act of 1933.

---

[1] The term "leveraged buy-out" generally refers to an acquisition accomplished primarily with borrowed funds from bank lenders or an investing group, where the acquirer is not an operating entity but is created by a group of lenders and investors solely for the purpose of the acquisition. A "bridge" loan is a short-term loan made to the issuer intended to be repaid from the proceeds of a public offering in less than six months, which is for the purpose of facilitating the speedy closing of the leveraged buyout transaction.

[2] See letter from Richard G. Ketchum, Director, Division of Market Regulation, Securities and Exchange Commission dated March 10, 1987 to Gordon S. Macklin, then President, National Association of Securities Dealers, Inc.

[3] The NASD has published for comment in Notice to Members 87–87 (December 30, 1987) a proposed amendment to the definition of qualified independent underwriter in Schedule E. The proposed amendment would prohibit a member from acting as qualified independent underwriter if the member owned 5% or more of the equity securities of the issuer or had been or was currently subject to certain disciplinary action. In addition, the proposed amendment would clarify that the member must have been actively engaged as a manager or co-manager of public offerings of a similar type and size to the offering being distributed in the 5-year period immediately preceding the filing of the offering.

The proposed rule change provides exemptions from the requirements of the proposed new provision for: (1) An offering already subject to Schedule E of the NASD By-Laws; (2) an offering of a class of equity securities for which a bona fide independent market exists as of the filing of the offering as defined in section 2(b) of Schedule E; (3) an offering of a class of securities rated by a nationally recognized statistical rating organization in one of its four highest generic rating categories; (4) an offering of securities by a charitable organization exempt from SEC registration under section 3(a)(4) of the Securities Act of 1933; (5) an offering by a real estate investment trust as defined in section 856 of the Internal Revenue Code; and (6) an offering of securities subject to Appendix F to Article III, section 34 of the NASD Rules of Fair Practice ("Appendix F"), unless the net proceeds of an offering subject to Appendix F are for the purpose of repaying loans, advances or other types of financing utilized to acquire an interest in a pre-existing company. Appendix F regulates public offerings of securities by a direct participation program, which is defined in section 34 as any entity with flow-through tax characteristics. Thus, Appendix F is most often applied to offerings of limited partnership interests. The exemption would cover traditional offerings subject to Appendix F, such as real estate or oil and gas offerings.

The NASD has historically relied on the participation of a qualified independent underwriter to resolve potential conflicts of interest on behalf of an underwriter of a public offering of securities. Qualified independent underwriters have been used to resolve conflicts of interest in offerings by members of their own securities and of their affiliates since the adoption of Schedule E to the NASD By-Laws in 1972, in the absence of a bona fide independent market for equity securities and in the absence of an investment grade rating for debt securities. In addition, in 1984, the NASD amended the "Venture Capital Restrictions" under the Corporate Financing Interpretation to provide an exemption from the restrictions if a qualified underwriter participated in the offering.[4] The NASD believes that the proposed rule change appropriately addresses the concerns raised by the SEC.

The proposed amendment is consistent with the provisions of section 15A(b)(6) of the Act, which requires *inter alia*, that the rules of registered securities associations promote just and equitable principles of trade, protect investors and the public interest, in that the amendment will provide protection for investors with respect to a member's potential conflict of interest where the proceeds of an offering are directed to a member or members underwriting the offering.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed amendment will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The proposed amendment was published for comment in NASD Notice to Members 87–52 on August 12, 1987. Nine comment letters were received regarding the proposed amendment. Three commentators, generally opposed to the amendment, questioned whether it would resolve the problem it was designed to address and asserted that regulatory and market safeguards are already in existence that make the amendment unnecessary. The remaining six commentators, while not objecting to the amendment, believed that it was overly broad and encompassed situations it was not intended to address.

Those commentators that objected to the amendment generally indicated that a member's concerns for the statutory liability incurred as a result of participating in the public underwriting makes the amendment unnecessary. It was pointed out that the underwriter has a strong incentive to insulate itself from potential liability under the Securities Act of 1933 by performing a particularly thorough review of the offering document, as the types of offerings that would be affected by the amendment generally involve a high degree of risk for investors. The NASD reviewed this comment and determined that where a member is distributing an offering, the proceeds of which will be directed to the member, the member may experience a significant conflict of interest in evaluating the issuer objectively, since the successful distribution of the issuer's securities directly benefits the member.

Commentators also pointed out that the potential conflict of interest present in pricing the securities to be offered to the public where the proceeds are to be directed to the member is not the same conflict addressed by the pricing recommendations provisions of subsection 3(c)(1) of Schedule E. Specifically, where an issuer and a member are affiliates, the member has an incentive to lower the yield of debt securities or raise the price of equity securities of the issuer to reduce interest costs or raise additional capital. However, where a member is not an affiliate of the issuer, it has a strong incentive to price the securities at a level which will ensure a successful distribution. The NASD believes that the primary function of a qualified independent underwriter in the context of an offering subject to the proposed new provision is to exercise the usual standards of due diligence with respect to the offering document to insure that all material facts regarding the issuer and its relationship with bridge lenders is adequately and accurately disclosed. However, the NASD believes that there may be situations where the price or yield of the security being distributed would be relevant. Therefore, the proposed rule change includes a provision providing that members may not participate in an offering subject to the provision unless the price of an equity issue or the yield at which a debt issue is to be distributed to the public is established at a price no higher or a yield no lower than that recommended by a qualified independent underwriter.

The NASD has modified the proposed rule change in response to a number of comments that the proposed new provision should not be applicable to an offering already subject to the provisions of Schedule E to the NASD By-Laws, or where the offering is of equity securities for which a bona fide independent market exists as of the date of the filing of the offering as defined in section 2(b) of Schedule E, or where the offering is of a class of securities rated by a nationally recognized statistical rating organization in one of its four highest generic rating categories.

A number of the commentators indicated that the minimum threshold level at which a qualified independent underwriter must be retained was too low a percentage of the net offering proceeds. Commentators also indicated that a 10% threshold might trigger application of the amendment in the ordinary course of corporate restructurings of debt. The NASD has clarified that the language of the proposed rule change to provide that application of the proposed rule change would not be triggered by that amount of the offering proceeds being paid to members as underwriting compensation.

---

[4] "The Venture Capital Restrictions" apply to initial public offerings in which members participating in the offering own securities of the issuer.

Further, the NASD believes that the potential conflict of interest intended to be addressed by the rule would exist at the level where 10% of the net offering proceeds were proposed to be directed to NASD member firms participating in the offering.

In this connection, one commentator requested that the proposed rule change be modified to clarify that the application of the amendment was explicitly restricted to repayments of borrowings incurred for the purpose of acquiring an equity interest in another business. The NASD believes, as indicated above, that the proposed rule change should not only be applicable in the context of leveraged buy-outs but also where the proceeds of the offering are being directed to members participating in the underwriting for the purpose of funding a joint venture, to repurchase equity securities of the issuer, to repurchase debt securities of the issuer or to repay a line of credit extended by an NASD member.

Three commentators pointed out that the language of the proposed amendment could be interpreted to include offerings of direct participation programs where the net proceeds from the offering are paid to a limited partnership which is affiliated with the NASD member distributing the offering. It was not the intention of the proposed amendment to encompass traditional direct participation program offerings subject to Appendix F to Article III, section 34 of the NASD Rules of Fair Practice. However, in one instance the proceeds of an offering of master limited partnership interests were directed to the managing underwriter of the distribution to repay bridge financing incurred in a leveraged buy-out transaction. Therefore, the NASD determined to clarify that the proposed rule change would not be applicable to offerings subject to Appendix F to Article III, section 34 of NASD Rules of Fair Practice unless more than 10% of the proceeds of the offering were to be used by the issuer to repay loans, advances, or other types of financing to a member to acquire an interest in a pre-existing company.

Finally, in response to one comment, the proposed rule change has been amended to provide an exemption for church bond and other charitable offerings that qualify for exemption from SEC registration under section 3(a)(4) of the Securities Act of 1933.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to file number SR-NASD-88-6 and should be submitted by April 13, 1988.

For the Commission, by the Division of Market Regulation pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-25481; File No. SR-NYSE-87-45]

Self-Regulatory Organizations; Filing of Proposed Rule Change by New York Stock Exchange, Inc., Permanent Approval of Policy for Reviewing Combinations Among Specialist Units and Proposed Amendment to the Policy and Order Granting Accelerated Approval to That Portion of the Filing Requesting an Extension of the Effectiveness of the Policy

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 17, 1987, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends the Exchange's specialist concentration policy by: [1]

(A) Amending its sixth "Guideline for Applying Consideration 2(c) to read in full as follows (italics indicates *additions;* brackets indicates [deletions]):

- Efforts to streamline *the efficiency of* its own operations *and its competitive posture* [so as to reduce its own costs, enabling it to pass on savings to its cutomers].

(B) Seeking permanent approval for the policy.

(C) Extending the interim effectiveness of the policy until the earlier of (1) June 30, 1988 or (2) the Commission's approval or disapproval of the request for permanency. The Exchange characterizes the policy as a Rule of the Board of Directors of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in section A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

(a) Purpose of the amendment. The purpose of the proposed rule change is (i) to make a minor amendment to the Exchange's specialist concentration policy, (ii) to make the policy permanent and (iii) to extend the interim effectiveness of the policy in order to afford time for the Commission to consider the Exchange's request for permanent approval. The minor amendment is to one of the guidelines for applying the policy's criterion regarding the constituent units' commitment to the Exchange. The amendment forecloses an unintended implication that the guideline mandates a particular method of pricing by specialists of their services. It does so by deleting a specific reference to passing through costs and substituting a generic reference to competitiveness, thereby causing the guidelines to encompass all competitive means and not just pricing.

---

[1] *See*, Securities Exchange Act Rel. Nos. 24411 (April 29, 1987), 52 FR 17870 (SR-NYSE-86-37) and 25077 (October 29, 1987) 52 FR 42488 (SR-NYSE-87-39).

(b) *Purpose of the amended policies: Role of the thresholds.* The purpose of the amended policy is to provide the Exchange with a mechanism for reviewing proposed mergers, acquisitions and other combinations between or among specialist units that may lead to a level of concentration within the specialist community that is detrimental to the Exchange and the quality of its markets. SR-NYSE-86-37 provided a detailed explanation of this purpose. This statement expands on that purpose statement by responding to the statement in the Commission's order approving SR-NYSE-86-37 anticipating that this proposed rule change would:

> [C]ontain a thorough analysis of the basis for the chosen threshold levels and for the use of a presumption against a combination at the higher threshold level.

SR-NYSE-87-39 reiterated the expectation and added that the Commission expected in particular that the Exchange's analysis would take into account "the capital needs of specialists highlighted during [October's] market volatility * * *." [2]

(i) *Policy overview.* The specialist concentration policy requires that, in reviewing a proposed combination among specialist units, the Quality of Markets Committee of the Board of Directors ("QOMC") must analyze the increased concentration resulting from the proposed combination. The significance of the concentration analysis in the review process increases in accordance with the number and volume of the specialty stocks assigned to the combining units as calculated under four "concentration measures".[3] If a proposed combination would result in a unit falling at or below five percent of the concentration measures, the concentration analysis plays no role. If a proposed combination involves or would result in a unit falling above five percent, but at or below ten percent, the concentration analysis becomes one of several factors that the QOMC must consider. Above ten percent, the concentration analysis takes on primary significance. At that level, the constitutent specialist units must carry the burden of showing that the proposed combination:

- Does not create or foster detrimental concentration;
- Does foster specialist competition;
- Does enhance market quality; and
- Is otherwise in the public interest.

Our explanation of the appropriateness of the thresholds and the shift of the burden of proof begins with a brief analysis of the nature of competition in the specialist community.[4]

(ii) Specialist competition. Competition among Exchange specialist units generally occurs not for market share *within* a stock, but rather for market share *of* stocks; *i.e.*, specialists compete for allocations. Thus, central to the Exchange's concern about specialist concentration is the vigor with which units compete for the constant stream of new listings that come to the Exchange (more than 140 common stocks in 1987, which is nearly ten percent of the list). In allocating new listings among units, great weight is given to the quality of the markets in the units' specialty stocks. Thus, today's vigorous competition for new allocations directly benefits public investors by enhancing the quality of the markets that specialist units make. The vigor of that internal competition also promotes vigorous intermarket competition by enhancing the Exchange's competitiveness relative to its long-time competitors in the National Market System and its emerging competitors worldwide.

Undue concentration in the specialist community would sap that vigor. To illustrate this point, imagine a specialist system composed of two units.

Consider now what would happen as new companies list. Even if one unit were markedly superior to the other in terms of the quality of the markets it maintains, the inferior unit's incentives to maintain markets of the highest quality would be reduced. It would know that the Exchange would be in a quandary: with every allocation to the superior unit in recognition of the superior quality of its market making, the Exchange would be reducing the competitive counterweight offered by the weaker firm and enhancing the dominance of the stronger firm in the Exchange's business.

Our hypothetical two-unit system would also increase the barriers to entering the specialist business. Inherent in the specialist business are significant entry barriers—large capital needs and expertise. The second factor has meant that, historically, new entrants have come principally from within the community as individuals left existing units to strike out on their own. A two-unit system would greatly inhibit this source of new competition. Proponents of creating a break-away unit would face the prospect of carrying on an uphill battle against entrenched units for new allocations. Moreover, since it could only expect to receive a portion of new allocations and would soon have its share of delistings as well, it would have no prospect of reaching a comparable market share.

To try to level the playing field, the Exchange could funnel all or a disproportionate number of new listings to the break-away unit or re-allocate stocks to it. But such intervention is far more difficult and disruptive than that which the Exchange proposes, which is to create a mechanism designed to prevent the situation from arising in the first place.

The barriers erected by a two-unit system would also deter new entrants from outside the specialist community. The Exchange's adoption of its functional regulation rules enabling diversified firms to enter the business through subsidiaries enhances the possibility of creating new entrants by tapping expertise developed off the Floor. But these potential entrants, faced with fighting the same uphill battle against entrenched units, might very well determine that making competing markets off the Exchange would be a better use of their capital and expertise. Thus, a two-unit system would likely frustrate the purposes of those rules by driving away sources of additional capital for the specialist system.

Finally, the way in which a two-unit system would deter potential new entrants would also negatively impact public confidence in the Exchange as a market place. It would raise questions in the minds of investors and other members of the public as to the fairness and openness of the Exchange's marketplace.

---

[2] *See*, Securities Exchange Act Rel. No. 25077 (October 29, 1987) 52 FR 42488.

[3] The concentration measures determine the specialist units' share of:

- Listed common stocks;
- The 250 most active listed stocks;
- The total share volume of stock trading on the Exchange; and
- The total dollar value of stock trading on the Exchange.

(iii) Thresholds: When to Say "Enough". Obviously, none of these dire consequences attach when the combination of two or more of today's more than 50 units first exceeds either of the two thresholds. Yet, no one would argue that we have to wait until our hypothetical two-unit system emerges before we can intervene. So the question becomes, "When does concentration become 'undue'?"

The Exchange cannot say for sure. That is why the Exchange did not flatly prohibit combinations above a specified level. Rather, the Exchange only assured that it could assess them for their concentration effects.

The numbers do have a basis, however. They derive from the simple recognition that (1) the present, relatively low level of concentration does not generate the adverse effects noted above and (2) as concentration increases, we do not know the point at which such adverse effects will begin to appear. In other words, the appropriateness of the thresholds derives from the goal of the policy: if warranted, to permit the Exchange to intervene *before* concentration in the specialist community increases to a point where it interferes with the vigor of specialist competition and the quality of the Exchange's markets.

As SR–NYSE–86–37 describes at some length, we believe that the stage may have been set for such an increase. Two factors led to the policy: (1) A long-term trend towards concentration in the specialist community and (2) more importantly, the occurrence of several changes in the nature and structure of the markets that may lead to a sudden acceleration of that trend.[5]

The convergence of these two factors caused the Exchange to decide that the time to begin analyzing the concentration effects of proposed combinations was *now*.

"Now" translates into 10 percent simply because, today, market shares array up to 8.5 percent. The Exchange set the thresholds by referring to the current level of concentration and targeting for special scrutiny concentration at a level slightly higher than that with which the Exchange is familiar today.[6] The NYSE reached the conclusion only through a consultative and deliberative process that caused it to carefully balance the desire to leave some room for combinations against the potential for accelerated concentration and the adverse effects that would follow. It is the NYSE's move from certain competitive vigor to uncertainty, coupled with the knowledge that competitive imperfections will begin to be felt at some higher level, that militate for setting the special scrutiny threshold above the current level by a conservative margin.

Conservatism is in order because the Exchange seeks an opportunity to visit the concentration issue at the very moment the structure of the specialist community begins to shift away from its present, relatively low level of concentration.

And that is precisely what the Exchange should be doing. The NYSE is charged with protecting the interest that the public has in maintaining and promoting the quality of its markets. The present market structure serves that public interest by fostering vigorous competition for new allocations and creating real incentives for market quality. Economic theory and common sense indicates that increases in concentration will at some point interfere with that vigor and undermine the perception of fair and open markets.

The NYSE does not know where that point is. The economic literature on industries in which firms compete for a regulatory allocation of market share offers no consensus as to the level of concentration that should be permitted. But it does teach that increasing concentration eventually reaches a level where the imperfections in that competition begin to dominate. The Exchange policy permits it to continually reassess the competitive effects as each combination proposal comes forth.

(iv) Presumptions—(A) A Yellow Light. The Exchange's thresholds may err on the side of caution. But its prudence imposes only a procedural cost: The Exchange has not prohibited combinations above ten percent, but only subjected them to special scrutiny.

This makes the approach elastic. It permits evolutionary change in the specialist system—and abrupt change if a case can be made for it. It scrutinizes, rather than caps, combinations. And it permits the Exchange to assess a proposed combination under the conditions of the time; *e.g.*, to take into account the contemporaneous distribution of market shares across firms.

October's extraordinary volatility underscores the importance of this elasticity. The NYSE formulated the policy with volatility (although not a market break) in mind: as the NYSE noted above, one of the factors that led to the Exchange's adoption of the policy was its recognition that growing capital demands on specialist units from the increasing risk to capital created by increased market volatility would create pressure for combinations.

The NYSE can demonstrate this elasticity by asking how the policy might have worked in October. Suppose a need for an immediate infusion of capital into one or more specialist units had brought forth a combination that fell under the policy. The policy would have permitted the Exchange to give extraordinary weight to the need for capital under the "conditions of the time"—the need to assure that the constituent specialist units could continue to make markets in a fair and orderly way under the unprecedented circumstances. In addressing the concentration effects, the constituent units could have analogized to the well-accepted "failing firm" doctrine of antitrust analysis, which holds that preventing the loss of productive capacity within a market due to insolvency of a competitor justifies a combination that might otherwise be viewed as anticompetitive.

(B) Analytical Rigor. But like all yellow lights, the Exchange's approach risks a crossing when a full stop is necessary. The NYSE addresses this risk by shifting to the proponent of a combination that may lead to detrimental concentration the burden of proving the benefits and the absence of detriment. Just as the elasticity of the Exchange's approach balances the conservatism of the Exchange's thresholds, so too the shifting of the burden balances the risk from that elasticity.

The balance to that risk is created by the rigor of the analysis. By making the analysis a prerequisite for approval, the Exchange harnesses the proponents' strong economic interest in the consummation of the proposed combination: they have a strong economic incentive to rigorously analyze the concentration issues and the countervailing economies of scale in areas such as capital, manpower and operations in order to win approval. Therefore, the NYSE expects that the shift in the burden of proof will yield a more meaningful grappling with the concentration issue then would otherwise be the case. Requiring the proponents to carry the burden of proof allows it to peer into the unknown using all the illumination the NYSE can muster.

(C) A Conventional Approach. Both the Exchange in SR–NYSE–86–37 and the Commission in its approval order have called this shift of burden a "rebuttable presumption". This characterization may obscure the nature of the burden that the proposing units must carry. The NYSE has not created a rebuttable presumption as it is used in the law of evidence, where, absent rebuttal, the trier of fact presumes from the proof of one fact (*e.g.*, the mailing of the letter) that another is true (*e.g.*, the receipt of the letter). Rather, the policy simply requires the constituent units to make affirmative showings that the combination is not harmful and is beneficial—albeit by "clear and convincing" evidence on three of the four points.

Shifting the burden to the proposing units is hardly extraordinary. The NYSE has borrowed our approach from the Act. As the Exchange has shown above, at some point, concentration creates a burden on competition among specialist units. The Act itself creates a rebuttable presumption against burdens on competition: the Commission may not adopt a rule or approve a rule proposal of a self-regulatory organization ("SRO") unless it finds that any burden on competition created by the proposed rule is necessary or appropriate in furtherance of the purposes of the Act. When an SRO proposal raises issues as to competitive burdens, the Commission looks to the SRO to make the showing necessary to support the required finding.

The thresholds and procedures of the specialist concentration policy give the Exchange flexibility to approve a combination that will strengthen the specialist system, yet affords an opportunity to carefully assess concentration if and as it develops at levels low enough to permit us to intervene if intervention is warranted. They enable it to manage evolution, rather than to have to cope with crises. They embody an orderly, deliberative and internally coherent approach to assuring that the specialist community does not drift into concentration so high that it impedes the competition among existing specialist units for new allocations, deters potential new entrants into the business and creates a perception that undermines investor confidence.

(2) Statutory Basis. The basis under the Act for the proposed rule change is section 6(b)(5): the Exchange will be able to monitor tendencies towards concentration in the specialist community and intervene to prevent undue concentration. This serves to remove impediments to and perfect the mechanism of a free and open market and to protect investors and the public interest. The proposed rule change also comports with section 11A(a)(1)(C), which states Congress's finding that fair competition among brokers and dealers serves and fosters the public interest, investor protection and fair and orderly markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

As more fully described in SR–NYSE–86–37, the Exchange believes that the proposed rule change will not impose any burden on competition and, in fact, creates a mechanism that will help assure competition among specialist units. (See Item 3(a)).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on the proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties. (See SR-NYSE–86–37 as to comments received during the policy's development.)

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has requested that the portion of the proposed rule change that extends the amended policy's interim effectiveness be given accelerated effectiveness pursuant to section 19(b)(2) of the Act. The Exchange believes there is good cause for accelerated effectiveness in order to avoid a hiatus in the effectiveness of the policy during the Commission's consideration of permanent approval.

The Exchange well recognizes that concentration in the specialist community raises important market structure issues, and that the Commission may wish to withhold action on the Exchange's request for permanent approval of the policy until it can consider any new comments that may be elicited by this **Federal Register** notice. Thus, the Exchange is only asking the Commission to grant expedited approval to an extension of its temporary approval. Accelerated effectinvess of the extension will not require the Commission to forego thorough consideration of, and additional public comment on, the request for permanent approval.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to the file number in the caption above and should be submitted by April 13, 1988.

V. Conclusion

The Commission finds that the portion of the proposed rule change requesting an extension of the interim effectiveness of the Exchange's current concentration policy until such time as the Commission makes a final determination on whether it should approve or disapprove the pilot program on a permanent basis is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and the requirements of section 6. In particular, the Commission views an extension of the interim effectiveness of the current concentration policy as furthering investor protection and the public interest as the extension will enable the Exchange to continue to monitor tendencies toward concentration in the specialist community while its proposal for permanent approval of the policy is considered by the Commission.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in that an extension of the effectiveness of the policy will permit the Exchange to continue to assess proposed combinations between and among specialist units on an uninterrupted basis while the Commission completes its review of the Exchange's request for

---

[5] These changes include the increasing capital demands on specialist units from the growing size and continued institutionalization of the market, the increasing risk to capital from increased market volatility, the adoption of rules making it possible for diversified firms to enter the specialist business, and increasing competition from domestic and overseas markets.

[6] Note that simply focusing on the 1.5 percent difference between the 10 perent threshold and the largest firms's market share underestimates the margin for increased concentration, since combinations among smaller firms can increase concentration without exceeding the 10 percent threshold.

BEST COPY AVAILABLE

permanent approval. In addition, the Commission has not received any comments criticizing the policy since its interim approval last year. Accordingly, the Commission believes that the portion of the proposed rule change relating to an extension of the effectiveness of the current concentration policy should be approved as submitted.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 17, 1988.

Jonathan G. Katz,

Secretary.

[FR Doc. 88-6359 Filed 3-22-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-25479; File No. SR-NYSE-88-06]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by New York Stock Exchange, Inc.; Auxiliary Closing Procedures for Orders Relating to Expiring Stock Index Contracts

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 10, 1988, the New York Stock Exchange ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items, I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change adds auxiliary closing procedures for assisting in handling the order flow associated with the concurrent expiration of stock index futures, stock index options and options on stock index futures on March 18, 1988. It specifies procedures substantively identical to those used on December 18, 1987, and on several earlier expiration Fridays. Only the dates and the list of pilot stocks (due to name changes and the substitution of stock as a consequence of changes in market weighting) has changed.

Specifically, the auxiliary procedures provide that market-at-the-close stock orders in 50 pilot stocks relating to index arbitrage positions must be received by 3:30 p.m. on March 18. The Exchange will promptly disseminate the size of substantial market order imbalances (50,000 shares or more) as of 3:30 in the pilot stocks. The procedures also ban entry of market-at-the-close orders in the pilot stocks after 3:30 p.m. unless orders (A) offset the imbalances and (B) are not for the purpose of liquidating an index arbitrage position.

The Exchange characterizes the proposed rule change as a Rule of the Board of Directors of the Exchange. The proposed rule change supersedes all other Exchange rules and policies inconsistent with it.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in Sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to comply with the request of the Commission that the Exchange repeat the June 19, 1987 closing procedures on subsequent concurrent expirations of stock index futures, stock index options and options on stock index futures. (9/16/87 Letter to Robert J. Birnbaum, President, NYSE, from Richard G. Ketchum, Director, SEC.) The proposed rule change will make the procedures a rule of the Exchange.

2. Statutory Basis

The basis under the 1934 Act for the proposed rule change is section 6(b)(5), which requires that rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The propsed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the 1934 Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding the proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the 1934 Act. Confirmation to the industry of the Exchange's intention to comply with the Commission's request that the Exchange repeat the closing procedures specified by the proposed rule change should occur as soon as possible to permit investors and firms to plan accordingly. Moreover, the procedures contain no substantive changes from the procedures used on previous expiration Fridays. Accordingly, the Exchange seeks action by the commission in time to permit notification of interested parties well in advance of the March 18 expiration.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a securities exchange, and in particular, the requirements of section 6 and the rules and regulations thereunder. The market-on-close procedures described herein have been utilized on the prior six Expiration Fridays (the quarterly expiration when stock index futures, stock index options and options on stock index futures have simultaneous expirations). These procedures were part of efforts by the Commission and the self-regulatory organizations to address stock market volatility that has been associated with certain index arbitrage trading strategies on Expiration Fridays. By requiring submission of market-at-close

orders early and disseminating imbalances, the NYSE could attrract contra-side interest to alleviate imbalances caused by the closing of index arbitrage positions. The procedures have proven to be operational successes, and have significantly contributed to the smooth handling of the increased order flow associated with these expirations.

The Commission finds good cause for approving this rule change prior to the thirtieth day after the date of publication of notice of filing thereof in that the Commission desires to notify market participants as soon as possible of the Exchange's intention to repeat these procedures on the upcoming March 18, 1988 expiration. Moreover, the procedures contain no substantive changes from the procedures utlized by the NYSE on December 18 and several earlier Expiration Fridays.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the NYSE. All submissions should refer to the file number in caption above and should be submitted by April 13, 1988.

It therefore is ordered, pursuant to section 19(b)(2) of the 1934 Act,[1] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 17, 1988.

Jonathan G. Katz,

Secretary.

[FR Doc. 88-6352 Filed 3-22-88; 8:45 am]

BILLING CODE 8010-01-M

---

[1] 15 U.S.C. 78s(b)(2) (1982).

[Release No. 34-25476; File No. SR-NYSE-88-04]

Self-Regulatory Organizations; Filing and Order Granting Limited Accelerated Approval of Proposed Rule Change by New York Stock Exchange, Inc.; Auxiliary Opening Procedures for Orders Relating to Expiring Stock Index Contracts

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) ("Act"), notice hereby is given that on March 14, 1988, the New York Stock Exchange ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change adds auxiliary opening procedures for assisting in handling the order flow on those days on which there is concurrent expiration of stock index futures, stock index options and options on stock index futures ("Expiration Fridays"). It specifies procedures identical to those used on December 18, 1987 (SR-NYSE-87-43; Release No. 34-25202 (December 16, 1987)) and on several previous Expiration Fridays. The procedures now are being proposed as permanent rule changes.

Specifically, the auxiliary procedures provide that stock orders relating to opening-price settling contracts must be received by 9:00 a.m. on an Expiration Friday.[1] The Exchange promptly will disseminate the size of substantial market order imbalances (50,000 shares or more) as of 9:00 in the affected stocks.

The Exchange will make SuperDot available to accept orders at 7:30. The Exchange will also raise the order size eligibility for the Opening Automation Reporting Service ("OARS") to 30,099 shares—in effect, raising SuperDot's pre-opening order size parameters. The procedures confine orders relating to opening-price settling contracts to market orders and require them to be appropriately identified. The procedures also ban "limit-at-the-opening" orders and apply the reduced waiting periods for second and subsequent price indications that the Commission previously approved.

The Exchange characterizes the proposed rule change as a Rule of the Board of Directors of the Exchange. The proposed rule change supersedes all Exchange rules and policies inconsistent with it.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to establish procedures to augment the NYSE's regular opening procedures on Expiration Fridays. The auxiliary procedures will assist in integrating stock orders relating to expiring contracts into the Exchange's opening procedures in a manner that will assure an efficient market opening in each stock as close to 9:30 a.m. as possible.

The Exchange believes that settling index contracts based upon the opening prices of the constituent stocks, and thereby permitting use of the Exchange's time-tested opening procedures, provides the best mechanism for handling the accompanying stock volume. Previously, the Exchange, the Chicago Mercantile Exchange, Inc. and the New York Futures Exchange, Inc. altered or added index contracts specifying that settlement pricing will occur based upon the opening prices on Expiration Fridays. They also have provided that trading in opening-price settling contracts will cease at the close on the preceding day. The Exchange anticipates that these changes will divert to the opening approximately 75 percent of the stock order flow related to expiring index contracts. The proposed rule change establishes auxiliary procedures to help accommodate the diverted order flow.

The special dissemination of a picture of substantial market order imbalances in the affected stocks as of 9:00 will provide off-Floor participants with a picture of the unique impact of the index-related orders, and will allow ample opportunity for them to react to it. Because the regular opening procedures will otherwise operate, an off-Floor participant will, as always, be able to obtain a minute-to-minute Floor picture through his Floor broker. Similarly, the pre-opening application of the Intermarket Trading System Plan will be in effect. Moreover, if it becomes evident that a significant change from the preceding day's closing price is in the offing, the specialist can, with the approval of a Floor Official, disseminate regular price indications over the tape as needed.

---

[1] As to each Expiration Friday, the Exchange will adjust the list of stocks subject to the procedures in response to changes in market weighting.

The particular purposes of several of the procedures deserves elaboration.

9:00 Cut-Off. The 9:00 cut-off for entry of stock orders relating to opening-price settling contracts assures that the upper limit of the order flow created by unwinding index-related positions is known at 9:00. The specialist can retrieve the orders in OARS at 9:00 and combine them with the manual orders, creating a complete picture of all the orders. If the picture shows a substantial imbalance, he will notify off-Floor participants of the imbalance within the first several minutes after 9:00. This allows a half hour or more to react.

Preclusion of Limit-at-the-Opening Orders. Preclusion of limit-at-the-opening orders simplifies the specialist's task in opening his market. These orders cannot be entered into the electronic display book. Consequently, their acceptance would complicate the specialist's task by requiring him to keep a separate, manual tally. Customers are free to enter regular limit orders.

Applicability of Revised Price Indications Waiting Period. SR-NYSE-87-14 (Release No. 34-24880 (September 4, 1987)) describes the purpose of reducing the waiting period following second and subsequent price indications.

2. Statutory Basis

The basis under the Act for the proposed rule change is section 6(b)(5), which requires that rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the 1934 Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding the proposed rule change. The Exchange created an ad hoc Expiration procedures Committee consisting of its Floor Directors, other representatives from the Floor, upstairs trades and institutional brokers. The proposed rule change reflects the consensus reached by the committee. The Exchange received no written comments following the previous expirations concerning the procedures.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given limited accelerated effectiveness pursuant to section 19(b)(2) of the Act solely with respect to the March 18, 1988 Expiration Friday. Confirmation to the industry of the Exchange's intention to repeat those procedures should occur as soon as possible to permit investors and firms to plan accordingly. Moreover, the procedures contain no substantive changes from previously-used procedures, on which there has been ample opportunity for comment. Accordingly, the Exchange seeks action by the Commission in time to permit notification of interested parties well in advance of the March 18 expiration.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of section 6 and the rules and regulations thereunder. The Commission believes that basing the settlement of index products on opening, as opposed to closing prices, on March 18 may help to accommodate index-related share volume. The proposed auxiliary procedures are intended to ensure that the Exchange may efficiently process sizeable order flow at the open. The Commission believes that these procedures should work to reduce order imbalances at the open, and thus dampen potential volatility. In this regard, the procedures worked well during the previous three expirations and the March expiration should provide the Commission with another opportunity to assess whether these procedures are sufficient in dampening expiration volatility at the opening, or whether additional measures are necessary.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the proposed rule change will enable the Exchange to quickly implement and notify market participants about procedures that it believes will appropriately address any index-related heightened share volume at the open on March 18.

The Exchange, at this time, is not seeking permanent accelerated effectiveness of the proposed rule change as it applies to subsequent Expiration Fridays. This rule filing, in addition, to seeking accelerated approval of the Exchange's opening Expiration Friday procedures for March 18, is designed to provide notice of those procedures for permanent approval.

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should

be submitted by April 13, 1988. *It therefore is ordered,* pursuant to section 19(b)(2) of the Act,[2] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 17, 1988.

Exhibit A—Special Notice, Expiration Procedures for [Insert Date of Expiration Friday]

[Notice Date]

The New York Stock Exchange, Inc. ("NYSE"), has altered procedures in accordance with changes in certain index contracts.[1] Settlements in these contracts will be based upon the opening stock prices on expiration Friday ([Insert Date]), and trading in these contracts will cease at the close on the previous day ([Insert Date]). The Exchange has taken these steps because it believes that the volume often associated with the concurrent expiration of futures and options contracts on stock indices can best be accommodated by using NYSE's opening procedures.

The Exchange has created special procedures applicable on [Insert Date]. For convenience, a copy of its special procedures is attached to this notice.

[NYSE Officer Name]
[NYSE Officer Title]

New York Stock Exchange

Expiration Procedures for [Insert Date of Expiration Friday]

Several auxiliary procedures are necessary to integrate stock orders relating to expiring contracts into NYSE's opening procedures in a manner that assures an efficient market opening in each stock as close to 9:30 a.m. as possible. The auxiliary opening procedures applicable on [Insert Date] are:

Order Entry

- Stock orders relating to index contracts whose settlement pricing is based upon the [Insert Date] *opening* prices must be received by SuperDot or by the specialist by 9:00 a.m.
  - These orders may be cancelled or reduced in size.[1]
  - Stock orders relating to index contracts whose settlement pricing is *not* based upon the [Insert Date] opening prices may be entered after 9:00 a.m.
- Stock orders relating to opening-price settling contracts may only be entered as market orders.
- To facilitate early order entry, SuperDot (1) will begin accepting orders at 7:30 am.m and (2) will accept orders of 30,099 shares or less.
- No "limit at the opening" ("limit OPG") order are permitted, whether or not they relate to index contracts.
  - Ordinary limit orders may be entered.

Order Identification

- Stock orders relating to opening-price settling contracts must be identified "OPG."
  - Firms entering these orders through SuperDot, but unable to identify orders as "OPG," may use a unique branch code or firm identifier (mnemonic) to identify these orders. The NYSE Market Surveillance Division (11 Wall Street, 11th Floor) must be advised of the branch code or identifier by [Insert Last Date to Notify Exchange Staff, Currently the Following Monday].
  - Firms unable to identify these orders in either way, and firms not using SuperDot, must submit a list of all these orders and related details to the NYSE Market Surveillance Division by [Insert Last Date to Notify Exchange Staff, Currently the Following Monday].

Dissemination of Order Imbalances

- For any fo the affected stocks having a *market* order imbalance of *50,000* shares or more at 9:00 a.m., the NYSE will disseminate the size of the order imbalance via the low-speed ticker and the news services as promptly as practicable after 9:00 a.m.

Except for the auxiliary procedures described above, all stocks are subject to the regular NYSE opening procedures, including price indications where a substantial price change is anticipated. Fifteen minutes must elapse between a first indication and a stock's opening. However, when more than one indication is necessary, a stock may open (1) five minutes after the last indication when it overlaps the prior indication (e.g., 51–53 overlaps 50–52, but does not over 53–55) and (2) ten minutes after the last indication when it does *not* overlap the prior indication, provided that 15 minutes must have elapsed from the dissemination of the first indication.

Any questions may be directed to [Insert Appropriate NYSE Staff Names and Phone Numbers].

[Release No. 35-24602]

Filings Under the Public Utility Holding Company Act of 1935 ("Act"); Eastern Utilities Associates et al.

March 17, 1988.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 11, 1988 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

[The List of Index Contracts Will be Updated Each Expiration Friday as Necessary.]

[1] Firms cancelling these orders or reducing them in size shall prepare contemporaneously a written record describing the rationale for the change and shall preserve it as Rule 410 provides.

Cogenex"), P.O. Box 2333, Boston, Massachusetts 02107, its wholly owned subsidiary, have filed a post-effective amendment to EUA's application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rule 45(a) thereunder.

By order dated December 19, 1986 (HCAR No. 24273), EUA was authorized to make capital contributions and/or short-term loans to EUA Cogenex in an aggregate amount not to exceed $7 million and EUA Cogenex was authorized to effect short-term borrowings from lending institutions in an aggregate amount not to exceed $7 million. The interest rate on the borrowings from EUA and the lending institutions was required to be no greater than the commercial base rate of The National Bank of Boston.

EUA proposes to increase the maximum amount of capital contributions and/or short-term loans which EUA is permitted to make to EUA Cogenex ("Obligations") evidenced by notes bearing interest at a rate equal to EUA's effective cost of funds from commercial lenders, as adjusted from time-to-time, the aggregate amount of such capital contributions and notes outstanding to EUA at any one time not to exceed $15 million. EUA proposes to finance these Obligations by short-term borrowings under its existing bank lines of credit. The principal amount outstanding at any one time will not exceed $15 million and will be evidenced by notes which may be issued and renewed from time-to-time during the period ending December 31, 1989. Based on the current prime rate of 8½% and a commitment fee of ¼ of 1% of the credit line, the effective borrowing rate would be 8.75%.

EUA Cogenex proposes to increase the maximum amount of short-term borrowings from lending institutions through December 31, 1989, to be evidenced by notes bearing interest either at the commercial bank base rate as adjusted from time-to-time or at available money market rates, the aggregate amount of such borrowings not to exceed $15 million.

Eastern Utilities Associates, et al. (70-7486)

Eastern Utilities Associates ("EUA"), P.O. Box 2333, Boston, Massachusetts 02107, a registered holding company, and its electric utility subsidiary, EUA Power Corporation ("EUA Power"), One Eagle Square, P.O. Box 709, Concord, New Hampshire 03002-0709, have filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12 of the Act and Rules 42, 43, 50(a)(5) and 62 thereunder.

By order dated November 21, 1986 (HCAR No. 24245) ("November 21st Order"), EUA Power was authorized to purchase joint ownership interests aggregating 12.1324% in Seabrook Nuclear Power Project ("Seabrook"), a two unit ("Unit 1" and "Unit 2") nuclear facility located in Seabrook, New Hampshire. Construction of Unit No. 1 has been completed, but its commercial operation has been delayed by licensing proceedings before the Nuclear Regulatory Commission. Commencement of commercial operation of Unit No. 1 is not anticipated before 1989 at the earliest. Construction of Unit No. 2 has been cancelled.

Also pursuant to the November 21st Order, EUA Power issued and sold for cash: (1) 10,000 shares of its common stock, $.01 per share, to EUA for a purchase price of $10,000; (2) 449,900 shares of its Class A 25% cumulative Convertible Preferred Stock, par value $100 per share ("Class A Preferred Stock") to EUA for a total purchase price of $44,990,000; and (3) $180 million aggregate principal amount of its 17½% Series A Secured Notes due November 15, 1991 ("Series A Notes"), purchased at their face value by institutional and other investors at private sale.

EUA Power states that it will not have significant amounts of income to meet its expenses, including monthly payments representing its share of the cost of maintianing Unit No. 1 and continuing the licensing process related to Seabrook, and interest payments on the Series A Notes. In order to meet its interest obligations under its Series A Notes and its share of Seabrook Unit 1 costs, EUA Power proposes to issue and sell, pursuant to an exception from the competitive bidding requirements of Rule 50 under subsection (a)(5): (1) Up to $180 million aggregate principal amount of 17½% Series B Secured Notes due 1993 ("Series B Notes"), only in exchange for up to $180 million of 17½% Series A Secured Notes ("Series A Notes") now outstanding, and up to 180,000 Contigent Interest Certificates ("CICs"), one of which will be issued with each $1,000 principal amount of Series B Notes in exchange for Series A Notes; and (2) up to $100 million aggregate principal amount of 17½% Series C Notes ("Series C Notes") to the Series B Noteholders and the Series C Noteholders in lieu of the payment of cash interest on the Series B and Series C Notes.

EUA Power will offer the Series B Notes to Series A Noteholders (together with the CICs) in exchange for their Series A Notes ("Exchange Offer"). The Series B Notes will provide that, at EUA Power's option, interest may, in lieu of payment in cash, be paid "in kind" by the issuance of Series C Notes to each Series B Noteholder in a principal amount which will be a fixed percentage not exceeding 133% of the amount of the cash interest payment to which the Noteholder would otherwise be entitled. Interest on the Series C Notes will similarly be payable in kind, at EUA Power's option, in lieu of payment in cash, by the issuance of additional Series C Notes in a principal amount up to the same percentage not exceeding 133% of the cash otherwise payable.

The Series B Notes and the Series C Notes (as well as the CIDs) will be issued under a supplement to the Indenture. The Series B Notes and the Series C Notes will rank equally with any Series A Notes that may remain outstanding. The terms and provisions of the Series B Notes and the Series C Notes will be identical to those of the Series A Notes to the fullest extent possible except with regard to the redemption provisions and the interest payment provisions (including, in the case of the Series B Notes, the CICs) and: (1) That the Series B Notes and the Series C Notes will mature on May 15, 1993 and November 15, 1992, respectively; (2) the Series B Notes will be non-redeemdable prior to November 15, 1991 and thereafter will be redeemable at par value plus a premium which will be 0.500% during the 6-month period ending May 14, 1992, 0.250% during the 6-month period ending November 14, 1992, and 0.125% during the remaining period to maturity: and (3) that no provision is made for optional redemption of the Series C Notes. The Series B Notes will be issued only upon exchanges of Series A Notes in equal principal amounts pursuant to the Exchange Offer, and Series C Notes will be issued only by delivery to Noteholders, in amounts as stated above, in payment of interest on Series B Notes and Series C Notes.

To encourage exchanges of the existing Series A Notes for the proposed Series B Notes, EUA Power will offer the Series A Noteholders the right to receive additional interest payments on Series B Notes contingent upon the income after interest charges of EUA Power exceeding certain amounts in each of EUA Power's full fiscal years beginning on the first day of the month following the commercial operation date of Unit No. 1 and continuing to and including (but not beyond) the date when the conversion of all of EUA Power's Preferred Stock into common stock is completed. The right to receive such contingent interest payments will be evidenced by CICs.

As soon as possible after commercial operation of Unit No 1 has commenced, EUA Power expects to resume payment of interest on, and eventually payment of principal when due at maturity or upon redemption of, the Series B Notes and Series C Notes from the proceeds of sales of electricity generated by Unit No. 1 and from the sale of additional securities.

EUA Power also seeks authorization, if such authorization is required, under the provisions of Rule 62 to make the Exchange Offer to its Series A Noteholders at the earliest possible time.

EUA Power further proposes to amend its Certificate of Incorporation to increase its capital stock by 250,000 additional shares of Class A Preferred Stock ("Additional Preferred Stock") and to issue and sell, and EUA to acquire, up to 250,000 shares of Additional Preferred Stock at a purchase price of $25 million. The Additional Preferred Stock will be converted into common stock on a schedule which depends upon the rate at which EUA Power refinances (at an interest rate not exceeding 175% of the then existing prime rate) its long-term debt outstanding at the date of commercial operation of Unit No. 1. All Additional Preferred Stock must be converted no later than 12 years after the commercial operation date of Unit No. 1. Under certain conditions, EUA may purchase all or a portion of the Additional Preferred Stock before any Series B Notes are issued. The proceeds from the sale of the Additional Preferred Stock will be applied to the payment of commitments of EUA Power other than interest on its Secured Notes, including expenses related to the proposed Exchange Offer and expenses required for the funding of EUA Power's share of the cost of operating, maintaining and protecting Unit No. 1 and the dismantling of Unit No. 2. EUA seeks authorization to finance its purchase of the Additional Preferred Stock by short-term bank borrowings under its existing bank lines of credit of up to $25 million. EUA may refinance all or part of such borrowings by means of a term loan or other credit arrangement with banks or other financial institutions.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Flight Service Station at Lovelock, NV; Closing

AGENCY: Federal Aviation Administration, Department of Transportation.

ACTION: Flight Service Station at Lovelock, Nevada, Notice of closing.

SUMMARY: Notice is hereby given that on or about March 10, 1988, the Flight Service Station at Lovelock, Nevada, will be closed. Services to the general aviation public of Lovelock, formerly provided by this office, will be provided by the Flight Service Station in Reno, Nevada. This information will be reflected in the next reissuance of the FAA Organization Statement.

(Sec. 313(a), 72 Stat. 752; 49 U.S.C. 1354.)

Arlene B. Feldman,

Acting Director, Western-Pacific Region.

Issued in Lawndale, California, on March 14, 1988.

Urban Mass Transportation Administration

Intent To Prepare an Alternatives Analysis/Environmental Impact Statement on Alternative Transit Improvements in the Atlanta Region of the State of Georgia

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice of intent to prepare an Alternatives Analysis/Environmental Impact Statement.

SUMMARY: This notice announces that the Urban Mass Transportation Administration (UMTA) and the Metropolitan Atlanta Rapid Transit Authority (MARTA) are undertaking the preparation of an Alternatives Analysis/Environmental Impact Statement (AA/EIS) for alternative transit improvements in the North Atlanta Corridor: Northside Hospital area to the vicinity of Spalding Drive and GA. 400 of the Atlanta Region. The AA/EIS is being prepared in conformance with 40 CFR Parts 1500 through 1508, Council on Environmental Quality (CEQ), Regulations for Implementing the Procedural Requirements of the National Environmental Policy Act of 1969 as amended; 23 CFR Part 771, Federal Highway Administration and Urban Mass Transportation Administration, Environmental Impact and Related Procedures, Final Rule.

FOR FURTHER INFORMATION CONTACT: Alex McNeil, Transportation Representative, UMTA Region IV Office, 1720 Peachtree Road NW., Suite 400, Atlanta, GA 30309, Telephone (404) 347-7875.

SUPPLEMENTARY INFORMATION:

Scoping Meeting

A public scoping meeting will be held on April 13, 1988 at 7:00 p.m., in the auditorium of the North Fulton Annex, 1741 Roswell Road, NE. (Sandy Springs) to help establish the purpose, scope, framework and approach for the analysis. At the scoping meeting, staff will present a description of the proposed scope of the study using maps and visual aids as well as a plan for an active citizen involvement program, and a projected work schedule. Members of the public and interested Federal, state, and local agencies are invited to comment on the proposed scope of work, alternatives to be assessed, impacts to be analyzed, and evaluation criteria to be used to arrive at a decision. Comments may be made either orally at the meeting or in writing no later than April 28, 1988 to Metropolitan Atlanta Rapid Transit Authority, Engineering Division, Attention: Gloria Gaines, 4th Floor, 2424 Piedmont Road, NE., Atlanta, GA., 30324, (404) 848-5465.

Corridor Description

The North Atlanta Corridor, Northside Hospital area to the vicinity of Spalding Drive and GA. 400, is a major travel corridor which includes Northside, St. Joseph's and Scottish Rite Hospitals, Perimeter Center mixed use office/retail center (DeKalb County), the North Park mixed use complex, and the North Springs Commercial/residential area. Its boundaries are generally described as the Sandy Springs/Perimeter Mall area and more particularly as Glenridge Drive, Roswell Road, and Trimble Road on the west, Powers Branch Creek on the north, Chamblee Dunwoody Road/Nancy Creek (north fork) on the east and Nancy Creek on the south.

MARTA is presently planning to extend the existing North Rail Line in the vicinity of the Lenox Station north to the Northside Hospital area where a station will be located. This study will analyze transit alternatives north of the Northside Hospital/Medical Center Station.

Description of Alternatives

Transportation alternatives proposed for consideration in the corridor are the following:

Alternative 1: No Build

The no build option includes the existing and committed rail system and the Medical Center (Northside Hospital area) Station as an on-line station, designed with busbays, kiss and ride spaces, and feeder bus service. No on-site parking will be provided. In addition to an expanded Abernathy Road Park and Ride (P&R) lot, additional P&R lots would be located at Mansell Road and State Bridge Road.

Alternative 2: TSM—Minimum

The Transportation System Management (TSM)—Minimum alternative, assumes the Medical Center Station as a permanent end of line station. Service will be improved by providing additional buses, bus routes, busbays, kiss and ride spaces, and increased emergency exiting capacity. Improvements to local roadways would be studied in an effort to mitigate the anticipated increase in transit system related traffic in the area. P&R lot improvements would be the same as the no build option.

Alternative 3: TSM—Maximum

The Transportation System Management (TSM)—Maximum alternative, also assumes the Medical Center Station as a permanent end of line station with the same station improvements proposed in the TSM (minimum) alternatives, except the addition of parking spaces at the station, with a percentage reserved for High Occupancy Vehicle (HOV) users. This alternative also proposes HOV lanes along GA. 400 from Spalding Drive to the Glenridge Connector or other viable locations. Satellite parking would be the same as the TSM (Minimum) with the addition of another P&R lot located at GA. 400/Spalding Drive area. Service will be improved as stated in Alternative 2.

Alternative 4: Busway

The grade separated busway alternative would provide an exclusive or semi-exclusive right of way from the Medical Center Station to an area located approximately at GA. 400/Abernathy Road with stations at Perimeter Center (Dunwoody) and North Park (Sandy Springs). Local bus access would be provided at the Perimeter Center (Dunwoody) Station and Abernathy Road. This proposal calls for the same satellite P&R lots as the TSM (Maximum). Service will be improved as stated in Alternative 2 using the busway as appropriate.

The Busway Alternative would begin with a barrier-free interface with the rail system at Medical Center Station. It would follow generally the same alignment as the rail extension to a station at Perimeter Center (See Alternative 5). Ramps would be located north of the station to allow some bus routes to continue north and east on surface streets to serve the Dunwoody area. The busway would continue northwest to the vicinity of th GA. 400/Abernathy Road interchange. Several design options will be considered in that area:

—Tie into the existing Abernathy Park/Ride Lot
—Direct ramps to GA. 400
—HOV lanes on Ga. 400 north of the connection

Alternative 5: Rail

The rapid rail alternative would be an extension of the currently-committed line beyond Medical Center Station. The line from the Lindbergh junction through Medical Center is currently under preliminary design. The proposed extension would be 3.1 miles long with three stations, Dunwoody, Sandy Springs and North Springs.

The extension would transition from open cut at Medical Center Station to aerial structure just east of the station and turn to the northeast and then north. It would cross over I-285 approximately 0.3 miles west of Ashford-Dunwoody Road. The line would continue on aerial structure to the Dunwoody Station at Hammond Drive.

The Dunwoody Station would be an aerial station located on the west side of Perimeter Mall. The station would have feeder bus access and possibly some parking spaces. The aerial line would continue north of the station and turn to the northwest. As the terrain rises quickly, the line would transition to a cut and cover subway section generally along Perimeter Center West.

The Sandy Springs Station would be located at the intersection of Perimeter Center West, Abernathy Road, and Mount Vernon Highway. The station would include bus access and approximately 1400 parking spaces. The subway line would continue northwest alongside the northbound ramp to GA. 400. It would transition to at grade construction and turn north along the east side of GA. 400.

The North Springs Station would be located ¾ mile north of Abernathy Road. It would be linked to GA. 400 with new ramps; feeder bus access and approximately 3000 parking spaces would be provided. This alternative also provides satellite parking at Mansell Road and State Bridge Road.

Comments at the scoping meeting should focus on the appropriateness of these and other options for consideration in the study, not on individual preferences for a particular alternative as most desirable for implementation.

Probable Effects

Impacts proposed for analysis include changes in the natural environment (air quality, noise, water quality, aesthetics) changes in the social environmental (land use, development, neighborhoods), impacts on parklands and historic sites, changes in transit service and patronage, associated changes in highway congestion, capital costs, operating and maintenance costs, and financial implications. Impacts will be identified both for the construction period and for the construction period and for the long term operation of the alternatives.

The proposed evaluation criteria include transportation, environmental, social, economic and financial measures as required by current Federal laws and current CEQ and UMTA guidelines.

Mitigating measures will be explored for any adverse impacts that are identified.

Comments at the scoping meeting should focus on the completeness of the proposed sets of impacts and evaluation criteria. Other impacts or criteria judged relevant to local decisionmaking should be identified.

Issued on: March 18, 1988.

Peter N. Stowell,

Regional Manager.

BILLING CODE 4810-25-M

Office of the Secretary

[Dept. Circ.—Public Debt Series—No. 7-88]

Treasury Notes of March 31, 1990, Series Y–1990

March 17, 1988.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $8,500,000,000 of United States securities, designated Treasury Notes of March 31, 1990, Series Y–1990 (CUSIP) No. 912827 VZ 2), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

1.2. If the interest rate determined in accordance with this circular is identical to the rate on an outstanding issue of United States notes, and the terms and conditions of such outstanding issue are otherwise identical to terms and conditions of the securities offered by this circular, this shall be considered an invitation for an additional amount of the outstanding securites and this circular will be amended accordingly. Payment for the securities in that event will be calculated on the basis of the auction price determined in accordance with this circular.

2. Description of Securities

2.1. The Notes will be dated March 31, 1988, and will accrue interest from that date, payable on a semiannual basis on September 30, 1988, and each subsequent 6 months on March 31 and September 30 through the date that the principal becomes payable. They will mature March 31, 1990, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $5,000, $10,000, $100,000 and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR Part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in 51 FR 18260, *et seq.* (May 16, 1986), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Standard time, Wednesday, March 23, 1988. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, March 22, 1988, and received no later than Thursday, March 31, 1988.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customer if the names of the customers and the amount for each customers are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders for all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a 1/8 of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised on the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.5. must be made or completed on or before Thrusday, March 31, 1988. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, March 29, 1988. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Thursday, March 31, 1988. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcment of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Dept. Cir.—Public Debt Series—No. 8-88]

Treasury Notes of March 31, 1992, Series M-1992

March 17, 1988.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $6,500,000,000 of United States securities, designated Treasury Notes of March 31, 1992, Series M-1992 (CUSIP No. 912827 WA 6), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated March 31, 1988, and will accrue interest from that date, payable on a semiannual basis on September 30, 1988, and each subsequent 6 months on March 31 and September 30 through the date that the principal becomes payable. They will mature March 31, 1992, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exemp from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $1,000, $5,000, $10,000, and $1,000,000 and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR Part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in 51 FR 18260, *et seq.* (May 16, 1986), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Standard time, Thursday, March 24, 1988. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, March 23, 1988, and received no later than Thursday, March 31, 1988.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the dead-line for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States hold membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.000. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the

Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.5. must be made or completed on or before Thursday, March 31, 1988. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, March 29, 1988. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Thursday, March 31, 1988. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

Part II

Department of Housing and Urban Development

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

Section 8 Housing Vouchers; Notice of Funding Availability

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-88-1745; FR-2420]

Section 8 Housing Vouchers

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of funding availability.

SUMMARY: This Notice of Funding Availability (NOFA) announces the availability of fiscal year 1988 funding authority for HUD's Housing Voucher Program authorized by section 8(o) of the United States Housing Act of 1937. Funding for the Program is provided in the Department of Housing and Urban Development—Independent Agencies Appropriations Act, 1988, and includes carryover funding authority from previous fiscal years. The funding authority is made available, subject to the program requirements set out in Part III of this NOFA. These requirements are based on the program requirements contained in Part III of the NOFA published on February 19, 1987, at 52 FR 5250, as revised to conform to recent statutory amendments to the Housing Voucher Program. This NOFA also advises PHAs that they must implement the Federal preferences for the Housing Voucher Program at the same time that they implement the Federal preferences for the Certificate Program.

EFFECTIVE DATE: March 23, 1988.

FOR FURTHER INFORMATION CONTACT: Gerald Benoit, Director, Housing Voucher Division, Room 6122, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-6477. (This is not a toll-free telephone number.)

IV. Findings and Other Matters

I. Background

The purpose of this Notice of Funding Availability (NOFA) is to announce the availability of budget authority for housing vouchers appropriated by the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1988 (section 1(f) of Pub. L. 100-202, approved December 22, 1987) (the 1988 Appropriations Act).

On October 29, 1987, the Department published a NOFA announcing the availability of fiscal year 1988 funding authority for the Housing Voucher Program provided in Continuing Resolution, Pub. L. 100-120, approved September 30, 1987, including any extensions of that Continuing Resolution. (The Continuing Resolution and extenders [1] were stopgap measures pending enactment of the the 1988 Appropriations Act.) That NOFA also advised the public that, pending completion of the Housing Voucher Program final rule, the Department intended to continue to administer the Program under the policies in effect in fiscal year 1987. (See NOFA published on February 19, 1987, at 52 FR 5250.) The Department is still developing the Housing Voucher Program final rule, including consideration of the 273 public comments received in response to the proposed rule. It remains the Department's policy that, pending publication of an effective rule, the Housing Voucher Program continue to operate under the program requirements that were contained in the February 1987 NOFA. This document revises these requirements, however, to implement certain recent statutory amendments, discussed below.

On February 5, 1988, the President approved the Housing and Community Development Act of 1987 (Pub. L. 100-242) (HCD Act of 1987). The Act made several changes in the Housing Voucher Program that are of immediate effect and require no prior public comment in order to be implemented. Section II.C. of this NOFA describes the revisions made to the program requirements, as they existed in Part III of the February 1987 NOFA, to implement these statutory amendments, as well as the provisions of the 1988 Appropriations Act concerning the use of budget authority for additional housing voucher units.

II. This Document

A. Fund Availability

Accordingly, this NOFA announces the availability of the budget authority for housing vouchers appropriated by the 1988 Appropriations Act, as well as authority carried from previous fiscal years. Pending publication of final effective Housing Voucher Program regulations, the authority must be used for the purposes provided in, and under the requirements of, Part III of this NOFA. This NOFA does not implement any of the policies described in Section II.B.2., *Anticipated Changes in the Housing Voucher Program*, of the February 1987 NOFA. Action on those proposed changes, including modifications set out in the proposed rule, will be dealt with in the Housing Voucher Program final rule.

1. Headquarters Reserve

The Secretary is retaining a number of housing vouchers in a Headquarters reserve, and, subject to the availability of sufficient budget authority, these housing vouchers will be used for emergencies, special housing needs, and for the following specific uses:

(a) A set-aside to assist public housing desegregation, when other methods have failed (see III.D.(c) of this NOFA).

(b) A set-aside to assist families living in one of the following types of "opt-out" or prepayment projects:

(1) For families living in a Section 8 New Construction or Substantial Rehabilitation project, where the owner has sole discretion to "opt-out" of an additional term of assistance under the Section 8 Housing Assistance Payments Contract and does so;

(2) For families living in a Section 8 Loan Management Set-Aside project, where the project-based housing assistance payments contract ends; or

(3) For families living in a below-market interest rate project insured under section 221(d)(3) of the National Housing Act or in a project insured under section 236 of the National Housing Act, when the owner prepays the mortgage and prior HUD approval is not required.

2. Housing Vouchers Distributed by Formula Allocation

The Department will allocate most of the carryover authority and fiscal year 1988 housing voucher funding authority made available under the 1988 Appropriations Act to its Regional Offices, using an allocation procedure patterned on the "fair share" procedures in 24 CFR Part 791. The Department will, to the extent necessary, allocate additional housing vouchers to a PHA, to ensure that it can provide housing vouchers to eligible applicant families that, as a result of rental rehabilitation activities, are forced to vacate their respective units because of physical construction, housing overcrowding, or a change in use of the units, or that would have to pay more than 50 percent of their respective adjusted income as rent. (See section II.C.5. of this NOFA for a description of the new requirements concerning the use of formula allocation housing vouchers for rental rehabilitation families.)

B. Applicability of this NOFA

The Housing Voucher Program requirements contained in Part III of this NOFA apply to the Housing Voucher Program, including budget authority made available in fiscal year 1988 under this NOFA and the October 29, 1987 NOFA.

C. Revisions to the Program Requirements Caused by the HCD Act of 1987 and the 1988 Appropriations Act

1. Implementation of Section 143(b)(1) of the HCD Act of 1987

Section 143(b)(1) of the HCD Act of 1987 amends section 8(o)(6)(A) (previously section 8(o)(7)(A)) of the United States Housing Act of 1937 (1937 Act) to give PHAs the discretion to make annual affordability adjustments to the payment standard. (This section previously permitted no more than two affordability adjustments in any five-year period.) In order to implement this amendment, section III.J. of this NOFA contains the following revisions: Paragraph (e)(1) has been revised to permit PHAs to make annual affordability adjustments and paragraph (f) has been revised to remove the reference to the two-in-five-year limitation.

2. Implementation of Section 143(b)(2) of the HCD Act of 1987

Section 143(b)(2) of the HCD Act of 1987 strikes section 8(o)(6)(D) (previously section 8(o)(7)(D)) of the 1937 Act, which had required PHAs to consult with the public and units of general local government before making affordability adjustments. Paragraph (e)(4) of section III.J. of the February 1987 NOFA (see 52 FR 5263, column 2), contained the consultation requirement. Paragraph (e)(4) has been omitted from section III.J. of this NOFA. A PHA may adopt an affordability adjustment *without* consulting the public or the unit of general local government in the PHA's jurisdiction concerning the impact of the adjustment on the number of families that can be assisted.

3. Implementation of Section 143(c) of the HCD Act of 1987

Section 143(c) of HCD Act of 1987 amends section 8(o)(7) (previously section 8(o)(8)) of the 1937 Act by striking the five-percent limit on the amount of authority that may be used to provide assistance with respect to cooperative or mutual housing. Paragraph (a)(4) in section III.M. of the February 1987 NOFA (see 52 FR 5266, column 2) contained the five-percent limit; the parallel paragraph (a)(4) of this NOFA does not contain a five-percent limit.

4. Implementation of Section 144 of the HCD Act of 1987

Section 144 of the HCD Act of 1987 added a new section 8(q), which establishes administrative fee requirements for both the Housing Voucher Program and the Certificate Program. Section 8(q)(1) requires the Secretary to establish a monthly fee (ongoing fee) equal to 8.2 percent of the two-bedroom fair market rent (FMR) and authorizes the Secretary to increase the fee if necessary to reflect higher costs of administering small programs and programs operating over large geographic areas. Section 8(q)(2)(A) requires the Secretary to establish reasonable fees for (1) preliminary expenses (not to exceed $275) incurred by a PHA in connection with a new allocation of assistance, (2) costs incurred in assisting families who experience difficulty in obtaining appropriate housing, and (3) extraordinary costs approved by the Secretary. Section 8(q)(2)(B) requires that the same method be used to calculate fees under the Housing Voucher Program and the Certificate Program. Section 8(q)(3) contains the following overall limitation: "The Secretary may establish or increase a fee in accordance with this subsection only to such extent or in such amounts as are provided in appropriations Acts."

The Department's 1988 appropriation for the Housing Voucher Program, as reflected in the table at page 838 of the Conference Report (H. Rept. No. 198, 100th Cong., 1st Sess., (1987)), is based on an administrative fee structure as provided in Part III.U. of the February 1987 NOFA (see 52 FR 5268). This system includes an ongoing administrative fee equal to 6.5 percent per month of the two-bedroom FMR, a preliminary fee not to exceed $215, and a "hard-to-house" fee of $45 for each qualified family. Because there is a fixed amount of budget authority for the Housing Voucher Program, any increase in the amount of budget authority available for administrative fees necessarily causes a concommitant decrease in the amount of budget authority available for program purposes, including for free-standing housing vouchers, and would decrease the number of housing vouchers available for eligible families below the level reflected in the Conference Report. This NOFA is based on the current Housing Voucher Program administrative fees, as reflected in the revised operating plan submitted to, and accepted by, the Committees on Appropriations of the Senate and House of Representatives.

5. Implementation of the Statutory Amendments Affecting the Relationship Between the Housing Voucher Program and the Rental Rehabilitation Program

Section 143(a)(2) of the HCD Act of 1987 strikes section 8(o)(4) of the 1937 Act, which required that HUD use "substantially all" housing voucher authority for families residing in dwellings to be rehabilitated with assistance under the Rental Rehabilitation Program and for families displaced as a result of rental rehabilitation assisted under that program or under section 533 of the Housing Act of 1949.

Section 149 of the HCD Act of 1987 added a new subsection (u) to section 8 of the 1937 Act, which reads as follows:

> (u) In the case of lower income families living in rental projects rehabilitated under section 17 of this Act or section 533 of the Housing Act of 1949 before rehabilitation—
>
> (1) Certificates or vouchers under this section shall be made [available] for families who are required to move out of their units because of the physical rehabilitation activities or because of overcrowding; and

---

[1] See, Pub. L. 100-120 (November 10, 1987), Pub. L. 100-193 (December 16, 1987), and Pub. L. 100-197 (December 20, 1987).

> (2) At the discretion of each public housing agency or other agency administering the allocation of assistance, certificates or vouchers under this section may be made [available] for families who would have to pay more than 30 percent of their adjusted income for rent after rehabilitation whether they choose to remain in, or move from, the project.

In addition, the 1988 Appropriations Act provides:

> [O]f that portion of such [Housing Voucher Program] budget authority to be used to achieve a net increase in the number of dwelling units for assisted families, highest priority shall be given to assisting families who are involuntarily displaced, or who are or would be displaced in consequence of increased rents, as a result of rental rehabilitation program activities.

It should be noted that while both section 8(u) of the 1937 Act and the above-quoted proviso in HUD's 1988 Appropriations Act concern the interrelationship between the Housing Voucher Program and the Rental Rehabilitation Program, there are several substantive differences. The 1988 Appropriations Act proviso applies only to FY 1988 housing voucher budget authority appropriated in FY 1988 for additional housing voucher units, while section 8(u) is not limited to funding for any fiscal year and applies to both housing vouchers and certificates. The 1988 Appropriations Act proviso *requires* that highest priority in the use of FY 1988 new unit funding be given to families who "are or would be displaced in consequence of increased rent as a result of rental rehabilitation actions." Section 8(u) of the 1937 Act, however, gives the PHA *discretion* to provide housing vouchers or certificates to families "who would have to pay more than 30 percent of their adjusted income for rent after rehabilitation whether they choose to remain in, or move from, the project."

In this NOFA, the appropriation proviso is met *by directing* the PHA to issue housing vouchers: (1) To eligible families that are forced, by rental rehabilitation activities, to vacate a unit because of physical construction, housing overcrowding, or a change in use of the unit, and (2) to eligible families that would have to pay more than 50% of their adjusted income for rent after rehabilitation. Since section 8(o)(3) of the 1937 Act requires that families with a rent burden in excess of 50 percent of adjusted income be given a preference, HUD has adopted the 50 percent standard as the threshold of displacement. This approach ensures the availability of housing vouchers for the same class of rent-burdened families that are given a preference to housing vouchers under section 8(o)(3) of the 1937 Act. It also gives effect to section 8(u), by providing PHAs discretionary authority to provide housing vouchers to families with rent burdens between 30 and 50 percent of their adjusted income.

The following briefly describes the changes in the program requirements for use of housing vouchers in connection with the Rental Rehabilitation Program:

- In using its housing vouchers, a PHA must issue a housing voucher to any eligible applicant family that is forced to vacate a unit because of physical construction, housing overcrowding, or a change in use of the unit, or whose rent would exceed 50 percent of its adjusted income, as a result of rental rehabilitation activities. HUD will allocate additional housing vouchers to a PHA, to the extent necessary, to ensure that PHAs can meet this obligation; and
- The PHA, in its discretion, may establish a preference for selecting eligible families whose rent would exceed 30 percent, but would not exceed 50 percent, of their adjusted income as a result of rental rehabilitation activities. A PHA must exercise this discretionary authority in a manner that is consistent with its obligations with respect to the Federal preferences, once it has implemented the Federal preference rule (see 24 CFR 882.219, as added by 53 FR 1122, 1152, January 15, 1988). If a PHA provides a housing voucher to a family that falls within this category, but is not eligible for a Federal preference, the family must be counted as part of the not more than 10 percent of applicants who do not qualify for a Federal preference, but may be issued housing vouchers before other applicants who do. There is no obstacle to a PHA employing its 10 percent exception to adopt a local preference for eligible families who encounter increased rent burdens in their rental rehabilitation units, but whose rent burden doesn't reach the level to qualify the families for a Federal preference.

To implement these policies, the Department is making the following changes in the February 1987 NOFA:

a. Paragraphs III.D.(a), *Invitations for Application for Housing Voucher Assistance in Connection with the Rental Rehabilitation Program,* and III.D.(b), *Procedures for State Rental Rehabilitation Programs* (see 52 FR 5258), have been removed from Part III. of this NOFA and paragraphs (c), (d) and (e) of section III.D. of the February 1987 NOFA have been relettered as paragraphs (a), (b), and (c), respectively, of section III.D. of this NOFA. A new paragraph (e) has been added to section III.E. of this NOFA to give PHAs involved in State-administered rental rehabilitation programs until August 31, 1988 to submit their applications for housing vouchers so that the State rental rehabilitation agencies can have sufficient time to identify the PHAs that need additional housing vouchers and the amount needed.

b. Paragraph (3) in section III.D.(b), *Invitations for Applications for Formula Allocation Housing Vouchers—Contents of Invitation,* of this NOFA is new. It requires HUD field offices to ensure that a PHA is provided sufficient housing vouchers to ensure that the PHA can comply with its obligations to rental rehabilitation families under section III.I.(e)(1)(i) of this NOFA.

c. Sections III.H., *Procedures in Connection with the Rental Rehabilitation Program,* and III.X., *Deobligation of Rental Rehabilitation Grants and Effect on Housing Voucher Budget Authority Provided in Connection with the Rental Rehabilitation Grants,* of the February 1987 NOFA have been removed. These are reserved in this NOFA to keep the lettering of sections consistent with the lettering in the February 1987 NOFA.

d. Section III.I.(e) of this NOFA is a revision of section III.I.(e) of the February 1987 NOFA (see 52 FR 5261–62). It contains the requirements, discussed above, concerning the PHA's obligation to provide housing vouchers to displaced and to 50 percent rent-burdened rental rehabilitation families and also the discretionary authority for PHA's to provide a preference to 30 to 50 percent rent-burdened rental rehabilitation families.

e. Section III.I.(f) has been revised in this NOFA to conform to the policies discussed above. (*Compare* section III.I.(f) of the February 1987 NOFA, 52 FR 5262, columns 1 and 2).

f. Paragraphs (c) and (d) in Section III.F. and paragraph (a) in section III.G. have been revised in this NOFA to conform to the policies discussed above (compare 52 FR 5259, columns 2 and 3 of the February 1987 NOFA).

6. Implementation of Section 103(b) of the HCD Act of 1987

Section 16(b) of the 1937 Act provides that no more than 5 percent of the dwelling units that become available under public housing annual contributions contracts and under Section 8 housing assistance payments contracts may be available for leasing to lower income families other than very low-income families. Section 103(b) of the HCD Act of 1987 amends section 16 to exempt from the percentage limitations in section 16(b) dwelling

units made available under Section 8 housing assistance contracts for the purpose of preventing displacement or ameliorating the effects of displacement, including displacement caused by rents exceeding 30 percent of monthly adjusted family income, of lower income families from projects being assisted with rental rehabilitation grants. In order to implement this amendment, paragraphs (a) (2) and (3) and paragraphs (b) (1) and (2) of section III.I. have been revised to conform to this statutory amendment. (*Compare* sections III.I. (a) and (b) of the February 1987 NOFA at 52 FR 5260–62.)

7. Implementation of Federal Preferences Under Section 8(o)(3) of the 1937 Act

On January 15, 1988, the Department published a final rule implementing the statutory Federal preferences for the Public and Indian Housing and Section 8 Programs under the 1937 Act, and the Rent Supplement Program under section 101 of the Housing and Urban Development Act of 1965 (53 FR 1122). That final rule provided that the Department would publish a notice of effective date following expiration of the 30-session-day waiting period and that PHAs and owners must implement that rule for the affected programs no later than July 13, 1988.

The January 15, 1988 final rule did not contain implementing rule text for the Housing Voucher Program. Rather, it noted that the Department was developing a Housing Voucher Program final rule, which would include provisions to implement the Federal preferences that would be substantially similar to the implementation of the Certificate Program. As previously noted, the Department has not completed development of the Housing Voucher Program final rule. Paragraph (d)(1) of section III.I. of both the February 1987 NOFA and this NOFA incorporate 24 CFR 882.209(a). Section 882.209(a) was revised by the Federal Preference rule to require a PHA under the Certificate Program to implement the Federal preferences contained in § 882.216, which was added by the Preference rule. Paragraph (d)(1) of section III.I. of this NOFA, accordingly, has been revised to make it explicit that a PHA, when it implements the Federal preferences under its certificate program, must also implement the Federal preferences under its housing voucher program.

III. Housing Voucher Program Requirements

A. Definitions

For purposes of the Housing Voucher Program, the following definitions apply.

Act (1937 Act). The United States Housing Act of 1937.

Annual Contributions Contract (ACC). A written agreement between HUD and a PHA to provide annual contributions to the PHA for housing assistance payments and administrative fees.

Annual Income. See 24 CFR 813.106.

Congregate Housing. See section III.M.(b) of this Notice.

Decent, Safe, and Sanitary Housing. Housing that meets the housing quality standards of § 882.109.

Demolition/Disposition. The demolition of public housing buildings or disposition of public housing units. The PHA must obtain HUD approval for demolition or disposition under 24 CFR Part 970.

Eligible Family (Family). A family as defined in 24 CFR Part 812 that, at the time it initially receives assistance under the Housing Voucher Program, (1) qualifies as a very low-income family or as a lower income family displaced by rental rehabilitation program activity under 24 CFR Part 511 (see section III.I. of this Notice); or (2) has been continuously assisted under the 1937 Act.

Housing Assistance Payment. The monthly payment by the PHA to an owner on behalf of a family participating in the Housing Voucher Program. Generally, the amount of the housing assistance payment is determined by subtracting 30 percent of a family's monthly adjusted income from the payment standard that applies to the family. For additional details see section III.J. of this NOFA.

Housing Voucher. A document issued by a PHA declaring a family to be eligible for participation in the Housing Voucher Program and stating the terms and conditions for the family's participation.

Housing Voucher Contract (Contract). A written contract between a PHA and an owner, in the form prescribed by HUD for the Housing Voucher Program, in which the PHA agrees to make housing assistance payments to the owner on behalf of an eligible family.

HUD. The Department of Housing and Urban Development or its designee.

Independent Group Residence (IGR). See section III.M.(b) of this Notice.

Initial PHA. A PHA administering a Housing Voucher Program with a housing voucher holder or housing voucher participant who desires to move, or who has moved, to another area under the portability procedures in section III.L.(d).

Lease. A written agreement between an owner and a family for the leasing of a dwelling unit by the owner to the family, with assistance payments under a housing voucher contract between the owner and the PHA.

Lower Income Family. A family whose annual income does not exceed 80 percent of the median income for the area, as determined by HUD, with adjustments for smaller and larger families. HUD may establish income limits higher or lower than 80 percent of the median income for the area on the basis of its finding that such variations are necessary because of the prevailing levels of construction costs or unusually high or low family incomes.

Occupancy Standards. Standards established by the PHA for determining the appropriate number of bedrooms for families of different sizes and compositions.

Opt Out. (1) A Section 8 New Construction (Part 880) or Substantial Rehabilitation (Part 881) project, where the owner has the sole option to renew for an additional term of assistance under the Section 8 Housing Assistance Payments Program, but elects not to renew; or (2) a Section 8 Loan Management Set-Aside project (Part 886, Subpart A) where the project-based housing assistance payments contract ends.

Owner. Any person or entity having the legal right to lease or sublease decent, safe, and sanitary housing.

Participant. A family becomes a participant in the PHA's Housing Voucher Program when the PHA executes a housing voucher contract with an owner for housing assistance payments on behalf of the family.

Payment Standard. (See section III.J. of this Notice.)

PHA Jurisdiction. The area in which the PHA is not legally barred from entering into housing voucher contracts.

Public Housing Agency (PHA). Any State, county, municipality or other governmental entity or public body (or agency or instrumentality thereof) that is authorized to engage in or assist in the development or operation of lower income housing.

Receiving PHA. A PHA administering a Section 8 Certificate or Housing Voucher Program that accepts a housing voucher holder or housing voucher participant from another PHA under the portability procedures of section III.L.(d) of this Notice.

Rent to Owner. The sum of the amount that will be paid by the PHA to

VOL 53
ISS 56
MR 23 1988

the owner on behalf of a family under the housing voucher contract and the amount that will be paid by the family to the owner to cover the balance of the rent payable to the owner under the lease.

Single Room Occupancy (SRO) Housing. A unit which contains no sanitary facilities or food preparation facilities, or which contains one but not both types of facilities (as those facilities are defined in 24 CFR 882.109 (a) and (b)), and which is suitable for occupancy by a single eligible individual capable of independent living. (See also section III.M.(c) of this Notice.)

Targeted Housing Voucher. Circumstances in which HUD provides housing voucher funding specifically for families living in certain types of projects. These types of projects include: demolition/disposition projects, opt out projects, rental rehabilitation projects, transitional housing, and public housing units for desegregation purposes.

Unit Size. The number of bedrooms in a dwelling unit.

Utility Allowance. An amount that applies when the cost of utilities (except telephone) and other housing services for an assisted unit is not included in the rent to owner, but is the responsibility of the family. The allowance is an amount equaling the estimate made or approved by the PHA of the monthly costs of a reasonable consumption of these utilities and other services for the unit by an energy-conservative household of modest circumstances, consistent with the requirements of a safe, sanitary, and healthful living environment.

Utility Reimbursement. Concept applies when the rent to the owner does not include some or all of the utilities and the family is responsible for them. The utility reimbursement is the excess of the housing assistance payment over the amount payable to the owner by the PHA.

Very Low-Income Family. A lower income family whose annual income does not exceed 50 percent of the median income for the area, as determined by HUD, with adjustments for smaller or larger families. HUD may establish income limits higher or lower than 50 percent of the median income for the area on the basis of its finding that such variations are necessary because of unusually high or low family incomes.

Voucher. See Housing Voucher.

Voucher Contract (Contract). See Housing Voucher Contract.

B. Applicability and Purpose

(a) *Applicability.* The provisions of this Part III apply to the use of budget authority for all housing voucher assistance authorized by Section 8(o) of the 1937 Act. Requirements that apply to some, but not all, Housing Voucher Program components also are contained in Part III, but are distinguished from the generally applicable requirements. By cross reference, provisions of the regulations for the Section 8 Existing Housing (Certificate) Program (24 CFR Parts 812, 813 and 882, Subparts A and B) are incorporated in this Notice and also apply to the Housing Voucher Program. Unless otherwise specified, references to particular section numbers (e.g., § 882.110) are to regulations in Title 24 of the Code of Federal Regulations. Provisions that apply only to a limited number of components of the Housing Voucher Program are noted within the generally applicable provisions.

(b) *Purpose.* The purpose of the Housing Voucher Program is to assist eligible families in affording rents for decent, safe, and sanitary housing.

C. Equal Opportunity Requirements

Participation in the Housing Voucher Program requires compliance with Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, Executive Order 11063, section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and all related rules, regulations and other requirements. In addition, failure to comply with these equal opportunity requirements will result in the imposition of sanctions under applicable civil rights law.

D. Allocations of Funding and Invitations for Applications

(a) Invitations for Applications for Formula Allocation Housing Vouchers—Allocation of Funding

The Department will allocate a portion of the current year's housing voucher funding to its Regional Offices, using a formula allocation that is patterned after 24 CFR Part 791. Each Regional Office may determine the amounts of housing voucher funding to be used for individual PHAs or it may delegate these decisions to its Field Offices.

(b) Invitations for Applications for Formula Allocation Housing Vouchers—Contents of Invitation

(1) Upon receipt of their funding allocation, the Regional or Field Offices will invite PHAs to submit applications to the appropriate Field Office.

(2) The Department generally considers 50 housing vouchers to be the minimum program size for cost-effective administration of a Housing Voucher Program. For this reason, HUD will not approve an initial application for fewer than 50 housing vouchers, unless a PHA specifically requests fewer housing vouchers. (This initial minimum need only be met once, and does not apply to additional allocations. This minimum does not apply to any of the special use allocations made by Headquarters.) Every effort will be made to provide sufficiently large allocations of housing vouchers to individual PHAs to facilitate program administration and economies of scale.

(3) In determining which PHAs will be invited to submit applications and the number of housing vouchers to be approved, the Field Office must consider the extent to which the PHA has housing vouchers or certificates available for use by rental rehabilitation families. If a PHA does not have sufficient housing vouchers or certificates available for families that will be physically displaced or will have an after-rehabilitation rent burden in excess of 50 percent of adjusted income, the Field Office shall provide sufficient housing vouchers to ensure that the PHA can comply with its obligations under section III.I.(e)(1)(i) of this NOFA.

(c) Allocations for Desegregation of Public Housing

HUD may provide housing voucher funding to a PHA for desegregation of public housing projects. The funding must be used in accordance with the PHA's HUD-approved administrative plan, modified to reflect revisions required by HUD to provide housing vouchers for families living in public housing projects or applicants on the PHA's public housing waiting list. The funding may be provided if HUD determines the following criteria have been met:

(1) The PHA has been found in preliminary noncompliance with Title VI of the Civil Rights Act of 1964 because of discriminatory practices or policies that resulted in segregated public housing projects, and, consistent with that finding—

(i) The PHA has entered into a compliance agreement and has carried out its obligations under the agreement but, because of circumstances beyond the PHA's control, has not succeeded in desegregating its projects; or

(ii) It is determined during the course of compliance agreement negotiations that the PHA could not develop and implement a meaningful plan to desegregate its project(s) without housing vouchers; and

(2) The racial characteristics of the PHA's public housing project occupants and the length and racial composition of the public housing waiting list is such that providing housing vouchers to a limited number of public housing tenants or applicants would facilitate the desegregation of public housing projects.

E. Submission of Applications

(a) The PHA must submit its application for the Housing Voucher Program in accordance with § 882.204, with the following exceptions:

(1) Equal Opportunity Housing Plan

Each PHA must submit an equal opportunity housing plan as required under § 882.204(b)(1), except that it must be a combined plan covering the PHA's entire Certificate Program and Housing Voucher Program. The plan must include any special rules for use of housing vouchers in connection with any program component identified in this Notice.

(2) Administrative Plan

Each PHA must submit an administrative plan as required under § 882.204(b)(3), except it must be a combined plan covering the PHA's Certificate Program and Housing Voucher Program. Applicable special functions related to housing vouchers—such as special procedures for selection of families in connection with the Rental Rehabilitation Program, targeted, freestanding, or small/rural components—must be covered. (Some functions, such as computation of the family rent in accordance with section 3(a) of the 1937 Act, and contract rent adjustments, do not apply to the Housing Voucher Program.)

(b) For all components of the Housing Voucher Program, the application must include estimates of gross family income of families to be assisted.

(c) For targeted housing vouchers only, the application must identify the size and composition of families to be assisted.

(d) If applicable, the PHA must describe its local housing initiatives in support of its Section 8 Certificate and Housing Voucher Programs. The application should specify the size of its combined Section 8 Existing Certificate and Housing Voucher Programs and what local services, facilities, or funding are provided in support of the program. If the PHA operates a Section 8 Program that currently does not receive local support, but there are plans for locally generated support in fiscal year 1988 (and beyond), the PHA should describe these plans, including a schedule for implementation.

(e) A PHA that is submitting an application for housing vouchers, based in whole or part on a need to assist families in a State-administered rental rehabilitation program, must submit its application by August 31, 1988.

F. Processing of Housing Voucher Applications

(a) Processing of Applications

(1) HUD will send applications for more than 12 units to the appropriate chief executive officer of the unit of general local government for review and comment. This submission will be in accordance with 24 CFR Part 791, as required by section 213 of the Housing and Community Development Act of 1974.

(2) HUD will evaluate each application on the basis of the requirements of this Notice and other program requirements, and will consider any comments received from the unit of general local government. HUD also will take into account the PHA's ability to administer the Housing Voucher Program, as evidenced, in part, by its performance in operating the Certificate Program, where applicable.

(b) Application Preferences

(1) Preference will be given to an application from a PHA that demonstrates locally initiated efforts in support of its Section 8 Certificate and Housing Voucher Programs. This preference takes precedence over the other two preferences listed, and Field Offices will attempt to fund applications which demonstrate these locally-generated efforts before evaluating applications indicating eligibility only for the other preferences. Evaluation of a locality's contribution will be measured competitively—that is, by the extent to which a locality is able to provide services or cash contributions, or to demonstrate its intention to provide this kind of support in the future, as compared to services or contributions provided by other localities of like program size.

(2) Preference may be given to applications from PHAs that provide families with the broadest geographical choice of housing, including interjurisdictional and interstate housing choice.

(3) Preference may be given to applications from PHAs whose needs previously have been underfunded in relation to the needs of other localities within the allocation area.

(c) Approval or Disapproval of Applications

HUD will notify the PHA, whether HUD has approved or disapproved the PHA's application. Where HUD has disapproved an application, HUD will include a statement of the reasons and, where applicable, the changes required to make the application approvable.

(d) Processing of Applications: Procedures (Memorandum of Understanding) for the Rental Rehabilitation Program

In processing applications for housing vouchers, HUD requires that the PHA in an area covered by the Rental Rehabilitation Program and the grantee under the Rental Rehabilitation Program execute a memorandum of understanding setting forth the responsibilities of each party and the procedures to be followed in coordinating the use of authority for housing vouchers for eligible applicant families in rental rehabilitation projects. Where a State is distributing the Rental Rehabilitation grant amounts to units of general local government (State recipients), the PHA and the State recipient must execute the memorandum of understanding. Before HUD and the PHA execute an ACC for the housing vouchers, the memorandum must be executed by both parties and the PHA must submit a certification to HUD that both parties have executed the memorandum and it is consistent with the PHA's HUD-approved administrative and equal opportunity plans. If there is any inconsistency between the PHA's administrative plan and the memorandum of understanding, the administrative plan prevails.

G. Annual Contributions Contract

(a) ACC Execution

HUD will execute the ACC with the PHA, in a form prescribed by HUD, in accordance with § 882.208, after HUD approves the application for housing voucher assistance. HUD will not execute the ACC, unless it also has received the PHA certification that the PHA and the grantee under the Rental Rehabilitation Program have executed a memorandum of understanding as required under section III.F.(d) of this Notice.

(b) Term of ACC for Funding Increment

The ACC term for each funding increment under the ACC is five years.

(c) ACC

HUD and the PHA will execute one ACC document covering all of the funding increments for the PHA's Housing Voucher Program. However, where (as in the case of some statewide PHAs) the area for which the PHA may execute housing voucher contracts is within the jurisdiction of more than one

BEST COPY AVAILABLE

HUD Field Office, HUD may require one ACC for each Office.

(d) Amount of Annual Contributions

(1) The total amount of annual contributions contracted for in the ACC for the five-year ACC term for each funding increment will be five times the total of (i) the average HUD-estimated annual PHA administrative fee plus (ii) 115 percent of the amount that HUD estimates would be required in the first year of the ACC for housing assistance payments to owners, assuming a full year of occupancy.

(2) The PHA must plan administration of its Housing Voucher Program in a manner that will ensure its operation within the amounts originally contracted for under the ACC, taking into account (i) the amounts available from reserving 15 percent more than the estimated housing assistance payments for the first year and (ii) the number of families that may be assisted (including consideration of the effect of a revised payment standard under section III.J., to assure continued affordability; changes in family income and composition; and portability of housing vouchers). HUD does not intend to make any ACC amendments to provide additional funding for the purpose of maintaining a particular number of assisted families.

H. [Reserved]

I. Selecting Families and Issuing Housing Vouchers

(a) Eligible Families

(1) A family is eligible for assistance under the Housing Voucher Program if, at the time it initially receives assistance under the program, the family:

(i) Qualifies as a very low-income family;

(ii) Qualifies as a lower income family (other than very low-income) and is displaced by rental rehabilitation activity under 24 CFR Part 511; or

(iii) Has been continuously assisted under the U.S. Housing Act of 1937.

(2) In interpreting paragraph (a)(1)(ii) of this section, the following rules apply. A lower income family in a rental rehabilitation project that is forced to vacate a unit because of physical construction, housing overcrowding, or a change in use of the unit, is considered "displaced". A lower income family that lives in a project undergoing rental rehabilitation activities whose post-rehabilitation rent would not be affordable is not considered "displaced" for this reason alone, for purposes of determining housing voucher eligibility. (Such a family may be issued a certificate to assist in paying the higher rent or in finding another unit; unlike housing vouchers, certificates are not subject to the statutory requirement for actual displacement as a condition of eligibility for a lower income family that is not a very low-income family.)

(b) Compliance With Section 16 of the U.S. Housing Act of 1937

Section 16 restricts to five percent nationally the number of lower income families with incomes above 50 percent of median income that may be assisted under the 1937 Act (both Section 8 and public housing). The only families with incomes above 50 percent of median income who are eligible for housing vouchers are: (i) Families that have been continuously assisted under the 1937 Act and (ii) lower income families who are displaced by Rental Rehabilitation activities. All other families must be very low-income families to be eligible for housing vouchers. Section 103(b) of the HCD Act of 1987 amended section 16 of the 1937 Act to exempt from the percentage limitation dwelling units made available under Section 8 housing assistance contracts for the purpose of preventing displacement, or ameliorating the effects of displacement, including displacement caused by rents exceeding 30 percent of monthly adjusted income, of lower income families from projects being rehabilitated with assistance under the Rental Rehabilitation Program. Thus, as a result of the section 103(b) amendment to section 16, the only units made available under the Housing Voucher Program that are subject to the section 16 percentage limitation are units made available to families with incomes above 50 percent of median income that are continuously assisted families under the 1937 Act. (Certificates made available under the program for the purpose of preventing displacement, or ameliorating the effects of displacement, including displacement caused by rents exceeding 30 percent of monthly adjusted income, of lower income families from projects being rehabilitated with assistance under the Rental Rehabilitation Program are not subject to the section 16 percentage limitation.)

(c) Activities to Encourage Participation by Owners and Others

The PHA must encourage participation by owners and others in the Housing Voucher Program, as required under § 882.208 for the Section 8 Certificate Program.

(d) Selecting Families; Issuing Housing Vouchers: Generally Applicable Procedures

(1) The PHA must select eligible families for participation in accordance with § 882.209(a), except for the provisions in § 882.209(a)(4)(ii), which are specifically modified by paragraphs (e) and (f) of this section. Section 882.209(a)(2), as revised by 53 FR 1122, at 1152, January 15, 1988, requires a PHA to give a Federal preference in selecting applicants for participation in accordance with § 882.219, which was added by the same rulemaking. As noted above, a PHA must implement the Federal preferences for its housing voucher program at the same time that it implements those preferences for its certificate program.

(2) The PHA must verify the sources of income and other information concerning the family necessary to determine eligibility and the amount of the housing assistance payment.

(3) The PHA must issue housing vouchers in accordance with its occupancy standards established under § 882.209(b) and this Notice; however, if a family rents a unit with a larger or smaller number of bedrooms than stated on the housing voucher, section III.N.(c) of this Notice applies. The PHA must issue a housing voucher for a particular number of bedrooms, consistent with its occupancy standards and consistently for all families of like composition.

(4)(i) If an applicant on the PHA's waiting list is offered a housing voucher (except the offer of assistance in paragraph (4)(ii) or (4)(iii) of this section) the family will not lose its place for refusing the housing voucher, if it desires to wait for a certificate. Conversely, the family will not lose its place on the waiting list for refusing a certificate, if it desires to wait for a housing voucher. However, if the family refuses the second form of assistance when it is offered, the family must be taken off the waiting list. If the family so requests, it will be reinstated on the waiting list, but only in conformance with the PHA's HUD-approved administrative plan and equal opportunity housing plan.

(ii) In selecting applicants for participation in the Freestanding Demonstration, the PHA must offer an available certificate and housing voucher to a pair of families on the waiting list that qualify for the same size unit under the PHA's occupancy policy.

(iii) In selecting applicants for participation in the Small/Rural Demonstration, the PHA must offer an available housing voucher to the next family on the waiting list that qualifies for the unit size of the available housing voucher under the PHA's occupancy standards.

(iv) If an applicant is offered a housing voucher on the condition that the applicant initially must use the housing voucher in a Part 511 rental rehabilitation project, the refusal of the applicant to accept the housing voucher will not be counted as refusal to accept one form of assistance under paragraph (d)(4)(i) of this section.

(e) Selecting Families—Targeting Assistance to Applicants Living in Certain Projects

(1) In selecting families for participation:

(i) A PHA must issue a housing voucher to any eligible applicant family that is forced to vacate a unit because of physical construction, housing overcrowding, or a change in use of the unit, or whose rent would exceed 50 percent of its adjusted income, as a result of rental rehabilitation activities under Part 511 of this title; and

(ii) In its discretion, a PHA may provide a selection preference to an eligible family whose rent would be between 30 and 50 percent of its adjusted income as a result of rental rehabilitation activities under Part 511 of this title. A PHA must exercise this discretionary authority in a manner that is consistent with its obligations with respect to the Federal preferences once it has implemented the Federal Preference rule (see 24 CFR 882.219, as added by 53 FR 1122, 1152, January 15, 1988). If a PHA provides a housing voucher to a family who falls within this category but is not eligible for a Federal preference, the family must be counted as part of the not more than 10 percent of applicants that may be issued housing vouchers before applicants who qualify for a Federal preference. After the grantee approves a rental rehabilitation project, the PHA must issue any needed housing vouchers to families living in the project to be rehabilitated. The housing vouchers must be issued so as to give families sufficient time to decide whether to move (where they are not required to move) and to give them time to locate other units (where they are required to move or choose to move).

(2) Except as provided in paragraph (e)(1) of this section and in this paragraph (e)(2), the PHA may not otherwise establish a selection preference based on the identity or location of the housing which is occupied by the applicant. If HUD provides housing voucher funding to a PHA for families living in any of the following types of projects, the PHA must use the housing vouchers initially to assist families living in the projects:

(i) Public housing units that are being demolished or disposed of with HUD approval;

(ii) Section 8 New Construction (Part 880) or Substantial Rehabilitation (Part 881) projects where the owner has sole discretion to opt-out of an additional term of assistant under the Section 8 Housing Assistance Payment Program and does so;

(iii) Section 8 Loan Management Set-Aside projects (Part 886, Subpart A) where the project-based housing assistance payments contract ends;

(iv) Section 221(d)(3) below market interest rate insured projects or Section 236 insured projects where the owner prepays the mortgage and prior HUD approval is not required;

(v) Public housing units, where HUD has made a determination under section III.D.(c) of this Notice that housing voucher funding is necessary for the desegregation of the PHA's public housing (but, see also paragraph (f)(1) of this section, which describes a concurrent use authorized for these housing vouchers); and

(vi) Transitional housing developed under the Department's Transitional Housing Demonstration Program involving applications submitted in response to the August 7, 1987 deadline (see 52 FR 21743, June 9, 1987). A PHA may use housing voucher authority for general program purposes provided it can ensure, to the extent of funding provided for this purpose, the availability of housing vouchers to eligible homeless persons upon their departure from transitional housing.

(3) If the PHA issues a housing voucher to a family living in any of the projects identified in paragraph (e)(1) or (e)(2) of this section, the family may use the assistance for an eligible unit located anywhere in the PHA's jurisdiction, consistent with the "finders-keepers" policy described in section III.K. of this Notice.

(f) Selecting Families—Targeting Assistance to Families on the PHA's Waiting List

The following rules also apply to the PHA in selecting families to assist.

(1) If HUD has provided housing voucher assistance based on a determination under section III.D.(c) of this Notice, to assist in the desegregation of the PHA's public housing, the PHA must issue housing vouchers to eligible families on the PHA's public housing waiting list (or to families living in public housing in accordance with paragraph (e)(2)(v) of this section). The family may use the assistance for an eligible unit located anywhere in the PHA's jurisdiction, consistent with the "finders-keepers" policy described in section III.K. of this Notice.

(2) If a rental rehabilitation grantee so requests and subject to its obligation to issue housing vouchers to rental rehabilitation families under section III.I.(e)(1)(i), the PHA may offer housing vouchers to families from its Section 8 waiting list who agree to move initially into a rehabilitated project. The following rules apply:

(i) In using the housing vouchers for the families selected from the PHA's waiting list, the PHA is limited to the total number of housing vouchers allocated in connection with rental rehabilitation in fiscal years 1984, 1985, and 1986. (For example, if the PHA received 15 housing vouchers in connection with a fiscal year 1984 rental rehabilitation project; and 50 in connection with a fiscal year 1986 rental rehabilitation project the PHA may target no more than 65 housing vouchers to families on its waiting list.)

(ii) A family who accepts a housing voucher under this paragraph (f)(2) must first use the housing voucher to occupy a dwelling unit rehabilitated under the Part 511 Rental Rehabilitation Program and specifically identified by the PHA when the housing voucher was offered.

(iii) Any housing vouchers issued under this paragraph must be issued to the families selected from the PHA's waiting list approximately 60 days before the estimated completion date for the rehabilitation work.

(g) PHA Briefing of Families

The PHA must brief each family in accordance with § 882.209(c), and must include information on the range of neighborhoods in which the family may find units meeting program requirements and information on possibilities for participating in available portability programs, as described in section III.L. of this Notice. Section 882.209(c)(7) does not apply. Instead, the PHA must brief the family on the function of the payment standard, determination of the housing assistance payment, the incentive for selecting a unit renting for less than the payment standard, and the minimum rent the family must pay. In jurisdictions in which the PHA is administering both a Section 8 Certificate Program and a Housing Voucher Program, the PHA also must explain how the principal features of the Housing Voucher Program differ from the Section 8 Existing Certificate Program.

(h) Housing Voucher Packet

The PHA must give each family a housing voucher packet in accordance with § 882.209(b)(4), except that instead of information on the Total Tenant Payment and the Tenant Rent, the PHA must give the family information on how the PHA computes the housing assistance payments. The PHA also must provide to the family as complete information as possible about available rental rehabilitation projects as possible places for the family to find housing.

(i) Term of Housing Voucher

Section 882.209(d), Expiration and Extension of Certificate, applies to housing vouchers issued in the Housing Voucher Program.

J. Housing Voucher Payments

(a) Overview

The determination of the amount of assistance provided a family in the Housing Voucher Program is based on the concept of the payment standard. Each PHA adopts a schedule of payment standard amounts, broken down by unit size and Fair Market Rent area. The amount of housing assistance paid on behalf of a family is determined by subtracting 30 percent of a family's monthly adjusted income (as determined under Part 813) from the payment standard amount applicable to the family (and subject to the minimum rent calculation in paragraph (d)(3) of this section.) To assure affordability, the PHA, at its discretion, may revise its payment standard amounts no more frequently than annually. The family's housing assistance payment also may change if the family's income or composition changes. This section J. explains how the housing assistance payments system works.

(b) Definition

(1) *General.* A payment standard is an amount used to calculate the housing assistance a family will receive in the PHA's Housing Voucher Program. The PHA must establish a schedule of payment standard amounts by unit size (single room occupancy, zero-bedroom, one-bedroom, etc.) and Fair Market Rent area. There is only one payment standard schedule in effect at any given time.

(2) *Single Room Occupancy Payment Standard.* Any PHA that wishes to utilize SRO housing must propose for HUD approval an SRO payment standard for the PHA's jurisdiction. The PHA may propose a payment standard amount that is within the range of 75 to 100 percent of the applicable published 0-bedroom Fair Market Rent or the HUD-approved, community-wide exception rent. Within this range, the proposed payment standard must reflect the presence of sanitary facilities or food preparation facilities, or the absence of both and what must be paid to obtain privately owned, existing, decent, safe, and sanitary rental SRO housing of modest (non-luxury) nature with suitable amenities.

(3) *Independent Group Residence Payment Standard.* The payment standard for a participant in an IGR is determined by dividing the dollar amount of the payment standard for the entire residence (for example, the 4-bedroom payment standard for a 4-bedroom residence) by the total number of potential occupants (assisted or unassisted), excluding a resident assistant (if any) occupying no more than one bedroom.

(c) Adoption of Payment Standard

Each PHA administering a Housing Voucher Program must adopt a schedule of payment standard. The following apply:

(1) For a PHA that receives its first increment of funding in fiscal year 1988, or a PHA that had its first increment of funding reserved in a previous year, but does not yet have an executed ACC, the payment standard schedule amounts must be the same as the Fair Market Rents published for effect or the HUD-approved community-wide exception rents at the time the ACC is executed by HUD.

(2) For a PHA that executed an ACC for its first increment of funding in fiscal year 1987 on or after February 19, 1987, the payment standard amounts must be the same as the Fair Market Rents published for effect or the HUD-approved community-wide exception rents at the time the ACC was executed by HUD, as modified by any changes in the payment standard amounts that have been made in accordance with program requirements in effect when the payment standard changes were made.

(3) For a PHA that received a previous increment of funding for which the ACC was executed before February 19, 1987, the payment standard schedule amounts must be amounts that have been adopted by the PHA, which are anywhere between (i) its initial payment standard (*i.e.*, the Fair Market Rents in effect when the ACC was executed for the first funding increment) and (ii) the Fair Market Rents published for effect or the HUD-approved community-wide exception rents at the time of adoption of the payment standard schedule, as modified by any changes in the payment standard amounts made in accordance with program requirements in effect when the payment standard changes were made.

(4) A payment standard may never exceed the applicable Fair Market Rent published for effect or the HUD-approved community-wide exception rent.

(d) How to Use the Payment Standard

(1) The PHA uses the payment standard schedule to determine what payment standard amount applies to a particular family's circumstances. The appropriate amount is determined by the family size and composition and the PHA's occupancy standards. Once the payment standard amount is determined from the schedule, the PHA subtracts 30 percent of the family's monthly adjusted income (as computed under Part 813) to arrive at the amount of assistance the PHA will provide to the owner on behalf of the family. (For example, if a family qualifies for a four-bedroom housing voucher and has a monthly adjusted income of $500, and the payment standard for a four-bedroom housing voucher is $600, the housing assistance payment for the family is the payment standard ($600) minus 30 percent of the family's monthly adjusted income ($150) or $450.) Before entering into a housing voucher contract with the owner for this amount, the PHA must complete the "minimum rent" calculation in paragraph (d)(3) of this section to ensure that the family is paying at least the minimum amount required by law.

(2) If a unit rents for more than the payment standard, the housing assistance payment is not increased, nor, as in the Certificate Program, is the family told it must find another unit. Instead, the family may pay the entire difference between the rent to the owner and the housing voucher assistance. If the unit rents for less than the payment standard, the family benefits by paying less than 30 percent of its monthly adjusted income toward rent, subject to the minimum rent calculation.

(3) The family must contribute at least 10 percent of its monthly gross income for rent. The PHA must ensure that the housing assistance is not greater than the difference between the rent to owner, plus any applicable utility allowance, and 10 percent of the family's monthly gross income, determined in accordance with Part 813. (This is the only time that actual rent for a unit is used to make a housing assistance payment calculation.)

(4) The payment standard schedule adopted by a PHA is the payment standard schedule the PHA uses to determine all housing assistance payments for all families in the PHA's

Housing Voucher Program, until the payment standard schedule is amended by an affordability adjustment under the procedures of paragraph (e) of this section.

(e) Changing the Payment Standard: Affordability Adjustments

(1) *General.* To assure continued affordability, the PHA may, in its discretion adopt annual affordability adjustments for each unit size and each FMR area, using the funds available under the current ACC.

(2) *Previously adopted affordability adjustments.* Affordability adjustments may be adopted for a single unit size. Any previous adjustment standard schedules that adjusted the payment standard amounts for particular unit sizes are counted only as affordability adjustments for the particular unit size(s) for which the payment standard amount was increased, but not as an affordability adjustment for the PHA's entire Housing Voucher Program.

(3) *Affordability cap.* An affordability adjustment may not cause the payment standard amount for the unit size to exceed the dollar amounts of the published FMRs or the HUD-approved community-wide exception rent for the unit size in effect at the time of the adjustment.

(f) Changing the Payment Standard Schedule: Lower FMRs

When FMRs are published for effect in the **Federal Register** and the FMRs are lower than the amounts in the PHA's payment standard schedule (as amended by any affordability adjustments), the PHA must adopt new payment standards, using the lower, effective FMRs or the HUD-approved, community-wide exception rents.

(g) When a Family's Payment Standard May Change

The only times the payment standard that is applied to a family may change are:

(1) At regular reexamination (see rules for regular reexamination in paragraph (h) of this section); or

(2) At the time a family moves to another unit (see paragraph (i) of this section for additional details).

(h) Rules at Regular Reexamination

(1) The payment standard that applied to a family at the time of initial lease approval for the unit or at its most recent regular reexamination continues to be used to determine the amount of housing assistance to be paid on behalf of the family unless one of the following circumstances applies:

(i) The PHA has adopted an affordability adjustment revising the payment standard applicable to the family;

(ii) The PHA has adopted new occupancy standards. In this case, the payment standard for the appropriate unit size under the PHA's new occupancy standards is used;

(iii) The family's size or composition has changed. In this case, the payment standard for the appropriate unit size is used.

(2) Unless there has been a change in family size or composition or a change in the PHA's occupancy standards, the payment standard for a particular family at the time of reexamination may not be determined to be less than the payment standard previously used for the family.

(i) Rule When a Family Moves

The payment standard that applied to a family at the time of initial lease approval for the unit or at its most recent regular reexamination continues to be used to determine the amount of housing assistance to be paid on behalf of the family, unless one of the following circumstances applies:

(1) The PHA has adopted a new payment standard or an affordability adjustment revising the payment standard applicable to the family;

(2) The PHA has adopted new occupancy standards. In this case, the payment standard for the appropriate size under the PHA's new occupancy standards is used;

(3) The family's size or composition has changed. In this case, the payment standard for the appropriate unit size is used.

(j) Request for Interim Reexamination

A family may request an interim reexamination of income, as provided for in section III.Q. of this Notice, which may result in a change in family income or adjusted income, but not in the payment standard applicable to the family.

(k) Prohibition Against Double Subsidy

In no event may any family receive the benefit of housing voucher assistance while receiving one of the following: Other section 8 or section 23 housing assistance; section 101 rent supplements; section 236 rental assistance payments; or other duplicative Federal, State or local housing subsidy, as determined by HUD. In the case of section 236 units having only interest reduction subsidy (insured or noninsured) the duplicative subsidy must be prevented by the owner's setting the unit rent to owner for a housing voucher participant at the lesser of the market rent for the unit, as approved by HUD, or the payment standard, but not less than basic rent.

(l) No Payments for Vacancies

If a family moves from the unit, the owner must notify the PHA promptly, and the PHA may not make any additional housing assistance payments to the owner for any month after the month in which the family moves. The owner may retain the housing assistance payment for the month during which the family moves.

(m) Utility Reimbursement

(1) Where the rent to the owner does not include some or all utilities and the family pays the utility company directly, occasionally the housing assistance payment will exceed the rent to the owner for the unit. In such a case, the PHA must pay to the family as a utility reimbursement the excess of the housing assistance payment over the rent payable to the owner. (Without this reimbursement, the family's housing assistance payment would be less than the amount for which the family is eligible under the subsidy formula.) For example, if the payment standard amount is $500, and $120 is 30 percent of a family's monthly adjusted income, the housing assistance payment would be $380. If the rent to owner is $350, and the utility allowance is $150, the PHA pays $350 to the owner and the remaining $30 of the housing voucher payment to the family as a utility reimbursement.

(2) If the family and the utility company consent, the PHA may pay the utility reimbursement jointly to the family and the utility company or directly to the utility company.

(n) Assisting More Families

If a PHA determines that some or all of the available annual contributions under its ACC are not needed for participating families, including future adjustments of housing assistance payments and portability moves, it may assist more families.

K. Finders-Keepers Policy

Except as described in paragraph K.(c) below, this section sets forth the same policy that applies to the Certificate Program.

(a) A family with a housing voucher is responsible for finding a housing unit suitable to the family's needs and desires in any area where the PHA (including the receiving PHA when the family is participating under the portability procedures in section III.L. of this Notice) determines that it is not legally barred from entering into contracts. A family may select the dwelling unit that it already occupies, if the unit is approvable. Upon request, the PHA must assist a family in finding a unit in circumstances where, because of age, handicap, large family size or other reasons, the family is unable to locate an approvable unit. The PHA also must provide assistance where the family alleges that illegal discrimination on grounds of race, color, religion, sex, national origin, age, or handicap is preventing it from finding a suitable unit, and in appropriate cases must provide the family with a copy of a Form HUD-903 for use in filing a housing discrimination complaint. This assistance must be in accordance with the PHA's approved equal opportunity housing plan.

(b) Neither in assisting a family in finding a unit nor by any other action may the PHA directly or indirectly reduce the family's opportunity to choose among the available units in the housing market.

(c) This section III.K. applies to any family to which a housing voucher is issued by a PHA. The finders-keepers policy does not apply to the first occupancy by a family on the PHA's waiting list that is issued a housing voucher because the family agrees to move initially into a project rehabilitated under the Rental Rehabilitation Program, when applicable (see section III.I.(f)(2) of this Notice). However, after initial use of the housing voucher in the rehabilitated project, the family is free to move to any other approvable unit in the PHA's jurisdiction, consistent with the Finders-Keepers policy, or to move to another PHA's jurisdiction under section III.L. of this Notice.

L. Portability of Housing Vouchers

(a) General Introduction

(1) This section III.L. describes portability procedures for families participating in the Housing Voucher Program. Housing voucher portability procedures are not intended to supplant current voluntary mobility programs for the Section 8 Certificate Program that PHAs may determine to extend to housing voucher participants.

(2) If a PHA is administering a Housing Voucher Program in the location to which a family (housing voucher holder or participant) wishes to move, the PHA must accept the family and provide services to the family as if the family were a participant in its Housing Voucher Program. Where a PHA is not administering a Housing Voucher Program, the PHA is encouraged to administer the housing voucher assistance on behalf of the family or to issue the family one of the receiving PHA's available Section 8 certificates. The details of the housing voucher portability program are discussed in paragraph (d) of this section.

(b) Mobility Under Current Section 8 Procedures

Current § 882.103(c) of the regulations for the Section 8 Certificate Program encourages PHAs to promote greater choice of housing opportunities for eligible families by:

(1) Seeking participation of owners within the PHA's jurisdiction;

(2) Advising families of their opportunities to lease housing throughout the PHA's jurisdiction;

(3) Cooperating with other PHAs by issuing certificates to families already receiving the benefit of Section 8 housing assistance payments who wish to move from the operating area of one PHA to another; and

(4) Entering into administrative arrangements with other PHAs in order to permit certificate holders to seek housing in the broadest range of areas.

(c) Applicability of Current Mobility Procedures

Current procedures for the Section 8 Existing Housing Certificate Program designed to facilitate mobility of assisted families, discussed in paragraph (b) of this section, apply to the Housing Voucher Program, wherever feasible to increase the opportunities of families participating in the Housing Voucher Program. If the family desires to move and can move with the opportunity for continued housing voucher or certificate assistance under a voluntary mobility program described in paragraph (b) of this section, the PHA is not required to use the portability procedures described in paragragh (d) of this section.

(d) Portability Under the Housing Voucher Program

(1) *Scope.* The procedures in this paragraph (d) are to be used only for the Housing Voucher Program.

(2) *General.* The purpose of this paragraph (d) is to establish procedures to be used in the Housing Voucher Program when a family desires to stay in the program, but wishes to move outside its current PHA's jurisdiction.

(i) Portability will provide an opportunity to a housing voucher holder or participant to move to any other housing voucher jurisdiction, by requiring the receiving PHA to accept the family, subject to the limitations identified in this paragraph (d). The receiving PHA may choose to bill the initial PHA for assistance payments made on behalf of the family, or it may decide to provide housing voucher assistance to the family under its own ACC.

(ii) This portability feature also promotes moves of housing voucher holders or participants to non-housing voucher jurisdictions by encouraging PHAs with certificate programs to participate on a voluntary basis. If the family chooses to move to an area without a Housing Voucher Program, the receiving PHA is not required to accept the family. The receiving PHA may administer the housing voucher and bill the initial PHA, or it may issue the family one of its certificates.

(3) *Eligibility for portability.* A family is eligible for portability if it lives in the initial PHA's jurisdiction and holds a current housing voucher, or if the family is a current participant (see § 882.209(a)) in the initial PHA's Housing Voucher Program.

(4) *Determination to deny or terminate assistance.* Either the initial PHA or the receiving PHA may make a determination to deny or terminate assistance to the family in accordance with § 882.210, as modified by section III.S. of this Notice.

(5) *Responsibilities of the Initial PHA.* (i) The initial PHA must manage its Housing Voucher Program in a manner that will assure that it has the financial ability to provide continued housing voucher assistance in accordance with these portability procedures.

(ii) The initial PHA may deny the request to move if the number of families assisted under these portability procedures would constitute more than 15 percent of units under lease in the initial PHA's Housing Voucher Program.

(iii) If a family eligible for portability notifies the initial PHA that it wants to move under these procedures and informs the PHA concerning the area to which the family wants to move, the initial PHA must determine whether the PHA in the new area administers a Housing Voucher Program and, if it does not, but operates a Certificate Program, whether the receiving PHA is willing to accept the family under paragraph (d)(ii) of this section III.L.

(iv) If the family is going to move under the portability provisions above, the initial PHA must notify the receiving PHA to expect the family. The initial PHA must verify to the receiving PHA that the family met income-eligibility requirements for admission to the program, and that the initial PHA issued the family a housing voucher consistent with section III.I. of this Notice, and

must state the date (as determined in accordance with § 882.209(d)) by which the family must submit a request for lease approval in the jurisdiction of the receiving PHA.

(v) When the family moves out of the initial PHA's jurisdiction, the initial PHA retains funding for the housing voucher under its ACC.

(vi) The initial PHA must reimburse the receiving PHA for the full amount of the housing assistance payments made by the receiving PHA on behalf of the family. The amount of housing assistance is based on the payment standard in effect at the receiving PHA. If the receiving PHA elects to provide assistance to the family utilizing funding under the ACC for its own Certificate or Housing Voucher Program, the initial PHA is not required to reimburse the receiving PHA.

(vii) The initial PHA must reimburse the receiving PHA in the amount of 80 percent of the initial PHA's ongoing administrative fee for each unit month that the family under a housing voucher contract is receiving housing assistance in the receiving PHA's jurisdiction.

(viii) The initial PHA also may receive the preliminary fee for any new unit (limited by cost-justified expenses submitted up to the maximum amount allowed for this purpose), if the portable housing voucher qualified for the preliminary fee and a hard-to-house fee, if the family housed with the portable housing voucher qualified for the hard-to-house fee.

(ix) If the portability family leaves the Housing Voucher Program, or if the receiving PHA elects to provide assistance to the family utilizing funding under the ACC for its own Housing Voucher or Certificate Program, the initial PHA may use for other families the funding previously needed to support payment of subsidy for the portable housing voucher.

(6) *Responsibility of the Receiving PHA.* (i) A receiving PHA that administers a Housing Voucher Program must issue a housing voucher to a family moving from the Housing Voucher Program of another PHA. (But see paragraphs (c) and (d)(4) of this section L.) A receiving PHA that administers a Housing Voucher Program may not limit the number of housing vouchers issued to such families. The receiving PHA may either bill the initial PHA for the housing assistance payments on behalf of the family or may provide assistance to the family utilizing funding under the ACC for its own Housing Voucher or Certificate Program.

(ii) A receiving PHA that does not administer a Housing Voucher Program, but does administer a Certificate Program may:

(A) Refer the initial PHA to a Statewide or other multi-jurisdictional PHA that administers a Housing Voucher Program in its jurisdiction;

(B) Administer the housing voucher assistance on behalf of the family and bill the initial PHA for amounts authorized in this paragraph (d); or

(C) Issue a certificate to the family, utilizing funding under the ACC for its own Certificate Program.

(iii) The receiving PHA must recertify the family's income initially and at least annually thereafter for purposes of determining the housing assistance payments. The receiving PHA may not deny the family a housing voucher on the ground that the family's income exceeds the income limits for housing voucher eligibility in the receiving PHA's jurisdiction.

(iv) The receiving PHA promptly must notify the initial PHA if a family fails to submit a request for lease approval by the date specified by the initial PHA.

(v) The amount of housing assistance payments to be made on behalf of the family is determined in accordance with section III.J. of this Notice. A non-housing voucher PHA must adopt a payment standard based on the appropriate Fair Market Rent or HUD-approved community-wide exception rent in effect in the receiving PHA's jurisdiction at the time of the family's initial lease approval, and must use all other applicable procedures in section III.J. of this Notice in determining assistance payments.

(vi) The receiving PHA must perform all of the functions normally associated with providing assistance to a family in a Housing Voucher Program, including lease approval, annual recertification of income and annual inspection of the unit.

(vii) The receiving PHA may bill the initial PHA for an amount equal to 80 percent of the initial PHA's administrative fee, unless it elects to provide assistance to the family utilizing funding under the ACC for its own Certificate or Housing Voucher Program. The receiving PHA also may bill the initial PHA for up to the preliminary fee for housing vouchers for cost-justified expenses and for the hard-to-house fee.

(viii) The receiving PHA is responsible for making payments on behalf of the family to the owner. If the receiving PHA does not elect to provide assistance to the family utilizing funding under the ACC for its own Housing Voucher or Certificate Program, the receiving PHA bills the initial PHA for the amount of the housing assistance payments. The receiving PHA should notify the HUD Headquarters' Office of Elderly and Assisted Housing if the initial PHA neglects to respond to timely billing by the receiving PHA.

(ix) The receiving PHA must notify the initial PHA promptly if the family ceases to be a current participant in the initial PHA's Housing Voucher Program.

(7) *Subsequent moves.* (i) A family may move more than once using the portability procedures in this paragraph (d), although the initial PHA may limit family moves to not more than once in any twelve-month period.

(ii) When the family wishes to move from an area in which the receiving PHA has been billing the initial PHA, the PHA in the new jurisdiction to which the family moves becomes the receiving PHA. It then has all of the choices and obligations of a receiving PHA as described in this section. The first receiving PHA is no longer involved, because the initial PHA retains funding authority for the housing voucher.

(iii) When a family wishes to move from an area in which the receiving PHA has elected to provide assistance to the family utilizing funding under the ACC for its own Housing Voucher Program, this receiving PHA becomes the new initial PHA. It has all of the choices and obligations of an initial PHA as described in this section. The PHA in the new jurisdiction to which the family moves becomes the receiving PHA and has all of the choices and obligations of a receiving PHA as described in this section. In this situation, the initial PHA that originally selected the family is no longer involved.

M. Eligible and Ineligible Housing

(a) Housing that is eligible for use in the Housing Voucher Program is any existing dwelling unit determined by the PHA to be decent, safe, and sanitary (meeting the housing quality standards in § 882.109, except § 882.109(q)), except for the following types of housing:

(1) A unit that is owned by the PHA administering the ACC under this Notice, including both the receiving PHA and initial PHA under the portability provisions of section III.L. of this Notice;

(2) A unit that is receiving other assistance under the 1937 Act, other than assistance under section 17;

(3) Nursing homes, units within the grounds of penal, reformatory, medical, mental and similar public or private institutions, or facilities that provide continual psychiatric, medical, or nursing services;

(4) A housing unit that is occupied by its owner (including the owner of a manufactured home leasing a manufactured home space). However, a

PHA may use housing voucher authority to provide assistance with respect to cooperative or mutual housing that has a resale structure that maintains affordability for lower income families, if the PHA determines that such assistance will assist in maintaining affordability of such housing for lower income families; and

(5) A housing unit used as transitional housing in the Department's Transitional Housing Demonstration Program.

(b) Elderly, handicapped, disabled, or displaced families and individuals may use congregate housing. Eligible elderly, handicapped, or disabled families and individuals who require a planned program of continual supportive services may use independent group residences. The definitions of and relating to congregate housing and independent group residences in § 882.102 and the housing quality standards for independent group residences and congregate housing under § 882.109 apply to the Housing Voucher Program.

(c) SRO housing may be used only if: (1) The property is located in an area in which there is a significant demand for SRO units, as determined by the HUD Field Office; (2) the PHA and the unit of general local government in which the property is located approve the use of SRO units for such purpose; and (3) the unit of general local government and the local PHA certify to HUD that the property meets applicable local health and safety standards for SRO housing. Specific housing quality standards for SRO housing are in § 882.109, and they apply to the Housing Voucher Program.

(d) The 40 percent limitation under § 882.110(c) on the number of certain subsidized units in specified types of federally assisted housing shall apply. The PHA must count housing voucher units in determining compliance with the 40 percent limitation.

N. Approving Units and Executing Leases and Housing Voucher Contracts

(a) Information to Owners and Requests to PHA for Lease Approval

(1) The PHA must respond to inquiries from owners who have been approached by housing voucher holders by explaining the major program procedures, including lease provisions, lease approval procedures, housing quality inspections, contract provisions and payment procedures, and by furnishing copies of pertinent forms.

(2) When a family has found a unit it wants and the owner is willing to lease, the family must submit to the PHA a request for lease approval signed by the owner of the unit and the family. At the same time, the family must submit a copy of the proposed lease for the unit, which must include the lease provisions prescribed by HUD for the Housing Voucher Program. At the time of submission of the lease, it must be complete except for execution.

(b) Decent, Safe, and Sanitary Condition of the Unit

In accordance with § 882.209(h), the PHA must inspect a unit to determine whether the unit meets the housing quality standards before the housing voucher contract is executed.

(c) Unit Sizes That Vary From Housing Voucher

(1) Regardless of the number of bedrooms stated on a housing voucher, the PHA may not prohibit a family from renting an otherwise acceptable unit on the ground that it is too large for the family.

(2) The PHA may not prevent a family from renting a unit with fewer bedrooms than stated on the housing voucher. However, the unit must meet the space requirements of the housing quality standards under § 882.109(c), or such variation as HUD may have approved.

(3) If the PHA determines that the assisted unit occupied by a participant family does not meet the space requirements of the housing quality standards under § 882.109(c) because of an increase in family size or a change in family composition, the PHA must issue the participant family a new housing voucher, and the family and the PHA must try to find an acceptable unit as soon as possible.

(4) The policies stated in paragraphs (c)(1)–(3) of this section are similar to policies applied in the Certificate Program (see §§ 882.209(i) and 882.213). References to compliance with maximum rent restrictions are not included, since there are no maximum rents in the Housing Voucher Program.

(d) Lease Requirements

(1) *General.* (i) The lease between the owner and the family must be in accordance with section III.P. of this Notice and any applicable HUD requirements. The lease must include all provisions required by HUD and may not contain any provisions prohibited by HUD.

(ii) In addition to the requirements identified in this paragraph (d), a lease for an independent group residence must comply with § 882.209(j)(2).

(2) *Term of Lease.* (i) The term of the lease begins on a date stated in the lease and continues until:

(A) A termination of the lease by the owner in accordance with section III.P. of this Notice.

(B) A termination of the lease by the family in accordance with the lease or by mutual agreement during the term of the lease. The lease must permit a termination of the lease by the family without cause, at any time after the first year of the term of the lease, on not more than 60 days' written notice by the family to the owner (with a copy to the PHA); or

(C) A termination of the housing voucher contract by the PHA.

(ii) The term of the lease must begin at least one year before the end of the term of the last funding increment under the ACC. The contract and the lease shall end if the PHA determines, in accordance with procedures prescribed by HUD, that funding under the ACC is insufficient to support continued assistance.

(iii) The owner may offer the family a new lease for execution by the family after approval by the PHA for a term beginning at any time after the first year of the term of the lease. The owner must give the tenant written notice of the offer, with a copy to the PHA, at least 60 days before the proposed beginning date of the new lease term. The offer may specify a reasonable time limit for acceptance by the family.

(e) Approval and Disapproval of Leases and Execution of Housing Voucher Contracts and Related Documents

The PHA must approve or disapprove leases and provide for execution of HUD-prescribed forms of housing voucher contracts and related documents in accordance with § 882.209 (k) and (*l*) and § 882.215(b). References to approving the amount of rent payable to the owner and the rent reasonableness certification under § 882.106(b) do not apply, since there is no maximum rent payable to the owner under the Housing Voucher Program.

O. Maintenance, Operation and Inspections; Security Deposits

(a) Maintenance, Operation, and Inspections

The requirements of § 882.211 concerning maintenance, operation, and inspections of units apply. In addition, the PHA may not make any housing assistance payments for a unit that fails to meet the housing quality standards, unless the owner promptly corrects the defect and the PHA verifies the correction.

(b) Security Deposits and Utility Deposits

(1) If at the time of the initial execution of the lease, the owner wishes to collect a security deposit, the amount

shall be the greater of $50 or 30 percent of the family's monthly adjusted income. The amount of the security deposit also is limited by any applicable limitation under State or local law. If a housing voucher family rents its pre-program unit, a security deposit collected in excess of the maximum amount that was collected before PHA approval of a lease under the Housing Voucher Program does not have to be refunded until the family vacates the unit subject to the lease terms. The family is expected to pay security deposits and utility deposits from its own resources or from other public or private sources.

(2) Subject to State and local law, the owner may use the security deposit, including any interest on the deposit, in accordance with the housing voucher lease, as reimbursement for any unpaid rent payable by the family or for other amounts the family owes under the lease. The owner must give the family a written list of all items charged against the security deposit and the amount of each item. After deducting the amount used to reimburse the owner, the owner must refund promptly the full amount of the unused balance to the family.

(3) If the family moves from the unit, the owner may claim reimbursement from the PHA for the amount the family owes under the lease (but not more than one month's rent to the owner), minus the greater of—

(i) The security deposit actually collected, or

(ii) The maximum security deposit the Owner could have collected at initial lease execution in accordance with paragraph (b)(1) of this section.

(4) Any reimbursement under this section must be applied, first, toward any unpaid rent due under the lease, and then to any other amounts owed. No reimbursement may be claimed from the PHA for unpaid rent for the period after the family vacates the unit.

P. Termination of Tenancy by Owners

(a) The owner may not terminate the tenancy except for:

(1) Serious or repeated violation of the terms and conditions of the lease;

(2) Violation of Federal, State, or local law which imposes obligations on a tenant in connection with the occupancy or use of the dwelling unit and surrounding premises; or

(3) Other good cause. However, during the first year of the term of the lease, the owner may not terminate the tenancy for "other good cause", unless the termination is based on malfeasance or nonfeasance by the family.

(b) The following are some examples of "other good cause" for termination of tenancy by the owner:

(1) Failure by the family to accept the offer of a new lease in accordance with section III.N.(d)(iii) of this Notice;

(2) A family history of disturbance of neighbors or destruction of property, or of living or housekeeping habits resulting in damage to the unit or property;

(3) Criminal activity by family members involving crimes of physical violence to persons or property;

(4) The owner's desire to utilize the unit for personal or family use or for a purpose other than use as a residential rental unit; or

(5) A business or economic reason for termination of the tenancy (such as sale of the property, renovation of the unit, or desire to rent the unit at a higher rental).

(c) The list of examples in paragraph (b) of this section is intended as a non-exclusive statement of some situations included in "other good cause", but may in no way be construed as a limitation on the application of "other good cause" to situations not included in the list. The owner may not terminate tenancy during the first year of the term of the lease for "other good cause" (see paragraph (a)(3) of this section) for the grounds stated in paragraph (b)(1), (b)(4), or (b)(5) of this section.

(d) Any notice required under this section III.P. or section III.N.(d) of this Notice may run concurrently with any notice required under State or local law.

Q. Reexamination of Family Income and Composition

(a) The PHA must reexamine family income and family size and composition at least annually, and in accordance with 24 CFR Part 813.

(b) After reexamination, the PHA must adjust the amount of the housing assistance to reflect any changes in family monthly adjusted income or monthly income, using the payment standard provisions in section III.J. of this Notice.

(c) If one year has elapsed since the date of the last housing assistance payment in accordance with section III.J. of this Notice, the housing assistance payments contract will terminate automatically.

(d) At any time, a family may request a redetermination of the housing assistance payment on the basis of a change in family income or adjusted income.

R. Family Obligations

(a) A family must:

(1) Supply any certification, release, information, or documentation that the PHA or HUD determines to be necessary in the administration of the program, including information required for use by the PHA in a regularly scheduled reexamination or interim reexamination of family income and composition in accordance with HUD requirements;

(2) Allow the PHA to inspect the dwelling unit at reasonable times and after reasonable notice;

(3) Notify the PHA before vacating the dwelling unit; and

(4) Use the dwelling unit solely for residence by the family, and as the family's principal place of residence.

(b) A family may not:

(1) Sublease or assign the lease or transfer the unit;

(2) Own or have any interest in the dwelling unit, except as provided in section III.M.(a)(4) of this Notice;

(3) Commit any fraud in connection with the Housing Voucher Program; or

(4) Receive duplicative assistance under the Housing Voucher Program while occupying, or receiving assistance for occupancy of, any other unit assisted under any other Federal, State, or local housing assistance program (including any Section 8 program).

S. Grounds for Denial or Termination of Assistance

Section 882.210 applies to the Housing Voucher Program. However, the applicable family obligations are covered in section III.R. of this Notice, not in § 882.118.

T. Informal Review or Hearing

(a) The informal review or hearing requirements of § 882.216 apply to applicants and participating families. References to a participant's right to an informal hearing in cases involving the amount of the total tenant payment or tenant rent under § 882.216(b)(i) should be considered to be references to computation of the amount of housing assistance payment for the family. Section 882.216(b)(1)(iii), concerning hearings where the PHA determines a family is residing in a unit with a larger number of bedrooms than appropriate, does not apply.

(b) If the housing voucher holder or participant wants to move with continued assistance under the Housing Voucher Program using the portability procedures in section III.L.(d) of this Notice, the family must be given the opportunity for an informal hearing in accordance with § 882.216(b) if the initial PHA or the receiving PHA decides to deny or terminate such continuing assistance. However, a receiving PHA that does not administer a Housing Voucher Program is not required to give the opportunity for an informal hearing on the PHA's election not to administer housing voucher assistance on behalf of the family.

U. Administrative Fees Paid to the PHA

(a) General

The ACC authorizes three types of fees to be paid to the PHA for HUD-approved costs associated with administering the Housing Voucher Program. The three types of fees are discussed below.

(b) Preliminary Fee: Use

HUD pays the PHA a preliminary fee for cost-certified tasks involved in taking families into the program to lease the number of units that can be supported with a new increment of housing voucher funding authority. This fee is intended to cover expenses incurred in helping families who inquire about or apply for the program (but never receive housing assistance for whatever reason), as well as all of the intake functions associated with achieving utilization of newly authorized funds. Examples of eligible costs include the following:

(1) The PHA's cost of preparing its Section 8 Housing Voucher Program application;
(2) The PHA's administrative overhead during initial lease-up, including rent, staff salaries, equipment, and supplies;
(3) Publicizing the program;
(4) Briefing applicants and landlords;
(5) Reviewing applicants for assistance;
(6) Determining eligibility, including initial determination and verification of income;
(7) Conducting initial unit inspections;
(8) Reviewing leases; and
(9) Preparing housing voucher contracts.

(c) Preliminary Fee: Amount

For each funding increment, a PHA will receive a preliminary fee to cover actual expenses incurred before the housing voucher contract is executed. The preliminary fee equals the lesser of actual expenses approved by HUD or $215 for each housing voucher that results in an initial lease or housing voucher contract.

(d) Preliminary Fee: Portable Housing Vouchers

HUD will pay the initial PHA an additional preliminary fee when the initial PHA is billed for such a fee by a receiving PHA for one of the initial PHA's portable housing vouchers. All requirements of paragraphs (b) and (c) of this section apply. (For procedures on portable housing vouchers, see section III.L. of this Notice.)

(e) Ongoing Administrative Fee: Use

The PHA earns the ongoing fee based on the number of units under housing voucher contracts on the first day of each month. The ongoing administrative fee is designed to cover the PHA's cost of administering assistance on behalf of the program participants. Examples of tasks include the following:

(1) Making housing assistance payments to owners;
(2) Reexamining family income;
(3) Conducting annual and special unit inspections;
(4) Maintaining continued occupancy after initial lease-up; and
(5) The PHA's administrative overhead after initial lease-up.

(f) Ongoing Administrative Fee: Amount

The ongoing administrative fee equals 6.5 percent per month of the current Section 8 Existing Housing Fair Market Rent for the PHA's two-bedroom unit, published in the **Federal Register** in accordance with § 888.115 of this chapter.

(g) Hard-to-House Fee: Use

A hard-to-house fee is provided to cover the cost of special assistance given to a family with three or more minors to enable the family to find suitable housing. Special assistance includes the following:

(1) Maintaining up-to-date lists of owners with large units;
(2) Increasing outreach efforts to owners, real estate organizations, and property management firms;
(3) Taking applications at home; and
(4) Following up weekly with housing voucher holders.

(h) Hard-to-House Fee: Amount

The PHA will receive a hard-to-house fee of $45 for special assistance provided to each family with three or more minors that results in a unit coming under lease in the Section 8 Housing Voucher Program. A family that rents in place does not qualify the PHA to receive a hard-to-house fee. The PHA qualifies for a hard-to-house fee each time an eligible family moves and a new housing voucher contract is signed for a different unit.

(i) Hard-to-House Fee: Portable Housing Vouchers

HUD will pay the initial PHA an additional hard-to-house fee when the initial PHA is billed for such a fee by a receiving PHA for one of the initial PHA's portable housing vouchers. All requirements of paragraphs (g) and (h) of this section apply. (For procedures on portable housing vouchers, see section III.L. of this Notice.)

V. Reporting Requirements for the Freestanding Component and the Small Rural Component

In addition to reporting required for all components of the Housing Voucher Program, a PHA administering the freestanding or small/rural component of the Housing Voucher Program must collect complete and accurate records, as required by HUD, on certificates and housing vouchers issued under the component. The PHA must send such copies of required forms to HUD or its designee, as HUD may specify for each certificate or housing voucher.

W. Subsequent Use of Housing Voucher Authority Targeted for Specific Uses

If HUD provides housing voucher funding for families living in particular kinds of projects (see section III.I.(e)(2) of this Notice for a complete list), or for desegregation of public housing projects (see section III.D.(e) of this Notice), the PHA must use the funding initially for the specified purpose. A housing voucher is considered as initially used for the purpose provided where the PHA has approved a lease and executed a housing voucher contract for that purpose. Once this initial use is achieved, the PHA may use the authority for any purpose in furtherance of its approved Housing Voucher Program.

X. [Reserved]

Y. Waivers

Upon determination of good cause, the Assistant Secretary for Housing-Federal Housing Commissioner may, subject to statutory limitations, waive any provision of this Notice. Each such waiver will be in writing and will be supported by documentation of the pertinent facts and grounds.

IV. Findings and Other Matters

An environmental finding under the National Environmental Policy Act (42 U.S.C. 4321–4347) is unnecessary since the Certificate Program and the Housing Voucher Program are part of the Section 8 Existing Housing Program, which is categorically excluded under HUD regulations at 24 CFR 50.20(d).

The information collection requirements contained in this Notice and in the February 1987 NOFA have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520. Currently approved requirements have been assigned the following OMB Control Numbers: 2502–0123; 2502–0154; 2502–0161; 2502–0185; 2502–0348; 2502–

0350; 2502–0362; 2577–0067; and 2577–0083.

Authority: Sec. 8(o) of the U.S. Housing Act of 1937 (42 U.S.C. 1437f(o)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Date: March 14, 1988.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

Environmental Protection Agency

2,4-D, 2,4-DB, and 2,4-DP; Notice of Proposed Decision Not To Initiate a Special Review

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30000/57; FRL-3353.3]

2,4-D, 2,4-DB, and 2,4-DP; Proposed Decision Not To Initiate a Special Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; Proposed Decision Not To Initiate a Special Review.

SUMMARY: This document announces EPA's proposed decision not to initiate a Special Review of 2,4-D, 2,4-DB, and 2,4-DP based on carcinogenicity. The Agency's decision is based on a consensus of opinion from EPA scientists, national experts on epidemiology, and the FIFRA Scientific Advisory Panel, that existing epidemiologic data are inadequate to assess the carcinogenic potential of 2,4-D. In addition, the Agency has concluded that existing laboratory data provide insufficient evidence of carcinogenicity. Therefore, EPA has determined that a Special Review is not appropriate at this time.

DATE: Comments on this Notice must be received by May 23, 1988.

ADDRESS: Submit three sets of written comments, bearing the document control number [OPP-30000/57] by mail to:

Information Services Branch, Program Management and Support Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington, DC 20460.

In person, bring comments to:

Rm. 236, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this Notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. The 2,4-D public docket, which contains all non-CBI written comments and the corresponding index will be available for public inspection in Rm. 236 at the Virginia address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

W. Michael McDavit, Special Review Branch, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M. St. SW, Washington, DC 20460.

Office location and telephone number:

Rm. 1006, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1787).

SUPPLEMENTARY INFORMATION: This Notice announces EPA's proposed decision not to initiate a Special Review of 2,4-dichlorophenoxyacetic (2,4-D), 2-(2,4-dichlorophenoxy) butyric acid (2,4-DB), and 2-(2,4-dichlorophenoxy) propionic acid (2,4-DP), and sets forth the rationale for that proposed decision. In summary, EPA has re-evaluated the concerns raised in the September 22, 1986, and December 3, 1986, preliminary notifications to registrants and applicants in light of other relevant information that, in part, has become available since issuance of the preliminary notifications. Based on this review, EPA has determined that a Special Review of 2,4-D, 2,4-DB, and 2,4-DP is not warranted at this time.

I. Introduction

A. Regulatory Background

The common name for the herbicide 2,4-dichlorophenoxyacetic acid is 2,4-D. The herbicides 2,4-DB or 2-(2,4-dichlorophenoxy) butyric acid and 2,4-DP or 2-(2,4-dichlorophenoxy) propionic acid are structural analogs of 2,4-D. Including the various derivatives of these three chemicals (esters and salts), over 1500 registered pesticide products contain 2,4-D, 2,4-DB, or 2,4-DP as active ingredients.

The active ingredient 2,4-D, first registered in 1948, is a popular, systemic herbicide widely used for controlling broadleaf weeds on a large number of food and non-food crops.

It is also used as a growth regulator on citrus. The majority of 2,4-D is used to control weeds in wheat, field corn, grain sorghum, sugar cane, rice, barley, and range and pastureland. In addition, 2,4-D is used for aquatic weed and forest management, as well as weed control around the home.

The herbicide 2,4-DB is a selective, systemic herbicide used for postemergence weed control. The majority of 2,4-DB is used to control broadleaf weeds in soybeans, alfalfa, and peanuts.

The herbicide 2,4-DP is a selective, systemic herbicide used to control broadleaf weeds, annual grasses, and woody plants. The majority of 2,4-DP is used to control pest plants in turf (ornamental, golf course and lawn areas), non-bearing citrus fruit, rights-of-way (utility, railroads, highways, etc.), and forestry.

On August 28, 1980, after reviewing all available health effects information on 2,4-D and consulting with the Scientific Advisory Panel (SAP), the Agency issued a Data Call-In notice (DCI) pursuant to section 3(c)(2)(B) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) to the registrants of 2,4-D. This notice required registrants to submit studies on the following areas: acute toxicity, oncogenicity in the rat and mouse, reproductive effects, teratogenicity (birth defects), neurotoxicity, and metabolism. Since that time, all of these required data have been received and reviewed by the Agency.

The Agency has also recently reviewed a number of epidemiology studies relevant to these pesticides, including a new study conducted by the National Cancer Institute and University of Kansas that found an association between farm herbicide use and non-Hodgkin's lymphoma. Published in the Journal of the American Medical Association on September 5, 1986, the authors of this study concluded that the use of phenoxy herbicides, including 2,4-D, was linked to an increased cancer risk among farmers handling such herbicides.

Based on this epidemiological evidence, on September 22, 1986, the Agency issued a preliminary notification of Special Review to the registrants of 2,4-D pursuant to 40 CFR 154.21. On December 3, 1986, the Agency issued a similar preliminary notification of Special Review to the registrants of 2,4-DB and 2,4-DP because the Agency believed that these compounds were toxicologically similar to 2,4-D and should be reviewed at the same time.

B. Legal Background

A pesticide product may be sold or distributed in the United States only if it is registered or exempt from registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136 *et seq.*). Before a product can be registered it must be shown that it can be used without causing "unreasonable adverse effects on the environment," [FIFRA section 3(c)(5)]. The term "unreasonable adverse effects on the environment" is defined in FIFRA section 2(bb) as "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide." The burden of proving that a pesticide meets this standard for registration is, at all times, on the

proponent of initial or continued registration. If at any time the Agency determines that a pesticide no longer meets this standard, the Administrator may cancel this registration under section 6 of FIFRA.

The Special Review process provides a mechanism to permit public participation in EPA's deliberations prior to issuance of any Notice of Final Determination describing the regulatory action which the Administrator has selected. The Special Review process, which was previously called the Rebuttable Presumption Against Registration (RPAR) process, is described in 40 CFR 154, published in the **Federal Register** of November 25, 1985 (50 FR 49015).

Prior to formal initiation of a Special Review, a preliminary notification is sent to registrants and applicants for registration pursuant to 40 CFR 154.21 announcing that the Agency is considering commencing a Special Review. In this case, that notification was issued on September 22, 1986 for 2,4-D, and on December 3, 1986 for 2,4-DB and 2,4DP. Registrants and applicants for registration were given 30 days to comment on the Agency's proposal to commence a Special Review. Most registrants responded to the notifications by concurring on one particular comment provided in response to the September 22, 1986, 2,4-D notification on behalf of the Industry Task Force on 2,4-D Research Data. A few unique comments were also received in response to the December 3, 1986 notification. These comments will be briefly addressed in Unit IV of this Notice.

If the Agency determines, after issuance of a notification pursuant to 40 CFR 154.21, that it will not conduct a Special Review, it is required under 40 CFR 154.23 to issue a proposed decision to be published in the **Federal Register**. This Notice is being issued under 40 CFR 154.23. That regulation requires that a period of not less than 30 days be provided for public comment on the Proposed Decision Not To Initiate a Special Review. Subsequent to receipt and evaluation of comments on the Proposed Decision Not To Initiate a Special Review, the Administrator is required by 40 CFR 154.25 to publish in the **Federal Register** his final decision regarding whether or not a Special Review will be conducted.

II. Risk Concerns Underlying 40 CFR 154.21 Notification

A. Epidemiologic Evidence

The preliminary notifications under 40 CFR 154.21 were issued as a result of Agency concerns raised by the findings of a new epidemological study of Kansas farmers. The researchers had found an association between farm herbicide use and non-Hodgkin's lymphomas in farmers based on a population-based case control study (Vol. 25, No. 9, Journal of the American Medical Association, pp. 1141–1147) conducted by the National Cancer Institute and the University of Kansas.

This study was performed to determine if there was any relationship between agricultural herbicide use and soft-tissue sarcoma, Hodgkin's disease, or non-Hodgkin's lymphoma. Newly diagnosed cases of the three diseases were taken from a population-based registry covering the State of Kansas and compared with control groups from the general population of Kansas using Medicare and mortality files. Telephone interviews were then conducted with living individuals (or next-of-kin for deceased individuals) belonging to case and control groups. Numerous questions were asked with respect to farming practices and the use of pesticides. An attempt was made to corrobate information from telephone interviews with records or knowledge of pesticide use by local suppliers of pesticides.

In summary, the study found that Kansas farmers who used certain types of herbicides had an excess risk for developing non-Hodgkin's lymphoma. No association was found between farm herbicide use and soft-tisse sarcoma and Hodgkin's disease. Farmers exposed to the herbicides for more than 20 days each year had six times the risk of developing non-Hodgkin's lymphomas when compared to controls. Among these frequent users, those who mixed or applied the herbicides themselves had eight time the risk. These excess risks were reportedly associated with the use of phenoxyacetic herbicides, including 2,4-D.

EPA scientisits and four epidemiology experts, requested by EPA to review the new evidence, generally agreed that the NCI/Kansas study was well conducted and that the study served as a good basis for a hypothesis of a non-Hodgkin's lymphoma and phenoxy herbicide association. Notwithstanding the lack of specificity for 2,4-D, the study was regarded by the reviewers as the most relevant epidemiological study of its kind that pertains to 2,4-D as a pesticide and provides a sound foundation for further inquiries.

A number of critical problem areas, common to many epidemiology studies, have been noted by reviewers. Some of the key areas of concern are the lack of appropriate controls, exposure to multiple chemicals, and insufficient information on actual exposure to 2,4-D and other pesticides.

In order to evaluate the occurrence of non-Hodgkin's lymphoma cases among farmers with exposure to 2,4-D, appropriate study controls should be used. Farmers have different lifestyles (e.g., diet, exposure to animal viruses) than the general population. Differences in habit and lifestyle may confound results when comparisons are made with controls from the general population. In this case, the study did not choose controls based on occupation and, therefore, it is quite possible that lifestyle factors other than herbicide use may have confounded the results.

Farmers are frequently exposed to other chemicals or potentially tumorigenic agents which could account for some or all of the non-Hodgkin's lymphoma cases. Researchers did report some positive associations with the use of other types of pesticides, such as fungicides and insecticides. In addition, before the phenoxy herbicide, 2,4,5-T, was suspended by the Agency in 1979 based on part on the risk posed by the presence of the carcinogenic impurity, 2,3,7,8-tetrachlorodibenzo-p-dioxin, farmers in Kansas used pesticide products containing 2,4,5-T. Fertilizers, fuel, and other environmental toxicants, as well as biological agents (e.g., viruses) may also present some risk of non-Hodgkin's lymphoma for farmers. Unless exposure variables associated with farming are better controlled, it is difficult to reach conclusions on any contribution of 2,4-D or other specific phenoxy herbicides to the onset of non-Hodgkin's lymphoma in farmers.

The information obtained on 2,4-D use and exposure is incomplete. Reported use, particularly when that use occurred many years previously, is not necessarily a good surrogate measure of exposure. This type of information is useful, but substantially less reliable than some quantitative measure of exposure. Information obtained from next-of-kin should be used with caution. Living farmers and next-of-kin frequently have incomplete recall with respect to specific pesticide names or work practices. Although researchers tried to verify the veracity of the information gathered from telephone interviews by contacting a sample of pesticide suppliers, only about half of the contacted suppliers were able to confirm respondents' answers concerning use of 2,4-D (personal communication, Blondell 1987).

Some reviewers noted an apparent underreporting of all herbicide use. U.S. Department of Agriculture records indicate that significantly more pesticides were used in Kansas than was suggested by the results of the telephone survey. This discrepancy alone introduces substantial uncertainty in the pesticide use information obtained from and relied on in this study.

Taken together, these problem areas or uncertainties make it impossible to pinpoint 2,4-D alone as the causative agent in these particular non-Hodgkin's lymphoma cases. As previously mentioned, uncertainties of these kinds are typically present to some degree in all epidemiology studies. Nonetheless, findings of epidemiology studies are frequently insightful and, on occasion, such insight is sufficient for policymaking and regulation. In this case, the extent and degree of these weaknesses limit the usefulness of the study for regulatory purposes.

A number of other epidemiological studies pertaining to 2,4-D were also evaluated by the Agency. Some of the existing epidemiologic studies on 2,4-D and related compounds indicate an association with cancer in humans and others do not. Those studies finding a relationship with cancer in humans were determined to be inadequate for establishing a specific association between cancer risk and 2,4-D use. As mentioned above, the NCI/Kansas study, while relevant to farmers handling phenoxy herbicides, was also determined to be inadequate for establishing a specific association between 2,4-D and non-Hodgkin's lymphoma.

In addition, a recently published epidemiologic study designed to address the same issue at the NCI/Kansas study, that is, the relationship between occupational exposure to phenoxy herbicides and cancer in humans, did not confirm the NCI/Kansas study's conclusions with respect to non-Hodgkins lymphoma. Woods, *et al.* (Soft Tissue Sarcoma and Non-Hodgkins Lymphoma in Relation to Phenoxyherbicide and Chlorinated Phenol Exposure in Western Washington, *Journal of the National Cancer Institute* 1987; 78: 899–910) studied male farmers handling a variety of phenoxy herbicides and chlorinated phenols, including 2,4-D and found "small but significantly increased risks of developing [non-Hodgkins lymphoma] in association with some occupational activities where phenoxyherbicides have been used in combination with other types of chemicals, particularly for prolonged periods." However, the investigators did not find a positive association between increased cancer risks and exposure to 2,4-D.

B. Laboratory Evidence

In response to the Data Call-In notice issued in 1980, the Industry Task Force on 2,4-D Research Data sponsored, among other things, oncogenicity studies in the rat and mouse. The rat study found equivocal evidence of oncogenicity and the mouse study found no treatment-related oncogenic responses.

In the rat, 2,4-D (97.5 percent purity) was administered in the diet to male and female rats at levels of 0, 1, 5, 15, and 45 mg/kg/day for 24 months. At an interim sacrifice of 53 weeks, an apparent treatment-related increased incidence of brain tumors (astrocytomas) was observed in male animals. No tumor response related to 2,4-D administration was observed in female rats.

The results of the final rat study were subjected to two statistcal evaluations. Using the Fisher-Exact test, the increased incidence of tumors seen in male animals at the high dose level was not statistically significant when compared to control male animals. Using the Cochran-Armitage trend test, 2,4-D administration was found to be associated with a marginally statistically significant positive dose-related trend for astrocytomas in male rats. Thus, neither evaluation found strong statistical evidence of oncogenicity in the rat.

In the mouse, 2,4-D (97.5 percent purity) was administered in the diet to male and female animals at levels of 0, 1, 15, and 45 mg/kg/day for 24 months. No oncogenic effects attributable to 2,4-D administration were found in either male or female mice.

Although there were no oncogenic effects observed in either sex of the mouse and only marginally statistical oncogenic effects observed in the male rat, the Agency still does not believe there are adequate laboratory animal data to unequivocally assess the carcinogenic potential of 2,4-D. This is predicated on the Agency's conclusion that a Maximum Tolerated Dose (MTD) was apparently not achieved in either test animal. (A MTD, usually the highest dose tested in an oncogenicity study, is a level slightly below the level which resulted in significant life-threatening toxicity in a subchronic study. The level should not be selected too far below a life threatening level because the highest dose tested in an oncogenicity study should elicit significant toxicity without substantially altering the normal life-span of the test species from effects other than tumor formation.

Based on the Agency's most current review of the chronic studies and on the results of subchronic studies with 2,4-D, the highest dose tested (45 mg/kg) in both the rat and mouse oncogenicity studies did not achieve a MTD (45 mg/kg is estimated to be only one-third to one-half of the MTD).

In 1985, scientists from NIH's National Toxicology Program (NTP) questioned the dose levels selected for the oncogenicity studies based on their evaluation of tissue slides taken from the subchronic studies and an interim sacrifice of test animals in both two year oncogenicity studies. The NTP pathologists concluded unanimously that the various kidney lesions observed in the subchronic studies, which were used to estimate the MTD and to support the dose levels used in the oncogenicity studies, were minimal in severity and clearly not life-threatening even at the highest dose of 150 mg/kg. They also concluded that the interim sacrifice data from the oncogenicity studies showed only minimal toxicity at the highest dose tested (45 mg/kg). Their overall conclusion was that the oncogenicity studies on 2,4-D were probably not being conducted at a MTD.

Having now evaluated the two year oncogenicity studies and having considered the scientific opinion of the NTP scientists, the Agency has decided to require, under authority of FIFRA section 3(c)(2)(B), additional oncogenicity testing in the rat and mouse to ensure that a MTD is achieved.

Additional toxicological information, including more detailed reviews of the rat and mouse studies, is available in the 2,4-D public docket.

In April 1987 the Agency concluded that the rat evidence provided limited evidence of oncogenicity in animals. Furthermore, the Agency concluded that although the NCI/Kansas study was well conducted, it provided "inadequate" evidence of cancer in humans attributable specifically to 2,4-D. Given these two conclusions, the Agency tentatively classified 2,4-D as Interim Category C (possible human carcinogen), based on the Agency's "Guidelines for Carcinogen Risk Assessment", and subsequently presented its conclusions and all available information regarding 2,4-D's potential to cause cancer to the FIFRA Scientific Advisory Panel for consideration in June 1987.

III. Scientific Advisory Panel Review

On June 25, 1987, the FIFRA Scientific Advisory Panel (SAP) met to review the data base supporting EPA's preliminary decision to classify 2,4-D as an Interim Class C carcinogen. The Panel was asked, "Does the Panel agree with the [Agency's Internal] Peer Review Committee's conclusion concerning the Interim Category C classification of the available 2,4-D oncogenicity data?."

On behalf of the Industry Task Force on 2,4-D Research Data, a number of expert witnesses provided written and oral comments to the Panel in an attempt to rebut the validity of the epidemiological and laboratory evidence. Comments concerning the epidemiological evidence were similar to those discussed in Units II.A. and IV of this notice. Regarding the laboratory evidence, one witness commented that the tumors noted in the rat study were not treatment-related because they failed to display certain commonly associated characteristics of this tumor type. The commentor also argued that the tumors in the high dose group were spontaneous in origin based on the presence of a brain tumor in one control animal.

In conclusion, the Panel issued the following written response on July 8, 1987:

> The SAP does not agree with the [Agency's Internal] Peer Review Committee's conclusion that the available 2,4-D oncogenicity data should be classified as an Interim Category C (Possible Human Carcinogen). The Panel believes that the rat and mouse oncogenicity studies are adequate in design and conduct. The data are negative for oncogenicity in female rats and both sexes of mice. The increased incidence of astrocytomas in male rats exposed to 45 mg/kg 2,4-D was considered equivocal evidence of oncogenicity. The Panel believes that additional testing is required to resolve this issue. This testing should specifically address the astrocytoma issue by repeating an oncogenicity study. The study design should include two male rat control groups of 50 each and two male rat groups of the same size exposed to 45 mg/kg 2,4-D.
>
> The Panel also believes that the human epidemiology studies represent well-designed and conducted investigations that present equivocal data on 2,4-D's oncogenicity for humans. Additional studies are underway that should help clarify the issue.
>
> The Panel notes that equivocal evidence is different from limited evidence and that until additional data are developed it is improper to label 2,4-D as a carcinogen or a noncarcinogen. The Panel therefore concludes that the present data for animals and humans are inadequate for determining oncogenicity and that 2,4-D should be classified in Group D (Not Classifiable as to Human Carcinogenicity).
>
> Dated: July 8, 1987
>
> Stephen L. Johnson,
>
> *Executive Secretary, FIFRA Scientific Advisory Panel.*

The Agency's Peer Review Committee has deliberated on the scientific issues involving 2,4-D since the SAP meeting. The Agency now concurs with SAP's conclusions regarding the classification of 2,4-D with respect to carcinogenicity. The human and animal evidence of carcinogenicity is insufficient and, therefore, 2,4-D should be considered unclassifiable with respect to carcinogenicity (Category D). The Agency agrees with the SAP that the absence of strong statistical evidence in the rat does not support a finding of "limited" evidence of carcinogenicity. The Agency also agrees with SAP that additional testing is necessary in the rat in order to assess accurately 2,4-D's oncogenic potential in that species. This need is further supported by the concern that a MTD was not reached in the rat and mouse studies. For that reason, the Agency will also require additional testing in the mouse.

IV. Comments Received on the Preliminary Notifications

Comments were received in response to the preliminary notifications on 2,4-D, 2,4-DB, and 2,4-DP from most registrants. The majority of these commentors concurred on a detailed comment received from the Industry Task Force on 2,4-D Research Data. In addition, several parties prepared comments on behalf of cetain registrants regarding the benefits of 2,4-D as a growth regulator on citrus crops.

Although the comment received from the Task Force focused primarily on the NCI/Kansas epidemiology study, it also provided comments on existing animal data and other human epidemiology studies. The Task Force's basic position was that, "the Kansas study does not demonstrate an association between 2,4-D and non-Hodgkin's Lymphoma." Criticisms given by the Industry Task Force were for the most part similar to those raised by the Agency and independent reviewers. These included, but were not limited to, limitations in information collection regarding exposure to 2,4-D, limitations on the general accuracy of next-of-kin information, and the fact that the authors did not adequately examine confounding factors or discuss other possible causative agents (such as viruses).

Upon closer examination, the Agency and most reviewers agree that the NCI/Kansas study provides the basis for additional research, but that on its own, it does not provide a conclusive argument for associating farmer exposure to 2,4-D and non-Hodgkin's lymphoma. Some additional research is now underway at NCI. This research will hopefully help resolve this issue and determine whether such an association exists for 2,4-D.

Most commentors on the 2,4-DB and 2,4-DP preliminary notifications generally argued that these compounds should not be included in a review of 2,4-D. They pointed out basic differences in metabolism and the ostensible absence of 2,4-DB and 2,4-DP use in the Kansas study area.

The Agency generally agrees that 2,4-DB and 2,4-DP are sufficiently dissimilar toxicologically from 2,4-D to allow for a chemical-by-chemical type of evaluation. Therefore, the Agency will review these compounds individually and evaluate 2,4-D, 2,4-DB, and 2,4-DP in the reregistration process as separate compounds. Separate guidance documents for the reregistration of these pesticides are scheduled to be issued in 1988. However, within these pending evaluations, the Agency will continue to group the esters and salts of each active ingredient with the parent chemical.

The decision to issue separate guidance documents does not preclude the Agency from conducting a joint review of these compounds if at a later time data suggest metabolic or toxicologic similarities which would warrant such a simultaneous review.

V. Agency's Decision Regarding Special Review

Subsequent to the issuance of the preliminary notifications pursuant to 40 CFR 154.21, the findings of a NCI/Kansas epidemiologic study reporting an association between exposure to 2,4-D and human cancer was reviewed, at the Agency's request, by four National experts on epidemiology. These experts concluded independently that the study did not implicate 2,4-D alone as the causative factor for the Non-Hodgkin's lymphoma observed in this study, but rather indicated an association with phenoxy herbicide use in general. In addition, the FIFRA Scientific Advisory Panel reviewed this study, as well as the entire oncogenicity data base and concluded that 2,4-D should not be classified as a carcinogen or noncarcinogen at this time. Instead, the Panel recommended that 2,4-D be classified in Category D, Not Classifiable as to Human Carcinogenicity.

The Agency agrees with the external reviewers and SAP that the epidemiologic evidence as provided in the NCI/Kansas study does not raise as great a concern regarding 2,4-D as originally thought. The available human evidence, now considered inadequate by EPA on the basis of confounding factors and bias, does not establish a credible, causal relationship between 2,4-D and non-Hodgkin's lymphoma among Kansas farmers. Based on this conclusion, the Agency has determined that it will not conduct a Special Review of 2,4-D, or its structural analogs, 2,4-DB and 2,4-DP at this time.

The Agency now agrees with SAP that 2,4-D should be classified in Category D with respect to carcinogenicity (Not Classifiable as to carcinogenicity) based on the inadequate evidence of cancer in humans and laboratory animals.

Since the Agency is still interested in the results of further epidemiologic and laboratory studies on 2,4-D, the Agency may initiate a Special Review at a later time depending on the findings of such studies. In particular, NCI is currently evaluating human cancer cases and pesticide use in several other states in the U.S., which may have bearing on the continued registration of 2,4-D. In addition, the Agency will require additional testing in the rat and mouse. The Agency will also issue individual reregistration guidance documents on 2,4-D, 2,4-DB, and 2,4-DP in 1988, which will among other things involve intensive scrutiny of the entire available data bases and data deficiencies of these pesticides.

VI. Public Comment Opportunity and Public Docket

The Agency is providing a 60-day period to comment on this Notice. Comments must be submitted by May 23, 1988. All comments and information should be submitted in triplicate to the address given in this Notice under **ADDRESS**. The comments and information should bear the identifying notation OPP–30000/57. After receipt and evaluation of comments on this Notice, the Agency will publish a final decision in the **Federal Register** regarding whether or not a Special Review will be conducted.

The Agency has established a public docket (OPP–30000/57) for this proposal not to initiate a Special Review of 2,4-D, 2,4-DB, and 2,4-DP. This public docket will include this Notice; any other Notices pertinent to the Agency's decision regarding the Special Review of 2,4-D, 2,4-DB, and 2,4-DP; non-CBI documents and copies of written comments or other materials submitted to the Agency in response to the pre-Special Review registrant notifications and this Notice regarding Special Review of 2,4-D, 2,4-DB, and 2,4-DP; and a current index of materials in the public docket.

Dated: March 14, 1988.

John A. Moore,

Assistant Administrator, Office of Pesticides and Toxic Substances.

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 15; at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC
RESERVATIONS: Carolyn Payne, 202-523-3187

BOSTON, MA

WHEN: April 19; at 9 a.m.
WHERE: Thomas P. O'Neill, Jr. Federal Building,
Auditorium,
10 Causeway Street,
Boston, MA.
RESERVATIONS: Call the Boston Federal Information Center, 617-565-8123.

Rules and Regulations

Federal Register
Vol. 53, No. 57
Thursday, March 24, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 984

Walnuts Grown in California; Free, Reserve, and Export Percentages for the 1987–88 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes a free percentage of 72 percent, a reserve percentage of 28 percent, and an export percentage of 100 percent of the reserve percentage for merchantable California walnuts handled during the 1987–88 season, which began August 1, 1987. This action is taken under the marketing order for walnuts grown in California and is intended to avoid unreasonable fluctuations in supplies and prices in view of a projected large 1987 walnut crop.

EFFECTIVE DATES: August 1, 1987, through July 31, 1988.

FOR FURTHER INFORMATION CONTACT: Allen Belden, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 984, as amended [7 CFR Part 984], regulating the handling of walnuts grown in California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 59 handlers of walnuts subject to regulation under the walnut marketing order, and approximately 8,000 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California walnuts may be classified as small entities.

This final rule requires handlers of California walnuts to withhold, as a reserve, from the normal domestic market, 28 percent of walnuts certified as merchantable during the 1987–88 crop year. The remaining 72 percent of walnuts certified as merchantable may be sold by handlers in any market. In preparing recommendations, the Walnut Marketing Board (Board) estimated the 1987 orchard-run production to be at 520 million inshell pounds, which is 44.4 percent larger than last year's 360 million pound crop and 11.2 percent larger than 1982's production of 467.8 million inshell pounds.

Of the 28 percent of the merchantable walnuts required to be withheld in reserve, 100 percent will be available for export outlets and should provide additional supplies to meet both inshell and shelled export demand. Handlers may also obtain reserve credit for disposing of substandard quality walnuts for oil or animal feed.

The United States Department of Agriculture's Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders specify that reserve pool programs must make at least 110 percent of recent years' sales available to primary markets each season. This requirement would be met. The amount to be made available represents 143 percent of 1983's record large shipments.

While this rule may restrict the amount of walnuts which handlers may sell in normal domestic markets, it is intended to lessen the impact of the projected oversupply situation facing the industry and to promote stronger marketing conditions, thus avoiding unreasonable fluctuations in prices and supplies and improving grower returns.

Based on the above, the Administrator of the AMS has determined that this rule will not have a significant economic impact on a substantial number of small entities.

This action establishes a new § 984.231 and is based on recommendations of the Board, two comments received, and other available information.

Notice of a proposal to establish free, reserve, and export percentages for 1987–88 season California walnuts was published in the Federal Register [52 FR 42298] on November 4, 1987. That notice proposed free, reserve, and export percentages of 60 percent, 40 percent, and 65 percent of the reserve percentage, respectively, and was based on a recommendation made by the Board at its September 16, 1987, meeting. The notice also proposed leaving the remaining 35 percent of the reserve unallocated until a later date, requiring handlers to withhold 35 percent of the reserve from the market until that time. Comments on the proposed rule were invited from interested persons until November 19, 1987. Two comments were received.

One comment was from James J. Hughan of Tulare Nut Company, a handler located in Tulare, California. Attached to Mr. Hughan's comment was a list of 12 walnut growers who agreed with Mr. Hughan's comment.

The commenter objects to the establishment of an unallocated reserve for the purpose of withholding walnuts from the export market when the state California Walnut Commission is using Federal government and industry funds to maintain and expand export markets for California walnuts. However, in making its recommendations, the Board develops marketing estimates, including both inshell and shelled export demand. Therefore, any estimated market expansion would be considered in arriving at reserve and export percentages. This final rule changes the November 4 proposals by eliminating the proposed unallocated reserve. While the November 4 proposal would have required handlers to withhold 35 percent of their reserve from all markets to be used as determined by the Board at a future date, this final rule allows handlers to ship 100 percent of their reserve into export markets as agents of the Board.

The commenter also objects to a statement in the proposed rule that the rule was brought about by essentially small entities acting on their own behalf. The commenter states that the Board's September 16 recommendation, upon which the November 4 proposed rule was based, was made by one large processor, who controls one half of the votes on the Board, acting in conjunction with other large handlers. While Sun Diamond Growers of California (a cooperative which handled more than 50 percent of certified merchantable production during the 1984–85 and 1985–86 marketing years) and growers who market their walnuts through Sun Diamond do hold five of the 10 seats on the Board, the Board is, in our view, representative of the industry as a whole. The Board is composed of five grower members, four handler members, and one non-industry member, and the nine industry members are apportioned between cooperative and independent segments of the industry based on each group's percentage of total certified merchantable production. Moreover, the Board's September 16 recommendation was made on an 8 to 1 vote of the Board's ten members, with the non-industry member abstaining.

The commenter also believes that the rule would have a significant impact on small growers and processors because small processors would have difficulty meeting the export reserve requirements because they do not have the volume or equipment to sell walnuts in foreign markets. The commenter also states that foreign buyers and brokers would not be interested in doing business with someone who is only capable of supplying small amounts of walnuts on an irregular basis. Handlers of any size do have options in disposing of their walnuts. For example, the marketing order provides that handlers may meet their export reserve requirements by delivering reserve walnuts to the Board for disposition by the Board. In this case, walnuts would be pooled and sold by the Board in export or other markets at the highest returns obtainable consistent with the ultimate complete disposition of the export reserve. The proceeds from the sale of these pooled walnuts, minus all expenses incurred by the Board in receiving, holding, and disposing of the walnuts, would be distributed to the handlers who delivered walnuts to the pool in proportion to each handlers' contribution.

The second comment received was from Albert F. Guerra of Pacific Nut Company, a handler located in Hollister, California. This commenter is against the establishment of a reserve percentage and states that, in spite of the notice of proposed percentages, sales of this year's crop have been slow and at very low prices. The commenter states that the only way to dispose of the 1987 walnut crop is to have it purchased, and that the market will find its own price level to accomplish that objective. However, the marketing of this year's crop without the reserve could result in an oversupply situation, market instability, and a downward spiral in prices, whereby buyers would be reluctant to purchase walnuts until they were convinced that a bottom price had been reached. This could result in both decreased consumption and even lower prices.

The commenter also claims that the 1987 crop is not as large as the Board estimated at its September 16, 1987, meeting. The Board's estimate is based on a crop projection made by USDA's Agricultural Statistics Board (ASB). On January 13, 1988, the ASB issued a revised projection of 490 million inshell pounds. The Board met on February 12, 1988, to consider current crop and marketing conditions. The Board reviewed the crop estimate as revised by the ASB. Based on sales to date and anticipated future demand, the Board felt that the percentages as previously recommended on December 17, 1987, would provide the amount of walnuts necessary to meet the anticipated trade demand and provide an adequate carryout for the next marketing year.

Finally, the commenter states that a reserve percentage will be disadvantageous to handlers who sell most of their walnuts prior to January 1 of each marketing year rather than on a year-round basis because handlers would have to hold back on disposing of 14 percent of their tonnage (the unallocated reserve) beyond January 1, 1988. Establishing or revising free, reserve, and export percentages is intended to avoid unreasonable fluctuations in supplies and prices during the marketing season. In doing so, all handlers including those who may sell most of their walnuts before January 1 would benefit.

On December 17, 1987, the Board met to reconsider its September 16, 1987, recommendation for free, reserve, and export percentages of 60 percent, 40 percent, and 65 percent of the reserve percentage, respectively, and its estimates of supply and inshell and shelled domestic and export trade demands upon which those percentages were based. These trade demands are the amounts of inshell and shelled walnuts expected to be sold in normal domestic or export market outlets, respectively, during the current marketing year. The inshell and shelled domestic trade demands are adjusted to account for walnuts certified as merchantable which are carried in on August 1, 1987, from the 1986–87 marketing year and for the desirable carryout of walnuts on July 31, 1988, for use in both domestic and export markets during the 1988–89 marketing year.

The Board left its September 16, 1987, estimate of supply subject to regulation unchanged at 222.4 million kernelweight pounds. Adjusted inshell demand is increased from 19.5 million kernelweight pounds to 26.2 million kernelweight pounds based on an increase in the desirable carryout on July 31, 1988. The Board believes that additional inshell walnuts will be needed to meet export trade demand, particularly from Japan, during the early months of the 1988–89 marketing year before 1988 crop walnuts are available for market. The Board also increased the adjusted shelled demand from 113.0 million kernelweight pounds to 135.0 million kernelweight pounds by increasing the desirable carryout from 28.0 million kernelweight pounds to 50.0 million kernelweight pounds. The 50.0 million kernelweight pound desirable carryout is more in keeping with actual carryouts in recent years, which averaged 46.6 million kernelweight pounds over the 1982–83 through 1986–87 period and which are trending upward. The Board left its inshell and shelled export demands unchanged at 41.3 million kernelweight pounds and 12.0 million kernelweight pounds, respectively. Based on the changes in adjusted inshell and shelled demands, the Board recalculated its recommended free, reserve, and export percentages at 72 percent, 28 percent, and 100 percent of the reserve percentage, respectively.

The complete estimates used by the Board to revise its recommended percentages for the 1987–88 marketing year are given in the table as follows. Weight figures for inshell walnuts are converted to their equivalent shelled kernelweights. The September 16, 1987, estimates, where different from the December 17, 1987, estimates, are given in parentheses.

	Inshell (1,000 lbs.)	Conversion factor (percent)	Kernel weight (1,000 lbs.)
Supply:			
1. Orchard-Run Production	520,000		
2. Less: Miscellaneous Farm Use	2,000		
3. Commercial Production	518,000	40	207,200
4. Plus: Uncertified Carryin Inshell	69	45	31
Uncertified Carryin Shelled			7,208
5. Total Mechantable Supply			214,439
6. Plus: Substandard Creditable for Reserve			8,000
7. Total Supply Subject to Regulation			222,439
Demand:			
8. Inshell Domestic Demand	40,000		
9. Plus: Desirable Carryout	18,751 (4,000)		
10. Less: Certified Carryin	583		
11. Adjusted Inshell Demand	58,168 (43,417)	45	26,176 (19,538)
12. Shelled Domestic Demand			103,000
13. Plus: Desirable Carryout			50,000 (28,000)
14. Less: Certified Carryin			18,020
15. Adjusted Shelled Demand			134,980 (112,980)
16. Total Demand (Item 11 + Item 15)			161,156 (132,518)
17. Free Percentage (Item 16—Item 7 x 100)			(1)
18. Reserve Percentage (100%—Item 17)			(2)
Determination of Export Percentage:			
19. Reserve Available for Export (Item 5—Item 16)			53,283 (81,921)
20. Export Demand:			
Inshell	91,740	45	41,283
Shelled			12,000
Total			53,283
21. Percent of Reserve for Export (Item 20—Item 19 x 100)			(3)

[1] 72 percent (60).

[2] 28 percent (40).

[3] 100 percent (65).

Therefore, for the reasons specified, the percentages established by this final rule are changed from those proposed in the November 4, 1987, notice based on the comments received, the Board's recommendations, and other available information.

After consideration of all relevant matter presented, including the Board's recommendations, the two comments received, and other available information, it is found that this regulation, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is hereby found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This action applies to all walnuts received by handlers during the 1987–88 crop year, which began August 1, 1987; (2) handlers are currently processing 1987–88 crop year walnuts; and (3) handlers are aware of this action, which was recommended by the Board at a public meeting, and need no additional time to comply with the requirements.

List of Subjects in 7 CFR Part 984

Marketing agreements and orders, Walnuts, California.

For reasons set forth in the preamble, 7 CFR Part 984 is amended as follows:

PART 984—WALNUTS GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 984 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Add a new section consisting of § 984.231 to read as follows:

[Note: This section will not appear in the annual Code of Federal Regulations]:

§ 984.231 Free, reserve, and export percentages for California walnuts during the 1987–88 marketing year.

The free, reserve, and export percentages for California walnuts during the marketing year beginning August 1, 1987, shall be 72 percent, 28 percent, and 100 percent of the reserve percentage, respectively.

Dated: March 21, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 88–6424 Filed 3–23–88; 8:45 am]

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 2054

Election of County Committee Members

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: By this final rule, the Farmers Home Administration (FmHA) adopts its proposed rule published February 3, 1988. This action is needed to comply with section 607 of the Agricultural Credit Act of 1987, Pub. L. (Pub. L.) 100–233. The intended effect of this section is to revise the criteria for voting and serving as elected county committee members to permit greater participation by the public in the process.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Robert A. Miller, Chief, Personnel Programs and Evaluation Branch, Personnel Division, Farmers Home Administration, USDA, Room 6442, Washington DC 20250, Telephone: (202) 382–1061.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined to be nonmajor because it will not result in (1) an annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

FmHA implemented certain provisions of the Agriculture Credit Act of 1987 (Pub. L. 100–233) upon publication by proposed rule in the **Federal Register** (53 FR 3176) on February 3, 1988. That rule provided for a 30 day comment period ending March 4, 1988. Thirty-one written comments were received. All were considered in developing the final rule. The following is a discussion of comments received:

One respondent commented that the size of FmHA county committees is too small. The Agency reviewed this comment and determined that since the present three member committee is mandated by law, no change in the regulation is required.

One respondent commented on the provision that prohibits members from performing certain functions (i.e., serving as an official or performing administrative functions such as clerical services, maintaining financial or other records, developing operating budgets, etc.), for an FmHA financed association or organization after appointment. The respondent concluded that this provision was in conflict with the change allowing eligible farm borrowers to serve because a farm borrower would continue his/her farm operation after appointment. FmHA reviewed this provision and determined that, as stated, it clearly does not apply to borrower's farming operations. Therefore, the Agency made no change in this provision.

Ten respondents commented that sons and daughters could be excluded from voting because they are not an "owner, tenant, sharecropper, or spouse of a farmer," and suggested that the regulation be changed to include them. The Agency reviewed this comment and determined that spouses are the only specific family members defined as a farmer in Pub. L. 100–233. We believe that the regulation's definition of farmer as owner, tenant or sharecropper is sufficiently broad. Consequently, sons and daughters are not entitled to vote unless they are farmers in their own right.

One respondent commented that individuals who fail to pay their just financial obligations that are either acknowledged, reduced to judgment by a court, or confirmed by a final administrative determination of a unit of the Federal, State, or local government, not be eligible to serve as county committee members. The respondent suggested that a provision be included that would require that to be elected or remain on the committee, members must pay their just debts. FmHA reviewed this comment and determined that the regulation already provides for this by its reference to FmHa Instruction 2045–BB, which includes provisions for paying just debts. Therefore, the Agency does not feel that any additional references in the regulation are necessary.

Three respondents commented that individuals who are ineligible for FmHA services because of a legal or administrative determination that conversion or unaccountability of proceeds from the sale of security property has occurred in an FmHA insured or guaranteed loan, be excluded from nomination and serving as a county committee member. FmHA reviewed the comment and determed that restricting only former or present FmHA borrowers who have converted security property or been found unaccountable for it, from nomination for the county committee would create an inequity by placing an eligibility requirement only on a selected group, specifically those individuals who are current or former FmHA borrowers. This would be particularly inequitable since FmHA does not have access to the loan records of borrowers who have loans not financed through FmHA. However, FmHA does consider conversion or unaccountability of security property to be a potentially serious matter that may constitute personal conduct which adversely affects FmHA or USDA. Therefore, should an FmHA borrower be found to have improperly converted security property or been unaccountable for such property, this can be grounds for possible removal. The same would be true for non-FmHA borrowers on the committee where the Agency receives information that this has occurred with another lending institution. In cases where there is gross negligence and/or deliberate fraud involved, there could be a determination that there is sufficient reason for removal. Removals of county committee members for personal cause will be made only after a full report has been made by the State Director to the Administrator, and a decision is made at that level. No change is made to the regulation since removal for conduct adverse to the Agency is already spelled out in the regulations.

One respondent commented that former or present FmHA delinquent borrowers, or FmHA borrowers who have defaulted on their loans, be prohibited from serving as county committee members. The Agency does not believe that delinquency or default on an FmHA loan, in and of itself, reflects on the character of a present or former borrower. Therefore, we have determined that delinquency or default on an FmHA loan, when viewed alone, is not sufficient cause to justify exclusion from serving as a county committee member.

Four respondents commented that the regulations should clearly define the term "or active in the management or affairs of any political club, organization or committee." The respondent expressed concern that FmHA County Supervisors or State Directors would apply the label of "political" to farm activist groups, regardless of their actual involvement in partisan politics. The regulation specifies that the prohibition on involvement in politically active organizations is limited to those organizations involved in partisan politics. Therefore, this would not include members of non-partisan political action groups. The specific criteria for these determinations are referenced in the regulation, and are contained in FmHA Instruction 2045–CC, which is available in any FmHA office. Consequently, the Agency believes the regulation is sufficiently clear on this point and does not require further elaboration.

One respondent commented that the regulations do not provide guidance on the number of allowable FmHA borrowers serving on the committee in instances where more than one area committee is established in the same county. The Agency reviewed this comment and determined that the regulation provides for the establishment of an area committee to service a part of a county, parts of two or more counties, or a combination of two or more counties, but only in instances where establishing a county committee is not feasible for reasons as provided in the regulation. If an area committee is established, that area committee would provide services to a specific area as does a regular county committee. Although it is possible to have two committees in one county, each county or area committee is independent and therefore would be allowed to have an FmHA borrower as a committee member. This would be consistent with the requirement in the law that limits each committee to one farmer eligible for an FmHA loan. The Agency determined that no change in the provision is necessary.

Seven respondents commented that the language in § 2054.1102 (c)(4) and (d) is not consistent in the definition of a farmer eligible for a loan made or insured by FmHA, and that "qualified applicants" should be changed to "certified applicants." The respondent suggested that the Agency use consistent language throughout the regulation. The Agency reviewed this comment and determined that the language used in both subsections should be consistent and has made appropriate changes throughout the regulations.

Eight respondents commented that the regulations should be written to allow any eligible FmHA borrower to be considered for the county committee. FmHA reviewed this comment and determined that the regulation already provides for this under § 2054.1104. Therefore, the Agency does not feel that any additional requirements are necessary.

One respondent commented that the provision which allows the County Supervisor to designate alternates for absent committee members should be changed to require that the State Director designate alternates for absent committee members. The Agency reviewed this comment and determined that the authority granted to County Supervisors to designate alternates in the absence of committee members is granted only when committee members are not available to attend meetings. The Agency believes that this authority is necessary at the County Office level in order to assure timely meetings. The Agency has no information to suggest that this delegation level has resulted in any problems.

Nine respondents commented the provision which provides that the State Director or his designated staff may solicit nominations during the nominating period be removed because solicitation by FmHA undermines the purpose of the election. The Agency reviewed this comment and disagrees that the solicitation of nominees by FmHA constitutes a conflict of interest. In many parts of the country, it is very difficult to get farmers to run for the county committee. If the Agency personnel did not solicit nominations many committees could not be properly constituted. Also, the regulations are clear that once individuals have been nominated, no further action for or against candidates can be taken by FmHA personnel. The Agency is satisfied that this provision does not limit the freedom of choice of voters.

Ten respondents commented that the 1987 Credit Act provides for the election of one member of the county committee to be a FmHA borrower and that the FmHA regulation does not make it clear that an elected borrower should have precedence over a designated FmHA borrower in the appointment process. Similar comments indicating designated members and alternates should also be FmHA borrowers were received. Since only one individual eligible for an FmHA loan can serve at a time, the respondents further commented that the regulation should be changed to make it clear that an elected FmHA borrower would serve instead of a designated borrower. A similar comment was received that the county committee should have representatives of farm borrowers in order to better serve the farmer. The agency reviewed the comments and determined that the Agriculture Credit Act of 1987 (Pub. L. 100–233) permits FmHA borrowers to serve on county committees. However, the Act is silent on the issue as to whether the FmHA borrower should be an elected or designated member. Likewise, the law is silent on the qualifications of alternate members. In the first instance, the Agency can find no meaningful distinction between the level of service provided by an elected member or a designated member that would justify the preference or distinction suggested in the comments. Furthermore, the law specifically states that individuals eligible for FmHA loans may be elected *or* designated. To deprive eligible borrowers from being designated would therefore be contrary to the law. In the second instance, the Agency does not believe that the administrative burden of limiting alternate members to being FmHA borrowers is feasible or prudent given the difficulty most jurisdictions have in finding individuals to serve. Therefore no change is made to the final regulations on these points.

Nine respondents commented the regulations require that the elections be held in June, and that June is a very busy time for farmers. One respondent further commented that the regulations should be changed to hold the elections in late fall or winter months. Farming seasons vary throughout the country and as a past practice, FmHA has always appointed new county committee members in the month of June. Our experiences have not indicated that this timeframe is unreasonable for farmers. We believe that changing the elections from June to late fall or winter would mean following a later schedule than the Agency feels is optimum; i.e., non-disruptive to normal farm activities. In addition, changing the election schedule at this point would disrupt the current cycle of appointments.

Five respondents commented on the process for absentee ballots and suggested that § 2054.1117 be changed to allow ballots to be hand carried in sealed envelopes to County Offices, and that FmHA verify votes by the same process used for mailed ballots. A similar comment was received and this respondent suggested that the regulation be changed to allow a single individual to hand carry numerous ballots that are hand carried in sealed envelopes to the County Office. The Agency reviewed these comments and determined that allowing numerous ballots to be hand carried by a single individual jeopardizes the concept of each farmer only being entitled to one vote. The Agency believes that requiring that absentee ballots be mailed in separate envelopes, and that only the voter can hand carry his or her own ballot serves as a deterrent to the possibility of undue influence over voters, or even of voter fraud through ballot stuffing. FmHA further determined that the difference in the verification of absentee ballots and regular ballots is the verification of challenged votes. This difference between voting in person and voting by absentee ballot (i.e., voter is not present), requires the difference in the verification of ballot process. FmHA's practice is consistent with nationwide practices in most municipal and public elections.

Six respondents commented that § 2054.1120 be changed to give advance notice to the public as to time and date of ballot counting. The Agency reviewed this comment and determined that the date designated by the County Office for ballot counting is indicated on the Election of County Committee Posters. These Posters are used by all FmHA County Offices to announce the dates of significant events that take place during the election process. If an individual is interested in being present at the ballot counting, he or she can always contact their FmHA County Office for the appropriate date. The Agency determined that no change in the provision is necessary.

One respondent commented that § 2054.1120 be changed to clearly state that witnesses cannot be County Office staff. The Agency reviewed this comment and determined that the presence of members of the general public as witnesses is optional, depending on the availability of persons to serve as witnesses. Should no member of the general public be available, the Agency is satisfied that the County Office staff can serve as trustworthy witnesses. Since interest by the general public in the elections is negligible in a significant number of locations around the country, it would be administratively burdensome to exclude FmHA County Office employees from serving as witnesses and to require public witnesses. Additionally, the Agency is satisfied that its employees are trustworthy to hold elections and verify the results. Therefore, the Agency does not believe that requiring public witnesses should be made mandatory.

One respondent expressed a concern that § 2054.1119 only suggests that the ballot counting process be done in public, and that it also only suggests that it be done in the County Office during regular working hours. The Agency reviewed this comment and determined that the language provided in § 2054.1119 can be strengthened. Therefore, we have changed the regulation to provide that the counting process shall be in public, to the extent that the public wishes to attend, and that it shall take place in the County Offices during regular working hours.

One respondent commented that the requirement that a dishonorable discharge from any branch of the armed forces is an overly broad trigger for disqualification and that this requirement appears to be irrelevant or overly broad. The Agency has always barred persons who received a dishonorable discharge from the military from serving on the county committee. This provision is retained to ensure that county committee members be of good character and have the confidence of the public.

Three respondents commented that § 2054.1111(c) leaves the determination of petition validity and eligibility to hold office solely in the discretion of the county supervisor. The respondent suggested that these determinations may adversely affect the potential nominee and should be subject to review, at least by the sitting county committee. The Agency reviewed this comment and determined that the responsibility for validity of petitions and the nominee's eligibility to hold office is best placed at the County Supervisor level. Placing the responsibility for making decisions on the validity of petitions and eligibility to hold office with the County Supervisor has not proven to be a problem in previous elections. Therefore, the Agency believes that establishing a higher or additional review process is an unnecessary administrative burden.

One respondent commented that § 2054.1127 refers to the County Supervisor verifying committee members' mileage with readings from their "speedometers," and suggested that FmHA make a technical correction by using "odometers." The Agency agrees and adopted the recommendation.

Nine respondents commented that the regulations do not include the most important duties of the county committee, duties that were given to the committee in the Agriculture Credit Act of 1987, and that the FmHA regulations should be changed to include these duties. The Agency reviewed this comment and we have changed the regulation to include the additional duty indentified in the Agriculture Credit Act of 1987.

One respondent commented that the Law requires that county committees are responsible for determining if accelerated borrowers are actively farming in order that they may be eligible for restructuring. The respondent recommended that the provision that specifies the functions performed by county committees be changed to reflect this added responsibility. The Agency reviewed that comment and determined that the Law does require that community committees to make determinations concerning accelerated borrowers and eligibility for restructuring. However, the Law specifies that county committees will make determinations if as of October 30, 1987, a FmHA borrower continued to be actively engaged in farming operations for which the farmer program loan was made. This is a one time determination and therefore, is not a recurring function. The Agency has determined that because it is not a recurring function, it would not be necessary to include this function as a responsibility of the county committees.

Nine respondents commented on the provision of the regulations which permits the designation of a non-farmer to the county committee by the State Director. The respondents stated that the statutory language in 7 U.S.C. 1982(a) makes it clear that all county committee members must be farmers and that the definition in the regulation would mean the inclusion of non-farming landowners. The respondents further state that alternates should be farmers who ran in the election and should be selected based on the number of votes they received. It is the Agency opinion that the law established no criteria whatsoever in determining the qualifications of the non-elected member of the county committee and alternates. The Agency determination that these persons did not have to be farmers was a reasonable one given the fact that the Agency has always permitted one county committee member to be a non-farmer. Thus this provision resulted in no diversion from past practice and did not violate any stated or implied requirement of the law. The law was also silent on the method for selection of alternates. The Agency found that a number of individuals were willing to serve on the county committee if they did not have to stand for election. The Agency believes that if alternates were to be elected that fewer individuals would be willing to serve and that many county committees would not be able to appoint alternates. In view of this, the Agency does not wish to limit its prerogatives in the selection process by requiring that alternates be selected through the election process.

Four respondents commented that there should be a provision for a grievance procedure if a farmer does not believe that a county committee election is being held or was held according to the regulations. The Agency has a provision for retaining ballots for 60 days after the elections to provide for reconstruction of balloting in case a complaint concerning the election is made. All other election materials are retained for a period of three years following the election. It is the Agency's view that this provides an ample opportunity for individuals to challenge the results of elections. Once an election is challenged, the election materials would be retained until a final administrative determination is made regarding the election. To date, the current process has provided sufficient to both the Agency's and the public's needs. Consequently, we do not favor this proposal.

One respondent commented that they are aware of occasions where County Supervisors have not notified all county committee members of prospective meetings. The respondent wishes to make it a requirement of the regulations that all members of the committee be notified of meetings. Although the Agency is unaware of instances where

available committee members were not notified of committee meetings, we believe that adding a provision that such notification be made is appropriate. Consequently, § 2054.1103(c) is amended to state that *all* sitting county committee members must be notified of meetings.

Five respondents commented that the regulation's definition of a farmer is too broad and that it allows individuals to participate in the county committee elections who are not actually farmers, for example landlords. The respondents suggest that the definition be changed to limit it to individuals that actively engage in the production of agricultural products. Pub. L. 100–233 was silent on the definition of who is a farmer. The Agency chose to utilize the definition currently in use by the Agricultural Stabilization and Conservation Services (ASCS). By using the ASCS definition of a farmer, FmHA believes it will reduce confusion of the public over who is eligible to vote, since the two USDA agencies will share the same definition. Additionally, FmHA believes that by interpreting the definition of farmer broadly that it has afforded an opportunity for all persons who could be classified as farmers, within the intent of the law, an opportunity to vote. Restricting eligibility to current producers could exclude, for example, former or retired farmers who retain an interest in farming and whose knowledge and skill would therefore be lost to the committee and the public.

Ten respondents commented that there are insufficient guidelines governing the establishment of area committees by the State Director. The respondent believes that provision for establishing area committees when it has been determined that there are insufficient interested individuals is objectionable since many farmers are still unaware of the opportunity to serve as committee members. The Agency notes that an insufficient number of interested farmers is only one of four examples of cases where the formation of Area Committees should be considered. It has been the Agency's experience over the last two elections that an insufficient number of farmers interested in serving on the county committee generally coincides with a situation where there are few farmers and a low Agency Farmer Program workload. In such instances, good management dictates that consideration be given to forming area committees. The Agency has not received any complaints that area committees were formed when county committees were feasible. The Agency sees no compelling reason to limit State Director discretion in this matter.

Three respondents commented that it is unclear whether the announcement of boundary changes prior to establishment of an area committee must be done for regular or special elections. The respondents also believe the language relating to the State Director's authority to set special elections is unclear. The need to publish boundary changes prior to county committee elections is a requirement for all county committee elections, both regular and special. Since the regulations do not specify a limitation on this requirement, there is no need for further clarification. The Agency also believes that all the circumstances in which State Directors are authorized to call special elections are fully spelled out. The Agency does not believe that further elaboration is necessary.

Two respondents commented that the creation of an area committee should result in the need for a special election since the change in boundaries could result in some counties or parts of counties not being fairly represented. Where the formation of area committees results in permanent vacancies occurring on the newly formed committee, special elections may be necessary. The regulations already provide for that. However, the Agency does not believe that it is feasible to require that every county or part of a county have a representative. Since there are only two elected committee members, and all eligible individuals from within the area can run, it would be impossible to ensure the highest vote getters would not be from the same area. FmHA believes that Congress' intent that the committees be fairly represented of farmers in a given area is met by the regulations.

One respondent commented that when utilizing alternates, the County Supervisor should ensure that alternates replacing elected members be called to duty based on the number of votes the alternate received in the election. As discussed earlier, there is no requirement that alternates stand for election or be appointed with regard to votes received in an election, if any. Consequently, the Agency does not favor adoption of this proposal.

Two respondents commented that permitting alternates to serve out the unexpired terms is contrary to Congressional intent that there be two elected members on the committee at all times. The respondent suggested that permanent vacancies of elected members always be filled through special election. The Agency does not agree that the law requires that there be two elected members at *all* times. Rather the law states that two members shall be elected. It does not speak to the situation of how to fill permanent vacancies caused by elected members leaving. FmHA believes that permitting alternates who succeed elected members to serve out the respective terms of those members is consistent with generally accepted political practices of most jurisdictions. Therefore, no change is made to this provision.

Seven respondents proposed that the regulations be changed to limit county committee members from counseling prospective borrowers to only apply to borrowers from the county or area in which the member serves. FmHA disagrees and believes that it is important to the public's perception of the impartiality of committee members that they refrain from all such activities regardless of the jurisdiction of the prospective borrower. The Agency believes that a blanket prohibition from counseling borrowers is justified on the basis of the administrative burden that would result from having to make a case by case determination that the borrowers are inside or outside the county committee members' own county.

One respondent commented that provision prohibiting county committee members from knowingly making any loan to persons to which they are related within the second degree of consanguinity or affinity is unclear. The Agency agrees and we have changed the provision to cite the specific regulation FmHA Instruction that provides the appropriate definition of consanguinity.

One respondent commented that the intent of Congress in permitting eligible FmHA borrowers to serve on the county committee was meant to apply only to existing borrowers and should not apply to applicants. Hence, the respondent suggested that both borrowers and applicants be permitted to serve on the committee simultaneously. It has always been FmHA's interpretations that individuals were not ineligible to run for or serve on the county committee merely because they were applicants. However, since Congress specifically required that only one individual "eligible" for an FmHA loan may serve on the committee at any one time, FmHA believes that it has no choice but to interpret that as to include individuals who have been certified eligible for a loan insured or guaranteed by FmHA.

Three respondents commented that FmHA Instruction 2045–CC especially § 2045.1407, Prohibited Activities,

VOL
53
ISS
57
MR
24
988
MI

referenced in § 2054.1104(d) be quoted at length or made an attachment to the regulation so that candidates will not exclude themselves from running for the committee. FmHA indicated in the regulation that FmHA Instruction 2045–CC is available in any FmHA office for inspection. In addition, anyone interested in running may refer their questions to the local County Office.

One respondent suggested that county committee members not be made FmHA employees, but rather be independent contractors. The respondent believes that this would be preferable since the prohibition against politically active individuals serving on the committee would no longer be necessary. FmHA believes that it is important to the public's perception of the committees' impartiality that its members not engage in partisan politics.

Three respondents suggested that county committee members be exempt from the requirements of FmHA Instruction 2054–L, Restrictions on Employment of Farmers Home Administration Borrowers and Sons and Daughters of Borrowers. FmHA Instruction 2054–L applies only to full time employees. Since county committee members are intermittent employees, they are exempt from the provisions of FmHA Instruction 2054–L.

Six respondents expressed concern that the regulations barring FmHA employees from performing certain functions for FmHA financed associations or organizations applied to individuals who might be partners or employees or organizations attempting to get a loan from FmHA. The respondent also stated that if it was not the intent to exclude these individuals that the language of the regulation was unclear. FmHA agrees that the language is unclear. Consequently, the regulations are amended to reflect that this prohibition relates to those employees and officials of associations and organizations with FmHA-financed community facility or community business loans.

Five respondents stated that the requirements that an elected county committee member be eligible for Federal employment could result in elected committee members not being able to take office. Further, the respondent stated that this would permit the State Director to appoint an alternate in cases where elected members were later found ineligible for Federal employment. By necessity, the process of determining someone's eligibility for Federal employment is one that can only be accomplished after an individual has completed a variety of appointment documents which need to be verified. It is not the intent, however, of the regulations to permit a State Director to appoint an alternate in cases where an elected member cannot be appointed. In such cases, the next highest vote getter becomes the elected member.

The only time the regulations permit the appointment of alternates to succeed county committee members is when a permanent vacancy exists. This situation is not present until a member is appointed as a Federal employee and is terminated or resigns.

Twenty respondents stated that the requirement that the period for nominations end 20 days before the election is in conflict with the requirement that the period between the notice of election and the election be 30 days. The Agency agrees that this is incorrect. The regulations has been revised to state that the nomination period will be 45 days and will end 12 days prior to the Notice of Election.

One respondent suggested that pro-tem members not be appointed in cases where a full slate of candidates cannot be fielded for the elected county committee vacancies. Instead the respondent recommends leaving the existing committee members on until an election can take place. In practice, the pro-tem members that have been appointed in such cases have almost invariably been members whose terms have expired. However, since the terms of members are set by law, FmHA could not legally extend their appointments. Instead, they had to be reappointed on a pro-tem basis until a special election could be held and new appointments made.

Seven respondents stated that exhibits to the regulation which were not published should have been published in the Federal Register. It is USDA policy not to publish exhibits which are internal administrative guidance and which do not affect the public. The Agency believes that the information published in the Federal Register contained all the pertinent information necessary for the public to comment on.

Four respondents suggested that the regulations be amended to read that there is a presumption that an individual is a farmer if their spouse is an eligible farmer whose name appears on the ASCS producer list. The Agency agrees that this is reasonable, and has amended the regulation accordingly for both ballots voted in person and ballots voted on an absentee basis.

Three respondents commented that the 5 working days given for absentee voters to respond to questioned ballots was too short and recommended giving voters 10 working days to respond. The respondents also stated that it was unclear as to when the 5 day period started. The Agency policy on this is to attempt to contact the individuals telephonically if possible, and only to write if that method fails. It has been our experience that most questioned ballots can be dealt with verbally and do not require the voter to produce documentation. The regulation is clear that the 5 days began after the voter has been contacted. This has proved sufficient, and the Agency does not believe extending this period is necessary.

Three respondents stated that the regulation was unclear as to what "election requirements" ballots were being subjected to by the County Office staff at the time of the ballot count. This provision refers to separating valid from invalid votes. Since this process is described elsewhere in the section, this statement is redundant and is therefore deleted.

Three respondents commented that there is no justification for considering a ballot invalid because it has a write-in candidate. The Agency disagrees. The regulations call for nomination by petition to be the only method for developing slates of candidates. Since write-in candidates, by definition, would not have been nominated by petition their inclusion on a ballot is invalid. As a result the ballot is invalid.

One respondent commented that the provision which requires that designated and alternate committee members reside in the county or area in which the committee operates is inconsistent with eligibility requirements for elected members; i.e., elected members must have their principal farming operation in the county or area in which they serve. The Agency agrees that the criteria for residence for elected and designated members is different. However, this is a function of the different eligibility requirements for these different groups. Since the Agency does not require that designated members or alternates be farmers, it is necessary to ensure that such persons do represent the area where they are serving as committee members. Hence, this is accomplished by requiring that they maintain their residence in that county or area.

Five respondents commented that there is no provision for a grievance procedure for a borrower if he or she perceives there was a conflict of interest on the part of a committee member who is reviewing the person's loan application. Further, the respondent states that there is no provision for an individual to remove themselves from

considering a loan application if they have a conflict of interest. The Agency disagree with these statements. Firstly, loan applicants may appeal decisions of the county committee if they believe that their loan application was not properly considered. Secondly, since county committee members are Federal employees they are covered by applicable conduct regulations governing conflict of interest. Any committee member who believes that he or she has a conflict of interest that would affect their consideration of a loan are required by FmHA Instruction 2045–BB to exclude themselves from the process.

One respondent commented that spouses who are active in the farming operation should have their own vote. The Agency reviewed this comment and determined that the regulation already provides for this under § 2054.1108(a). Therefore, the Agency does not feel that any additional requirements are necessary.

One respondent commented that the Agency omitted a requirement that publications serving women, racial, and ethnic minorities be utilized in the nomination process. The overall requirements relating to notice to the public regarding the election process are contained in § 2054.1105(d) and this section does include a requirement that publications serving women, racial, and ethnic minorities be utilized in the full election process. Consequently, the Agency believes that no further elaboration of this requirement is necessary in other sections of the regulation.

Two respondents commented that the stipulation that designated county committee members be in general agreement with the objectives of FmHA was too vague and stated that the main purpose of FmHA should be quoted in the regulation. One respondent offered the following wording, "FmHA was established for the purpose of insuring tht family farmers keep control of their farms and that FmHA is the lender of last resort." The Agency has reviewed this comment and agrees that inclusion of the Agency's mission statement in the regulation would provide greater clarity. The Agency, however, does not agree with the respondent's definition of the Agency objectives. The Agency has provided the definition of its mission.

Three respondents commented that the provision in § 2054.1103(b) stating that county committee members are not prohibited from making inquiries concerning applicants and borrowers was unclear. The respondents suggested that the nature of the inquiries permitted be clarified in the regulation. The Agency believes that it would be counter productive to attempt to define permissiable contacts since this would lead to placing unnecessary limitations on normal interpersonal contacts. The Agency believes that this section is clear that prohibited contacts, in this context, are confined to counseling prospective borrowers regarding preparation of loan documents. Therefore, the Agency does not believe that it is useful to further define this provision.

One respondent commented that FmHA should use the same elections procedures used by ASCS and with little additional spending. At the time FmHA first defined its election procedures, consideration was given to following the ASCS model, but this ultimately had to be rejected to the irreconcilable differences between the laws the two agencies operate under.

Two respondents commented that the provision requiring that County Supervisors engage in community out reach and information activities designed to educate minorities and women on the nomination, election, or appointment process did not specify the methods to be undertaken or the system of evaluation. The Agency believes that the County Supervisors should have leeway in determining specific courses of action to accomplish this goal. Evaluation of the success of County Supervisors in bringing women and minorities into the county committee election process can be made through the annual performance appraisal process.

Two respondents commented that the regulations be changed to include a provision to require the mailing of nomination forms and ballots to all FmHA borrowers and all farmers who are non FmHA borrowers but listed on the county ASCS producer list. A similar comment was received that when ballots are mailed to the prospective voter that the envelope contain complete voting instructions. The Agency believes that the system of publishing ballots in publications serving the area and mailing ballots to those individuals who request them provides eligible voters with ample opportunity to vote. The Agency also believes that the voting instructions provides adequate information to the prospective voter. No changes in the regulation are necessary.

One respondent commented that the provision in the regulation that provides for the termination of the employment of county committee members by various means allows unilateral removal of county committee members without any explanation of the process or the reasons for removal. The Agency has reviewed this comment and determined that county committee members serve at the will of the Agency. Because county committee members serve at the will of the agency and because they are intermittent temporary employees in the excepted service, they do not have civil service status. Therefore, by law they are not entitled to an official appeal process and are subject to removal. However, the Agency has provided that all terminations for cause be reviewed by the Administrator. All county committee members who are removed through this process are given a letter from the State Director explaining the reason for the removal. The Agency believes that this process is adequate in protecting the rights of county committee members.

One respondent commented that the provision requiring that a nominating petition be signed by three eligible voters be changed to prohibit the nominee from signing the petition. The Agency has reviewed this comment and determined that there is nothing in the Law which prohibits individuals from nominating themselves for election as county committee members. Also, we believe that allowing self nominations is consistent with general election practices. No change is made to the regulation.

One respondent commented that the language in § 2054.1111(b) should be changed to specifically state that the County Supervisor or designated staff shall call for nominations during the nominating period. The Agency reviewed this comment and determined that the language as stated in the regulation is intended to convey that the methods of developing slates will be by the nomination process. We believe that further clarification of this provision is unnecessary.

One respondent commented that § 2054.1115(b) be deleted. The Agency reviewed this comment and determined that the Law does not prohibit FmHA employees from voting, if eligible. The Agency believes that this section is necessary in order to assure that FmHA employees are aware that they are entitled, if eligible, to vote. No change in this provision is necessary.

One respondent commented that it should be mandatory that information concerning elections be published in the ASCS newsletter. The Agency reviewed this comment and determined that the regulation provides for this under § 2054.1105(d). No change in the regulation is necessary.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Intergovernmental Consultation Statement

1. For reasons set forth in the final rule related to Notice 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940–J, Intergovernmental Review of Farmers Home Administration Programs and Activities," (December 23, 1983), Emergency Loans, Farm Operating Loans, and Farm Ownership Loans are excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

2. The Farm Labor Housing Loans and the Soil and Water Loans are subject to the provisions of Executive Order 12374 and FmHA Instruction 1940–J.

Programs Affected

These changes affect the following FmHA programs as listed in the Catalog of Federal Domestic Assistance:

10.404	Emergency Loans
10.406	Farm Operating Loans
10.407	Farm Ownership Loans
10.421	Indian Tribes and Tribal Corporation Loans

List of Subjects in 7 CFR Part 2054

Agriculture, County Committee members.

Therefore, Chapter XVII, Title 7 of the Code of Federal Regulations is amended by revising Subpart W of Part 2054 as follows:

PART 2054—EMPLOYMENT

1. The authority citation for Part 2054 continues to read as follows:

Authority: 7 U.S.C. 1989; U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

2. Subpart W, consisting of §§ 2054.1101–2054.1150, is revised to read as follows:

Subpart W—Employment, Pay, And Functions of County And/or Area Committees

Sec.

2054.1101 General.
2054.1102 Establishment and composition of county and/or area committees.
2054.1103 Functions of the county and/or area committee.
2054.1104 Eligibility to hold office.
2054.1105 Election requirements.
2054.1106 Voting eligibility.
2054.1107—2054.1110 [Reserved]
2054.1111 Conducting elections.
2054.1112—2054.1114 [Reserved]
2054.1115 Prohibition of employee participation in committee elections.
2054.1116 Ballots.
2054.1117 Absentee ballots.
2054.1118 Ballot boxes and safekeeping of returned ballots.
2054.1119 Basic requirements for ballot count.
2054.1120 Counting ballots and announcing results.
2054.1121—2054.1122 [Reserved]
2054.1123 Notifying candidates of election results.
2054.1124 Safekeeping and disposition of election records.
2054.1125 [Reserved]
2054.1126 Appointment.
2054.1127 Compensation.
2054.1128 Certification of services.
2054.1129 Termination of services.
2054.1130—2054.1149 [Reserved]
2054.1150 OMB control number.

Subpart W—Employment, Pay, And Functions of County And/or Area Committees

§ 2054.1101 General.

This subpart provides instructions for selection of county committee members. Nomination, election, or designation of county committee members are made without regard to race, color, sex, religion, national origin, age, political affiliation, marital status, or handicap.

§ 2054.1102 Establishment and composition of county and/or area committees.

(a) *General.* In each county or area in which Farmers Home Administration (FmHA) activities are carried out, there shall be a county or area committee composed of three members:

(1) Two members shall be elected by farmers. For this subpart, farmer is defined as any person who has an interest in a farm as owner, tenant, or sharecropper within the county or area. The term "farmer" shall include the spouse of an eligible farmer. One member, who shall reside within the county or area, shall be designated by the State Director. Designation may also be made for alternates for each member of the county committee and will be subject to all other requirements contained in this subpart.

(2) In selecting designated members of the county committee, care should be taken to ensure, to the greatest extent practicable, that the committee is fairly representative of farmers in the county or area. Designated committee members must be in sympathy with the family farm concept, be familiar with the problems of farmers and residents of rural communities, and be in general agreement with the mission of FmHA. The mission of FmHA is to provide supervised credit assistance through various loan and grant programs, to rural Americans by encouraging and supporting family farm ownership and operation to provide an economic and social base, provide adequate housing, install needed community facilities, provide economic support to farmers affected by disaster and foster economic and rural development. Designated committee members and alternates may also be farmers. However, if they are farmers, they need not meet the criteria in § 2054.1102(a)(1).

(3) It is FmHA policy that membership on county committees reflect, to the extent practicable, the diversity of the individuals served by the Farmer Programs. Eligible minorities and females will be designated wherever possible, to serve on county and/or area committees. Therefore, State Directors and/or County Supervisors will:

(i) Engage in community outreach and information activities designed to educate minorities and women on the nomination, election, selection, or appointment process for FmHA county committees.

(ii) Make efforts to obtain recommendations from civil rights and women's organizations.

(b) *Area committees.* A county committee will normally be established in each county. Area committees may be established by State Directors to serve a part of a county, parts of two or more counties, or a combination of two or more counties when:

(1) Topography and communications make it impractical to establish county committees according to county boundaries;

(2) The workload in an individual county is extremely low;

(3) More than one county office is necessary to service the workload of an individual county; or

(4) It has been determined that there are insufficient interested individuals to create a county committee in a single County Office's jurisdiction.

(c) *Action to create area committees.* When a State Director establishes an area committee, he or she must issue a State supplement designating the boundaries that the committee will serve. The State Director shall give public notice of boundary changes to county or area committees in official county newspapers or publications serving the area at least 30 days before a county committee election takes place. If the establishment of an area committee will result in the elimination of a county committee and a surplus of elected county committee members, the State Director will take the following steps:

(1) Terminate one of the designated members of the two committees, if necessary.

(2) Poll the elected members of the committees as to their continued desire to serve, and accept resignations from those who voluntarily wish to resign in inverse order as to their remaining terms; i.e., 1 year, 2 years, 3 years.

(3) If a surplus of elected members still remain after taking steps (2) (paragraph (c)(2) of this section) the County Supervisor should have the members draw lots for the positions.

(4) In combining two county committees to create an area committee, the State Director must ensure that no more than one member of the reconstituted committee is a farmer eligible for a loan made or insured by FmHA. See § 2054.1104 for definition of persons eligible for an FmHA loan.

(d) *Temporary absence of committee members.* When committee members are not available to attend meetings, the County Supervisor can call alternates to become acting members of the committee with the same duties and authorities as regular members. A quorum of at least two members or alternates is needed to have a county committee meeting. When utilizing alternates, the County Supervisor should ensure that no more than one member of the committee is a farmer eligible for a loan made or insured by FmHA.

(e) *Permanent vacancies.* In cases of permanent vacancies, alternates may be used to complete the unexpired terms of either elected or designated members. Alternates should be designated in order of succession at the State Director's discretion; e.g., first alternate, second alternate, and third alternate. This rule of succession is subject to the requirement that no more than one farmer eligible for an FmHA loan serve at the same time. Alternates succeeding to members' unexpired terms will serve out the remainder of the term. If an alternate is not available to fill the county committee vacancy, the State Director will review the prevailing circumstances and determine the best course of action as follows:

(1) Continue with existing members until the next regular election.

(2) Designate additional alternates.

(3) Call a special election to fill vacancies.

(f) *Special elections.* The State Director may set the date for special elections that might be necessary in filling permanent vacancies or vacancies caused by inability to complete a slate of nominees during a regular election. Vacancies created by the inability to complete a slate of nominees to fill an expired term of an elected member must be filled through special elections held not later than 120 days after the regular elections. Committee members elected through special elections will serve out the remainder of the term of the position for which the election was called.

§ 2054.1103 Functions of the county and/or area committee.

(a) The functions which are subject to appropriate program Regulations, Civil Rights Laws, and Subpart E of Part 1901 of this Chapter to be performed by the committees, consist of:

(1) Determining the eligibility of applicants for certain types of loans, including farmer program loans, irrigation and drainage loans to grazing associations;

(2) Classify or reclassify farm real estate property that is being suitable or unsuitable. Also, the county committee will be responsible for subdividing surplus property larger than family size whenever possible into parcels for the purpose of creating one or more suitable farm properties;

(3) Making recommendations on resolving problem cases;

(4) Conferring with the County Supervisor on the servicing of FmHA loans with respect to borrowers who should be referred to other credit sources, including graduation;

(5) Making recommendations regarding applications for compromise or adjustment or cancellation of debts owed to FmHA;

(6) When requested by the County Supervisor, advising the County Supervisor, debtors, and their creditors in connection with voluntary debt adjustment; and

(7) Attending appeal hearing authorized under Subpart B of Part 1900 of this chapter.

(b) Members will not be assigned to perform service as individuals and will be paid for service only when requested to attend county committee meetings, make certain field visits with the County Supervisor, and attend appeal hearing and training meetings in accordance with FmHA regulations. They may not counsel prospective borrowers regarding preparation of loan documents. This will not prohibit a county committee member from making inquiries concerning applicants and borrowers during the normal contacts in his or her county or area.

(c) The County Supervisor is authorized to convene the county committee subject to the limitations specified in § 2054.1127(a)(1) of this subpart. Form FmHA 2006–9, "Notice of Visit or Meeting," may be used to notify all county committee members of meetings. Regardless of the method, all sitting members must be notified of meetings. The County Supervisor serves without extra compensation as Executive Secretary of the county committee.

(d) At the first meeting after July 31 of each year, the members of the county committee will elect one member to serve as Chairperson for that year.

(e) The County Supervisor will prepare Form 2054–7, "Record of County/Area Committee Meetings," and maintain such files and records as may be required to reflect actions taken by the committee. The County Supervisor may designate the Assistant County Supervisor to represent him or her at county committee meetings, when it is not possible for the County Supervisor to attend. Such designations may be made orally. In these instances, the Assistant County Supervisor will prepare and sign minutes of the meetings as Executive Secretary and other records necessary to reflect actions taken by the committee.

§ 2054.1104 Eligibility to hold office.

Elected committee members must be persons who have their principal farming operation within the county or area in which activities of the county committee are carried out, and are farmers (as defined in § 2054.1102(a)(1) of this subpart). Criteria for selection of the designated member and alternates are found in § 2054.1102(a)(2) of this subpart. Any farmer eligible for a loan made or insured by FmHA shall be eligible to serve as an elected or appointed county committee member. Not more than one farmer eligible for a loan made or insured by FmHA may serve on a county committee at the same time. Persons will be considered "eligible" for an FmHA loan if they either currently have such a loan, or are certified applicants for such a loan. In addition, the elected and/or designated members and alternates must meet all of the following requirements to hold office as a county committee member:

(a) Be a citizen of the United States, or an alien lawfully admitted to the United States for permanent residence.

(b) Not have been removed for cause from any public office, or have ever been convicted of fraud, larceny, embezzlement, or any felony.

(c) Not have been dishonorably discharged from any branch of the armed services.

(d) Not currently be an officer or employee of a partisan political party, or be active in the management or affairs of any political club, organization, or committee. The general rules are contained in FmHA Instruction 2045–CC (available in any FmHA office). See especially §§ 2045.1402(b) (Coverage), 2045.1407 (Prohibited activities), and 2045.1410 (Accepting and holding State and local offices). Committee members are also subject to the prohibitions contained in Executive Order 11222 and Department of Agriculture (USDA) policy contained in Part 735, Departmental Personnel Manual (DPM) Supplement 990–1, with respect to holding public office.

(e) Not be employees of FmHA, Agricultural Stabilization and Conservation Service (ASCS), Soil Conservation Service (SCS), Extension Service (ES), Rural Electrification Administration (REA), Federal Crop Insurance Corporation (FCIS), or agents of these agencies.

(f) Not currently be an employee of a Federal Land Bank, Production Credit Association, or other Farm Credit System institutions, or serve on a committee which make recommendations for approval of loans by these organizations since FmHA may be involved in participation loans with such Farm Credit System loans.

(g) Not perform any of the following functions for an association or organization having FmHA-financed community facilities or community business loans after appointment:

(1) Serve as an official;

(2) Perform administrative or employee functions including performing clerical services, maintaining financial or other records, preparing financial reports, or developing operating budgets.

(h) Not currently be an employee or serve on Boards of Directors of Banks or Savings and Loan Associations or be the spouse of or a family member living in the same household with an individual serving on the board of such organizations in the county or area over which the county committee has jurisdication, since FmHA may be involved in participation loans with such banks.

(i) Meet the legal or regulatory requirements for appointment to Federal employment. (See § 2054.1128 of this subpart.) This determination will be made subsequent to nomination but prior to the committee member taking office.

§ 2054.1105 Election requirements.

(a) *Election dates.* All regular elections of county committee members shall be held in those years that an elected member's term expires. This date must be in June but not either a Saturday or Sunday or a federally or State-recognized holiday. It shall be selected by the State Director and announced to the public.

(b) *Length of terms.* Elected and designated members of the county committee shall serve for a term of three years.

(c) *Beginning dates of terms.* County committee members begin their terms as follows:

(1) For regular elections, no later than July 31.

(2) For special elections, no later than 30 days after the election was held.

(d) *Notice to the public.* Information concerning county committee elections shall be made available to the general public through the use of official county newspapers or publications in general circulation serving the area, through notices prominently posted in FmHA offices within the areas, and, if possible, in ASCS and/or ES newsletters and through public service announcements on radio or television stations serving the area. To ensure participation of women and racial and ethnic minorities, publications in circulation serving these groups should also be utilized to provide information concerning the elections.

§ 2054.1106 Voting eligibility.

An individual farmer is entitled to one vote. A "farmer" who is a legal entity such as a corporation, partnership, cooperative, joint operation, association or other legal entity is entitled to one vote by its duly authorized representative. A farmer may vote in only one county or area election. In order to vote in the election of a county committee member, voters must:

(a) Be farmers; i.e., persons who have an interest in a farm as owner, tenant, or sharecropper or spouses of such persons, or be duly authorized representatives of a legal entity which has an interest in a farm.

(b) Have their principal farming operation within the county or area for which the election is being held.

§§ 2054.1107—2054.1110 [Reserved]

§ 2054.1111 Conducting elections.

(a) *Elections calendar.* An election calendar is provided as Exhibit C of this subpart (available in any FmHA office).

(1) The election calendar provides a sequence of events for conducting the election.

(2) If the final date for any event is a nonworkday, it is automatically extended to the next workday.

(b) *Developing slates of nominees.* Nomination by petition shall be the method used for developing slates of nominees.

(1) The period for nominating by petition will be 45 days and end 12 days before publication of the Notice of Election.

(2) The opportunity to nominate by petition shall be announced in official county newspapers or other publications in general circulation serving the county or area and, if possible, in ASCS and/or ES newsletter and through public service announcements on radio and television stations serving the area. In addition, notices whall be posted in all FmHA offices within the area. The Notice of Right to Nominate by Petition shall be completed by the County Supervisor and read as set forth in Exhibit A of this subpart (available in any FmHA office.)

(3) The minimum number of eligible nominees for a slate is one per vacant elected committee member position. The State Director or designated staff may solicit nominations during the nominating period.

(4) At least three eligible voters (including the nominee) within the county or area must sign a nominating petition in order for it to be valid. No one may sign more than one nominating petition.

(5) All eligible nominees nominated by valid petition shall be included on the slate for county committee.

(c) *Approval and processing of nominations by public petitions.* The County Supervisor shall review all petitions and verify their validity, including the eligibility of the nominee to hold office. In order to be valid, petitions must be:

(1) Limited to one nominee each.

(2) Signed by the nominee certifying that he or she is willing to serve if elected.

(3) Received in the County Office no later than 12 days before the date of publication before the Notice of Election, whether delivered in person or by mail.

(4) Accompanied by a signed statement by the nominee certifying that he or she either currently meets the criteria to hold office, or will do so prior to taking office. If all the criteria are not met at the time the nomination is filed, the candidate must specify how he or she will meet the criteria; e.g., resign from a position listed in § 2054.1104 (d), (e), (f), (g), or (h).

(d) *Action to complete slate of nominees.* The State Director or designated staff may solicit nominations during the nominating period.

(1) The petitions will be returned to the County Office for execution of Form 2054–5, "Nominating Petition."

(2) The completed Form FmHA 2054–5 must be in the County Office no later than 12 days before publication of the Notice of Election.

(3) The County Supervisor will send a letter to all eligible nominees explaining the duties of county committee member and will retain a copy in the County Office files. See FmHA Guide Letter No. 2054–1, "Letter to Nominees" (available in any FmHA office).

(4) If less than the required minimum number of valid nominations are made by petition, the regular election will be cancelled, and the State Director will designate the necessary number of pro tem county committee members to have a full committee. These pro tem designees must meet all the requirements of this subpart concerning designated members and may serve only until a special election can be held and elected members appointed. Pro tem appointments may be made not-to-exceed 120 days. If a special election fails to produce a sufficient slate of candidates, requests for extensions of pro tem appointments, with supporting justification, may be made to the Director, Personnel Division.

§§ 2054.1112—2054.1114 [Reserved]

§ 2054.1115 Prohibition of employee participation in committee elections.

FmHA employees shall not campaign for or against any county committee candidate or nominee, or actively participate in the election except as necessary to:

(a) Perform their official duties.

(b) Vote, if eligible.

§ 2054.1116 Ballots.

Ballots shall be published at the time an election is announced in county newspapers or publications serving the area. The Notice of Election, which contains the ballot, shall be completed by the County Supervisor and read as set forth in Exhibit B to this subpart (available in any FmHA office). Each State may distribute additional ballots through means other than publications, as necessary. The announcement must be made at least 30 days prior to the date of the election. There shall be a statement in the announcement as to where and when the ballots should be returned. Ballots shall also be available at the County Office. Ballots should be mailed as set forth in § 2054.1117 of the subpart to any person who requests one even though the person's eligibility has not been determined. The names of voters who vote in person will be verified against an ASCS list of producers and checked from that list. A separate list must be maintained manually by the County Supervisor of those individuals voting in person or by absentee ballot in the county committee election. The ASCS producer list will be used by FmHA only as an indicator that the prospective voter has an interest in farming. Presence or absence of an individual from the ASCS list does not automatically qualify or disqualify an individual. The County Supervisor can challenge anyone presenting themselves to vote, if there is a reasonable basis to believe that the voter is not eligible to cast a ballot. However, the County Supervisor should count the vote of a prospective voter if his or her name is found on the ASCS list, is not otherwise known to be ineligible, and submits a ballot. If the prospective voter is not on the producer list, but can provide information that shows he or she is otherwise eligible, the voter should be permitted to vote. Spouses of farmers will be presumed eligible, regardless of whether their name appears on the ASCS list, if their spouses' name appears on the ASCS list. Individuals voting in person may only cast their own vote.

§ 2054.1117 Absentee ballots.

Persons who do not plan to vote in person may request that a ballot be mailed to them. The ballot should be enclosed in an envelope along with voting instructions, a return envelope with the County Office address, and a plain white envelope stamped ballot enclosed. The voter must pay the postage on the return envelope and return the ballot on or before the date set for the election. Upon receipt of the ballot, the name of the voter will be verified against the ASCS producer list, checked off that list, and added to the FmHA voter list. Spouses of farmers will be presumed eligible, regardless of whether their name appears on the ASCS list, if their spouses' name appears on the ASCS list. Absentee ballots are subject to the same review process as ballots voted in person. The County Supervisor may challenge any absentee ballot for which there is a reasonable basis to believe that the person voting is not eligible. In these cases, and in cases where the prospective voter is not on the ASCS list, the County Supervisor will hold the ballot in abeyance and write or otherwise contact the individual advising that he or she must provide a verbal explanation or documentation that he or she meets the voter criteria. Individuals must be given 5 working days to respond. If the prospective voter does not respond within the time permitted, or does not provide sufficient information for the County Supervisor to make a determination, the vote will not be counted, and the ballot will be destroyed 60 days after the election. All absentee ballots submitted by eligible voters will be placed unopened in the ballot box by the County Office staff. Each ballot must be mailed in a separate envelope with the name and address of the voter clearly marked on the outside of the envelope. If more than one ballot is mailed in the same envelope, all ballots contained therein will be invalid, the votes will not be counted, and the ballots will be destroyed 60 days after the election.

§ 2054.1118 Ballot boxes and safekeeping of returned ballots.

Each County Office holding an election will provide a ballot box in the County Office. The boxes must:

(a) Be of sufficient size.

(b) Be constructed so ballots cannot be read or removed.

(c) Be sealed so that tampering with the box would be visible.

(d) Be identified as the ballot box for the county or area in which it is used.

§ 2054.1119 Basic requirements for ballot count.

Ballot count by County Office staff:

(a) Ballots shall be counted within 7 working days after the election.

(b) The counting process shall be in public, and shall be done in the County Office during regular working hours.

§ 2054.1120 Counting ballots and announcing results.

The County Office staff shall:

(a) Announce the beginning of the count, if witnesses are present.

(b) Open the ballot box in the presence of witnesses, if witnesses are present.

(c) Examine the ballots and separate the valid from the invalid ballots. Invalid ballots will not be counted and will be destroyed as specified in § 2054.1124 of this subpart. Examples of invalid ballots are those that contain write-in candidates, more votes than are specified as being appropriate, or no clear vote.

(d) Call out the votes shown on the ballots.

(e) Review the final vote count and determine the candidate(s) elected.

(f) Settle all two-way ties by coin toss, if necessary. Ties involving more than two will be settled by drawing lots.

BEST COPY AVAILABLE

(g) Only those candidates who receive one or more votes can be elected. If less than the necessary number of candidates are elected to fill the vacant positions, special elections will be required for those seats left unfilled.

§§ 2054.1121–2054.1122 [Reserved]

§ 2054.1123 Notifying candidates of election results.

The County Supervisor will promptly notify successful candidates of election results in writing. See FmHA Guide Letter No. 2054–2, "Letter to Elected County Committee Members," (available in any FmHA office).

§ 2054.1124 Safekeeping and disposition of election records.

(a) Ballots for each County Office should be placed in a sealed container.

(b) Ballots should be retained for 60 days after the elections and then destroyed if no complaint or investigation is initiated.

(c) FmHA voter lists, and other election documents such as the nominating petitions, nominee's certification to hold office, etc., should be retained in the County Office files and disposed of after a period of 3 years.

§ 2054.1125 [Reserved]

§ 2054.1126 Appointment.

(a) *Employment conditions.* County committee members both elected and designated are given Federal appointments on an intermittent basis under "Schedule A, § 213.3113(e)(2)" of Civil Service Rules and Regulations. They are not required to take an Office of Personnel Management (OPM) examination and are not selected from OPM registers. They do not acquire competitive status through their appointment, but such service is creditable toward retention and retirement in connection with other Federal employment. Neither retirement nor social security deductions are made from their pay, nor do they earn annual or sick leave. County committee members are not eligible for life insurance or health benefits coverage.

(b) *Processing accessions.* To document selection of county committee members, specific remark codes have been assigned for use in processing the accession action (SF–52, "Request for Personnel Action," and AD–350A, "Change Action Notice,") for members. One of the remark codes listed below must be entered in Blocks 37 and 56, respectively. The National Finance Center (NFC) will supply the descriptive data and complete the remark.

(1) Elected county committee member—remark code 167—remark is—Employee elected as a county committee member.

(2) Designated as a county committee member—remark code 168—remark is—Employee designated as a county committee member.

(3) Designated as an alternate county committee member—remark code 169—remark is—Designated as an alternate county committee member.

(c) *Dual compensation.* A person may be appointed and paid as a county committee member while also holding another Federal appointment on a part-time or intermittent basis, subject to the exclusions found in § 2054.1104(e) of this subpart. In such cases, the member may not receive pay under both appointments for more than 40 hours in any one calendar week.

(1) A full-time Federal employee may be appointed only on a "Without Compensation" (WOC) basis.

(2) A full-time or part-time State government employee (not disqualified under § 2054.1104 of this subpart) may be appointed. If acceptance of the Federal salary would violate a State law, while acceptance of the appointment itself would not be prohibited by the State Constitution or laws, it may be made on a WOC basis.

(3) A retired civilian employee of the Federal Government may be appointed only on a WOC basis.

(4) Dual compensation restrictions do not apply to persons receiving retired pay for enlisted military service, provided they are not receiving other payments from the Federal Government which would constitute a violation of such restrictions.

(5) Dual compensation restrictions apply for persons receiving retired pay for *service as a commissioned officer.* The State Director will make the necessary determinations in such cases in accordance with Federal Personnel Manual (FPM) Chapter 550, Subchapter 8, "Reduction-in-Retired Pay Provision of the Dual Pay Status."

(d) *Appointment procedures.* The following procedures are to be followed:

(1) The County Supervisor will have the prospective county committee members including alternates complete Standard Form (SF) 171, "Personal Qualifications Statement," in an original only, which will be forwarded to the State Director by the County Supervisor with Form FmHA 2054–6, "Mileage Certification for County Committee Members," in an original completed by the County Supervisor. Although veteran's preference does not apply to county committee member appointments, copies of the DD–214 should be obtained from veterans in order to accurately establish Service Computation Dates (SCD) for members.

(2) *Care should be taken that all Federal, territorial, State, county, or local offices held by a nominee for county committee appointment are specified on the SF 171,* in the space showing experience, so that the State Director may determine eligibility under the applicable restrictions.

(3) The State Director will review SF 171 for completeness and conformity with requirements and will process Form AD–350A. The State Director will send a copy of Forms AD–350A, AD–349, "Declaration Sheet," SF–61, "Appointment Affidavits," I–9, "Employment Eligibility Verification," Treasury Form W–4, "Employee's Withholding Exemption Certificate," and State Income Tax Withholding form, where applicable, to the County Supervisor. The copy of Form AD–350A will be retained in the County Office committee file. FmHA Instruction 2045–BB and Appendix 1, "Employee Responsibilities and Conduct," will be sent to the County Supervisor with other forms for distribution to the new committee member.

(4) The County Supervisor will instruct the committee member in completing Forms AD–349, SF–61, I–9, Treasury Form W–4, and State Income Tax Withholding form, when used, and will return these forms to the State Director for review. The date of Appointment Affidavit must be recorded on Form AD–321–3, "Time and Attendance Report," before Form AD–349 is forwarded to the State Director. Failure to enter the date of the Appointment Affidavit on the Time and Attendance Report will delay the committee member's pay. Form AD–349 must be executed in its entirety. The State Director will forward the "Employee Copy" of the SF 50B "Notification of Personnel Action" printout produced by NFC to the County Supervisor for delivery to the county committee member.

(5) The terms of committee members and alternates begin on the effective date of the Schedule A Appointment. Terms of appointments are for three years except in cases where the appointee is completing the unexpired term of a former member.

(6) Elected county committee members will be issued a "Certificate of Election" by the County Supervisor. These certificates can be reordered only the State Offices. When ordering from the warehouse, State Offices should ask for Item No. 410, "Certificate of Election."

(e) County committee members are covered by FmHA Instruction 2045–BB, including Exhibits A and B, "Employee Responsibilities and Conduct."

§ 2054.1127 Compensation.

(a) *Commuting time.* Service performed by regular and alternate county committee members will be computed in units of whole days. Alternate county members who, at the request of County Supervisors, attend county committee meetings for training and/or orientation purposes are entitled to compensation even if all three regular county committee members are present.

(1) *Service time limits.* County committee members are limited to a maximum of 20 days of service in any one calendar month. Avoid short or unnecessary meetings.

(2) *Compensation restrictions.* Payment of salary for county committee services (as distinguished from the allowance "in lieu of travel and subsistence") may be prohibited in some cases as outlined in § 2054.1126(c) (3) and (4).

(b) *Rates of pay and allowance.* For county committee services performed in connection with the FmHA program, members will be paid at the basic daily rate of $30 plus an allowance in lieu of travel and subsistence on a sliding scale based on the distance from the county committee member's residence to the County Office or other place where county committee meetings are normally held, as provided on the following chart:

One-way mileage from residence to meeting place	Salary	Allowance	Total
25 or less	$30	$6	$36
25 to 50	30	9	39
51 and over	30	12	42

(1) The allowance in lieu of travel and subsistence for each county committee member will be established by the State Director at the time of appointment. The rate will be based upon certification from the County Supervisor as to the mileage between the county committee member's residence and the place where the meetings are normally held, by way of the most commonly traveled route. This rate will remain fixed after initially established, unless there is a change in the residence or place where meetings are normally held, so as to place the member in a lower or higher allowance zone. The change in allowance is effective the first of the month which is not less than 30 calendar days after: the change in residence; or the first meeting at the new regular location. Changes in allowance in lieu of travel and subsistence will not be made for attendence to training meetings, appeal hearings, or for occasional county committee meetings not held at the regular location.

(2) County Supervisors will certify on Form 2054–6, for each person appointed. The certification will be submitted to the State Director at the time other documents required by § 2054.1128 of this subpart are submitted.

(3) A revised certification on Form FmHA 2054–6 will be submitted for a county committee member as required. This certification will be submitted as soon as possible after the county committee member's residence has been changed, or after the first county committee meeting at the new location.

(4) If the County Supervisor has positive knowledge of the proper mileage zone, he or she may make the required certification without taking odometer readings. Otherwise, the certification will be based on actual odometer readings.

(5) The odometer readings will be taken to the nearest full mile, with five tenths of a mile counted as the next highest mile. All certification will be prepared in duplicate, with a copy retained in the County Office.

§ 2054.1128 Certification of services.

The County Supervisor will certify biweekly on Form AD–321–3, all services for which county committee members are to be paid. These forms should be completed and submitted promptly to NFC according to the Management of Objectives with Dollars through Employees (MODE) Time and Attendance Report Handbook.

§ 2054.1129 Termination of services.

If a county committee member is terminated prior to the expiration of the appointment, the State Director will process Form AD–350A. The Employee's copy will then be forwarded to the County Supervisor for delivery, using Form FmHA 2054–4, "Separation Notice to County Committee Members," or other suitable letter from the State Director to the committee member. If the form letter is used, no copy is needed.

(a) *Resignation.* The resignation of a county committee member may not be coerced by the County Supervisor or any other person. Members wishing to resign, however, should be urged to do so in writing so that the resignation may be properly documented. Resignations will be sent by the County Supervisor to the State Director, accompanied by a recommendation for replacement, if possible (see § 2054.1102(e) of this subpart).

(b) *Other separations.* (1) The County Supervisor will inform members that they no longer meet eligibility requirements when they enter military service. Elected members will lose eligibility if they no longer maintain their principal farming operation in the county or area they represent. Designated and alternate members will lose their eligibility if they move from the area. In all cases the County Supervisor will so notify the State Director. If a resignation is not promptly submitted, termination of the appointment will be processed by the State Director.

(2) When a committee member accepts public office or engages in political activity in violation of the restrictions outlined in § 2054.1104 of this subpart, it is the State Director's responsibility on receipt of such information to make a full report to the Administrator. The report should be sent to the attention of the Director, Personnel Division. Upon receipt of a decision or guidance from the Administrator, the State Director will handle the case and direct the processing of any necessary personnel action.

(3) The County Supervisor will notify the State Director if a member dies so that the appropriate action may be processed.

(4) If a County Supervisor or other FmHA officials have information concerning the personal conduct of a county committee member which adversely affects FmHA and the USDA, such information should be sent in a confidential letter to the State Director who will forward a report to the Administrator. The report should be sent to the attention of the Director, Personnel Division. Upon receipt of a decision or guidance from the Administrator, the State Director will handle the case and direct the processing of any necessary personnel action.

(5) No member of a county committee shall knowingly make or join in making any certification with respect to a loan to purchase any land in which he or any person related to him within the second degree of consanguinity or affinity has or may acquire any interest or with respect to any applicant related to him within the second degree of consanguinity or affinity. § 2045.1352(f) of FmHA Instruction 2045–BB provides definition of consanguinity or affinity (available in any FmHA office). Should this provision be violated, those FmHA officials having information will take action in accordance with § 2054.1129(b)(4).

(6) Where termination is due to the expiration of appointment, a termination action is not necessary. NFC will automatically drop the county committee member from FmHA rolls. A letter of appreciation will be sent to the county committee member by the State Director.

§§ 2054.1139—2054.1149 [Reserved]

§ 2054.1150 OMB control number.

The collection of information requirements in this regulation have been approved by the Office of Management and assigned an OMB control number 0575-0117.

Date: March 15, 1988.

Vance L. Clark,

Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Organization and Operations of Federal Credit Unions

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final amendment.

SUMMARY: This amendment revises § 701.20 of NCUA's Regulations—Surety Bond and Insurance Coverage for Federal Credit Unions ("FCU's"). It is issued both pursuant to NCUA's regulatory review process and to conform the regulation to the Competitive Equality Banking Act of 1987. Section 701.20 sets forth the requirements for surety bond coverage for losses caused by Federal credit union employees and officials and for general insurance coverage for losses caused by persons outside of the credit union (e.g., losses due to theft, vandalism). This amendment eliminates the requirement of faithful performance coverage for the financial officer of a Federal credit union. It eliminates the requirement that bonding companies be approved by NCUA. It also eliminates reference to certain bond forms which are no longer in use. Finally, it states that any bond form not previously approved by the NCUA Board, or a rider or endorsement which limits the coverage provided by approved bond forms, must receive the written approval of the NCUA Board before being marketed to credit unions.

EFFECTIVE DATE: March 24, 1988.

ADDRESS: National Credit Union Administration, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: Robert Fenner, General Counsel, or Allan Meltzer, Assistant General Counsel, at the above address, or telephone (202) 357-1030.

SUPPLEMENTARY INFORMATION: The surety bond regulation was last revised in 1984. Pursuant to its regulatory review program, the NCUA Board has determined that several changes should be made in § 701.20(c). In addition, the Competitive Equality Banking Act of 1987 deleted from the Federal Credit Union Act the statutory requirement of faithful performance coverage for the financial officer.

On November 12, 1987, the NCUA Board requested comment on a proposal to: (1) Eliminate the regulatory requirement of faithful performance coverage for the financial officer; (2) eliminate the requirement that bonding companies be approved by the NCUA Board; (3) eliminate approval of certain bond forms no longer in use by surety companies. The proposal also would require that all riders and changes to basic bond forms be approved by the NCUA Board prior to their use.

A total of 29 comment letters were received. Twenty two were from federal credit unions, three from state chartered, federally insured credit unions, 1 from a credit union league, two from national credit union trade associations, and one from a surety bond company. Essentially three issues were addressed. They are discussed below.

Faithful Performance

The proposed rule noted that while the Competitive Equality Banking Act of 1987 deleted the statutory requirement that the financial officer be covered for faithful performance, the NCUA Board nevertheless had the authority to require the coverage for the financial officer or any other credit union official or employee.

In fact, for many years Federal credit unions were required to maintain faithful performance coverage on all employees. The Federal Credit Union Act required the coverage for the financial officer and NCUA's rules required it for other employees. In 1984, NCUA amended its rules to eliminate the requirement for employees other than the financial officer. There were a number of reasons for this change. Faithful performance bond coverage had been construed by the courts as covering losses caused by simple negligence, or in other words, losses that involved bad management decisions but no fraud or dishonesty. This resulted in bond coverage that was extremely expensive and that in effect duplicated protections that were already provided by credit union capitol and, in more recent years, share insurance. It also resulted in a considerable amount of litigation over what conduct constituted a lack of faithful performance, increasing expenses for both underwriters and credit unions. It also may have contributed to bond underwriters being unwilling to write credit union coverage, with the result that one company now writes over 95 percent of all credit union fidelity bonds. It was to partially address these conditions that the Board amended the rules to eliminate the requirement for employees other than the financial officer.

The requirement of faithful performance coverage for the financial officer was a statutory requirement, outside of NCUA's regulatory discretion until Congress recently amended the Act. When Congress eliminated the statutory requirement, NCUA responded by proposing to eliminate its regulatory requirement. It was made clear at the time, as it should be now, that fraud and dishonesty coverage continue to be required for all officials and employees, and that individual FCU boards of directors are free to purchase additional coverages, including faithful performance, to the extent they are made available.

This proposal to eliminate the faithful performance requirements drew the most comments. The responses were somewhat mixed. Fifteen commenters favored deleting the requirement of faithful performance coverage. Eight objected to deleting it. One concurred with reservations.

Those commenters who support the proposal did so for two basic reasons. First, they agreed that the decision to maintain faithful performance coverage is one for a credit union's board of directors to make, and second, they expressed hope that deleting the coverage would control bond premium costs. Strong feelings were expressed over the increases in surety bond premiums over the last few years.

Those opposing the proposal believed that it would increase the financial risk to credit unions and the NCUSIF. These commenters apparently believe that the increased risk to the NCUSIF outweighs the anticipated savings in bond premiums. But, as one commenter supporting the change stated, there is no evidence that dropping the requirement of faithful performance coverage would subject the NCUSIF to substantial or

undue risk. In this connection it is noted that basic fraud and dishonesty coverage will cover some losses that may have been filed as faithful performance claims in the past. Also, it is expected that many credit unions will continue to purchase faithful performance as an optional coverage for an additional premium. Those credit unions are encouraged to carefully review the coverage received, as new definitions of "faithful performance" may limit the traditional scope of the coverage.

After careful consideration of the comments, the Board has repealed the regulatory requirement of faithful performance coverage. The Board believes this decision provides a desired degree of management discretion to credit union boards of directors. Also, with this change, credit union bond requirements will now be comparable to those currently being met by other underwriters in the banking and savings and loan industries, thus opening the possibility of additional competition for credit union bond business. While the Board is generally satisfied with the condition of credit union fidelity coverage, this change will help to ensure that pricing and claims payment experience remain fair and competitive.

Company Approval

The proposal also would delete the requirement that companies marketing surety bond policies be approved by the NCUA Board, leaving in place the statutory requirement that the companies hold a certificate of authority from the Secretary of the Treasury.

Three commenters concurred with the proposal, generally feeling that approval by the Secretary of the Treasury was sufficient. One objected to the proposal, arguing that the NCUA is in a better position than the Treasury Department to determine which requirements should be met by an insurance company marketing to credit unions. In light of the clear language employed by the Congress in the Federal Credit Union Act, the final rule remains as proposed, and approval of surety bond companies by the NCUA Board will no longer be required.

Bond Forms

The proposal approved Standard Form No. 23 and Blanket Bond Forms 581 and 582. It was proposed that references to several other obsolete bond forms be deleted. The proposal further provided that all other bond forms and riders be approved in writing by the Board prior to being marketed to credit unions.

Three commenters agreed with the deletion of obsolete bond forms. No commenter objected. However, two commenters suggested that the requirement of prior written approval of riders and forms be modified. They noted that several riders currently being marketed to credit unions provide coverage beyond that required as a minimum. Requiring prior written approval of these riders would unnecessarily delay implementation of new optional coverage. It was therefore suggested that prior written approval be required only of riders that limit required coverage.

The Board agrees that requiring prior written approval of *all* bond forms and riders might unnecessarily complicate the process of issuing optional coverages. Accordingly this final rule only requires that any basic bond forms other than those approved, and all riders and endorsements which limit the coverage provided by approved bond forms, must receive the prior written approval of NCUA. This limitation balances the needs of the NCUA with the benefits to be derived from the ability to market products to the credit union industry in a timely and responsive fashion. The NCUA however will be the final arbiter in determining whether a particular rider requires such approval.

The change made in the final rule is as follows. The third sentence in § 701.20(c) is changed to read—"Any other basic bond forms, and all riders and endorsements which limit coverage provided by approved bond forms, must receive the prior written approval of the NCUA Board."

Federally-Insured State-Chartered Credit Unions

While § 701.20 applies only to Federal credit unions, § 741.1 establishes the requirements of 701.20 as minimum standards for all federally-insured credit unions. Thus, depending on bonding requirements under state law and regulations, this final rule will affect federally-insured state-chartered credit unions in some states.

Regulatory Procedures

Regulatory Flexibility Act

The NCUA Board has determined and certifies that this final rule will not have a significant economic impact on a substantial number of small credit unions. The rule will not impose an additional burden upon credit unions. Accordingly, the Board has determined that a Regulatory Flexibility Analysis is not required.

Paperwork Reduction Act

The revised regulation does not impose any additional paperwork requirements.

List of Subjects in 12 CFR Part 701

Credit unions, Fidelity bond, Insurance coverage, Bond forms.

By the National Credit Union Administration Board on March 16, 1988.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA amends its regulations as follows:

PART 701—[AMENDED]

1. The authority citations for Part 701 continue to read as follows:

Authority: 12 U.S.C. 1755, 1756, 1757, 1759, 1761a, 1761b, 1767, 1782, 1784, 1787, 1789, and 1798.

2. Section 701.20(c) of the NCUA Rules and Regulations is revised to read as follows:

§ 701.20 [Amended]

* * * * *

(c) *Minimum Coverage; Approved Forms.* Every Federal credit union will maintain bond and insurance coverage with a company holding a certificate of authority from the Secretary of the Treasury. Credit Union Blanket Bond Standard Form No. 23 of the Surety Association of America (revised to May, 1950) is considered the minimum coverage required and is approved. Credit Union Blanket Bond Forms 581 and 582 are also approved. Any other basic bond forms, and all riders and endorsements which limit the coverage provided by approved bond forms, must receive the prior written approval of the NCUA Board. Fidelity bonds must provide coverage for the fraud or dishonesty of all employees, directors, officers, and supervisory and credit committee members.

BILLING CODE 7535-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 133

[Amdt. 6]

Display of Office of Management and Budget Control Numbers for Reporting and Recordkeeping Requirements

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Small Business Administration is amending its

regulations to indicate Office of Management and Budget (OMB) approval of new and revised information collection requirements contained in or authorized by the regulations. This action is required by the Paperwork Reduction Act of 1980 (Pub. L. 96–511, 94 Stat. 2812, Chapter 35 of Title 44).

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: William Cline, Chief, Administrative Information Branch, Small Business Administration, 1441 "L" Street NW., Washington, DC 20416. Telephone No. 653–8538.

SUPPLEMENTARY INFORMATION: This amendment is administrative in nature and is intended to comply with the requirements of the Paperwork Reduction Act of 1980 as implemented by 5 CFR Part 1320 that agencies display a current listing of OMB control numbers and expiration dates. Where the information collection requirement exists as a document separate from the regulations, the Small Business Administration will also display the current OMB number on the document.

Because this is a nonsubstantive amendment dealing with procedural matters, it is not subject to the provisions of the Administrative Procedure Act (5 U.S.C. et seq.) requiring advance notice and comment.

List of Subjects in 13 CFR Part 133

OMB control numbers assigned, Reporting and recordkeeping requirements.

Therefore, 13 CFR Part 133 is amended as follows:

PART 133—[AMENDED]

1. The authority for Part 133 continues to read as follows:

Authority: 44 U.S.C. 3512.

2. The table in paragraph (c) of § 133.1 is revised to read as follows:

§ 133.1 Control numbers assigned by OMB under the Paperwork Reduction Act.

BILLING CODE 8025-01-M

ARMS CONTROL AND DISARMAMENT AGENCY

22 CFR Part 601

Statement of Organization

AGENCY: United States Arms Control and Disarmament Agency.

ACTION: Final rule.

SUMMARY: The agency is amending the description of its organization and functions to reflect the establishment an Office of Inspector General at the Agency by section 6(a) of the Arms Control and Disarmament Amendments Act of 1987 (Pub. L. 100-213).

EFFECTIVE DATE: December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Walter L. Baumann, Assistant General Counsel, Washington, DC 20451, telephone 202-647-3530.

SUPPLEMENTARY INFORMATION: This information is published in compliance with section 552(a)(1) of Title 5, United States Code, and 1 CFR 305.76-2.

List of Subjects in 22 CFR Part 601

Organization and functions (government agencies), Arms control.

Accordingly, 22 CFR Part 601, is amended to read as follows:

PART 601—[AMENDED]

1. The authority citation for Part 601 continues to read as follows:

Authority: Sec. 1, Pub. L. 90-23, 81 Stat. 54 (5 U.S.C. 552(a)(1)); Title II, Pub. L. 87-297, 75 Stat. 632, as amended (22 U.S.C. 2561 et seq.); and sec. 41(h), Pub. L. 87-297, 75 Stat. 636, as amended (22 U.S.C. 2581(i)).

2. In § 601.6 the last sentence of paragraph (d) is revised to read as follows:

§ 601.6 Structure.

* * * * *

(d) * * * Other organizational units with staff responsibilities are the Office of the General Counsel, the Office of Congressional Affairs, the Office of Public Affairs, the Office of Administration, and the Office of the Inspector General.

3. Section 601.19 is added to read as follows:

§ 601.19 Office of the Inspector General (OIG).

This Office is headed by the Inspector General of the Agency who has the duties, responsibilities, and authorities specified in the Inspector General Act of 1978. The Inspector General of the Agency utilizes personnel of the Office of the Inspector General of the Department of State in performing the duties of Inspector General of the Agency.

Dated: March 15, 1988.

William J. Montgomery,

Administrative Director.

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 9

[Order No. 1262-88]

Technical Amendment of Regulations Governing the Remission or Mitigation of Civil and Criminal Forfeitures

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This order revises 28 CFR 9.3(a) by adding a procedural requirement that a copy of a petition for remission or mitigation of a judicial forfeiture be submitted to the agency which seized the property for forfeiture. The addition is intended to expedite the processing of petition reports by the seizing agencies and to conform 28 CFR Part 9 to the forfeiture notice procedures used by the seizing agencies for potential petitioners.

EFFECTIVE DATE: March 14, 1988.

FOR FURTHER INFORMATION CONTACT: Brad Cates, Director, Asset Forfeiture Office, Criminal Division, Department of Justice, Washington, DC 20530. Telephone: (202) 786-4950.

SUPPLEMENTARY INFORMATION: This order is not a rule within the meaning of either Executive Order 12291, section 1(a), or the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

List of Subjects in 28 CFR Part 9

Seizures and forfeitures.

By virtue of the authority vested in me as Attorney General by 5 U.S.C. 301 and 28 U.S.C. 509, 510, and 524, Title 28 of the Code of Federal Regulations is hereby amended as follows:

PART 9—[AMENDED]

1. The authority citation for Part 9 continues to read as follows:

Authority: 28 U.S.C. 509, 510, and 524; 5 U.S.C. 301; Reorganization Plan No. 1 of 1968.

2. Section 9.3(a) is amended by adding the following sentence to the end to read as follows:

§ 9.3 Procedure relating to petitions is judicial forfeitures.

(a) * * * A copy of the petition shall be submitted also to the local or regional office of the seizing agency that covers the judicial district in which the seizure occurred, except in DEA cases where the petition shall be submitted to DEA headquarters, Office of Chief Counsel.

* * * * *

Date: March 14, 1988.

Edwin Meese III,

Attorney General.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 57

Safety Standards for Methane in Metal and Nonmetal Mines

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Final rule and continuation of stay.

SUMMARY: MSHA is issuing as a final rule amendments to the Safety Standards for Methane in Metal and Nonmetal Mines which were published as an interim final rule on October 27, 1987 (52 FR 41394). MSHA is also continuing until further notice the stay of the standard that requires blasting from the surface in Subcategory I-A mines to permit the completion of research currently underway.

EFFECTIVE DATE: March 24, 1988; § 57.22601 is stayed until further notice.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey; Director, Office of Standards, Regulations and Variances, MSHA; (703) 235-1910.

SUPPLEMENTARY INFORMATION: On October 27, 1987, MSHA published interim amendments to two sections of the Safety Standards for Methane in Metal and Nonmetal Mines: § 57.22228, addressing pre-shift examinations in Subcategory I-A, I-C, II-A, Category III and Subcategory V-A mines; and § 57.22234, addressing actions at 1.0 percent methane in Subcategory I-A, I-B, V-A, V-B and Category III mines. The Agency solicited public comment on these amendments. No comments were received.

The Agency also published additional explanation clarifying the intent of standards which were not amended. Among the standards clarified were §§ 57.22218 and 57.22221 concerning seals and stoppings and overcast and undercast construction. One commenter urged MSHA to be cautious in allowing polyurethane foam as sealants or coatings under these standards because of the risk of ignition and the release of toxic gases. MSHA acknowledges these concerns and will carefully monitor any possible use of these materials in mines.
